## APPENDIX.

---

NOTE.—By way of contrast to the results of the present CENSUS, there are here appended the statistical returns from the NORTHERN and SOUTHERN Divisions for the year 1846. There is also recorded an enumeration of the KAIRA DISTRICT made in 1855, and one of KHANDESH, by Colonel Sykes, in 1827.

J. L.

TERRITORIAL DEPARTMENT—REVENUE.

To

H. E. GOLDSMID, Esq.,

Officiating Secretary to Government, Bombay.

SIR,—I have the honour, with reference to the Government letter No. 2040, of 22nd June 1844, and subsequent instructions relating thereto, to submit the Census Returns for the Northern Division, exhibiting the enumeration of the population and other details, as the same were ascertained to have stood on the 1st January last.

2. The statements now submitted are abstracts of similar documents received from the Collectors of the several zillahs, and the letters which accompanied them, as per margin, now likewise enclosed, contain the observations made by those officers. In these communications the information afforded as regards the preparation of the returns by their subordinates, whether for the most part in conformity with the instructions, and to what extent to be relied upon for accuracy, is however but very limited, and no comments on the results which the returns exhibit are offered.

Ahmedabad, No. 207 of 30th June.	
Broach, No. 42 of 10th Feb.	
Surat, No. 54 of 12th Feb.	
Tanna, No. 103 of 12th Feb.	
Khandesh, No. 134 of 31st January.	
Colaba, No. 10 of 17th Jan.	

The Kaira statements would seem to have been received merely under a blank cover.

3. A defect in the statements for the Ahmedabad Zillah in the omission of the town of Bhownuggur, in consequence of no returns having been furnished by the Thakor, is not noticed in the Collector's letter. The returns of the Mewassees, Bhuts, &c., of Parantej are stated also by that officer to have been filled up by the estimate, owing to those wild and uncivilized classes having "refused to admit of any scrutiny, or even to give an account themselves of the number of their inmates." And he further observes—"the people generally have taken considerable alarm at the measure, and are supposed to have given a short account for fear of some poll-tax being imposed"—nor could the assurances I gave them that no such thing was in contemplation entirely allay their fears; and finally expresses a doubt of the practicability of getting anything like correct returns as long as there is no obligation on the people to answer the enquiries made, or be responsible for the correctness of the statements put forth.

4. For the city of Surat and its suburb of Reindier the returns are also incomplete. The reason assigned for this is not satisfactory, but the defect is now incapable of remedy.

5. In preparing the general abstract the number of castes shown in the several zillahs were found to be as per margin. Those common to all the returns have therefore been selected, and remainder combined under the heading of sundry miscellaneous distinctions. A want of uniformity is also apparent in the number in which the number of villages in the statements of emigration and immigration is entered, the aggregate for the zillah being given in some instances, instead of the number only in which such changes had taken place. Explanation has been called for, but some interval will probably elapse ere it can be received. The disagreement in the number of "emigrations" to other collectorates and of "immigrations" from other collectorates, seems likewise to indicate some incorrectness in the manner in which this portion of the returns has been prepared. It is possible, however, that the surplus emigration may have been to collectorates of the Southern Division, for which there is no separate column in the statement.

Ahmedabad .....	70
Kaira .....	52
Broach .....	69
Surat .....	66
Tanna .....	51
Khandesh .....	36
Colaba .....	12

6. Having noticed the above imperfections, I proceed to offer a few comments on the conclusions to be deduced from the results exhibited in these returns, and for this purpose a separate statement is appended showing—

1. The population per square mile.
2. Percentage of births to the population.
3. The same of deaths.
4. Proportion of births to deaths.
5. Proportion of males to females.
6. Number of individuals to each house.
7. Proportion of the revenue or public burdens per head.

7. With respect to the first heading, viz., the population per square mile, it is necessary to explain that the area of the several zillahs has been calculated from very imperfect data, partly from rough estimates by the Collectors, and partly from measurements on a map upon too small a scale to admit of any nicety in the delineation of the boundaries. The density of the population will be observed to vary from about 57 to the square mile in Khandesh to 257 in Kaira. For the whole division the density of 155 is about that of France.

8. The percentage of births to the population varies from 2.587 in Khandesh to 5.136 in Broach, the average for the whole division being 3.487. The high rate in Broach would seem to indicate some mistake in the returns for that zillah. The percentage for England for the 3 years from July 1838 to 1841, according to the best authority I have the means of consulting, was 3.175 per cent.

9. The percentage of deaths varies from 1.615 in Khandesh to 4.081 in Broach, the average for the division being 2.408. Here also the results of Broach would seem to call in question the accuracy of the returns. The percentage for England for the period above specified was 2.214 per cent.

10. The proportion of the above percentages to each other is shown in columns 9 to 11, the highest being 190 to 100 deaths in Ahmedabad, and the lowest 125 in Broach, the average for the division being 149, or stated in other terms births one to about  $28\frac{3}{4}$ , and deaths one to  $41\frac{1}{2}$  of the population. In England, for the ten years from 1821 to 1831, the proportion was births one to  $34\frac{1}{2}$ , deaths one to  $58\frac{1}{2}$ .

11. The proportion of males to females is shown in column 12, varying from 125 in Ahmedabad to 108 in Surat and Colaba, the average for the division being 114 in favour of the males, which is on the inverse ratio to the results of the census of Great Britain for 1841. The males being to the females as 9.074642—9.581339. How far the difference of proportion is real, or occasioned by an unwillingness on the part of the natives to make known the true number of their females, is a point to be determined by future enquiries.

12. The number of individuals to each house varies from 2.780 in Ahmedabad to 4.693 in Tanna, the average for the division being 4.006. On this head it may be observed that, except in the largest towns, upper-storeyed houses are very rare: the habits of the natives disposing them rather to build small habitations for each family. The number in Great Britain in 1841 was about 5.4 to each inhabited house.

13. The taxation or revenue for realization varied from Rs. 2.55 in Ahmedabad to Rs. 7.55 in Broach, the average for the division being Rs. 3.93 per head. For Great Britain and Ireland, collectively, according to the value of money on the continent, the amount per head was estimated in 1823 at £2-0-0, or about Rs. 20; for France at £1-4-0, or Rs. 12; for Russia, in Europe, at £0-9-9, or Rs. 4-14-0.

14. The migrations for the whole division, taking the mean of emigrations and immigrations, bear a percentage of 0.11 to the population, and show a proportion of one in 900 to the stationary inhabitants. The emigrations to and immigrations from places beyond the division exhibit a percentage on the population of 0.53 and 0.51, respectively. The details of these migrations I am disposed, however, to consider as the least accurate portion of the Census Returns.

15. It is hardly, perhaps, to be expected in a measure of this novelty, in the shape in which it has now been undertaken, that great accuracy in the execution will be attained on the first attempt. If a near approximation have been accomplished, the experiment may be considered to have been not unattended with success, and such I am willing to believe to be the case. As the district and village establishments afford, however, an effective agency for such enquiries, there is no doubt that all requisite accuracy may be arrived at, as they and the superintending stipendiary establishments become more familiar with the duty, and acquire a proficiency in conducting it with greater system and regularity, and considerable improvement would, I am satisfied, be effected on a second trial.

16. In para. 13 of the Government letter No. 2040 above quoted, a yearly census would seem to be in contemplation. If this intention be adhered to, it will be necessary that a periodical supply of lithographed forms be provided; but as the investigation is attended with considerable labour, and occasions to a certain extent a species of excitement and apprehension in many parts of the country, it is, I think, deserving of consideration, whether it would not be sufficient if a census were undertaken at longer intervals of five or ten years—the latter being the period in operation in Great Britain.

I have, &c.,

(Signed) D. A. BLANE

Poona, 17th August 1846.

TERRITORIAL DEPARTMENT—REVENUE

To

D. A. BLANE, Esq.,

Revenue Commissioner, Northern Division.

SIR,—I have been directed by the Right Honourable the Governor in Council to transmit to you copies of general Statistical Tables for the whole Presidency (exclusive of the Island of Bombay and the several military cantonments), compiled, so far as the imperfect nature of many of these documents will admit, from the returns submitted with your letter No. 1448, of the 17th August 1846, as well as of those received from the Revenue Commissioner of the Southern Division.

2. His Lordship in Council considers that the present division of the districts, under the Revenue Commissioners is not convenient for the consolidation of information on statistical subjects, and he conceives that the more natural divisions for such purpose are—

1.	The Province of Guzerat	Collectorate	...	Surat, Broach, Kaira, Ahmedabad.
2.	"	Deckun	"	...
3.	"	Khandesh	"	...
4.	"	Konkan	"	...
5.	"	Carnatic and Southern Maratha Country	...	Belgaum, Dharwar.

3. Table I gives an abstract of the whole population. It exhibits a total of 7,633,333 souls, which His Lordship in Council believes is much larger than any estimate hitherto made which can claim any approach to correctness.

4. The first point which cannot fail to attract notice in examining the returns is the disproportion of females to males. The general proportion is 111 males to 100 females, which His Lordship in Council observes in the Census of Great Britain in 1841 the proportion is 94.72 males to 100 females. This disproportion exists throughout. It is highest in Ahmedabad (125 males to 100 females), and lowest in Sholapore and Dharwar (106 males to 100 females). It exists in the statements of births and deaths, as well as in the census, the general proportion in these being about the same or 110 males to 100 females. This must be considered a curious fact in the statistics of this side of India, and as it is the same in all districts, and among all castes, it is impossible to attribute this result to any error in the returns.

5. Several causes may, in the opinion of His Lordship in Council, be assigned for this result, such as the known disinclination which natives of India have to communicate information respecting their females, which may induce them to omit many in the returns; the great excess of the age of the male over that of the female on most native marriages (*vide* Sadler on Population, Vol. 2, Book IV., Chap. III.) and possibly the practice of female infanticide which may be carried out to a greater extent than has been hitherto imagined. It is only recently that the existence of this horrible practice has been discovered in the Ahmedabad Zillah, and it is curious that it is in that zillah that the proportion of females is lowest.

6. Colonel Sykes, in his Statistical Report on the Poona Collectorate of the 1st October 1827 notices a similar disproportion, asserting, however, that the same exists in England, where he states, according to the Census of 1811, that the males exceeded the females by nearly 7 per cent. But such, His Lordship in Council observes, is certainly not the result of the British Census of 1841, which gives the numbers as follows:—

	Males	Females.
England and Wales .....	7,775,224	8,136,533
Scotland .....	1,241,862	1,378,322
Islands .....	57,556	66,434
	<hr/>	<hr/>
	9,074,642	9,581,339
Army.....	18,684	969
	<hr/>	<hr/>
	9,262,126	9,582,308

Excess of females above males 320,182, or above 3 per cent.

7. In the preparation of these returns both Mr. Townsend and yourself have distinguished the castes or religions as follows:—

Hindoos.	Shrawacks or Jains.
Low Castes.	Parsees.
Mussuhmans.	Christians.

The Southern Division has "Jews" and the Northern Miscellaneous "explained as comprising Jews and Seedees." Why these two are blended together is not apparent. "Jews" should have a separate column; "Seedees," being usually Mussulmans, should have been included under that head. In all future returns the following right distinctive classes should be adopted:—

I.—Hindoos.	V.—Mussulmans.
II.—Wild Tribes.	VI.—Parsees.
III.—Low Castes.	VII.—Jews.
IV.—Shrawacks or Jains.	VIII.—Christians.

Under the head of "Hindoos" your division has (15) distinctions, with one column for castes not enumerated. The Southern Division has twenty-two (22) distinctions, with a similar column. In this column in your division about one-fourth of the whole of the Hindoos is included. In the Southern about one-seventh. This is not sufficiently in detail, and His Lordship in Council thinks every caste, which in the aggregate of either division exceeds 10,000 souls, should be separately entered.

9. His Lordship in Council would retain the following classifications, and to these might be added others after you have, in communication with the Commissioner of the Southern Division, determined what alterations will be required on this principle above stated:—

Bramins.  
 Shenwees or Senoys.  
 Purbhoos or Purvoes.  
 Wanees or Banians.  
 Sonars or Goldsmiths.  
 Lohars or Blacksmiths.  
 Kansars or Braziers.  
 Tambuts or Coppersmiths.  
 Sootars or Carpenters.  
 Koombhars or Potters.  
 Shimpees or Tailors.  
 Nahavees or Barbers.  
 Pureets or Washermen.  
 Kolees or Fishermen.  
 Telees or Oilmen.  
 Bhoees or Hamauls.  
 Dhungurs or Graziers.  
 Koonbees or Cultivators.  
 Goornos.  
 Rajpoots.  
 Jungum Lingayats.

10. Under the head of "Low Castes," the returns of your division have only three columns—Mhars, Chambars, and sundry minor distinctions, the last bearing a proportion of 23 per cent. to the total "Low Castes." The Southern Division has six columns—Ramoosees, Beels, Chambar, Mhar, Mang, and other castes, the last having a proportion of 6 per cent. to the total.

11. His Lordship in Council considers it a great object to ascertain the different classes of the population, with reference to their habits and occupation. With this view, all classes who are considered turbulent and predatory should be distinctly shown, such as the Kolees and Bheels of Goozerat and the Konkan, the Bheels of Khandesh, the Ramoosees and Mangs of the Deekun. Many of these tribes come under the description of "Low Castes," but some may be, strictly speaking, Hindoos. His Lordship in Council thinks it would be better to confine the "Low Castes" to the Mhars, Chambars, and those whose touch would be pollution to a Hindoo, and to place the Kolees, Bheels, Ramoosees, &c., under a separate head of "Wild Tribes," since it is of importance to know what proportions these classes bear to the whole of the population.

12. His Lordship in Council would therefore next to Hindoos enter "Wild Tribes," as Kolees (these must not be confounded with the fishermen of the coast), Bheels, Ramoosees, &c., and "Low Castes," as Mhars, Chambars, &c.

13. His Lordship in Council has not the means at his disposal of ascertaining with any accuracy what are the results as to increase and decrease in the population of a comparison of this with former censuses, unfortunately the results have not on former occasions been published.

14. There is, however, a record of the census of the province of Khandesh taken by Colonel Sykes in 1826, which gives a result very different from that now exhibited.

		Males.		Females.		Total
1826	.....	200,597	.....	170,807	.....	371,404
1846	.....	358,476	.....	327,143	.....	685,619
Excess in 1846	.....	157,879	.....	156,336	.....	314,215

This would show that the population of Khandesh had increased 84 per cent. in 20 years.

15. A census of Dharwar in 1841-42 afford the following comparative results:—

	Males.	Females.	Total.
1841-42 .....	310,060	289,167	599,227
1845-46 .....	334,315	312,881	647,196
	24,255	23,714	47,969

or an increase of 8 per cent. in 4 years.

16. A census of Rutnagherry in 1841-42 gives—

	Males.	Females.	Children	Total.
1841-42 ...	176,912	171,277	181,331	529,520
1846 .....				625,782
				96,262

or an increase of 18 per cent. in 4 years.

17. These results are not, in the opinion of His Lordship in Council, much to be depended on, but they serve at least to show that the population throughout this Presidency is on the increase, and this result is most apparent in the Province of Khandesh, on which it was most to be expected.

