## EXPLANATORY MEMORANDUM.

### FORM A.

#### AREA CULTIVATED AND UNCULTIVATED.

Column 4 was inserted by the Statistical Conference on the ground that the first step in improvement of returns as a whole must be the separation of fairly accurate statistics from those that can, at best, only claim an approximation to accuracy.

*Madras.*—The figures in column 4 represent the areas of permanently settled zamindari estates for which statistics are not available at present, as well as the areas of ináms in zamindaris. Ináms are chiefly lands which have been enfranchised and assessed to quit-rent: there are also a few inám lands which are consecrated to religion or charity, or which are exempt from assessment. Statistics for both these classes of land will be collected as soon as the Zamindari Karnams Bill, now before the local Legislative Council, becomes law.

*Bombay.*—The figures entered in column 4 are chiefly for Government and alienated villages which have not been surveyed.

*North-Western Provinces.*—The areas given in column 4 are chiefly those for the permanently settled districts, for which arrangements are now being made to secure reliable statistics. Column 6 has been subdivided to show (a) the area by survey, and (b) the area by the village papers, as the Local Government consider that for the subsequent returns of crops, &c.; the latter area must be accepted. These areas vary, sometimes to a very considerable extent, from year to year, owing chiefly to the action of rivers, and unless both the survey and village-papers areas are given, there will be discrepancies between the returns of different years and the different returns of the same year.

*Oudh.*—Column 6 has been subdivided in the same manner in the case of Oudh as in that of the North-Western Provinces.

The area in current fallow (column 8) could not be given for 1884-85 with any accuracy. It will be furnished for 1885-86.

*Punjab.*—Column 6 has also been divided to show the area by the village-papers and by survey. The Statistical Committee appointed by the Local Government for the consideration of this and the other forms remark that, "however accurate the village or patwari survey of the province may be, it is impossible that its aggregate result in any district shall agree with the Surveyor-General's return. The Surveyor-General calculates the area of the district in block: the patwari survey is by fields and villages: at the best, a difference of one per cent. between them is unavoidable. And in the Punjab there is another source of divergence which operates in many cases: we allude to the action of rivers. The patwari survey does not always include the beds of the rivers, and where it does not, as also in cases where the district boundary varies with the deep stream, the agreement of the district returns with those of the Survey of India is impossible."

*Central Provinces.*—Column 4 represents the statistics of the area held in zamindari right. The tracts which are held in zamindari right, *i.e.*, by persons intermediate between the village Málguzárs and the Government, form a considerable portion of the area of no less than eight districts in these provinces, comprising as a rule wild and hilly country at present of very low productiveness. Some of them are held revenue-free, but the majority are charged with a small annual payment to Government as land revenue. They were for the most part settled summarily, and without the preliminary revenue survey. The Chief Commissioner states that "under the settlement contract the zamindars are obliged to submit annual returns showing the extent of cultivation and the rental of each village. It is obvious, however, that, in the absence of any definite statistics of area to start with, the information which these returns can yield is of very doubtful value. Their credit is further impaired by the circumstances under which they are prepared. The estates are as a rule far too poor to afford the maintenance of a regular village land record staff, and the annual returns are in consequence written up on contract terms by men whose services

are temporarily hired for the purpose. It would of course be altogether inadvisable that no information should be forthcoming respecting the progress of cultivation in tracts which together constitute no less than one-third of the provincial area, and it seems proper to insist upon the submission of these returns, inaccurate though they must necessarily be, if only in order to keep alive the right of Government to demand the submission of more accurate information as the estates progress in prosperity. The statistics of the area held in zamindari right should be kept separate from those of area held by Málguzárs direct from Government (Khálsa), since there is no reason why the latter should not be made tolerably accurate, while it is impossible that the former should be rendered so during the continuance of the present settlement."

At the commencement of the current year a staff of patwáris (village accountants) was appointed in all the 18 districts of the Central Provinces. Formerly these patwáris existed in 11 districts only. The Chief Commissioner will doubtless now be in a position to supply improved statistics.

