TABLE II.
VARIATION IN POPULATION SINCE 1872.

NOTE.—The population given in this table for the years 1891, 1881 and 1872 has been adjusted to represent the population of the area of each District and Native State as it stood on March 1st, 1901. Where the actual population transferred could be ascertained, the necessary alterations were effected on that basis. In other cases the population of the area transferred has been calculated from the density of the district the area of which has been changed.

2. The new district of Lárkhána was created in August 1901 by transferring certain talukas from the Shikárpur and Karáchi Districts. As the change took place after the date of the Census the new district has not been shown in the body of the table. The population of the three districts of Karáchi, Lárkhána and Shikárpur as they now stand is—

			Persons.	Males.	Females.
Karáchi	446,513	248,816	197,697
Lárkhána...	656,033	354,103	301,930

TABLE X.

LANGUAGE.

PART II.—BY LINGUISTIC FAMILIES.

NOTE.—Of the figures shown in column 9 in the form of a fraction, the numerator is the reference number of the District or State where the language was returned, and the denominator shows the number of persons speaking the language. The scheme followed is that drawn up by Dr. Grierson, I. C. S., in his Index of Languages.

TABLE XVI—(OPTIONAL).

**CASTE, TRIBE AND RACE BY TRADITIONAL AND
ACTUAL OCCUPATION.**

Bombay Presidency.

NOTE.—The districts or areas from which the castes shown in this table were selected are shown in the last column of the table. Thus, Váni (Gujarát) represents Vánis selected from the Gujarát Districts. Again, in the case of the Bhátias (Sind), 100,000 Bhátias were selected from the Sind returns, after abstraction. In cases where 100,000 entries were not available from the area for which statistics were required, actuals were taken and raised to 100,000 basis. Sub-castes, however, are invariably shown by actual numbers selected. Brahmans have been taken from the representative areas of the Presidency; thus Gujarát representing Audich and Nágár, the Deccan representing Deshasth, the Karnátak representing Shenvi and Sáraswat, and Sind representing Pokarna and Sarsudh. The figure 100,000 for all Brahmans is the total of all these sub-castes, reduced to a basis 100,000.