Ahmedabad ...	612,844	
Kaira ...	559,698	
Surat City ...	106,117	
" Districts ...	336,934	443,051
Broach ...	258,192	1,873,785
Poona ...	604,954	
Ahmednuggur ...	929,809	
Nassick ...	290,383	1,220,192
Sholapore ...	610,418	2,435,564
Khandesh ...		634,416
Tanna ...	764,320	
Rutnagherry ...	621,280	1,385,600
Belgaum ...	917,079	
Dharwar ...	592,069	1,509,148
Grand Total...	7,838,513	

18. The Sudr Adalat, in the accompaniment to its Annual Criminal Report for 1845, gave the total population of this Presidency as stated in the margin at 7,838,513 larger than that of the present census 7,638,383. But the former is obviously wrong, as there can be no doubt that the two districts of Ahmednuggur and Belgaum are much overrated. The Sudr, moreover, gives no account of the source whence this estimate has been taken.

19. His Lordship in Council deems it desirable that the present census should, notwithstanding its imperfections, be published. Before this can be done, it is necessary that you should furnish the following particulars from each district:—

1st.—A brief account of the exact tract over which the census extended, whether all Inam as well as Government villages, have been included in the returns of your division, &c., &c.

2nd.—Separate returns of the larger towns containing 10,000 and more inhabitants in classes as follows:—

Class I. above 200,000
" II. from 100,000 to 200,000
" III. from 50,000 to 100,000
" IV. from 25,000 to 50,000
" V. from 20,000 to 25,000
" VI. from 15,000 to 20,000
" VII. from 10,000 to 15,000

20. Table II. gives the births and deaths with certain deductions from the results. This exhibits disproportions between males and females somewhat similar to those which are found in the census itself. The return from Belgaum is wanting. That from Dharwar is the only one which shows the deaths exceeding the births, and that in the large proportion of 152.3 to 100. The accuracy of this may be much doubted, especially as there is no reason to believe that the Dharwar districts are more unhealthy than other parts of this Presidency, and, as shown in para. 15, it is evident that the population is on the increase.

21. Table III. of Immigration and Emigration shows—

Column I.—The fluctuation within the talooks of each collectorate.

Column II.—The fluctuations between the different collectorates.

Column III.—The fluctuations between British and foreign territories.

22. The first and second columns of the table do not affect the general result of our Population Returns, the fluctuations being confined within our boundaries, but the third shows whether the stream of emigration flows to or from British territory. On the whole, the result is so far unsatisfactory that where 2½ persons have come into British territory, 4 have gone out. The result is particularly seen in the Deckun Collectorate, wherein, while 6,206 have entered our district, 21,288 have left them. A result which ought not to have been anticipated considering the benefits recently conferred on the mass of the population by our Revenue Surveys and the unsettled state of the whole of the Nizam's dominions.

23. The Table IV. is a return of houses, cattle, &c. In this has been entered the proportion of houses to the population, showing, as the general result, an average of 4390 individuals to each house. Your account for the smallness of this average by the tendency of the people to separate their families into small houses, seeing, however, the numbers that usually congregate at the smallest native huts, and the crowds that fill larger dwellings, His Lordship in Council would have expected a much larger proportion.

24. The other columns of this table furnish much interesting information which is peculiarly valuable as, affording the means of comparison with similar returns of other periods. If correctly prepared, these tables will hereafter afford ample means of judging of the general advance of the country in agricultural prosperity. The results are in some instances unexpected. For instance, it has usually been supposed that no district possessed so many bhandharas and pats as Khandesh, whereas it is found that in these particulars it is surpassed by all the Deckun collectorates and by Rutnagherry.

25. His Lordship in Council thinks it would be advisable in all future returns to add a column, showing in miles the extent of made roads passable by wheel carriages to be found in each district.

26. In the returns from your division, the proportion of inhabitants to the square mile is given, and the average taxation per head. Both these points are very desirable of ascertainment, but His Lordship in Council fears his information on the data necessary for this purpose is so imperfect that he cannot as yet hope to arrive at an approximation to the truth, until it has been determined with some accuracy what is the area of the tract over which the returns extend, and the items of taxation which ought to be brought into such a calculation, any estimate that may be framed will be likely only to mislead. Copy of a circular issued this day to the several Collectors respecting the first of these two points is annexed for your information.

27. You have not, I have been directed to observe, informed Government what item of taxation you have included in your estimate of the proportion of taxation to the population, whether that taxation alone, which flows into the Government treasury, is entered, or whether all other items are included, such as contribution to village officers, and charges, &c., whether customs and excise duties are included, and if so, how that portion falling on our population is separated from that which may fall on the population of States beyond our frontier. These points should all be ascertained and fixed before any trustworthy calculation can be attempted.

28. Government, you are aware, determined on the 18th December 1846 that the census should not be annual. You propose that it be after intervals of 5 or 10 years. His Lordship in Council is of opinion that the next census should be taken on the 1st January 1850, which gives a period of 4 years from that now under review, and after that it may be repeated at intervals of (5) five years. It might have been better perhaps, in the first instance, to familiarize the people to these proceedings by annual enquiries, especially as an impression seems to have arisen in part of Gujerat that their object is to increase taxation. The fallacy of this would soon be apparent under an annual census, and when the ignorant classes of the population found, after a few years experience, that no measures to increase taxation were based on them they would the sooner cease to oppose the acquisition of correct information.

29. In matters of this kind, much depends on the superintending agency, such as that of the Collectors and Mamlutdars. One man will succeed in inspiring the people with confidence and induce them to impart every item of information required of them with readiness and alacrity, another will fail in all his efforts, and, unless the business be entered upon with zeal and carried through with judgment and discretion, it will be long before any returns that can really be relied on are obtained.

30. In conclusion, I have been directed to state that the period intervening between the present time and that at which it will be necessary to strike off the forms at the press should be employed by you, in concert with the Revenue Commissioner of the Southern Division, in communicating with the Collector on points connected with these returns, so as to secure their being prepared on uniform principles in all collectorates, and to ensure the work on the 1st January 1850 being in all respects and in all parts of the country complete.

31. The Right Honourable the Governor in Council is, I am directed to observe, taking steps to procure from all military cantonments within the Presidency, returns similar to those which will be required from the Collectors, in order that they may be embodied in the general statement.

I have, &c.,

(Signed) W. COURTNEY,  
Acting Secretary to Government.

Bombay Castle, 25th July 1848.

No. 2321 of 1849.

TERRITORIAL DEPARTMENT—REVENUE.

To

H. E. GOLDSMID, Esq.,

Secretary to Government, Bombay.

SIR,—With reference to the 34th paragraph of Mr. Acting Secretary Courtney's letter, No. 4318, of 25th July 1848, and the Revenue Commissioner, S. D.'s communication addressed to Government, relative to the forms of Statistical Returns, which we have framed in conjunction, and which Mr. Townsend undertook to forward after our separation, I do myself the honour to solicit the instructions of the Right Honourable the Governor in Council as to the adoption or otherwise, of the modifications proposed in Statements A and D, to enable me to prepare the necessary Marathee and Gujarathee translations of the forms, for the purpose of being lithographed and furnished to the several Collectors of this division.

2. I beg the favour also, at the same time, that you will have the goodness to obtain the sanction of His Lordship in Council to directions being issued to the Superintendent of the Government Printing Press to my being supplied, at his early convenience, with forms specified in the accompanying memorandum.

I have, &c.,

(Signed) A. N. SHAW,

Revenue Commissioner, N. D.

Revenue Commissioner's Camp, Tanna Districts, }  
Oorun, 16th November 1849. }

(Transfer from the Revenue to the General Department.)

TERRITORIAL DEPARTMENT—REVENUE

To  
**R. K. PRINGLE, ESQUIRE,**  
 Chief Secretary to Government.

Sir,—I have the honour, in reply to your letter No. 4185, of 18th instant, received yesterday, to submit the accompanying Statistical Returns A, C, and D, drawn up from those received in Marathee, from the Collectorates of this Division, on the dates noted in the margin.

From Ratnagherry on 20th February last.	
" Ahmednuggur... 23rd March	"
" Poona ..... 5th May	"
" Sholapore ..... 29th "	"
" Belgaum ..... 25th July	"
" Dharwar ..... 23rd August	"

2. The delay in their submission, for which I beg to apologize to His Honour in Council, was occasioned partially by the length of time occupied in testing the contents of the several columns, and by a heavy press of business in this office.

3. Certain discrepancies having been detected in the Return B of "Deaths and Births" received from the Ahmednuggur Collectorate, I referred to the Collector for explanation on the 25th ultimo, but have as yet received no reply. I shall call that officer's attention to the reference, and immediately, on having the discrepancies reconciled, shall also forward the General Return B for this division.

(Vide subsequent letter No. 152, of 22nd January 1847.)

4. With reference to the instructions conveyed in your letter No. 4184, of 18th instant, to the address of the Acting Revenue Commissioner, Northern, copy of which has been furnished for guidance in this division, relative to the intermission in the preparation of the General Enumeration Returns, &c., till further orders, I shall lose no time in intimating the same to the several Collectors of this division, and in requesting their particular attention to the punctual transmission of them on the date that may be eventually determined by Government.

<i>Marathee.</i>	
Poona.....	10,752
Ahmednuggur .....	19,864
Sholapore .....	9,624
Ratnagherry.....	11,904
Revenue Commissioner.....	8
	52,152
<i>Canarese.</i>	
Belgaum .....	13,952
Dharwar .....	12,304
Revenue Commissioner.....	8
	26,264
Total...	78,416

5. Adverting to paragraph 3 of your letter under acknowledgment, relative to the excess of the expense of lithographing the Statistical Forms for the Zillahs in the division, above that incurred for the Northern Division; I regret that I am unable to account for it. The list of Forms required for this Department and the Collector's, transmitted with my predecessor's letter No. 17, of 7th January 1845, and approved of in the Government reply No. 737, of 14th February following, gave the total number of impressions, both Marathee and Canarese, at 78,416.

The calculation on which the number of each Form for each collectorate was regulated will appear from the six statements appended, which were furnished to the Collectors as explanatory of the mode in which their distribution was considered to be most correct and desirable. Possibly, a comparison of these papers with the calculation assumed by the Northern Division (which I have no means of ascertaining), or a reference to the Superintendent, Government Printing Press, may show His Honour in Council the cause of the difference of expense adverted to.

I have the honour to be,  
 Sir,  
 Your most obedient Servant,  
**E. H. TOWNSEND,**  
 Revenue Commissioner, Northern Division.

*Sholapore District, Revenue Commissioner's  
 Camp, Dauljee, 24th December 1846.*

LIST OF LITHOGRAPHED FORMS FOR THE POONA COLLECTORATE, SHOWING ALSO THE CALCULATION ON WHICH THE NUMBER OF EACH HAS BEEN REGULATED.

POONA.

Of Form No. 1, 2,500 copies ...	}	Assuming the number of villages to be 1,250, 2 Forms are allowed for each, one to be kept by the Kulkurnee, and one to be furnished to the District Hereditary Officer the next in the series.
		The number of Turfs has been calculated at 45. For each of these 2 are allowed, and 60 added for the larger Turfs requiring extra sheets. The same Form is also applicable to the Mahalkurree's, Mamlutdar's and Zillah Returns. One copy is to be kept in the office where it is compiled, and the other to be furnished to the next grade in the series. The numbers required are accordingly estimated as follows:—
Do. No. 2, 188 do. ...	}	Turfs, as above stated ... 150
		Mahalkurrees, at 10 ... 20
		Mamlutdars, at 8 ... 16
		Zillah ... 2
		188
Do. No. 3, 2,500 do. ...		The same as Form No. 1.
Do. No. 4, 188 do. ...		Do. No. 2.
Do. No. 5, 2,500 do. ...		Do. No. 1.
Do. No. 6, 150 do. ...	}	Two Forms for each of the 45 Turfs, with 60 extra sheets for the larger Turfs.
Do. No. 7, 20 do. ...		Do. for the 10 Mahalkurrees.
Do. No. 8, 16 do. ...		Do. for the 8 Mamlutdars.
Do. No. 9, 2 do. ...		For the Zillah.
Do. No. 10, 2,688 do. ...		The same as Nos. 1 and 2, to both of which it is applicable.
<u>Total...10,752</u> Forms.		

AHMEDNUGGUR.

Of Form No. 1, 4,700 copies ...	}	Assuming the number of villages to be 2,350, 2 Forms are allowed for each, one to be kept by the Kulkurnee, and one to be furnished to the District Hereditary Officer the next in the series.
		The number of Turfs has been calculated at 62. For each of these 2 are allowed, and 90 added for the larger Turfs requiring extra sheets. The same Form is also applicable to the Mahalkurree's, Mamlutdar's and Zillah Returns. One copy is to be kept in the office where it is compiled, and the other to be furnished to the next grade in the series. The numbers required are accordingly estimated as follows:—
Do. No. 2, 266 do. ...	}	Turfs, as above stated ... 214
		Mahalkurrees, at 10 ... 20
		Mamlutdars, at 15 ... 30
		Zillah ... 2
		266
Do. No. 3, 4,700 do. ...		The same as Form No. 1.
Do. No. 4, 266 do. ...		Do. No. 2.
Do. No. 5, 4,700 do. ...		Do. No. 1.
Do. No. 6, 214 do. ...	}	Two Forms for each of the 62 Turfs, with 90 extra sheets for the larger Turfs.
Do. No. 7, 20 do. ...		Do. for the 10 Mahalkurrees.
Do. No. 8, 30 do. ...		Do. for the 15 Mamlutdars.
Do. No. 9, 2 do. ...		Do. for the Zillah.
Do. No. 10, 4,966 do. ...		The same as Nos. 1 and 2, to both of which it is applicable.
<u>Total...19,864</u> Forms.		

SHOLAPORE.

Of Form No. 1, 2,200 copies ... { Assuming the number of villages to be 1,100, 2 Forms are allowed to each, one to be kept by the Kulkurnee, and one to be furnished to the District Hereditary Officer the next in the series.

Do. No. 2, 206 do. ... { The number of Turfs has been calculated at 51. For each of these 2 are allowed, and 70 added for the larger Turfs requiring extra sheets. The same Form is also applicable to the Mahalkurree's, Mamlutdar's and Zillah Returns. One copy is to be kept in the office where it is compiled, and the other to be furnished to the next grade in the series. The numbers required are accordingly estimated as follows :—

Turfs, as above stated	...	...	...	172
Mahalkurrees, at 7	...	...	...	14
Mamlutdars, at 9	...	...	...	18
Zillah	...	...	...	2
				206

Do. No. 3, 2,200 do. ... The same as Form No. 1.  
 Do. No. 4, 206 do. ... Do. No. 2.  
 Do. No. 5, 2,200 do. ... Do. No. 1.  
 Do. No. 6, 172 do. ... { Two Forms for each of the 51 Turfs, with 70 extra sheets for the larger Turfs.  
 Do. No. 7, 14 do. ... Do. for the 7 Mahalkurrees.  
 Do. No. 8, 18 do. ... Do. for the 9 Mamlutdars.  
 Do. No. 9, 2 do. ... For the Zillah.  
 Do. No. 10, 2,406 do. ... The same as Nos. 1 and 2, to both of which it is applicable

Total...9,624 Forms.

RUTNAGHERRY.

Of Form No. 1, 2,800 copies... { Assuming the number of villages to be 1,400, 2 Forms are allowed for each, one to be kept by the Kulkurnee, and one to be furnished to the District Hereditary Officer the next in the series.