*Assam.*—In column 4 are entered chiefly the areas of the hill districts and of the permanently settled parts of the districts of Goalpara and Sylhet. The hills of North Cachar, and those temporarily settled portions of Sylhet for which no village-accountants as yet exist, have also been included in column 4.

Columns 10 and 11 are bracketed, because it is impossible till the province has been cadastrally surveyed to distinguish culturable waste from land incapable of cultivation.

#### IRRIGATION.

*Madras.*—All lands artificially irrigated, whether classed as wet or dry, and whether paying water-rate or not, are shown in this statement. Lands dependent on falling rains (Mánavári) are excluded, though they may appear as wet in the accounts.

*Bombay.*—No return furnished. It is explained that the demands of the Statistical Conference necessitated the prescription of a totally new village form of considerable intricacy. Most of the Collectors expressed their inability to fill in the form for 1884-85. It is hoped that it may be submitted next year.

*North-Western Provinces.*—The areas irrigated from private canals and tanks are not shown separately, as no statistics are available for them. Such canals and tanks are very few in number.

*Assam.*—The return will not be compiled for this province. The small area irrigated by the people themselves from hill-streams has never been distinguished from other cultivation, and possesses no importance in relation to the general agricultural statistics of the country.

#### FORM C.

##### SURVEYED AND ASSESSED AREA.

Several provinces have found it impossible at present to fill in columns 11 and 12 of this form, there having been no separate census of the fully assessed and imperfectly assessed areas.

*North-Western Provinces.*—This form will be quinquennial. The revenue is fixed for long periods, and changes of population are so slowly appreciable, that annual returns would show but little variation.

#### FORM I-E. 3.

##### VARIETIES OF TENURE HELD DIRECT FROM GOVERNMENT.

The compilation of an abstract for the Empire has been found impracticable owing to the want of uniformity in the preparation of some of the provincial returns.

*Bombay.*—The form prescribed by the Government of India was unsuited to the conditions of the presidency, and the Local Government therefore decided upon substituting two special forms. The Director of the Agricultural Depart-

ment has thrown these two forms into one, but pronounces the result very unsatisfactory.

*Oudh.*—The division of tenures prescribed by the Government of India was considered unsuitable to the special conditions of the province. The Local Government are of opinion that zamindaris, pure and simple, should be distinguished from talukas, and that talukas should be subdivided according to the law of succession applicable to them.

*Punjab.*—This return will be prepared quinquennially only for the Punjab.

FORM I-E. 5.

REGISTER OF TRANSFERS.

*Madras.*—Information as to transfers of tenant area is not available.

*Bombay.*—The Committee appointed by the Local Government to consider the forms suggested that this form should not be filled in, as no useful information is forthcoming. They state that “in this Presidency, we could not prepare the information for the tenant area in the form required. In the village form transfers are recorded, and in raiyatwari Khalsa Government villages the details can be given by a subdivision of the transfer column into—(1) Transfers by order of Court, (2) Transfers by private contract or gift, and (3) Transfers by inheritance. We do not think the information would be of value. The conveyance of the proprietary rights of a ‘survey-holder’ does not necessarily carry with it a corresponding transfer in the accounts. The right of occupancy is distinct from the other proprietary rights in the land. A man may possess the right of occupancy and yet have no share in other rights in the land. No doubt it was on account of the small significance of recorded transfers that they are omitted from the District Form which summarizes the other details of the Village Form in which they appear.”

*North-Western Provinces.*—It was found impracticable to prepare this form for 1883-84. It will, however, be furnished for 1885-86. The transfers by tenants who have a statutory or recognized power of transfer cannot be given, as no record of such transfers is kept. In the permanently settled districts alone, those tenants only who are defined in Act XII of 1881 as tenants at fixed rates possess complete a statutory right of transfer. Elsewhere ex-proprietary and other occupancy tenants have no statutory right of transferring their holdings to persons other than those who are or have been co-sharers in the tenures. Their holdings are further entirely exempt from sale by order of Court.

