Agricultural Statistics of India

VOLUME II—INDIAN STATES

Introductory Note

This volume deals with statistics for Indian States as far as reported. ^{General} As in the previous issues, summary tables have been inserted to show the total figures relating to area, the classification of area, and the area under crops for each State or group of States, and the totals for all the reporting States. The total number of cattle as far as reported in each of the years 1906-07 to 1919-20 has also been included in the general summary table (No. 1). These statistics are defective for comparative purposes, as additions have been made in the number of reporting States from time to time. The States of Hyderabad, Benares, Bhavnagar, Dharampur, and Bagli have for the first time furnished figures for 1919-20. Explanatory notes have been inserted at the foot of the tables. In the present issue the former Table II (classification of area) has been split up into two separate tables, viz., Table II—Classification of Area, and Table III—Area under Irrigation; while Table VI—Transfers of Property in land—has been abolished. Details for ten years have been added in each table for groups of States. Two charts and an index for easy reference have been added to the volume.

It should be noted that, for the reasons explained below, the agricultural statistics of Indian States are incomplete and are of far less accuracy than those of British Provinces published in Volume I. The question of the improvement of the statistics of Indian States has been taken up by the Government of India, and it is expected that more complete and accurate statistics for them will be available in the near future. As these States comprise one-third of the total area of India, the importance of their statistics in the all-India returns can scarcely be over-estimated.

The total area of Indian States is approximately 496,000,000 acres (775,000 square miles), with a population of 70½ millions according to the census of 1921. These are divided for the purposes of agricultural statistics into two main classes, namely, (1) States within the jurisdiction of Local Governments and Administrations, and (2) States having direct political relations with the Government of India.

(1) *States within the jurisdiction of Local Governments and Administrations.*—The total area of these States is 181,064,000 acres, with a population of about 30 millions. They are divided into the following main groups:—

	Area Thousand acres	Population Thousands
Bombay and Sind States	40,878	7,412
Madras States	6,803	5,460
Punjab States	24,511	4,415
Bihar and Orissa States	18,335	3,965
Central Provinces States	19,980	2,064
North-West Frontier Province States (including Tribal areas)	16,330	2,585
Burma States (including Shan States)	38,402	1,524
United Provinces States	4,348	1,185
Bengal States	3,477	896
Assam States	7,970	384
Total	181,064	20,844

The total area of all these States (with the exception of the greater part of the South Shan States and Karenne in Burma and the Tribal areas in the

North-West Frontier Province) is included in the areas of the respective British Provinces stated in column 2 of table I. of Volume I (British India), but is shown separately in column 3 of that table in order to arrive at the net area of British territory (in column 5) dealt with in that volume. Of these States, agricultural statistics are at present available only for the following thirty-six States in the Madras and the Bombay Presidencies, the Punjab, and the United Provinces, and are dealt with in this volume:—

No agricultural statistics are at present available for Baluchistan (Native), and Sikkim. Of the remainder, returns are received from the following twenty-two States:—

The total area of all the fifty-eight reporting States * named above amounts to 251,181,000 acres, with a population of about 47 millions. These States, therefore, represent 51 per cent of the total area, and 67 per cent of the total population, of all the Indian States.

The earliest years from which the statements of agricultural statistics have been received from these fifty-eight reporting States are noted below:—

Mysore	1886-87

Gwalior	1896-97
Bikaner, Marwar, Tonk	1898-99

Baroda, Bundi, Phaltan, Aundh, Sachin, Jath	1918-19
Hyderabad, Benares, Bhavnagar, Dharampur, Bagli	1919-20

The returns for the different States relate to the years ending on the dates stated below, so far as information is now available:—

From the total area of all the fifty-eight reporting States (251,181,000 acres), deduction must be made of 121,249,000 acres for which statistics are

(a) Relates to Census of 1911.

not available. These comprise chiefly unsurveyed areas and lands held on jagir, muafi, and other privileged tenures. The net area actually covered by these statistics is, therefore, only 129,932,000 acres by professional survey,* or 128,923,000 acres according to village papers.*

uses other than agriculture, amounts to 22,462,000 acres or 17.4 per cent. The balance, 90,756,000 acres or 70.2 per cent, represents the area available for cultivation. Of this, 16,867,000 acres, or 13 per cent of the total area, represent culturable waste, i.e., land available for cultivation but not taken up, and 14,133,000 acres, or 11.1 per cent, were kept fallow in the year under report. The net area actually sown in the year was thus 59,756,000 acres (46.1 per cent of the total area). This net area sown, however, excludes areas sown more than once in the year. If areas sown more than once (as noted below) are taken as separate area for each crop, the gross area sown in the year of report amounts to 64,223,000 acres.