Do. No. 2, 176 do. ... { The number of Turfs has been calculated at 40. For each of these 2 are allowed, and 64 added for the larger Turfs requiring extra sheets. The same Form is also applicable to the Mahalkurree's, Mamlutdar's, and Zillah Returns. One copy is to be kept in the office where it is compiled, and the other to be furnished to the next grade in the series. The numbers required are accordingly estimated as follows :—

Turfs, as above stated	...	...	...	144
Mahalkurrees, at 10	...	...	...	20
Mamlutdars, at 5	...	...	...	10
Zillah...	...	...	...	2
				176

Do. No. 3, 2,800 do. ... The same as Form No. 1.  
 Do. No. 4, 176 do. ... Do. No. 2.  
 Do. No. 5, 2,800 do. ... Do. No. 1.  
 Do. No. 6, 144 do. ... { Two Forms for each of the 40 Turfs, with 64 extra sheets for the larger Turfs.  
 Do. No. 7, 20 do. ... Do. for the 10 Mahalkurrees.  
 Do. No. 8, 10 do. ... Do. for the 5 Mamlutdars.  
 Do. No. 9, 2 do. ... For the Zillah.  
 Do. No. 10, 2,976 do. ... Thesame as Nos. 1 and 2, to both of which it is applicable.

Total...11,904 Forms.

**BELGAUM.**

Of Form No. 1, 3,240 copies ...	} Assuming the number of villages to be 1,620, 2 Forms are allowed for each, one to be kept by the Kulkurnee, and one to be furnished to the District Hereditary Officer the next in the series.										
	} The number of Turfs has been calculated at 67. For each of these 2 are allowed, and 72 added for the larger Turfs requiring extra sheets. The same Form is also applicable to the Mahalkurree's, Mamlutdar's, and Zillah Returns. One copy is to be kept in the office where it is compiled, and the other to be furnished to the next grade in the series. The numbers required are accordingly estimated as follows:										
Do. TERRITORIAL DEPARTMENT—REVENUE.

To

R. K. PRINGLE, Esq.,  
Chief Secretary to Government, Bombay.

SIR,

With reference to paragraph 3 of my letter No. 2530, dated the 24th ultimo, I do myself the honour to submit the General Return B of "Births and Deaths" in this division, as therein promised.

I have the honour to be,

Sir,

Your most obedient Servant,

(Signed) E. H. TOWNSEND,  
Revenue Commissioner, S.D.

Dharwar District, Revenue Commissioner's Camp,

TERRITORIAL DEPARTMENT—REVENUE.

To

E. H. TOWNSEND, Esq.,  
Revenue Commissioner, Southern Division.

SIR,—I have been directed by the Right Honourable the Governor in Council to transmit to you copies of General Statistical Tables for the whole Presidency (exclusive of the Island of Bombay and the several Military Cantonments) compiled, so far as the imperfect nature of many of these documents will admit, from the returns submitted with your letter No. 2530, of the 24th December 1846, as well as of those received from the Northern Division.

2. It might, His Lordship in Council observes, have been expected that in submitting such returns for the first time the Revenue Commissioners would have favoured Government with some valuable observations on the subject of them—on the difficulty or facility experienced in procuring them—the exact tracts over which the returns extended, &c., with comments on the results as shown in the various statements. The Revenue Commissioner of the Northern Division has in some degree answered the expectation of Government, so far as the imperfect data before him admitted, but your letter accompanying these returns is singularly barren and uninformative.

3. The Right Honourable the Governor in Council regrets to be obliged to notice the faulty and imperfect manner in which many of your returns have been furnished. Those of the population alone are complete throughout, being made up to the 1st of January 1846, with the exception of Dharwar, the returns of which district are made up to the 1st May.

4. The Returns of Births and Deaths and of Emigration and Immigration for Belgaum are wholly wanting. Those for Dharwar comprise a period of 16 months from 1st January 1845 to the 30th April 1846.

5. The Returns of houses, cattle, &c., for Belgaum are wholly wanting. Those of Dharwar are made up to the 30th April 1846 instead of on the 1st January.

6. The alteration of date in respect to Dharwar was admitted by Government as a matter of necessity, in consequence of the delay in sending down the Canarese Forms, but no reason, I have been directed to observe, has been assigned why the Collector of Belgaum, who must have been in a similar difficulty from the want of the Forms, did not prepare his returns in the same manner as the Collector of Dharwar has done. It is much to be regretted that you did not take steps to prevent the total failure in sending in some of the returns which prevents the preparation of complete tables for the whole Presidency.

7. His Lordship in Council considers that the present division of the districts under the Revenue Commissioners is not convenient for the consolidation of information on statistical subjects, and, he conceives, that the more natural divisions for this purpose are :—

I.	The Province of Goozerath	Collectorates ...	Surat, Broach, Kaira, Ahmedabad.
II.	"	Deckun " ...	Poona, Ahmednuggur, Sholapore.
III.	"	Khandesh " ...	Khandesh.
IV.	"	Konkan " ...	Tanna, Colaba, Rutnagherry.
V.	"	Carnatic or Southern Maratha Country Collectorates...	Belgaum, Dharwar,

8. Table I. gives an abstract of the whole population. It exhibits a total of 7,638,383 souls which His Lordship in Council believes is much larger than any estimate hitherto made, which can claim any approach to correctness.

9. The first point which cannot fail to attract notice in examining the returns is the disproportion of females to males. The general proportion is 111 males to 100 females, while His Lordship in Council observes, in the census of Great Britain in 1841, the proportion is 94.72 males to 100 females. This disproportion exists throughout. It is highest in Ahmedabad (125 males to 100 females) and lowest in Sholapore and Dharwar (106 males to 100 females). It exists in the statements of Births and Deaths as well as in the Census. The general proportion in these being above the same, or 110 males to 100 females. This must be considered a curious fact in the statistics of this side of India, and as it is the same in all districts and among all castes it is impossible to attribute this result to any error in the returns.

10. Several causes may, in the opinion of His Lordship in Council, be assigned for this result, such as the known disinclination which natives of India have to communicate information respecting their females, which may induce them to omit many in the returns the great excess of the age of the male over that of the female in most native marriages (*viz* Sadler on Population, Vol. 2, Book IV., Chapter III.), and possibly the practice of female infanticide which may be carried out to a great extent than has been hitherto imagined. It is only recently that the existence of this horrible practice has been discovered in the Ahmedabad Zillah, and it is curious that it is in that Zilla that the proportion of females is lowest.

11. Colonel Sykes, in his Statistical Report on the Poona Collectorate of the 1st October 1827, notices a similar disproportion, asserting, however, that the same exists in England, where, he states, according to the Census of 1811, that the males exceeded the females by nearly 7 per cent. But such, His Lordship in Council observes, is certainly not the result of the British Census of 1841, which gives the numbers as follows:—

	Males.	Females.
England and Wales .....	7,775,224	8,136,583
Scotland .....	1,241,862	1,378,322
Islands .....	57,556	66,494
	<hr/>	<hr/>
	9,074,642	9,581,399
Army, &c.....	187,484	969
	<hr/>	<hr/>
	9,262,126	9,582,368

Excess of females above males 320,182, or above 3 per cent.

12. In the preparation of these returns both Revenue Commissioners have distinguished the castes or religions as follows:—

Hindoos.	Shrawucks or Jains.
Low Castes.	Parsees.
Mussulmans.	Christians.

The Southern Division has "Jews" and the Northern "Miscellaneous" explained as comprising "Jews" and Seedees"; why these two are blended together is not apparent "Jews" should have a separate column, "Seedees" being usually Mussulmans should have been included under that head. In all future returns the following eight distinctive classes should be adopted:—

I.—Hindoos.	V.—Mussulmans.
II.—Wild Tribes.	VI.—Parsees.
III.—Low Castes.	VII.—Jews.
IV.—Shrawucks or Jains.	VIII.—Christians.

13. Under the head of "Hindoos" the Northern Division has (15) fifteen distinctions with one column for castes not enumerated. The Southern Division has twenty-two (22) distinctions with a similar column. In this column in the Northern Division about one-fourth of the whole of the Hindoos is included. In the Southern about one-seventh. This is not sufficiently in detail, and His Lordship in Council thinks every caste, which in the aggregate of either division exceeds 10,000 souls, should be separately entered.

14. His Lordship in Council would retain the following classifications, and to these might be added others after both Commissioners shall have determined what additions will be required on the principle above stated:—

Brahmins.
Shenvees or Senoys.
Prubhoos or Purvoes.
Wanees or Banians.
Sonars or Goldsmiths.
Lohars or Blacksmiths.
Kansars or Braziers.
Tambuts or Coppersmiths.
Sootars or Carpenters.
Koombars or Potters.
Shimpees or Tailors.
Nahavees or Barbers.
Pureets or Washermen.
Kolees or Fishermen.
Teelees or Oilmen.
Bhoees or Hamals.
Dhangurs or Graziers.
Koonbees or Cultivators.
Goorws.
Rajpoots.
Jungum Lingayuts.

15. Under the head of "Low Castes" the Northern Division has only three columns, Mbars, Chambars and sundry minor distinctions, the last bearing a proportion of 23 per cent. to the total "Low Castes." The Southern Division has six columns, Ramoosee, Bheel, Chambar, Mhar, Mang, and other castes, the last having a proportion of 6 per cent. to the total.

16. His Lordship in Council considers it a great object to ascertain the different classes of the population with reference to their habits and occupation. With this view all classes who are considered turbulent and predatory should be distinctly shown, such as the Kolees and Bheels of Goozerath and the Konkan, the Bheels of Khandesh, the Ramoosees and Mangs of the Deckun. Many of these tribes come under the description of "Low Castes," but some may be, strictly speaking, Hindoos. His Lordship in Council thinks it would be better to confine the "Low Castes" to the Mbars, Chambars; and those whose touch would be pollution to a Hindoo, and to place the Kolees, Bheels, Ramoosees, &c., under a separate head of "Wild Tribes" since it is of importance to know what proportions these classes bear to the whole of the population.

17. His Lordship in Council would, therefore, next to Hindoos, enter "Wild Tribes" as Kolees (these must not be confounded with the fishermen of the coast), Bheels, Ramoosees, &c., and "Low Castes" as Mbars, Chambars, &c.

18. His Lordship in Council has not the means at his disposal of ascertaining with any accuracy what are the results as to the increase or decrease of the population, of a comparison of this with former censuses. Unfortunately the results have not on former occasions been published.

19. There is, however, a record of the census of the Province of Khandesh taken by Colonel Sykes in 1826 which gives a result very different from that now exhibited:—

	Males.	Females.	Total.
1826 .....	200,597 .....	170,807 .....	371,404
1846 .....	358,476 .....	327,143 .....	685,619
Excess in 1846 .....	157,879 .....	156,336 .....	314,215

This would show that the population of Khandesh had increased 84 per cent. in 20 years.

20. A census of Dharwar in 1841-42 affords the following comparative results:—

	Males.	Females.	Total.
1841-42 .....	310,060 .....	289,167 .....	599,227
1845-46 .....	334,315 .....	312,881 .....	647,196
	24,255 .....	23,714 .....	47,969

or an increase of 8 per cent. in 4 years.

21. A census of Rutnagherry in 1841-42 gives—

	Males.	Females.	Children.	Total.
1841-42.....	176,912 .....	171,277 .....	181,331 .....	529,520
1846 .....	.....	.....	.....	6,25,782
				96,262

or an increase of 18 per cent. in 4 four years.

22. These results are not, in the opinion of His Lordship in Council, much to be depended on, but they serve at least to show that the population throughout this Presidency is on the increase, and this result is more apparent in the province of Khandesh, in which it was most to be expected.

Grand Total.....	7,838,513		

23. The Sudr Adawlut in the accompaniments to its Annual Criminal Report for 1845 gave the total population of this Presidency, as stated in the margin, at 7,838,513, larger than that of the present census 7,638,383. But the former is obviously wrong, as there can be no doubt that the two districts of Ahmednuggur and Belgaum are much overrated. The Sudr, moreover, gives no account of the source whence this estimate has been taken.

24. His Lordship in Council deems it desirable that the present census should, notwithstanding its imperfections, be published. Before this can be done it is necessary that you should furnish the following particulars relative to each district:—

1st.—A brief account of the exact tract over which the census extended, whether all Inam as well as Government villages have been included, &c., &c.

2nd.—Separate returns of the larger towns containing 10,000 and more inhabitants in classes as follows:—

Class I.	above 200,000
II.	from 100,000 to 2,00,000.
III.	from 50,000 to 1,00,000.
IV.	from 25,000 to 50,000.
V.	from 20,000 to 25,000.
VI.	from 15,000 to 20,000.
VII.	from 10,000 to 15,000.

25. Table II. gives the births and deaths with certain deductions from the results. This exhibits disproportions between males and females somewhat similar to those which are found in the census itself. The return from Belgaum is wanting. That from Dharwar is the only one which shows the deaths exceeding the births, and that in the larger proportion of 152.3 to 100. The accuracy of this may be much doubted, especially as there is no reason to believe that the Dharwar districts are more unhealthy than other parts of the Presidency, and, as shown in para. 20, it is evident that the population is on the increase.

26. Table III. of Immigration and Emigration shows—

Column I.—The fluctuation within the talooks of each collectorate.

Column II.—The fluctuation between the different collectorates.

Column III.—The fluctuation between British and foreign territories.

27. The first and second columns of the table do not affect the general result of our population returns, the fluctuation being confined within our boundaries, but the third shows whether the stream of emigration flows to or from British territory. On the whole the result is so far unsatisfactory, that when 2½ persons have come into British territory, 4 have gone out. The result is particularly seen in the Deckun Collectorate, wherein, while 6,206 have entered our districts, 21,288 have left them, a result which ought not to have been anticipated, considering the benefits recently conferred on the mass of the population by our revenue surveys and the unsettled state of the whole of the Nizam's dominions.

28. The Table IV. is a return of houses, cattle, &c. In this has been entered the proportion of houses to the population, showing, as the general result, an average of 4.390 individuals to each house. The Revenue Commissioner of the Northern Division accounts for the smallness of this average by the tendency of the people to separate their families into small houses, seeing, however, the numbers that usually congregate in the smallest native huts, and the crowds that fill larger dwellings, His Lordship in Council would have expected a much larger proportion.

29. The other columns of this table furnish much interesting information which is peculiarly valuable as affording the means of comparison with similar returns of other periods. If correctly prepared, these tables will hereafter afford ample means of judging of the general advance of the country in agricultural prosperity. The results are in some instances unexpected. For instance, it has usually been supposed that no district possessed so many Bundharas and Pats as Khandesh, whereas it is found that in these particulars it is surpassed by all the Deckun Collectorates and by Rutnagherry.

30. His Lordship in Council thinks it would be advisable in all future returns to add a column showing, in miles, the extent of made roads passable by wheel carriages to be found in each district.

31. In the returns of the Northern Division the proportion of inhabitants to the square mile is given, and the average taxation per head. Both these points are very desirable of ascertainment, but His Lordship in Council fears the information on the data necessary for this purpose is so imperfect that he cannot as yet hope to arrive at an approximation to the truth, and he has desired me to state that until it has been determined with some accuracy what is the area of the tract over which the returns extend and the items of taxation which ought to be brought into such a calculation, any estimate that may be framed will be likely only to mislead. Copy of a circular issued this day to the several Collectors respecting the first of these two points is annexed for your information.

32. Government, you are aware, determined, on the 18th December 1846, that the census should not be annual. His Lordship in Council is of opinion that the next census should be taken on the 1st January 1850, which gives a period of 4 years from that now under review, and after that it may be repeated at intervals of 5 years. It might have been better perhaps in the first instance to familiarize the people to these proceedings by annual enquiries, especially as an impression seems to have arisen in parts of Goozerat that their object is to increase taxation. The fallacy of this would soon be apparent under an annual census, and when the ignorant classes of the population found, after a few years' experience, that no measures to increase taxation were based on them, they would the sooner cease to oppose the acquisition of correct information.