*Oudh.*—Tenant right scarcely exists in Oudh, and in this respect the statement is virtually blank for that province.

FORM III-D. 2.—AGRICULTURAL STOCK.

*North-Western Provinces.*—The statement could not be submitted this year. It will be prepared for 1885-86.

*Punjab.*—The return will be compiled quinquennially for this province.

*Central Provinces.*—No return has been compiled for 1884-85, as it was considered that any figures which could at present be given would be of very doubtful value.

*Assam.*—There are no data from which this form can be prepared, and the Chief Commissioner has decided not to submit it for the present.

REVENUE AND AGRICULTURAL DEPT. ; }

Simla, the 16th August 1886. }

32

(a) The difference between column 8 and the sum of the four succeeding columns may be accounted for by the area irrigated at both harvests (1,236,742 acres).  
 (b) Complete details of irrigation are not available.  
 (c) The difference between column 8 and the total of columns 9 to 12 represents the area irrigated in certain districts, for which no details of crops are available.

(d) Includes "Private canals."  
 (e) Ditto Tanks.  
 (f) The difference between column 8 and the total of columns 9 to 12 represents the area irrigated by canal, for which no details of crops are available.  
 † Figures are given for 1883-84, later statistics not being available.

\* There are no unoccupied assessed lands in the district, and hence the figures in Columns 9 and 10 are the same.

† These consist of lands known as "Karar" lands in Cannanore and some islands of the Laccadive group.

‡ Statistics are not available for Columns 13 and 14.

§ Includes 4,608,665 acres of zamindari lands of the Nellore and North Arcot Districts for which no information required by Columns 4 and 5 is available.

FORM C,—continued.

BOMBAY.

3.—Surveyed and Assessed Area in 1884-t

No.	DISTRICT.	Total area by survey, less Feudatories.	Deduct area not fully assessed, including estates assessed at privileged rates.	Balance of area fully assessed.	Total land revenue excluding cesses of district (column 2).	Population of district (column 2).	Land revenue per head of population (columns 6 and 7).	Land revenue assessed on fully assessed area (column 4).	INCIDENCE OF LAND REVENUE (COLUMN 8) ON FULLY ASSESSED AREA (COLUMN 4) PER ACRE		Population of fully assessed area.	Land revenue assessment per head of population of fully assessed area (column 4).	TOWNS OVER 10,000 INHABITANTS.	
									For total area.	For cultivated area only.			No. of towns.	Aggregate population.

\*NOTE.—Survey area entered according to Census report. Since the census the Sirsa district has been broken up, part being added to Hissar, part to Ferozepore. In this statement the whole of Sirsa is shown with Hissar, as the details of divisions are not known at present. In all districts the area in column 4 differs from that in column 2, the former being according to Patwari's returns.

Note.—The total area for each district and the areas for Government and inam villages and of zamindaris in Ganjam has been adopted from the latest figures furnished by the Superintendent of Revenue Survey. In the case, however, of inams in all the other districts and of zamindaris in Godavari, Tanjore, South Arcot, Coimbatore and Malabar, the area given in the Collectors' returns has been adopted.

FORM A—continued.

BOMBAY.

3.—Area cultivated and uncultivated in 1885-86.

(a) Includes area irrigated by private canals.  
 (b) Includes area irrigated by wells and other sources.  
 (c) The difference between column 8 and the sum of the four succeeding columns may be accounted for by the area irrigated at both harvests.

(d) The difference between column 8 and the total of columns 9 to 12 represents the area irrigated by canal, for which no details of crops are available.  
 (e) Private canals (except those in Kumaon) included under Government canals.  
 (f) Included under "Other Sources."