Table III,
Area under irrigation

The total area irrigated in the reporting States during 1919-20 was 8,309,000 acres, as against 6,200,000 acres in the preceding year. Of this, 2,358,000 acres were irrigated from Government canals, 797,000 acres from private canals, 1,467,000 acres from tanks, 1,927,000 acres from wells, and the remaining 1,760,000 acres from other sources of irrigation. These figures, however, do not take into account areas sown more than once during the year with the help of irrigation, but indicate the extent of land actually irrigated. If areas sown more than once are counted as separate area for each crop, the gross area of irrigated crops amounts to 10,186,000 acres. Of this area, 9,131,000 acres were under food crops.

Of the total area sown, food crops occupied about 94,658,000 acres or 78.3 per cent and non-food crops about 13,770,000 acres or 21.7 per cent. Of the food-crops, food grains (cereals and pulses) occupied as much as 47,253,000 acres, or 74.5 per cent of the total area sown, and other food crops (condiments and spices, sugar, fruits and vegetables, and miscellaneous food crops together) covered some 2,405,000 acres, or only 3.8 per cent of the total. food crops, oilseeds occupied 3,814,000 acres or 6 per cent of the total area sown, fibres such as cotton, hemp, etc., 6,204,000 acres or 9.8 per cent, and fodder crops 1,890,000 acres or 3 per cent. The other non-food crops, namely, dyes and tanning materials, drugs and narcotics (tobacco, tea, coffee, opium, etc.), and miscellaneous non-food crops together, covered some 1,862,000 acres or 2.9 per cent of the total. Statistics for the premier State of Hyderabad have been received for the first time and are included in the present issue. No comparison has therefore been made with previous year's figures, as the inclusion of Hyderabad has nearly doubled the figures.

* For explanation of the terms "professional survey" and "village papers," see footnotes to Table I (page 6) of this Volume and the Note prefixed to Volume I
† See footnote (c) on page 23 of the Tables

The total extent of land on which more than one crop was raised during the year was 4,467,000 acres.

Table V is prepared by forty-five States, namely, Hyderabad Mysore, Baroda, Pudukkottai, Banganapalle, Sandur, Cochin, Gwalior, Indore, Bhopal, Rajgarh, Narsingarh, Barwani, Nagod, Bagli, Bikaner, Marwar, Jaipur, Kishangarh, Alwar, Bharatpur, Jhalawar, Tonk, Kotah, Bundi, Jath, Phaltan, Aundh, Sachin, Bhavnagar, Dharampur, Benares, Jhabua, Jobat, Sailana, Ali-Rajpur, Piploda, Dewas (junior) Maihar, Chhatarpur, Dhar, Rutlam, Panna, Travancore, and Karpurthala. According to the latest statistics, the total number of live-stock of the bovine class (bulls, bullocks, cows, buffaloes, and young stock, *i.e.*, calves and buffalo calves) is 31,384,000, that of the ovine class (sheep and goats) 19,384,000, and that of horses and ponies, mules, donkeys, and camels 921,000. The numbers of ploughs and carts are 3,987,000 and 1,201,000, respectively.

Table V,

Table VI (Land Revenue) is prepared by twenty-seven States, namely, Hyderabad, Mysore, Pudukkottai, Banganapalle, Sandur, Cochin, Gwalior, Indore, Bhopal, Rajgarh, Narsingarh, Barwani, Nagod, Bikaner, Marwar, Jaipur, Alwar, Bharatpur, Jhalawar, Tonk, Kotah, Bundi, Jath, Phaltan, Aundh, Sachin, and Benares.

The Appendix explains the vernacular terms used in this volume, and the charts illustrate (1) the classification of the total area showing the proportion of cultivated and uncultivated lands, and (2) the total area sown in 1919-20 with shares of food and non-food crops.

Column 2.—The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in Southern India. In States where there has been no professional survey, the figures are based on the best available information.

Column 3.—In this column is deducted the entire area for which the statistics required for Tables II and IV are not forthcoming in whole or in part. This area comprises chiefly estates held on privileged tenures, which have not yet been surveyed and which possess at present no agency for the annual collection of agricultural statistics. As surveys extend and the organisation of village statistical establishments develops, the area in this column is reduced, and that entered in the next columns (4 and 5) and dealt with in Tables II and IV is correspondingly increased.

Columns 4 and 5.—Column 4 is a check on the accuracy of column 5. In the latter, "village papers" mean "the papers prepared by the village accountants." In States where no village papers exist, or where the source of information is the same for both the survey and the village papers, the figures in column 4 are necessarily repeated in column 5. The area in village papers may differ somewhat from that given by the Survey Department, (a) because, while the survey area is calculated in block, the area by village papers represents the added total of field and village areas, and (b) because the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railways is not always uniform in the two sets of returns.