33. In matters of this kind much depends on the superintending agency, such as that of the Collector and Mamlutdars. One man will succeed in inspiring the people with confidence and induce them to impart every item of information required of them with readiness and alacrity, another will fail in all his efforts, and unless the business be entered upon with zeal and carried through with judgment and discretion, it will be long before any returns that can really be relied on are obtained.

34. In conclusion, I have been directed to state that the period intervening between the present time and that at which it will be necessary to strike off the Forms at the Press, should be employed by the Commissioners in communicating with the Collectors on points connected with these returns, so as to secure their being prepared on uniform principles in all collectorates, and to ensure the work on the 1st January 1850, being in all respects and in all parts of the country complete.

35. The Right Honourable the Governor in Council is, I am directed to observe, taking steps to procure from all military cantonments within the Presidency, returns similar to those which will be required from the Collectors, in order that they may be embodied in the general statements.

I have, &c.,

(Signed) W. COURTNEY,  
Acting Secretary to Government.

*Bombay Castle, 25th July 1848.*

---

Resolution, 17th November 1849.

Ordered that copies of the documents noted in the margin on the subject of the prepara-

tion of General Statistical Tables for this Presidency be transferred to the General Department, so that the requisite preliminaries for the Census of 1st January next may be there arranged, and in order that all correspondence regarding the Census Returns of future years may be considered and disposed of in that department.

Letter from the Revenue Commissioner, S.D., No. 2530, dated 24th December 1846, with accompaniments.  
Letter from the Revenue Commissioner, S.D., No. 152, dated 22nd January 1847, with enclosure.  
Letter from the Revenue Commissioner, N.D., No. 1448, dated 17th August 1846, with accompaniments.  
Four Abstracts of Statistical Returns made on 1st January 1846, framed by the Honourable Mr. Reid.  
Government letters to the Revenue Commissioners, N. & S. Divisions, dated 25th July 1848, Nos. 4317 and 4318.

(Signed) H. E. GOLDSMID,  
Secretary to Government.

I.

CIRCULAR.

No. 4223 OF 1849.

To

THE COLLECTOR OF

SIR,—Adverting to my Circular Memorandum No. 3524, dated the 27th October 1848, I

- A. Return of Population.
- B. do. of Births and Deaths.
- C. do. of Houses, Cattle, &c.
- D. do. of Immigration and Emigration.

have the honour to append a copy of a letter which I have this day addressed to Government, proposing, with reference to the suggestions and instructions contained in their letter No. 4318, of 25th July 1848, the addition of certain columns to some of the forms of Statistical Returns specified in the margin, and to request your particular attention

to the alterations therein indicated, as pending receipt of the lithographed blank statements, which Government have been requested to supply to you direct; they will help to prepare you for the immediate use of the new returns when received.

2. You will have observed, from the 12th paragraph of the Government letter forwarded with my memorandum above quoted, that instead of the former divisions of population in Statement A., the following classification of inhabitants is prescribed for the future:—

- |       |                        |
|-------|------------------------|
| Class | I.—Hindoos,            |
| ”     | II.—Wild Tribes,       |
| ”     | III.—Low Castes,       |
| ”     | IV.—Shrawuks or Jains, |
| ”     | V.—Parsees,            |
| ”     | VI.—Moosulmans,        |
| ”     | VII.—Jews, and         |
| ”     | VIII.—Christians.      |

3. In the amended form of Population Return (A), which I have submitted for the approval of Government, the whole of the castes formerly ranked under the head “Hindoos” have been retained in Class I., with the following *additional* castes:—

- |             |                             |
|-------------|-----------------------------|
| Gowlees     | (Milkmen),                  |
| Gowndees    | (Bricklayers),              |
| Bhundarees  | (Toddy-drawers),            |
| Koshtees or | } (Weavers and Spinners),   |
| Salees or   |                             |
| Joolaees    |                             |
| Rungaree    | (Dyers),                    |
| Booroods    | (Basket-makers),            |
| Putwegars   | (Fringe and Tassel makers), |

the column of “other castes” being also retained at the end of these. In taking the census of the several villages and talookas of your collectorate for 1st January 1850, therefore, I request that you will direct the above castes to be *likewise* reckoned in case their inclusion in the General Return to be furnished by you to this department should be approved by Government. The former column of “Kolees and Bhoees” you will have observed, from the 14th paragraph of the Government letter of 25th July 1848, has been sub-divided into “Kooloes” (fishermen) and “Bhoees” (hamals). Under Class II. of “Wild Tribes” are entered “Kooloes,” “Bhoes,” “Katodees,” and “Ramooses;” and under Class III. of “Low Castes,” “Chambhars,” “Mhars,” and “Mangs.” The remaining Classes IV. to VIII. stand as shown in the preceding paragraph, and agree with the original divisions of Statement A.

4. In Statements B (of Births and Deaths) and C (of Immigration and Emigration) no alterations have been proposed.

5. In statement D (of Houses, Cattle, &c.) the addition of the following has been proposed after its original columns as contained in the former statements:—

LANDS.					ROADS.		
Extent of Dry-crop Land in Acres.	Irrigated Lands.			Total extent of Culturable Land in Acres.	Extent in Miles of Roads constructed under Scientific Superintendence.	Extent in Miles of Roads constructed under the Superintendence of the Local Revenue Officers.	
	Garden Land in Acres.	Rice Land in Acres.	Total Irrigated in Acres.				
36	37	38	39	40	41	42	43

The retention or modification of these columns, however, will be decided by the Government in reply to the accompanying letter.

6. In addition to the above 4 statements for your entire collectorate, you will also have the goodness (with reference to the second clause of the 24th paragraph of the Government letter; dated 25th July 1848) to furnish this department with separate similar returns for such towns in your collectorate, as may, from their extent of population, come under any of the seven classes specified by the Acting Secretary.

7. You will likewise be good enough to accompany the whole of these returns (which should reach this office at the earliest possible date after the 1st January 1850) with a general review of the statistical results which they may exhibit; also your opinion as to the degree of trust to be placed upon them for correctness, the cause of any great or usual mortality or of striking fluctuations in immigration and emigration, and the advance or retrogression of your charge in agricultural prosperity.

I have, &c.,

E. H. TOWNSEND,  
Revenue Commissioner, S.D.

Poona Districts, Revenue Commissioner's Office,  
Camp Khundalla, 15th November 1849.

(True copy.)

(Signed) E. H. TOWNSEND,  
Revenue Commissioner, S.D.

No. 4224 OF 1849.

TERRITORIAL DEPARTMENT—REVENUE.

To

H. E. GOLDSMID, Esq.,  
Secretary to Government.

SIR,—With reference to the 34th paragraph of the Acting Secretary's letter dated the 25th July 1848 (No. 4318), I have the honour to submit Forms of Statistical Returns, noted in the margin, which have been framed in this office, and approved of by the Revenue Commissioner, Northern Division, who will issue a similar circular to that which I have annexed to the collectors of his division.

2. In drawing up these returns the remarks and instructions contained in the Government letter above quoted have been duly attended to. How far they exhibit modifications of the forms originally furnished with the Government letter of 22nd June 1844, No. 2041, will be seen from the following paragraphs.

A.—Population Return.  
 ° Columns 8 to 28.  
 † Columns 29 to 35.

3. In this statement the "eight classes" of inhabitants indicated in the 12th paragraph of the Government letter under acknowledgment have been adopted. Under the 1st of these, viz., "Hindoos," I have retained the several castes\* enumerated in the 14th paragraph of the same despatch, and added 7 more† for—

Gowlees	(Milkmen),
Gowndees	(Bricklayers),
Bhundaries	(Toddy-drawers),
Koshtees or	} (Weavers or Spinners),
Salces or	
Joolaces	
Rungarees	(Dyers),
Booroods	(Basket-makers),
Putweegars	(Silk fringe-makers),

classes wholly distinct from those formerly entered in the return, as well by occupation as by customs and prejudices of religion.

4. Next follows Class II., "*Wild Tribes*," and under this head have been inserted\* in addition to the castes of "Kolees," suggested in the 16th paragraph of the Acting Secretary's letter alluded to, the castes of "Katodees," "Ramosees," and "Bheels," the last two of which, in the original forms, were comprised in the division of "Low Castes." This last division is now Class III., and is made to include† "Chambhars," "Mahars," and "Mangs," the only castes I believe whose touch is considered to pollute a Brahmin.

5. In Classes IV. to VIII. appear the "Shrawucks or Jains," "Moosulmans," "Parsees," "Jews," and "Christians," respectively, in the same order that they held in the original form. With reference to the "Shrawucks or Jains," however, I should rather have given them a column in Class I. than after "Wild Tribes" and "Low Castes"—they are followers of Budh, and as much "*Hindoos*," therefore, as Jungum "Lingayats," "Shenwees" or others, generally coming under that denomination.

6. In addition to the foregoing alterations I have inserted a column\* after collectorate for a brief statement of the boundaries of the Zilla, so as to indicate the precise tract to which the information the return is designed to record applies. Another column† is also added to exhibit the area in square miles of the collectorate, and the original column of "Villages" has been sub-divided into "Government Villages" and "Alienated Villages." A Column has likewise been inserted‡ for the Gross Land Revenue of the collectorate to be shown under the head of "Government" and "Alienated." The addition of these details will occasion little or no trouble in the Collector's office, and will, I think, contribute much to the value and completeness of Statement A. as a statistical record.

7. The statement of "Births" and "Deaths" accompanying is in accordance with the form originally furnished with the Government letter of 22nd June 1844 above quoted. No alteration in it occurs to me as expedient, nor do I observe any directed in the Acting Secretary's letter under reply.

8. The above remark applies also to the Return C. of "Immigration and Emigration," of which a copy accompanies to complete the set.

9. In regard to the Return D. of houses, agricultural livestock, implements of husbandry, works of irrigation, &c., &c., it appeared to me that its value would be much enhanced if it showed also the number of talookas and villages contained in the collectorate, and particularly the extent of *culturable land* in acres, the dry-crop, rice, and garden lands being entered in separate columns. The record in each Collector's office would at all times supply these details, and I have therefore added columns 3, 4, and 37 to 41 to the Return.

10. With respect to the extent of made roads passable by wheeled conveyances in each district, alluded to in the 30th paragraph of the Government letter under acknowledgment, the Collector of Ahmednuggur is the only officer of the division who proposes that information concerning "roads" should be embodied in a return *distinct* from the four above mentioned. The other Collectors suggest that details regarding roads should be entered in Statement D. of "houses, cattle, &c.," and as I concur in this suggestion, I have added two columns\* to that document, so as to distinguish, if possible, the extent of roads constructed "under scientific superintendence" from that of those made under the "superintendence of the local Revenue Officers." The Collector of Dharwar has suggested the addition to these of "ordinary wheel-tracks" used in the common traffic of the country; but this appears not according to the wishes of Government, which are expressly limited to "made roads."

11. Should the accompanying forms be approved of by His Lordship in Council, I would respectfully request that they be forthwith lithographed and furnished to the several Collectors of the division and this department to the number specified in the accompanying memorandum.

12. I beg to annex a copy of a circular which I have this day addressed to the several Collectors of the division, advising them of the present reference to Government and of the additional points on which it is probable that information will be required in the Statistical Returns to be furnished by them for the 1st January 1850.

13. The information called for in the 24th paragraph of the Government letter under reply, in connection with the statistical reports for the 31st December 1845, will be furnished immediately on the receipt of replies to references made to the Collectors of Ahmednuggur, Sholapore, Dharwar, and Belguam on the 20th ultimo.

I have, &c.,

(Signed) E. H. TOWNSEND,  
Revenue Commissioner, S.D.

(Signed) E. H. TOWNSEND,  
Revenue Commissioner, S.D.

TRANSFER FROM THE REVENUE TO THE GENERAL  
DEPARTMENT.

*EXTRACT paragraphs 111 to 115 and 117 to 141 of a letter from the Collector of Kaira, No. 48-A, dated the 31st January 1855, to the address of the Revenue Commissioner, Northern Division.*

Para. 111. The accompanying statement shows the population of the several talukas of this Collectorate at different periods between the years A.D. 1820 and 1851, exhibiting the average rate of increase of population to be about 2 per cent. A higher rate than this might have been expected, as there is no reason to suppose that emigration has taken place to any considerable extent during the period under review. The ryots are naturally averse under any circumstances to forsake their native villages, and there appears to be no reason which could have prompted them to emigrate to neighbouring Native States, where the rates of assessment are generally heavier than in our districts. In the Godhra and other districts recently transferred to the management of the Political Agent in the Rewa Kanta, cultivators are (I am informed) invited to settle on very advantageous terms, but no family in any of the villages of this Collectorate appears to have responded to the call, *excepting some few discontented individuals.* Under these circumstances, it is a query what are the causes which check the increase of population in the Kaira Collectorate? The mortality caused by fever and other diseases, produced by the filthy state of the towns and villages, the quantity of manure exposed, and the stagnant pools of water surrounding their outskirts, and the ravages of cholera, the enervating and destructive habit of eating opium, must account for the slow rate of increase exhibited in the accompanying subjoined statement. Besides the above causes, it may also be mentioned that in several castes men, not in affluent circumstances, are obliged from the heavy marriage expenses to remain bachelors which must operate as a restraint against the increase of population.

112. The increase of population would have been slower if it had not been for the numerous drains excavated between the years 1831-32 and 1853-54 which have answered the double purpose of increasing the public revenue by removing what were swamps in the rains, and saving a considerable amount of human life. Similar beneficial works are still required, particularly in the southern division of the Collectorate, but their execution has been postponed owing to the opposition offered by the intervening Guikwar and Cambay Nawab's villages, their people objecting to allow the water to be drained off through their fields. These two Governments have now, however, deputed their respective officers to the different villages through which the drains are to be cut, with orders to fix, in conjunction with the Native Officers of this Collectorate, the several lines of excavation; and it is hoped that these long-projected useful works will soon be accomplished.

113. I beg to submit a statement of towns and villages in this Collectorate, showing their names, area, population, number of shops in each, the amount of Government revenue for 1853-54, and their tenures. It will be seen from this statement that the villages of the Cherotur districts are those most densely inhabited, and yield the largest amount of revenue, the majority of which are on the Nerwa tenure; while those of the Thasra and Kapatbanj Talukas have the smallest population, and yield less revenue.

114. The several talukas of this Collectorate generally bear the same names as their chief towns, where the Mamludars hold their Kutcheries. The following extract from the statement alluded to in the preceding paragraph exhibits the names, &c., of the principal towns in this Collectorate:—

Number.	Talukas.	Towns.	Area.	Population	Number of Shops in each Taluka.	Amount of Government Revenue.	Tenure.
			Beega. W. Ww.			Rs. a. p.

\* Exclusive of Wanta lands.

115. The town of Kaira is the Sudur Station of the Collectorate of that name, and stands on the bank of the Serhee and Watruck Rivers, longitude 72° 45' E, and latitude 22° 45' N. No authentic account of its early history is forthcoming, but according to the statement of the oldest people now living, it appears that Kaira was formerly a small village belonging to the Thakor of Khoomarwar (about two miles distant from Kaira), by whom it was made over to Babee Khundora (an officer of the Emperor of Delhi), about 400 years ago, whose descendants ruled over it for many years, until dispossessed by the Guikwar, who made it over to one Teekoojee Pole as a Jaghir (on service tenure), to which several other villages were attached. In A.D. 1803-4, the Kaira Jaghir, comprising the town of Kaira and the villages attached to it, were ceded by the Guikwar to the Honourable Company, and in 1805 the town was formed into a civil and military station; but as such its importance has now greatly diminished by the removal of the Adawlut to Ahmadabad, and the formation of a military station at Hursole. During the period Kaira was a military station, the people of the town found employment in the cantonment, and were enriched by the trade carried on in the cantonment, and by contracts, &c., in the Commissariat Department.