N.B.—(a) "Private canals" (except Kumaon) have been included under "Government canals" and "Tanks" under column headed "Other sources"  
 (b) The difference between column 8 and the sum of four succeeding columns (827,736 acres) may be accounted for by the area irrigated at both harvests.  
 (c) Benares includes Chandauli taluk only.

\* There are no unoccupied assessed lands in the district and hence the figures in columns 9 and 10 are the same.

† These consist of lands known as "karar" lands in Cannanore and some islands of the Laccadive group.

‡ Includes also the population of the zamindari and Inam Villages in the District of Madras.

§ This incidence is obtained without taking the Malabar figures into account, information for column 10 for this district not being available.

¶ Includes 5,568,665 acres of zamindari land of the North Arcot and Madura Districts for which particulars required by columns 4 and 5 are not available. Statistics are not available for columns 13 and 14.

FORM C—continued.

(a) Excluding Hata Tahsil which is under settlement

(b) Excluding Harria and Basti and part of Khalabad Tahsils under settlement

(c) Excluding Balaha, Gopajit East and Khareil for which figures are not available.

Difference from last year's figures in the case of Gorakhpur, Basti and Balaha districts is due to a difference in the area to which returns of the present and the preceding years pertained, while the difference in the case of Saharanpur, Meerut, Agra, and other districts is for the most part due to greater accuracy with which returns of the present year have been collected.

\* Private Canals except those in Kumaun have been included under "Government Canals."

† The difference between column 8 and the sum of the four succeeding columns may be accounted for by the area irrigated at both harvests.

‡ Tanks included under "Other sources"  
§ There is no canal irrigation in Ajmere-Merwara.

(a) Includes area irrigated by private canals.  
(b) Includes area irrigated by wells and other sources.

Irrigation in 1886-87.

The lands in the Malabar district are all manavari (rain-fed), but the figures given above relate to the occasional irrigation with water from private canals or watercourses, wells and tanks when the crops are threatened with a drought.

Irrigation in 1886-87.

\* The high price of chillies in Ganjam during the year is reported to be due to the failure of the crop, and that of garlic to want of sufficient stock with the merchants at the end of the year.

\* Includes whole Inam villages  
 † The return being quinquennial, the figures for 1883-84 have been shown.  
 ‡ The return being quinquennial, the figures for 1884-85 have been shown.  
 § Area returned by village papers (column 6 (b) of Form A).

N.B.—(a) Bombay Presidency Proper and Sind have been shown separately in this return, as the statistics for Sind have been collected on a principle different from that followed in the case of the Presidency Proper.  
 (b) The difference between the figures in column 2 of this form and those given in column 2, less column 3 of Form A, is due (1) to the net area returned by village papers (Col: 6 (b), Form A) having been entered in column 2 against the Punjab in this form, and (2) to the figures for 1883-84 and 1884-85 (instead of those for 1886-87) having been shown against the North-Western Provinces and Oudh respectively.

FORM C.—continued.

opposite A 1—(4). The net areas so dealt with in the case of other Provinces are those entered opposite A 1—(3).  
Canals" and "Tanks" under "Other sources."

the area irrigated at both harvests in Bombay, North-Western Provinces and Oudh, having been shown.

(e) Separate details are not available.

(f) Exclusive of 25,329 acres irrigated in the Sagar district, details of which are not available.

(g) There is scarcely any double cropped area in Berar.

\* The acreage under crops dealt with in table A 3 is exclusive of the areas for which statistics are not available. † Includes Cow buffaloes.  
 (a) Area by Revenue survey, inclusive of feudatory and tributary States. (e) Includes the area under culturable waste other than fallow in Assam.  
 (b) Includes area irrigated from private canals. (f) Includes area irrigated from tank =  
 (c) Includes area irrigated from Tanks and Wells. (g) Not reported  
 (d) The difference between the total area irrigated (A 2-6) and the total area of crops irrigated (A 2-7) is due to the exhibition in the latter column of the area irrigated at both harvests. (h) Separate statistics not available.

in each Province of British India during the year 1891-92.