(a) See footnote (b) on page 13

(b) Previous year's figure repeated [vide footnote (a) on page 16]

(c) Column 3 states the area of unsurveyed forests.

Column 2.—The definition of the term "forests" is as follows:—"Any land classed or administered as forest under any legal enactment dealing with forests." Any cultivated areas existing within such forests may be excluded and entered in column 6 (net area sown), an explanation being given in a note.

Column 3 includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to uses other than agriculture.

Column 4 includes groves not classed in the area sown. Areas under bamboos and thatching grass, when not forming parts of forest areas, are included in this column.

(a) The statistics collected in 1908-09 have been repeated up to 1912-13, as fresh information could not be collected owing to pressure of work connected with the revenue settlement of the State.

(b) Column 2 states the area of reserved forests within surveyed villages.

(c) Includes 8,215 acres in coffee estates.

(d) See footnote (c) on page 23.

Column 2 states the areas of state and district forests and of plantations.

Column 3 includes not only lands absolutely unfit for cultivation, but also lands reserved for pasture, and plantations intended for public use and therefore left unassessed. A large portion of the pasture lands is fit for cultivation, and is given out for cultivation from time to time under special orders, such lands when given out for cultivation being transferred from column 3 to 5 or 6 as the case may be.

Column 4 states unoccupied assessed waste.

Column 5.—There is no system of fallows, that is, lands are not systematically left uncultivated for the purpose of giving them rest. Individuals occupy large areas and pay full assessment thereon, leaving portions uncultivated, generally for the use of their cattle. For purposes of account the difference between the areas of the lands occupied by individuals and of those actually cultivated by them is taken as fallow. The lands occupied and assessed are sometimes unfit for cultivation, having been taken up on a full assessment merely for use as pasture, but the exact area of all such lands cannot be ascertained, although it cannot be large.

Columns 8 to 19 state the gross area of irrigated crops, areas sown more than once being counted as separate areas for each crop. This accounts for the excess in some cases of the total area of crops irrigated (column 19) over the total area irrigated (column 7)

(a) Included in column 16

(b) Incomplete

(c) Includes 120,384 acres for which details are not available

Note—In this table are entered the areas actually sown, whether the crop comes to maturity or not, except in cases when fields, owing to the failure of the first sowings, have been devoted to other crops: in such cases the area first sown is omitted. In cases where two or more crops are grown together, an estimate is made of the area covered by each, and the areas so estimated are separately returned. The estimate is made by the village accountant, or is subsequently determined on formulae prescribed by higher authorities.

Entry 2 (a)—Areas held revenue-free or at privileged rates should be deducted, but the deduction need not be made where such areas are in any case less than an entire village, and where there is any difficulty in estimating the corresponding deduction to be made in the population of short crops, or for other special reasons

Entry 3.—This column should be sub-divided into (a) total fully assessed area for which returns are available, and (b) area cultivated out of the area given in head (a). The latter head should be equal to the former after deducting current fallows and fully assessed waste.

* These are *khas* or state lands only. The whole area of the State according to the census of 1911 is stated in Table I—No. 5
 ** *Alwar*.—The classes of tenure are zamindari and village communities, the former comprising *samin-dari-bil-i-mal* and the latter *pattidari*
 and *khajiyachara*. Item 1 states the area by village papers (column 5 of Table I). Item 2 (a) shows areas covered with forests (column 2 of Table
 II) which are wholly revenue-free
 † *Jhalawar*.—The whole area stated in this table is classed as "Khatodari" and "Wotendar" equivalent to "rai-yat-wari" and "zamin-dari"
 respectively. Item 1 excludes entire villages held by jagirdars and *udaldars*

Entry 4.—Where land revenue includes the zamindar's share, the net demand should be entered, and the table should state the payments due by the zamindars to Government, not those by the raiyats to the zamindars. The actual realisable demand on account of the year should be entered, after excluding arrears for past years. This column should include all the heads classed as "Land Revenue" in the Civil Accounts.

Entry 5.—The population in entry 3 is that of the last general census.

† Entry 7.—As in entry 6, but only ordinary land revenue on fully assessed areas is to be entered.

† Narsingarh.—Item 1 states the net area by revenue survey as shown in column 4 of Table I. Item 2 (a) includes forest areas (column 2 of Table II) and unculturable (column 3 of Table II) and culturable land not possessed by any cultivator. Item 2 (b) states the area of minor muafis. Item 3 (b) includes fallow lands left uncultivated for three years or less as full cultivation rate is assessed on them.