117. The population of the town of Kaira is, as above stated, 12,091, composed of the undermentioned castes:—

Brahmins .....	912
Vanias (or Banias) .....	755
Koonbees .....	1,005
Kurreeas or Bricklayers .....	1,112
Sonees or Goldsmiths .....	100
Lohars or Blacksmiths .....	118
Kunsaras or Braziers .....	9
Sootars or Carpenters .....	130
Koombars or Potters.....	239
Durjees or Tailors .....	101
Rajpoots .....	428
Hujams or Barbers .....	174
Dhobees or Washermen .....	87
Bhoees or Fishermen .....	700
Bhoees or Humals .....	181

Carried over... 6,051

Brought over...	6,051
Gacha or Basket-makers .....	14
Other Castes .....	1,540

Total Hindoos... 7,605

*Wild Tribes.*

Kolees, Vaghrees, &c. ....	181
----------------------------	-----

*Low Castes.*

Chamars, Dhers, Bhungies, &c.....	615
Shawuks or Jains .....	2,366
Moossulmans .....	1,319
Parsees .....	5

Total... 12,091

118. The Shawuks or Jains and the Vanias in the town of Kaira are affluent. They are chiefly bankers, usurers, tradesmen, and grocers. The Sowkars of Kaira have their agents at Ahmadabad, Baroda, Cambay, Broach, Súrat, Dholka, Rutlam, Bombay, &c. The rates of exchange between Kaira and these places are as follows:—

The Syasee Rupee is only current in the Guikwar's territory and Kaira Collectorate—by the Government Assay Table, of 31st December 1842, it is valued at 100 Syasee Rupees equal to Company's Rupees 87.417.

About the following rates of exchange are generally paid at Kaira for Hoondies at short notices on the different towns marked below:—

*Paid at Kaira.*

Syasee Rupees ...	112½	for Company's	... 100	payable at Ahmadabad.
Do. ...	112½	do.	... 100	do. Broach.
Do. ...	112	do.	... 100	do. Súrat.
Do. ...	112½	do.	... 100	do. Bombay.
Do. ...	113	do.	... 100	do. Póna.
Do. ...	113½	do.	... 100	do. Rutlam.
Do. ...	113½	do.	... 100	do. Palee.

119. The Brahmins in the town of Kaira, though subsisting generally on "Yujmanvri-tee," or the proceeds derived from their sacerdotal office of family priests, are comparatively in tolerable circumstances, and some amongst them, who are men of capital, lend out small sums of money to Kolees and Koonbees on interest. The Koonbees of the town of Kaira are generally in better circumstances than their brethren in the districts, as the constant demand of their carts for European travellers, &c., enables them to raise cart-hire sufficient to meet the Government rent on their holdings, and to hoard up the produce of their fields to be sold whenever favourable prices can be obtained. The Girasias of the town of Kaira hold Wanta lands in its bounds, and in the villages of Dubhan, in the Nariád Taluka, but are involved in debt, and so are the Rajpoots in general. The Kolees and Musulmans are generally poor—some of the latter and also Rajpoots are employed in the Government service as peons.

120. Matur, though the district town of the taluka of that name, is, in point of size, population, area, and revenue, not larger than a second class Cherotur village.

121. The town of Mahmudabad, situated on the bank of the River Watrick, was formerly the seat of a Mamlutdar, who had charge of the Mahmudabad Purgunna, comprising only 11 villages and 35 villages of the Duskurohie Purgunna. The Mahmudabad Purgunna is now consolidated with the Matur Taluka. The town of Mahmudabad is generally supposed to have been founded by Mahmudshaw, commonly called Mehmud Begra, who built a wall around it, the remains of which are to be still seen. The lands of this town are of the best quality, and in a high state of cultivation, producing cotton, grain, and leguminous plants, &c. From the number of wells within the limits of this town and the River Watrick, the cultivators have ample means of irrigation at their command. The short distance from the surface at which water is obtained here, renders the construction of wells less expensive in this locality. There are a number of country Churkas for spinning cotton in this town, which also boasts of several ancient edifices presenting specimens of Mahomedan architecture. Amongst these may be mentioned the "Roza," at the distance of about a mile from the town on the east, the Doodyatulas, and Blumereea "Kooa," well, on the road to Kaira, and a Bowree or well built of stones of uncommon size in the midst of the town. The houses are substantially built, and the majority of cultivators and non-cultivators appear to be in a comfortable condition. The principal article manufactured in Mahmudabad is "Basta," a kind of coarse cotton cloth, formerly used by natives of all classes for their ordinary wearing apparel. The Sowkars of this town have agents or correspondents at the same places as those of Kaira, the rates of exchange being also the same.

122. The principal towns in the Nariád Taluka are Kusba, Nariád, and Bhaluj, besides which most of its villages are large and populous, resembling small towns. The town of Nariád is divided into 6 Paties or divisions (namely, Chucklasee, Bhagole, Kakurkhar, Lakhawar, Heerjee, Ruttunjee, and Uladh), each of which has its own set of Patels and Tulatee, and is in itself a distinct village; the lands are generally held on the "Nerwa" tenure though a small portion is set aside as "Muzmoon." This town (Nariád) is situated on the high road from Kaira to Baroda, and is the largest and most populous in this Collectorate. The inhabitants are generally in a comfortable state, though the Pateedars are involved in debt. The Nariád Sowkars have commercial agents at Bombay, Súrat, Baroda, Ahmadabad, and other places. Around and in the vicinity of Nariád there are numerous wells irrigating its rich tobacco fields.

123. The town of Muhoonda is said to have been founded by a Hindoo prince named Mandhata, about 2,000 years ago. It is smaller in size and importance than Nariad. The only other town worthy of notice in the Muhoonda Taluka is Aleena, which, with a circle of villages, once formed a distinct Purgunna, and was the station of a Mamlutdar.

124. In the Thasra Taluka the town of Thasra is at present only known as the Mamlutdar's station, there being nothing else to attract notice. The town of Oomrut is, however, one of the most populous and wealthy places in this Collectorate, and the Moonsiff's station. It is close to Dakor, where the famous temple of Runchorejee stands, and where numerous pilgrims periodically flock from different parts of the country.

125. The town of Kapatbanj stands on the bank of the River Mohur, and is said to be an ancient one. It has a very pleasant aspect, contains handsomely built houses; the Sawucks who inhabit it are very rich, and two of them are said to possess wealth upwards of 20 lacs of rupees, carrying on extensive trade of opium, and other commodities with Bombay, Rutlam, and other places. Numerous Lotia Borahs occupy a part of this town; they trade with Bombay and other places, and occasionally visit their native country.

126. The town of Borsad in the Taluka of Borsad is said to have been founded by Raja Nul, a Hindoo prince, about 1,500 years ago. It is the District Mamlutdar's station. It was formerly surrounded by walls which are now in ruins.

127. In the Napar Taluka there are no towns except Napar Kusba, the seat of the Mamlutdar's Kutcherry, most of its villages (particularly Anand) are very large, populous, and in a flourishing state.

128. Agriculture appears to form the principal occupation of nearly three-fourths of the population of this Collectorate. The numerous class of Koonbees and Kolees are by occupation cultivators, but in almost all villages Brahmins and other castes, though their ordinary calling may be different, are engaged in cultivation. It is only in large towns that barbers, washermen, tailors, blacksmiths, &c., subsist solely on their respective occupations, but as they find insufficient livelihood from following it they are obliged to resort to cultivation. Dhers and others, weaving during the fair season, engage in cultivation during the monsoon, with the view at least of raising sufficient grain for their domestic consumption. The Vanias are perhaps the only people not directly engaged in cultivation but as money-lenders at interest and the purchasers of grain; they chiefly live on the profits of cultivators.

129. Dhers, Khetrees, Momnas, Mussulmans, Taees, and Jogees are generally weavers, but they bear only a small proportion compared with the mass of cultivators. They make coarse clothes called Khadees and Dhoturs for the labouring classes.

130. The Brahmins in this Collectorate are of various castes, namely, Nagar\*, Satodra, Kherawal, Oudch, Talukeea, Ondeech, Suhoitr, Mohur, Seengonee, Mewara, Raekwar, Valum, Choniso, Rodewar, Nadora, Ruval, Khurayeta, Seemalee, Oodumbur, Chutrorra, Vudadra, Parasoor, Pulewar, Borsida, Napul, &c. The Nagar Brahmins will not associate with those of other castes, while the Kherawal, Ondeech, Mohur, Seengore, Raekwar, and Mewara Brahmins will have no objection to eat with each other, though not to intermarry. The other castes of Brahmins are deemed inferior, and excluded from all association with the above. There are a very few Deccanee Brahmins in the Collectorate, having come in the Peishwa's time, and, obtaining Government service, settled for livelihood. The Nagar, Satodra, and Kherawal Brahmins are either usurers or employed in the Government or private service of Bankers, &c. Of the other castes of Brahmins, some are usurers, but the majority of them are either cultivators or living partly or wholly on charity. Some of them are schoolmasters and physicians, while others during the monsoon recite Poorans (or heroic poems of the deeds of the Hindoo God). The Vudadra Brahmins are mostly inhabitants of Mahmudabad, who perform distant journies, and, pretending to deal in magic or

\* *Nota.*—The term Nagar (formerly applied to Krishna of the Hindoo Deities as one of his attributes) literally means beautiful, and the Nagar Brahmins are so called from their being fairer than other castes.

Another account of the origin of the term "Nagar" states that in days of yore, the inhabitants of a certain city were compelled, by the sudden appearance of numerous snakes therein, to desert it; that on going outside the city they met a saint (formerly a native of the same city, seated in a devotional attitude, who enquired the cause of their deserting the city, and on being informed of it, desired the people to return to their homes along with him; and that he entered the city uttering the expression "Nagriem," or no poison, by virtue of which the snakes fled. The inhabitants of the city, after their return, were called Nagar.

otherwise cheating people or by begging alms as sacred characters, return with a large fortune and become usurers. Amongst the higher castes of Brahmins, Government service is much coveted and sought for—Brahmins in towns are better educated than those in villages. Their ordinary knowledge is nothing beyond astrology—very few study Sanskrit, except reciting Poorans to enable them to procure a livelihood.

131. The most influential classes in the Collectorate are the Vantias and Jains, the wealthiest amongst whom circulate their capital in the districts, and enable petty village usurers and traders and merchants to carry on their trade. Those who do not possess sufficient capital to subsist solely by money-lending, borrow money at moderate rates of interest from the wealthier classes, and deal in clothes, grains, timber, sugar, &c. Those placed under still less favourable circumstances, keep retail shops for the sale of various articles of daily necessity, while some stroll through villages and hamlets with a small quantity of various articles required by cultivators for their daily consumption. Besides the above occupations, the Jains and Vantias are employed either in Government or private service.

132. On enquiry of the cause which led to the accumulation of wealth by the Vantias and Jains, it is said that our Civil Courts affording facilities for the recovery of debts, they have taken advantage of the ignorance of Pateedars, Girasias, Kolees, and cultivators in general; and recovered more than treble the amount of original debt. The village Vantias draw small sums of money from the Sowkars in towns at 8 or 10 annas per cent., and lend them out to ryots, repaying their creditors as they recover their advances to ryots. The rates of wages which the Sowkars pay their mehtas or Goomastas vary from 86 to 200 rupees per annum.

133. The Sowkars of this Collectorate seldom or never lay out their capital on agricultural improvement, nor on any speculation beyond its limits, but chiefly confine themselves to the lending of money on interest to traders, agriculturists, and others in want of money. Advances are sometimes made on the personal security of the borrower, and at others on his property being mortgaged, or the expected produce of his field being pledged to the lender. It is chiefly in case of the cultivation of sugar-cane and other rich crops that the cultivators are obliged to borrow large sums of money from Sowkars, with whom they are generally careful to maintain a good credit, and regularly (as far as they possibly can) discharge the Government demand and the Sowkars' debt previously to appropriating to themselves the produce of their fields, that they may be enabled to obtain fresh advances to meet the marriage, funeral or other incidental family expenses. Amongst Vantias it is usual to obtain advances of money by mortgaging their jewels so as to procure the loan on less interest. Koonbees and others who may have been enabled by their frugal habits to make small savings generally keep their money in earthen jars or bury it in their houses, whence it is sometimes liable to be robbed or lost. The Sowkars receive small sums of money in deposit from Brahmins and others possessing some capital, to whom they pay small interest; but many people, from fear of losing their small earnings and savings by the Sowkars becoming insolvents, prefer depositing their money in their houses to placing their money out on small interest. This suggests the necessity of founding a Provincial Bank on a safe foundation.

134. The Syasye Rupee is used in making all sales and purchases throughout the Collectorate, whereas the Government revenue is paid in Company's Rupees. The ryots sell the produce of their fields and receive its value in Syasye Rupees, which they are obliged to exchange for Company's Rupees with which to pay the Government revenue. The Vantias charge arbitrary rates of exchange between the two currencies according to the season for making revenue collections, and enrich themselves at the expense of the poor cultivators. It seems desirable, for the interests of the agricultural classes, to suppress the use of the Syasye Rupees; for, in addition to the exorbitant rate of interest which they have to pay on loans, the rate of exchange (between the Syasye and Company's Rupees) charged operates prejudicially on the ryots.

135. From the tranquil state of the country for many years past, the Mehwassee villages have been increasing in prosperity, their proprietors relieved from warfares with neighbouring petty chieftains are now better enabled to turn their attention steadily to the cultivation and improvement of their lands, but their estates are often heavily encumbered with debts from their expensive habits of living. Their ryots are nearly in the same condition as those of Government villages, and when the management of their villages are in their own hands, and not in those of creditors, the villagers enjoy a greater degree of freedom (than the ryots in Company's villages) from oppression, as their landlords are less strict in enforcing the punctual payment of the revenue instalments as they become due than are the Government Officers in Government villages.

136. The Pateedars in general are an enterprising, industrious class of agriculturists, and in tolerably good circumstances. They occasionally borrow money from Sowkars at 12 annas or 1 rupee percent, and, though obtaining sufficient returns from the produce of their fields, from the enormous sums of money required to be expended by them on the occasion of marriages and deaths amongst their families, they are more or less involved in debt, and prevented from growing rich.

137. The Cusbatees, having from their expensive habits sold or mortgaged their lands, and in peaceful occupations, being naturally indolent, are sinking from a respectable condition into poverty.

138. The Koolees are not nearly so industrious as the Koopees, and the surplus produce of their fields, after paying the Government rental and the Sowkar's dues, is often all consumed by the end of February or March, consequently during the hot season they subsist on the fruit of Mowra trees or some wild-growing vegetables, or by collecting and selling firewood. When impelled by want, they sometimes commit thefts and robberies, but the police, and especially the improved existing system, acts as a restraint and bar to their predatory habits. Their ignorance is frequently assigned as the cause of their poverty, and it is a matter of importance to educate this class of our agricultural population to render them more industrious, and thereby to reclaim their wild habits.