(v) Includes goats for the districts of Bellary, Anantpur, Madras, and Tanjore.  
 (j) Includes cows.  
 (k) Included under "Bulls and Bullocks."  
 (l) Includes cow buffaloes and young stock.  
 (m) Included under male buffaloes.  
 (n) Includes goats.  
 N.B. (1) - Statistics of stock entered under Bombay are exclusive of Sind, for which the information is not available.  
 (2) - Statistics of stock entered under Assam relate to six districts only, statistics for the remaining districts not being available.  
 (3) - The difference between the total areas shown under Bombay opposite columns (1) and (2-a) of table A 1 and the totals of district areas shown in the corresponding columns of the provincial table A 1 is due to the inclusion in the former table of the areas of feudatory and tributary States which are not shown under any districts in the latter table they being situated within the Presidency proper but outside limits of any British Districts and not in Political relation with the Foreign Department  
 (4) - In the case of Madras the total of columns 1 to 5 of A 2 does not correspond with the area shown in column 4 of A 1. This has caused a corresponding difference in the figures entered in the column "Total."

(e) Included under sheep  
 (f) Includes area under non-food crops.  
 (g) Includes 1,384 acres under miscellaneous crops in large istemrar villages, details of which are not given  
 (h) Includes 60,160 acres of which details are not available.  
 (i) Includes cows for Punjab, Assam and Berar.  
 (j) Includes cow buffaloes for Punjab and cow buffaloes and young stock for Assam, and Berar.  
 (k) Includes goats for Punjab, Assam, and Berar.  
 (l) Includes the information not being available.

\* The return for Upper Burma relates to the year ending 31st March 1893.

† The previous year's classification has been modified under the recent conveyance of proprietary (Malguzari) rights on certain musafirs in the district.

TABLE C—continued.

Incidence of the Land Revenue on Area and Population in the year ending 31st March 1892.

LOWER BURMA.

DISTRICTS AND CLASS OF TENURE.	Total area by Survey less feudatories.	Deduct area not fully assessed, including estates assessed at privileged rates. The return for Coorg relates to the year ending 31st March 1892.  
The return for Ajmere-Merwara relates to the year ending 30th June 1892.

\* The return for the Mysore State relates to the revenue year of fifteen months ending 30th June 1892.  
Returns for other Native States not available.

---

**APPENDIX.**

**Statements illustrative of the state of Tea, Coffee, Cinchona and Cotton cultivation in  
British India.**

---

## NOTE.

---

Special statements showing the state of tea, coffee, cinchona, and cotton cultivation in India are for the first time appended to the Returns of Agricultural Statistics of British India. These statements were formerly incorporated in the Volume of "Statistical Tables relating to British India" annually published by the Government of India in the Department of Finance and Commerce. Their publication in that volume ceased in 1888, but the returns themselves were continued, and as they contain information of some interest, it has been decided to publish them as an appendix to the Agricultural Tables.

The present statements exhibit figures from the year the Department of Finance and Commerce ceased to publish them.

The statistics of area in these statements differ in many instances from those exhibited in Statement A, the reason being that the two sets of returns do not cover the same period, and the special returns include areas for which reliable statistics are not available.

## Statement illustrative of the state of Tea cultivation

\* Incomplete.

† Crop not harvested as the plant did not thrive.

‡ The decrease in number from 98 to 91 is due to some having been clubbed into one.

(a) Not distinguished as "Black" or "Green" in the local return.

(b) These plantations were not worked during the year.

(c) Picked tea sent to Rangoon.

(d) In this year the Punjab tea did not flourish as the weather was not favourable. The leaves of the tea plants were destroyed by hailstones.

(e) Worked for 3rd of the season only.

in British India during the calendar years 1888 to 1891—concl.

									TOTAL BRITISH INDIA.

\* Crop not harvested as the plant did not thrive.  
 † Owing to the gradual decrease in the yield of tea the six tea gardens shown for Dacca in the return for 1890 were closed before the commencement of the season of 1891.  
 (a) Not distinguished as "Black" or "Green" in the local return.  
 (b) These plantations were not worked during the year.  
 (c) Of the seven plantations shown in the previous year five decayed, deterioration in fertility of the soil being assigned as the reason for it.  
 (d) Tea gardens have been abandoned.  
 (e) Figures for the Upper Chindwin district are more or less conjectural.  
 (f) Worked for only 3/4ths of the season; if fully worked the outturn would have been 3,000 lb or an approximate yield of 375 lb per acre.  
 (g) Incomplete.

\* No information available.

† These totals represent only the figures given by the Planters. According to the village accounts they amount to 10,330 acres and 20,659,040 plants during 1888-89; 9,420 acres and 18,839,220 plants during 1889-90; and 10,99½ acres and 21,983,460 plants during 1890-91.

(a) Planted amongst 23 acres of coffee and as avenues, those amongst the coffee have been abandoned, and are dying out.

(b) This quantity is exclusive of 349,931 lb which is the outturn for South-East Wynaad, Nilgiri District, for which particulars are not given against each species.

(c) The cinchona plants have almost been abandoned and replaced by coffee plants, and have died out.

(d) The increase over the figures of the previous years is due to the greater number of returns received from Planters during the year.

(a) Cinchona is grown in the spaces between coffee trees in coffee estates, but does not occupy any ground which would otherwise be planted with coffee. (b) The cultivation of cinchona has practically ceased in Coorg. The trees are in many places being uprooted, as their cultivation is not now remunerative, and as they have turned out to be injurious to coffee when they are planted as shade trees. (c) The increase from 50,350 in 1890-91 to 154,502 is due, not to any actual increase in the cultivation, but to the supply of more complete information from the planters concerned.

Cotton.

Comparative Statement showing the progress of Cotton Cultivation in the several Provinces of British India, and in the Native States, during the years ending 30th June 1888, 1889, 1890, and 1891.

(b) These figures are for the official year ending 31st March and represent exports by sea only.  
 (c) These figures are for the official year ending 31st March and represent exports by rail only.  
 (d) These figures represent exports, both external and internal, of cleaned cotton.  
 (e) These figures include in some cases exports from one district to another within Mysore which are not separately distinguished in the local statements.

(f) These figures represent imported cotton exported by sea only.  
 (g) Estimated by dividing the total value of exports by the total quantity exported.  
 (h) Figures taken from the daily registers of the Customs Department.  
 (i) This represents exports by sea and rail.  
 (j) This includes the traffic by road and rail as well as the trade by sea.  
 (k) Exports from Calcutta by river, rail, road and sea.

repeated. + The acreage under crops dealt with in Section A 3 is exclusive of the areas for which statistics are not available.

(b) The difference between the total area irrigated (A 2-6) and the total area of crops irrigated (A 2-7) is due to the omission from the latter column of the crop areas irrigated in the Mandla District.

(c) Separate details are not available.

(d) Represents the areas irrigated from private canals in the Kumaun District only; the areas irrigated from private canals in the other districts have been included under Government canals.

(e) Included under "Other sources".

(f) The difference (190 acres) between the total net area cropped shown in column 5 of Section A 2 and in column 3 of Section A 3 occurs in Upper Burma from which no explanation has been received.

N.B.—(1) The net areas dealt with in the North-Western Provinces, Oudh, the Punjab, and the Sambalpur District of the Central Provinces. (2) In the North-Western Provinces "Private Canals" except in Kumaon have been included under "Government Canals". (3) The difference between the total area irrigated under "Government Canals" and the total area irrigated under "Private Canals" is due to the fact that the statistics under Ajmere-Merwara refer to the K. area (revenue-paying) area only. (4) The acreage under crops dealt with in A3 is exclusive of the areas for which statistics are not available. (5) The statistics under Ajmere-Merwara refer to the K. area (revenue-paying) area only. (6) In the case of the Central Provinces the total of items 1 to 5 in A 2 does not correspond with the net area given in A 1—by village papers, while those given for the other districts relate to the net area by survey.