139. The Pateedars have generally at least a pair of bullocks and all agricultural implements, but many of the Koonbees, and most of the Koolees and other agriculturists, possess only a single bullock and few of the most necessary implements of agriculture. Those who have only a single bullock of their own mutually lend their bullocks to their neighbours or relations, and receive the loan of his in return, and thus each in his turn has at his command a pair of bullocks whenever required for working his field. Those who have no bullocks of their own, obtain them on hire, in lieu of which (if they are unable to pay the hire in cash) they render manual labour, equal to the amount of hire, to those from whom they may have obtained bullocks and the same thing is done with respect to implements. Sometimes cultivators obtain the gratuitous use of bullocks and implements from their relations who may be in better circumstances. The majority of cultivators obtain so small a profit from grain cultivation that no surplus is left to enable them to provide themselves with a pair of bullocks and the full complement of agricultural implements. The heavy rates of interest charged by the Sowkars on granting loans would seem also to prevent their borrowing money for the purchase of cattle and the necessary implements. Their wretched condition is to be attributed to the fact that they adopt no agricultural improvements, but still raise the same crops, and in the same manner which their forefathers did, but the abundance of grain and other produce renders it very cheap, and a large portion of the surplus produce, after paying the Government rental, goes to the Banian or money-lender on account of advances in money or grain previously made, especially during the hot season when the poorer classes have exhausted their monsoon supplies of grain. Their circumstances might be improved—they would be benefited if they raised more exportable produce; but this is often attended with additional expense on a slackness of local demand, which discourages the increase.

140. Rice, wheat, bajree, "toovur," milk, ghee, and vegetables form the usual diet of the upper classes, but the poor classes use poorer and cheaper grains, such as bowta, buntee, chuna, juv or barley, and seeds of leguminous plants. On occasions of marriages, deaths, &c., the higher classes of Hindoos extensively use sugar and ghee, in addition to the grains, forming their ordinary diet. The Koolees and other poorer classes, when they are unable to procure any description of grain, live entirely on such nutritious vegetables and berries as they find growing wild in jungles during the hot season. The ordinary diet of the Musulmans in this Collectorate does not differ much from the Hindoos.

141. The Goozarathee language is the dialect generally spoken all over the Collectorate, the Musulmans of large kusbas or towns speaking Hindoostanee among themselves.

To

J. BAX, ESQUIRE,  
Secretary to Government.

Poona, 28th October 1827.

SIR,—I do myself the honour to transmit the Population Returns from the Collectorate of Khandesh, and trust they will prove satisfactory to the Honourable the Governor in Council. A reference to the memoir accompanying the Returns will afford all the requisite explanations.

2. Returns of Births, Deaths, and Marriages have not been received from Khandesh.

3. Considerable progress has been made in the translation of the Returns of the Population and of the Births, Deaths, and Marriages in the Dharwar Collectorate. Mistakes, however, having been discovered on the face of the Population Returns, the extent of which it was impossible to determine, but, by referring the Returns to the Collectors, they were sent back for rectification about a month ago. Their receipt may be daily expected. On their arrival, the Population Returns will be immediately wound up and the Pervoe and Mahratta translator will be discharged agreeably to the wishes of the Honourable the Governor in Council.

4. I beg to take this opportunity of supplying an omission in the memoir in the Population Returns of the Poona Collectorate, explanatory of the reason why the land in the Poona Collectorate were not inserted in my Returns. The denominations of land measurements in the Poona Collectorate being so various, differing in neighbouring villages even, and referring most commonly to the productive power of the land and not to specific superficial extent, it has found impracticable to reduce the terms to any common standard of measurement, and the lands were therefore entirely omitted in the Returns.

5. Having had the misfortune lately to break my only Daniel's Hygrometer, I applied to Colonel Goodfellow, the Chief Engineer, for the use of one of the hygrometers in his department. Colonel Goodfellow most liberally and obligingly met my wishes, and I trust the Honourable the Governor in Council will be pleased to authorize Colonel Goodfellow to issue an hygrometer from his department for my use. The hygrometer being returned (should it be required) at a future period, on the arrival of two hygrometers which I have commissioned from England.

6. I avail myself of this opportunity to report the arrival, from England, of various books in science and natural history, a chronometer, and drawing materials for the use of my department. All these articles are already paid for from the advances made to me by Government. The bills and further details respecting them will be transmitted at a future period, when the whole of the charges for agency, freight, and insurance shall have been received, together with the remaining articles commissioned from England.

7. Purposing to move into the districts on the 31st instant, I beg any letters may be addressed *via* Poona.

I have, &c.,

(Signed) W. H. SYKES, Major,  
Officiating Statistical Reporter to Government.

#### COLLECTORATE OF KHANDESH.

The Dekhun Survey not having extended to Khandesh, Lieutenant Boyd, the officer in charge of the Survey Department, is unable to furnish me with the Area or boundaries of the several talukas and pergunnahs in the Collectorate; but from a map of the province of Khandesh, completed under the direction of Lieutenant-Colonel Briggs, Lieutenant Boyd deduces the area of the province of Khandesh to be 12527.82 square miles, including tracts belonging to Foreign States and to Jagheerdars. The province being bounded on the north by the Santpoora mountains, on the east by the province of Berar, on the south by the Indyalree range, and on the west by Dong and Raj Peempla.

The Area furnished not being referable to the Honourable Company's Tracts in Khandesh is consequently of no use in illustrating the accompanying Returns. I have been enabled, however, from the accounts of the whole of the village lands in Khandesh being exclusively kept in Beegas (the Beega being equivalent to three-fourths of a statute acres) to deduce the area in square miles of so much of every district as is populated. This will admit of a strict proportion being determined of the inhabitants to the square mile. With these data it will appear that the populated part of Khandesh, belonging to the Honourable Company, comprises an area of 6,760 square miles, giving 54.93 inhabitants (nearly 55) to the square mile for the populated villages,

Area of Pergunnahs deduced from village lands in Beegas.

Inhabitants to the square mile, exclusive of lands of depopulated villages.

which approaches within 7 persons to the square mile to the proportion in the Poona Collectorate. Bringing in the lands, however, of the deserted and Pyegusta villages into the account

from which returns have not been received, and supposing that, as 1,982 villages from which returns have been received, give 6,760 square miles, 1,384 Pyegusta and deserted villages, and villages refusing returns having a proportionate extent of lands to the villages from which returns have been received, will give 4,720 square miles, making a total of square miles (independently of Jagheer villages) in the Collectorate of Khandesh of 11,480 square miles, with

Inhabitants to the square mile, 32½ inhabitants to the square mile, and this deduction, I think, will not be very far from the truth. This certainly exhibits a very low rate, but such as might be anticipated with reference to nearly the half of the towns and villages belonging to the Honourable Company being deserted.

The accompanying lists comprise details of 3,666 towns and villages in the Collectorate of Khandesh. It will be necessary to remark, that this sum, independently of including all Pyegusta (subsequently explained), deserted and Jagheer towns and villages includes also the villages of the entire Pergunnahs of Lahoor and Chalisgaon, whose names are not included in the copy of the Government list sent to me by the Secretary to Government, together with 11 villages in the Pergunnahs of Nandoorbar, Nowapoor, Sooltanpoor, and Erundole, for which corresponding names are not to be met with in the Government list. Admitting that these 11 villages are referable to 11 villages in the above Pergunnahs, but which cannot be identified from the misspelling of names, it will leave 3,655 towns and villages in the Collectorate of Khandesh: of this number 330 are Pyegusta—which term means that the villages are deserted, but that the lands or part of them are cultivated by neighbouring villagers: 990 are deserted villages; of this number there are 51 whose limits are unknown,<sup>1</sup> 12 whose sites are unknown but names known,<sup>2</sup> and 135 whose names are unknown but a record remains of their number<sup>3</sup>. 314 villages are in Jagheer, Enam, &c., or belong to the Guicowar or Scindeh in sovereignty. The Pyegusta, Deserted, and Jagheer amount to 1,634 villages, leaving 2,032 villages belonging exclusively or in great part to the Honourable Company. In this number there is not any town with 7,000 inhabitants; 2<sup>1</sup> only with from 6 to 7,000, 2<sup>2</sup> with from 5 to 6,000, 4<sup>3</sup> with from 4 to 5,000, 5<sup>4</sup> with from 3 to 4,000, there are 9<sup>5</sup> towns with from 2 to 3,000 inhabitants, with from 1 to 2,000 inhabitants there are 38<sup>6</sup> and finally there are 18<sup>7</sup> villages with from 700 to 1,000 inhabitants. Deducting the inhabitants of these towns, 83 in number, amounting to 138,385 inhabitants from the total inhabitants of the Collectorate, viz., 371,404, the remaining towns and villages 1,899 average 122½ inhabitants each, which is less than the average of the Poona Collectorate by 127 inhabitants to each village, that is to say, the remaining villages do not average half the population of the villages of the Poona Collectorate. The following tabular view will give the Honourable the Governor in Council a perspicuous idea of the present state of the towns and villages in Khandesh, some columns are added exhibiting the changes that have taken place since the date of the Government list in 1820. It will hence appear that 148 villages which were Pyegusta in 1820 have since that period become popu-

It did not enter into my plan to exhibit every trade or caste when met with in the population of the country, from the circumstance of the details necessarily swelling the returns to a most inconvenient bulk. The Collector of Khandesh, however, having caused all the various trades and many minute distinctions of caste in the towns and villages to be enumerated on the back of each return, I did not conceive myself at liberty, in translating the returns, to leave out this enumeration. This explanation will account for the voluminous character of the accompanying returns—a character which did not distinguish the returns from the Poona Collectorate, and from which also the returns from Dharwar will be free.

1,968 Returns have been received from towns and villages belonging to the Honourable Company, and 14 returns from Jagheer villages. 300 Jagheer villages have not sent returns, 3 Government villages have not sent in returns, and the Collector found it impracticable to obtain returns from the Pergunnah of Hutghur. The inhabitants deserting their villages in the attempt being made to obtain a Census, it was abandoned. In a similar manner it was found impracticable to obtain returns from 8 villages in Pergunnah Hookurmoonda. With these exceptions, returns have been received from all the Company's villages.

Abstract of Returns	{	Returns received from Company's villages . . . . .	1,968
		Do. do. Jagheerdar's do. . . . .	14
		Returns refused by villages . . . . .	64
		Pyegusta villages, no returns . . . . .	330
		Deserted villages . . . . .	990
		Jagheer villages, no returns . . . . .	300
Total. . . . .			3,666

In looking into the Returns there are very few internal proofs of errors, and on the whole they are, probably, tolerably correct. Had circumstances, however, admitted of it, I could have wished to have referred them again to the village authorities for the explanation of some inconsistencies, but principally for the purpose of having the draught cattle inserted, which have very generally been left out.

The proportion of inhabitants to a house is 3.96, nearly 4 persons, which falls short of the proportion in the Poona Collectorate by 83 decimals; Poona Collectorate averaging 4.79 persons, England and Wales 5½ persons.

The great feature in the population of this collectorate, as in that of the Poona Collectorate, and as in England and Wales (although the contrary is usually believed to be the case), is in the preponderance of the males over the females—the preponderance prevailing throughout the different castes. In only one instance, in the whole of the pergunnahs, is there an exception of females exceeding males, and this is in the Hookurmoonda Pergunnah, where there are 1,258 females and 1,178 males.

There are 200,597 males and 170,807 females, giving an excess of males 29,790, or 8.41 females to 10 males, which closely approaches the proportion in the Poona Collectorate of 8.81 females to 10 males, the excess of males being in favour of Khandesh.

In England the population is 9.28 females to 10 males.

Considering the whole population as 100, the proportions of the different castes per cent. will be as follows:—

Castes.	will be as follows:—	
Whole Inhabitants . . . . .		100
Brahmins . . . . .		5.40 Per Cent.
Rajpoots . . . . .		3.47 "
Mahrattas or Koonbees . . . . .		69.58 "
Low Castes . . . . .		14.72 "
Musulmans . . . . .		6.83 "
		100

The proportion of Brahmins of 5.40, or nearly 5½ per cent., is very considerably less than the Poona Collectorate, where the Brahmins amount to more than 11½ per cent. In every 8.63 persons one person is a Brahmin, whilst in Khandesh only in every 18.24 persons one is a Brahmin.

As a contrast to this excess of Brahmins in the Poona Collectorate is the excess of the Rajpoots in Khandesh, where the proportion is 3.47 per cent., the proportion in the Poona Collectorate not being a half per cent.

In Khandesh in every 28.73 persons one is a Rajpoot; in Poona one in 244 persons nearly. The proportion of Shudrahs to the whole population is 69.59 per cent., which is somewhat less than in the Poona Collectorate, where the proportion is 73.85 per cent.; the difference, however, is not remarkable. In Khandesh to 1.43 inhabitants there is one Shudrah; in Poona to every 1.35 inhabitants there is one Shudrah.

The cultivators may be considered as almost exclusively confined to this caste, and as there are 37,311 cultivators, allowing a cultivator's family to consist of 5 persons, 186,555 persons may be allowed as engaged in agriculture out of a total population of 371,404, or one-half. In the Poona Collectorate more than a half of the population is engaged in agriculture, and, although the Poona Collectorate is little more than one-third of the size of Khandesh, it has 35,335 cultivators, approaching within 2,000 of the number of the cultivators in Khandesh.

The agricultural means of a cultivator may be determined pretty correctly by the number of his draught cattle, unfortunately the Returns have not had the column of draught cattle filled up in a great majority of the villages. It is impossible, therefore, even to approximate to the truth, in determining the proportion of draught cattle to each cultivator. But, as far as the Returns go, they give 1.62—not quite  $1\frac{1}{2}$  bullocks to each cultivator.

As the proportion of Rajpoots greatly exceeds the proportion of this class in the Poona Collectorate, so does the proportion of the low castes greatly exceed the proportion in the Poona Collectorate, amounting to  $14\frac{1}{2}$  nearly per cent. in the Khandesh Collectorate; in the Poona Collectorate amounting to 9.78 per cent. These calculations give in the Khandesh Collectorate one low caste in 6.80 inhabitants; in the Poona Collectorate there is one low caste to 10.22 inhabitants.

The proportion of Musulmans in Khandesh also exceeds the proportion in Poona, amounting to 6.83 per cent. in Khandesh, Poona giving only 4.38 per cent. In Khandesh there is, consequently, one Musulman in 14.60 inhabitants; in Poona one Musulman in 22.81 inhabitants.

An inspection of the abstract of the Population Returns will give the numbers, character, and variety of the trades. The columns include several professions, for which the English language does not afford specific appellations, such as Munyar, Mahan Bhao, Gusreh. At a future period, on my visiting Khandesh, I purpose entering into details on the constituents of the population of Khandesh.

I cannot, of course, at present speak from personal knowledge of the state of the manufactures in Khandesh, but, from an inspection of the abstract, it will appear that there are 1,842 weavers (Koshtees and Saalees), independently of 300 turban weavers (Mohmeens), indicating in reference to the population of the collectorate a greater support of these classes in Khandesh than exists in the Poona Collectorate.

In the whole Collectorate of Khandesh there are only 85 schools, or one school to 4,369 inhabitants, which proportion is unfortunately more unfavourable than exists in the Poona Collectorate, where there is one school to 3,337 inhabitants.

The village lands in Khandesh would appear, from the Returns, to be universally and uniformly kept in beegahs of 20 pands and 20 katees, &c., which renders the beegah equivalent to three-fourths of an English acre. The lands have been obligingly separated by the Collector into "Patsthal," or lands watered by perennial streams; "Mohtsthal," lands watered by wells, which two kinds of land constitute garden ground; and into zerhaet, or field land, and waste land.

The Patsthal are more limited than might have been expected, situated, as Khandesh is between two ranges of mountains. It amounts, however, to 15,958 acres, and is about  $\frac{1}{270}$  part of the whole lands of the populated villages.

The Mohtsthal lands amount to treble the amount nearly of the patsthal, and consist of 46,064 acres, which is  $\frac{1}{94}$  nearly of the whole of the land of the populated villages.

Zerhaet or field lands are those that are not watered by artificial means—the crops are left to the rains or the dews. These lands amount to 600,556 acres, and comprise about  $\frac{1}{7}$  only of the whole lands of the populated villages.

The whole of the cultivated land—patsthal, mohtsthal, and zerhaet—amounts only to a little more than  $\frac{2}{3}$ ths of the whole lands, leaving a heavy excess of waste land, amounting to  $\frac{1}{3}$ ths of the whole of the lands of the populated villages in Khandesh. If the lands of the depopulated villages were brought into the account, the disproportion of waste to cultivated would unhappily be yet more striking.

Returns of Births and Deaths. Returns of Births and Deaths have not been received from the Collectorate of Khandesh.

I beg to take the liberty to notice the defective state of the Government list of villages in the Collectorate of Khandesh. Two whole pergunnahs are omitted, and the misspelling of the names of villages is so general, that it was with extreme difficulty, and only by references to the Collector, that I was enabled to identify the native Returns sent me. Ultimately it was found utterly impracticable to identify 11 of the Returns, and they stand separated. The abstract showing the condition of the towns and villages is even wrong. I would beg to suggest, therefore, that it would be advantageous to have the villages numbered in a series, and the same number should constantly remain attached to the village, whatever change may take place, and by which number the village may always be identified, although the name may be misspelt by Purvoes in copying it. The names, however, generally of the villages in the Collectorate of Khandesh require to be rewritten from the native names by a person understanding the Mahratta characters. The errors are too numerous for me to attempt to rectify them, and to save the additional confusion arising from a partial attempt I have adopted such names and spelling as I have met with.

(Signed) W. H. SYKES, Major,  
Officiating Statistical Reporter to Government.

Proportion of Inhabitants to the Square Mile and to each House, and of the grand divisions of Castes—Males and Females—to the whole Population in the Collectorate of Khandesh, A. D. 1826.

Area in Square Miles.	Names.	Total Inhabitants.	Inhabitants to the Square Mile.	BRAHMINS.			RAJPOOTS.			SHUDRAHS.			LOW CASTES.			MUSULMANS.			Proportion of Inhabitants to each House.	Proportion of Draught Cattle to each Cultivator.
				Males to males of the whole population as 1 to	Females to females of the whole population as 1 to	Males and females to whole population as 1 to	Males to males of the whole population as 1 to	Females to females of the whole population as 1 to	Males and females to the whole population as 1 to	Males to males of the whole population as 1 to	Females to females of the whole population as 1 to	Males and females to whole population as 1 to	Males to males of the whole population as 1 to	Females to females of the whole population as 1 to	Males and females to the whole population as 1 to	Males to males of the whole population as 1 to	Females to females of the whole population as 1 to	Males and females to the whole population as 1 to		
* 6,760	Collectorate of Khandesh ...	371,404	*59.98 †	18.24	18.82	18.51	29.27	28.13	28.73	1.43	1.44	1.43	6.81	6.73	6.90	14.84	14.33	14.60	9.96	1.62

\* \* *N.B.*—The area in square miles is that of the lands of the populated villages only, giving nearly 60 inhabitants to the square mile, including, however, the lands of depopulated villages, the area would be about 11,480 square miles, and the proportion of inhabitants to the square mile would be reduced to 32½ nearly.

† The correct figures are 54.93.—*J. L.*

(Signed) W. IL-SYKES, Major,  
Official Statistical Reporter to Government.

Poona, 23th October 1827.

No. 2087 OF 1827.

TERRITORIAL DEPARTMENT.

REVENUE.

To

MAJOR SYKES,

Officiating Statistical Reporter.

*Bombay Castle, 6th November 1827.*

SIR,—I am directed to express the satisfaction of Government on the receipt of the Returns which accompanied your letter of the 28th ultimo, but to suggest to you, at the same time, the necessity of reporting the result of your labours in some form less objectionable in point of size than has been adopted in the present instance. The Honourable the Governor in Council is of opinion that all the information required by the Honourable Court and by Government can be advantageously comprised within limits of more moderate dimensions.

2. The application preferred in the 5th paragraph of your letter to Colonel Goodfellow for an hygrometer has been complied with.

---

No. 2088 OF 1827.

To

THE CHIEF ENGINEER.

*Bombay Castle, 6th November 1827.*

SIR,—I am directed by the Honourable the Governor in Council to request you to supply the Acting Statistical Reporter with a hygrometer, which will be returned into store, if required, on the arrival of two hygrometers commissioned from England by Captain Sykes.

To

W. HART, ESQUIRE,  
Secretary to Government,  
General Department.

*Poona, Office of the Director of Public Instruction*  
25th August 1855.

SIR,

I have the honour to submit a set of Forms which, it appears to me, may very advantageously be substituted on occasion of the next census of this Presidency for the Forms which have hitherto been used on similar occasions.

2. I would also suggest that a census might be taken with more ease and effect during the rainy season than in the cold weather as heretofore. It has already been arranged, I believe, that the next census shall take place in February 1856, and if this can still be effected, I would certainly not propose to interfere with it, as the results of a more recent and careful numeration of the people would be of great advantage to this department, especially, in drawing out the educational estimates and returns upon which our future plans will in a great measure depend. But if His Lordship in Council can allow the census to proceed in February, and to be repeated in July next, it might afterwards be re-taken in 5 years (*i.e.*, in July 1861), and then repeated decennially in the same years as the censuses of Great Britain.

3. I would suggest that, if the annexed Forms be adopted, the Village Returns should be tabulated by the talooka and zillah officers separately from the returns relating to the larger towns.

I have the honour to be,

Sir,

Your most obedient Servant,

(Signed) C. J. ERSKINE,

Director of Public Instruction.

No. 488 OF 1855.

GENERAL DEPARTMENT.

FROM

H. B. E. FRERE, Esq.,  
Commissioner in Sind;

TO

THE RIGHT HONOURABLE LORD ELPHINSTONE, G.C.H.,  
Governor and President in Council,  
Bombay.

*Dated 19th November 1855.*

MY LORD,

I have the honour to submit the enclosed statement drawn up by Mr. P. M. Dalzell, Deputy Collector of Customs, showing the population of this province, as taken at the census of the 20th March 1854. On that date the population was returned as being 1,571,908, and to this may be added 108,135, being the population of the districts of Meer Ali Moorad, of Khyrpoor, where a census was taken by the Meer at my request, giving a total of 1,680,043.

2. I also beg to submit two extracts from Mr. Dalzell's remarks on the census papers, but they can only be regarded as rough approximations in consequence of defects and mistakes which he detected when he came to examine the returns. These have been pointed out to the Collectors for future guidance.

3. I am inclined to think that the total population of the province is considerably larger than that here shown, but this will be ascertained, and the errors of the present census corrected, by a simpler census which I have arranged to have taken in the spring of next year, on a plan drawn up by Mr. Dalzell. The result will, I hope, be more correct, and I trust that the measure will be approved by Government.

I have the honour to be,

My Lord,

Your Lordship's most obedient, humble Servant,

(Signed) H. B. E. FRERE,  
Commissioner in Sind.

*Commissioner's Office, Camp Wudda Gurrae,*  
19th November 1855.

B.

Summary of the Census taken, 20th March 1854.

The population of Sind appears to have been on the 20th March 1854 1,571,908 souls, viz, 838,914 males and 732,994 females of all ages, distributed as follows:—

Collectorates.	Males.	Females.	Total.	Per-centage to Population.	Proportion of Females to every 100 Males.
Kurrachee... ..	157,469	186,945	344,414	22	119
Hyderabad ... ..	352,451	292,956	635,406	40.4	60
Shikarpoor ... ..	284,250	229,424	513,674	32.7	80
Upper Sind Frontier ... ..	21,729	15,150	36,879	2.3	70
Thur and Parkur ... ..	23,015	18,520	41,535	2.6	80
Total... ..	838,914	732,994	1,571,908	100	87

The proportion for the province of males and females appears to be 100 of the former to 87 of the latter. In the Kurrachee Collectorate, however, the females preponderate by 19 in excess of every 100 males, or nearly 50 per cent. in excess of the average for the Hyderabad and Shikarpoor Collectorates. In the Hyderabad, Shikarpoor, and Thur and Parkur Districts there appear to be 80 females to every 100 males. In the frontier districts the proportion is a little less.

The excess of females in the Kurrachee Collectorate is evidently an error, and arises from the transposition of the males and females of the district returns into the opposite sexes in the General Abstract Return of the Kurrachee Collectorate, as shown in the separate memorandum of remarks on the Collectorate Returns.

The proportion of the sexes of children (263,786 males and 219,174 females) is 100 males to 80 females. Of the adult population (exclusive of sexagenarians) the proportion is 100 to 87, and of old persons (44,121 males and 49,938 females) as 100 to 113. The last result tends to show that longevity is in favour of females.

The proportion of children to adult males is shown to be 84 of the former to 100 of the latter; of females the proportion is as 94 to 100.

Viewing the population of the province in respect to age, we find the following proportions:—

Children under 12 years...	482,960	or	31 per cent.	of the population.
Full-age Persons .....	994,889	„	63	„
Old do. ....	94,059	„	6	„

Total...1,571,908 ; 100

Comparing the population according to castes, we obtain the following results:—

Castes.	Males.	Females.	Total.	Per-centage to Population.	Proportion of Females to 100 Males.
Mahomedans ... ..	613,430	537,318	1,151,248	73.2	89
Hindoos ... ..	173,269	150,514	323,783	20.6	87
Christians... ..	2,913	810	3,723	0.2	25
Other Castes ... ..	49,302	43,952	93,154	5.9	89
Total... ..	838,914	732,994	1,571,908	100	87

The Mahomedans and Hindoos are distributed as follows:—

Collectorates.	Mahomedans.	Per-centage to Population.	Hindoos.	Per-centage to Population.	Proportion of Hindoos to 100 Mahome-dans.
Kurrachee ... ..	234,403	20	65,050	20	28
Hyderabad ... ..	484,807	42	117,793	36	24
Shikarpoor ... ..	407,306	35	106,368	33	23
Frontier Districts... ..	11,362	1	6,396	2	56
Thur and Parkur ... ..	13,364	1	23,171	9	211
Total... ..	1,151,248	99	323,733	100	28

The Christians are confined to Kurrachee chiefly.

The proportion of Mahomedans to Hindoos appear as 100 to 28. In the Frontier districts, however, the proportion of Hindoos is double the general average, which probably is an error, as the population of those districts is supposed to consist principally of the followers of Mahomet, who compose, with trifling exceptions, the hill tribes of Sind.

The proportion of children in respect to castes is as follows:—

Castes.	Children.	Adults.		Proportion of children to 100		Proportion of 100 Adult Males to Females.
		Males.	Females.	Males.	Females.	
Mahomedans ... ..	355,977	418,504	376,767	85	95	90
Hindoos ... ..	108,280	115,004	100,499	94	108	67
Christians ... ..	714	2,532	477	28	150	19
Other Castes ... ..	17,989	39,088	36,077	46	50	92
Total... ..	482,960	575,128	513,820	84	94	89

From this table we learn that the Christian population of Sind is the most prolific; next rank the Hindoos, and the Mahomedans the last. The general impression on this point may perhaps be that the converse of this is true.

Comparing the fecundity of the population according to collectorates the following results are shown:—

Collectorates.	Children.	Adults.		Proportion of children to 100		Proportion of 100 Adult Males to Females.
		Males.	Females.	Males.	Females.	
Kurrachee ... ..	88,045	117,861	138,508	75	64	118
Hyderabad ... ..	208,247	234,365	192,794	89	108	83
Shikarpoor ... ..	159,101	193,577	160,996	82	99	83
Frontier Districts... ..	11,654	14,973	10,252	78	114	68
Thur and Parkur ... ..	15,913	14,352	11,270	110	141	78
Total... ..	482,960	575,128	513,820	84	94	89

If productiveness be a test of the healthiness and salubrity of a climate, then the Thur and Parkur Districts stand pre-eminent in this respect, next the Frontier Districts, and last the Kurrachee Collectorate, the Hyderabad and Shikarpoor Collectorates occupying intermediate places.

The productiveness of the Thur and Parkur Districts, which are chiefly peopled by Hindoos, bears out the result arrived at in the preceding table of the greater prolificness of the Hindoos as compared with Mahomedans.

(True Extract)

(Signed) M. J. M. STEWART,  
Assistant Commissioner.

C.

#### GENERAL RECAPITULATION.

In the Kurrachee Collectorate there would appear to be an excess of female over male Mahomedans under the age of 12 years of 23 per cent., and above that age of 31 per cent.

Of Hindoo females under 12 years there is also an excess over males of 20 per cent., and above that age of 3 per cent.

In the other collectorates the reverse is the case, which is more consistent with the general and natural order of distribution.

Excepting the Kurrachee Collectorate, longevity would appear to be the attribute of the female rather than the male by 13 per cent.

The number of persons, male and female, above 60 years of age is in the proportion of 6 to 100 of the whole population, which would show that the climate of the province is favourable to long life.

The total number of souls under 12 years of age is to those above that age as 4 to 10.

Supposing every male and female above the age of 12 years to be married, one child would be about the proportion of family to each.

Comment and inference might be proceeded with, but as it is in contemplation to test the past by another census, it would be premature to enlarge upon the results now before us, which, as they embody many obvious inaccuracies and discrepancies, render it highly desirable that another census should be taken.

(True Extract)

(Signed) M. J. M. STEWART,  
Assistant Commissioner.

From the Commissioner in Sind, No. 488, dated 19th November 1855—Submits a statement showing the population of Sind as taken at the census of the 20th March 1854.

RESOLUTION.—The Commissioner should be informed that it has been determined by Government that the next census of the Presidency shall be taken in July 1856, and that they consider that no other census of Sind should be taken in that year.

2. He should be furnished at the same time with a copy of the letter from the Director of Public Instruction, No. 408, of 26th August 1855, and of the forms proposed therein and approved by Government of returns for the next census, as also with a copy of the Government Resolution on the above letter, and informed that a further communication on the subject will be made to him so soon as the scheme referred to in paragraph 3 of that Resolution, and now under the consideration of the Director of Public Instruction, shall be submitted to Government.

To

THE COLLECTORS OF

*Bombay, Office of the Director of Public Instruction,  
18th February 1856.*

SIR,—Under instructions from Government, I have the honour to inform you that a Census of the Bombay Presidency is to be taken on the night of the 17th of July next and on the following morning.

2. The month of July has been selected, because the people are more likely to be found in their own houses at that season than at any other, and because the officers of Government are generally less burdened with work during the rains than during fair weather.

3. The 17th day of the month has been named because the moon will then be at the full, which may be convenient for enumerators and others, especially as regards the reckoning of vagrants and houseless persons, and those employed after dark out of doors.

4. The census is to be conducted in the manner described in this letter, and the results are to be recorded in tabular statements, of which the forms A to E are annexed.

5. In commencing a regular census, the first step to be taken is to divide the country embraced in the survey into convenient districts and sections, the extent of the smallest beats or sectional units being such that the population of each may be thoroughly registered by a single enumerator in a single night.

6. In this Presidency, the large divisions are sufficiently defined by the boundaries of collectorates, talukas, and villages. It is necessary, however, to decide as to the sub-divisions.

7. It has consequently been resolved that every village shall be divided into "enumerator's beats," no beat to contain much more than 100 houses, or 600 persons.

8. Villages and hamlets of a smaller extent than this are not to be sub-divided, but a separate enumerator is always to be appointed for each village and for each hamlet, however small it may be.

9. Villages or hamlets which contain many more than 100 houses, or 600 persons, are to be sub-divided into beats, each of which is to contain, as nearly as possible, the number of houses or persons just specified.

10. When the size of a village is not such as to necessitate the appointment of more than one enumerator, the offices of enumerator and inspector for that village are generally to be combined in the person of the village accountant.

11. When the size of a village or town is such as to necessitate the appointment of more than one enumerator, the accountant is not generally to be employed as one of the enumerators, but is to be appointed inspector over all the enumerators for that village or town.

12. When the size of a town is such as to necessitate the appointment of 15 or more enumerators, the accountant or other competent person who may be appointed inspector over the enumerators, is to be furnished with one or more assistants according to circumstances.

13. When the size of a town is such as to necessitate the appointment of 45 or more enumerators, one inspector is to be appointed over every 15 enumerators, and one Deputy Registrar is to be appointed over all the inspectors of that town.

14. One Deputy Registrar is also to be appointed over all the inspectors for each taluka.

15. And one Registrar is to be appointed over all the Deputy Registrars for each collectorate.

16. It is to be clearly understood that when the size of a town is such as to necessitate the appointment of a separate Deputy Registrar for it, that Deputy Registrar is to communicate, not with the Deputy Registrar of the taluka in which the said large town is situated (the latter officer has nothing whatever to do with the numeration of such large towns), but with the Registrar of the collectorate direct.

17. With the exception of separate Deputy Registrars, appointed for large cities, and their subordinate inspectors, every inspecting Census Officer, in any taluka is to communicate on matters relating to the census with the Deputy Registrar of that taluka, and with him alone.

18. As regards the duties of the officers who are thus to be employed.

19. It will be required of each enumerator that between the hours of 4 P.M., on the 17th, and 12 A.M., on the 18th of July next, he shall visit every house within his beat, and record in the household schedule, with which he is to be furnished (see accompanying Form A\*), every item of information therein noted in relation to every individual present in the house on that night; also that he shall record similar details relative to every vagrant or houseless person within his beat on the same night. Having made these entries between the specified hours, he is afterwards to sum columns, the contents of which require to be summed, and finally (within 3 days from the date of numeration) to place the completed statements in the hands of the inspector to whom he is subordinate.

\* Translations of this, and the other Forms in the vernacular languages, will be provided in such numbers as may be indented for by you.

See below, paragraph 26.

20. Of each inspector it will be required that on receipt of the completed statements from all the enumerators within his section, he shall immediately effect a careful examination of these documents, and prepare abstracts of the information contained in them, according to the accompanying Forms B, C, D, and E, and then transmit (within 10 days from the date on which he may receive the papers from the enumerators) both the original tables and the abstracts to the Deputy Registrar to whom he is subordinate.

21. The Deputy Registrar will be required, on receipts of the original tables or abstracts from all the inspectors within his taluka (or city), at once to effect a careful examination of these documents, prepare taluka (or city) abstracts, according to Forms B, C, D, E, and then transmit (within one month from the date on which he may receive the papers from the inspectors) the whole of the census records to the Registrar of the zillah in which he is employed.

22. The Registrars will re-examine the documents forwarded to them, prepare zillah abstracts of the same, and forward (within one month) the whole of the papers to this office.

23. It is unnecessary to say much as to the qualifications of the enumerators and inspectors. They should of course be as intelligent, active, and trustworthy as possible, and must all be good and quick writers in the vernacular languages of their respective districts, and accurate ready calculators; more than this cannot be expected of them, and is not required. The census of districts in which any particular caste or denomination of people largely predominates should of course be taken, if possible, by a member of the prevailing sect.

24. The Deputy Registrars must have all the qualifications named for inspectors, but need not have more except in the case of separate Deputy Registrars, appointed to large cities, who should have an adequate knowledge of English, in case the cities may contain European residents for whom English schedules are to be provided.

25. The Registrars must all have a good knowledge of English, and must be able to prepare all their zillah abstracts in that language with accuracy and despatch.

26. From the foregoing statements as to the duties and qualifications of officers to be employed in taking the approaching census, and length of time during which the services of each must be secured, you will be able, with the aid of the last census returns, to calculate exactly the number of each grade of officers required for your collectorate, and approximately the rates of remuneration for each.

27. On this subject, I will only remark that the Registrars for collectorates should be either the Collectors or one of their assistants, that the Deputy Registrars for large cities should be the Superintendents of Police, and that the Deputy Registrars for talukas should be the Mamuludars or Mahalkuries, or their first Karkoons, or some responsible officer of Government (as a Moonsiff) well acquainted with business and with the district in which he is employed.

28. None of these officers would require special remuneration, but all of them, while engaged in the work of examination and abstraction, should be relieved *pro tempore* of their other duties entirely, if possible, and should be allowed to employ on the details of revising and calculation, some member of their ordinary establishment as an assistant.

29. The inspectors and enumerators should be selected, as far as possible, from local accountants, and their assistants—intelligent officers of the Police Force—active karkoons employed in Government offices and other similarly qualified persons.

30. They should not receive special remuneration for this duty, if they be servants of the State by profession, but they should be absolutely relieved, for the time, from all other duties. If a sufficient number of qualified men cannot be found in the Government service, then other persons must be entertained, and paid for their work, at such rates as you may deem necessary, and suggest for the approval of Government in your reply to this communication.

31. One police peon should be told off beforehand to accompany each enumerator on his rounds; no enumerator, unless he himself be a Police officer, should be left without this provision.

32. I beg that you will be good enough to submit the estimates called for in paragraph 26 without fail before the 20th proximo. It is of the greatest consequence that your reply on this subject should not be delayed beyond that date, as the issue of the proper quantity of each kind of form cannot be definitively arranged, until your intended arrangements are known exactly, and in detail.

33. The printing of the forms in English and in the vernacular languages will proceed in the meantime, but their issue will depend on your reply.

34. I may notice, as regards enumerators' beats and inspectors' districts in the larger towns, that it is very desirable they should correspond, as far as possible, with any existing and well-known divisions established in the said towns, either for Police or other purposes.

35. It is also desirable, in the larger towns especially, that the agency of the Police should be employed in the numeration, if competent persons can be found in that force for that purpose. You will, perhaps, be kind enough to ascertain what assistance you may anticipate from that quarter, and also to what extent the public offices or Government schools, in different localities, may be in a position to facilitate your arrangements.

36. As the time for the census draws near, it will be proper that a notification should be issued, explaining its objects, and exhorting the people to co-operate with those appointed to carry out the operations. On this subject, however, as well as on all points relative to exact method of preparing the original returns, abstracting their contents and disposing of the records, a further and more detailed communication will hereafter be addressed to you.

37. You will understand that all your correspondence on this subject is on this occasion to be addressed to this office direct, and not through the Revenue Commissioner's.

38. When the last census was taken in 1851, four sets of forms were previously distributed—one set marked A, I. to IV., regarding population; a second set marked B, I. to VI., regarding mortality; a third set marked C, I. to IV., regarding migration; and a fourth set marked D, I. to IV., regarding agricultural stock, &c.

39. On the present occasion one set of papers only is forwarded, marked A to E, and all these forms relate to population alone.

40. The measures which it is proposed hereafter to adopt for the purpose of securing information on the other points will hereafter be announced to you in separate letters.

41. In conclusion, I beg again, particularly, to call your attention to the 32nd paragraph of this letter, and to request that every effort may be made to furnish all the information therein referred to by the 20th proximo (March) at latest.

I have, &c.,

(Signed) C. J. ERSKINE,  
Director of Public Instruction.

(True copy)

(Signed) C. J. ERSKINE,  
Director of Public Instruction.

---

No. 232 OF 1856.

To

W. HART, Esq.,  
Secretary to Government,  
General Department.

*Bombay, Office of the Director of Public Instruction,  
18th February 1856.*

SIR,—With reference to the Government Resolution forwarded with your Memo. No. 2700, of the 14th September last, I have now the honour to forward copies of letters which I have this day addressed to the Collectors in this Presidency, to the Commissioner of Customs, to the Adjutant General, and to the Superintendent of the Education Society's Press.

2. I have also the honour to forward copies of the Forms A to E in English.

3. As it was stated in paragraph 3 of the Resolution above quoted, that if I could prepare instructions for local officers in regard to the census, Government would be glad to authorize me to communicate with them on the subject; I have deemed myself at liberty to issue these preliminary instructions without further reference.

4. Referring to paragraphs 11 to 13, I beg to explain that there are not in this Presidency more than about 650 places, with a population of more than 2,500 persons in each, of which not more than 30 towns have a population of 10,000 persons each, and not more than half-a-dozen a population of 30,000 each.

5. It would have been easy to re-issue all the four sets of forms noticed in paragraphs 38 to 40, but the information required in some of them is forthcoming on the Government records—that called for in others cannot possibly be obtained without a previously existing system of registration. Such a system, as regards births and deaths, it is proposed to introduce forthwith, and Government have approved the forms of registers and abstracts for this purpose. But it will be wiser, I believe, to postpone the improvement until the approaching census shall have been completed, after which it may be introduced with less risk of confusion and annoyances; instructions to this effect will, therefore, be separately prepared. The migration returns, I beg to suggest, should be entirely discontinued; for, without a regular system of passports, it must be impossible to secure detailed information as to the exact movements of all the people in the interior, and the filling in of such returns as have hitherto been used all at once on occasion of a census, with figured statements professing to show precisely whence everybody came and whither everybody went during the previous twelve months, must do a great deal of mischief, both to those who concoct them without materials, and to those who consult them without care. Returns of agricultural stock should certainly still be required, but the old forms are not the best that could be devised. I have obtained a new set which contain much more information, and which nevertheless may be filled up, I believe, almost entirely from the village Chittas in the Tanna Kutcheries. These I propose to submit separately as soon as possible.

6. May I beg in the meantime to be informed whether any and what steps should be taken to secure a census of the Native States in political connection with this Government?

7. Trusting that these proceedings may be approved by Government,

I have, &c.,

(Signed) C. J. ERSKINE,  
Director of Public Instruction.

No. 232 of 1856.

To

THE DIRECTOR OF PUBLIC INSTRUCTION.

18th February 1856.

Forwards copies of letters addressed by him to the Collectors and other officials at the Presidency on the subject of taking the census in July next, also copies of forms for that purpose. Submits certain observations on the subject, and requests to be informed whether any and what steps should be taken to secure a census of the Native States in political connection with this Government.

RESOLUTION.—Government approve of Mr. Erskine's proceedings as reported in this letter.

The subject of Mr. Erskine's 6th paragraph should be referred to the Political Department, for consideration.

No. 736 of 1856.

GENERAL DEPARTMENT.

To

THE DIRECTOR OF PUBLIC INSTRUCTION.

SIR,—I am directed to acknowledge the receipt of your letter No. 232, dated 18th February 1856, and in reply to inform you that the Right Honourable the Governor in Council approves of your proceedings as therein reported.

2. The subject of your 6th paragraph has been transferred to the Political Department, for consideration.

1st March 1856.

No. 757.

Ordered that extract, paragraph 6, of a letter from the Director of Public Instruction, No. 232, dated 18th February 1856, and extract, paragraph 2, of Government Resolution, dated 27th idem, be transferred to the Political Department, for consideration.  
Resolution, 1st March 1856.

No. 234 OF 1856.

To

THE COMMISSIONER OF CUSTOMS,  
BOMBAY.

*Bombay, Office of the Director of Public Instruction,  
18th February 1856.*

SIR,—In forwarding the annexed copy of a circular addressed this day to the Collectors, may I beg to request that you will state what number of forms of each kind will be required to enable the Customs Department to take a census of all the population sleeping afloat at any of the bunders on this coast on the night specified.

2. Will you also kindly describe the arrangements which you would propose to make to ensure an accurate numeration by them, and to prevent a double numbering of people passing during the night from the shore to boats or *vice versa*.

3. You will understand that it is not intended to reckon any but persons actually passing the night of the 17th and 18th July afloat in the harbours, creeks or rivers of this Presidency.

4. Persons out at sea on that night are not to be afterwards added to the returns.

5. Will you kindly suggest whether any similar arrangements could be made, and how, at fishing villages which are not commercial bunders.

I have, &c.,

(Signed) C. J. ERSKINE,  
Director of Public Instruction.

P.S.—May I beg that you will let me have an answer before the 20th proximo.

(Signed) C. J. E.,  
D.P.I.

No. 235 OF 1856.

To

THE ADJUTANT GENERAL OF THE ARMY.

*Bombay, Office of the Director of Public Instruction,  
18th February 1856.*

SIR,—In forwarding the annexed copies of Forms\* to be used at the census to be taken on the night of the 17th and morning of the 18th July next, may I beg that you will inform me what number of each description of Form you will require for the numeration of all the cantonments, stations, outposts, &c., occupied by soldiers and camp-followers connected with the army of this Presidency.

2. You will observe that the Form marked A is one of which you may probably wish to have a larger supply than that specified in paragraph 2 of your letter No. 4594, of the 18th October 1854, to the address of the Secretary to Government, General Department.

3. May I beg that you will let me have an answer before the 20th proximo.

I have, &c.,

(Signed) C. J. ERSKINE,  
Director of Public Instruction.

To

THE SUPERINTENDENT OF THE BOMBAY EDUCATION SOCIETY'S PRESS.

Bombay, Office of the Director of Public Instruction,

18th February 1856.

SIR,—Will you be good enough to strike off, with the least possible delay, the proper number of each of the accompanying forms as per memo on the margin.

File of Form.	English.	Marathi.	Goozerathi.	Canarese.
A. ... ..	500	30,000	4,000	7,000
B. ... ..	200	25,000	3,000	6,000
C. ... ..	200	25,000	3,000	6,000
D. ... ..	200	25,000	3,000	6,000
E. ... ..	200	25,000	3,000	6,000

2. The copies of Form A in English are to be prepared in single sheets, as in the accompanying English specimen copy.

3. Copies of the same Form A in the vernacular languages are to be prepared in little books, containing 25 lines on each page, and 600 lines altogether. As in the accompanying specimen copies in Marathi, Gujerathi, and Canarese.

The English Form A should not be prepared in books, but in a single sheet.

4. Will you let me know, as nearly as possible, the date on which you expect that the printing of them will be completed, and announce the completion of each set from time to time.

5. Instructions as to the distribution of the forms will hereafter be forwarded to you.

I have, &c.,

(Signed) C. J. ERSKINE,  
Director of Public Instruction.

(True copy)

(Signed) C. J. ERSKINE,  
Director of Public Instruction.

## GENERAL NOTICE.

Every occupier or person in charge of a house is requested to furnish full information upon all the points specified in this statement to the enumerator by whom it may be brought to his house, between the hours of 4 P.M. on the 17th and noon on the 18th of July 1856.

If the house be sublet to different persons or families in separate storeys or apartments, the occupier or person in charge of every such storey or apartment is requested to furnish full information in regard to his portion of the house separately.

*Notice to Enumerators, No. 1.*—On completing the enumeration of every family, draw a line under the last name in column 8, as in the example below.

*Notice to Enumerators, No. 2.*—In filling in the *castes* it is to be borne in mind that Purdesee, Marwaree, Mulbaree, Kamathee, Ghatee are not the names of *castes*, but territorial designations.

The names of the particular sub-divisions of caste of Hindoo and low caste persons are required; also it is to be noted, that most of the Portuguese-speaking Christians are *Native Christians*, and not Portuguese.

*Notice to Enumerators, No. 3.*—Columns from 9 to 21 to be filled in by figures in the following example:—

### *Example of Household Return.*

No. of Families.	No. of Persons.	Persons Present.	Sex.	Age.	Caste or Race.	Occupation.	Place of Birth.	Condition.		Can Read.	Can Write.	Infirm.