(a) Exclusive of Feudatory and Tributary States.  
(b) Includes area irrigated by private canals.

(c) Includes area irrigated by wells and other sources.  
(d) Exclusive of Sindh statistics for which are not available.  
(e) For Sambalpur District only.

Carts, Ploughs, and Boats in each Province of British India during the year 1889-90.

Provinces in this statement are those entered opposite A-1-(4). The net areas so dealt with in the case of other Provinces are those entered opposite A1-(3). and "Tanks" under "Other sources." the area irrigated at both harvests in Bombay, North-Western Provinces and Oudh having been shown.

(3) net area (by Survey Department), owing to the fact that the details given in items 1 to 5 of A 2 refer, in the case of the Sambalpur District, to the net area given

(f) Not reported. | (g) Separate details are not available. | (h) There is scarcely any double-cropped area in Berar.

The area of cultivated land in the portion of the Thayetho district transferred from Upper Burma, on which no land revenue is assessed, was not included here against Thayetho in column 4. Therefore, the area of fallow land in this part of the district which amounted to 64,538 acres was not deducted from the total in column 4 for the purpose of working out the figures in column 10. The population of portion of district in Upper Burma.

MADRAS

a) Exceeds the area shown in column 1 of Table A 1, minus Feudatory and Tributary States by 18,991 acres, (vide note (b) in page 57).  
 b) Information not furnished.  
 c) Exclusive of Meighat taluk.  
 d) Exclusive of Lohardugga district.  
 e) Exclusive of Jaipalguri and Lohardugga districts.  
 f) Vide note (a) in page 57.  
 g) Shows the area of estates borne on the Revenue Roll of the district wholly situated within the district boundaries or not and does not include lands of estates partly situated within the district boundaries but borne on the Revenue Roll of another district. This accounts for the difference between column 4 of this return and column 1 of Table A 1 less column 2(a).  
 h) Shows the area by village papers plus the area for which returns exist (vide columns 2 (b) and 4 of Table A 1).  
 i) Shows the area by village papers (vide column 4 of Table A 1).  
 j) Vide note (d).  
 k.—The provincial returns do not relate to the same period. The returns for Madras and Ajmere-Merwara relate to the year ending 30th June 1893, those for the Western Provinces, Oudh and the Punjab to the year ending 30th September 1893, and those for Upper Burma, Lower Burma, Assam, Bihar, Coorg and Madras to the year ending 31st March 1893, the return for the Bombay Presidency relates to the year ending 31st July 1893 and that for the Central Provinces to the year ending 31st May 1893.

Returns of Agricultural Statistics of British India 1895. \$ 1918 183-94.

\$ 1909

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

10

MEMORANDUM.

In 1866 Tabular forms proposed by a statistical committee were prescribed by the Government of India for general adoption as appendices to the annual Reports on General Administration.

In 1884, at the instance of the Secretary of State for India, certain of these forms, which related to agriculture, land and tenures, were reconsidered and, after examination and discussion by a conference of Agricultural officers, modified. The modified returns comprised eight tables, which were compiled for the first time for the year 1884-85 and published under the title of 'Returns of Agricultural Statistics of British India.' These tables continued to be prepared and published annually till 1887-88, when there was a re-arrangement of the headings of four statements dealing with area, irrigation, crops and agricultural stock, without however any modification of substance.

In 1891 the tables were again subjected to revision and to some extent recast. The revised series of 1891 has, with a few unimportant alterations, been maintained up to the present time.

The following schedule compares the three series of 1866, 1884, and 1891:—

1866.	1884.	1891.
IA. 1.—Area cultivated and uncultivated.	A.—Area cultivated and uncultivated.	A.—Total acreage, classification of areas, irrigation, current fallows, and stock.
IIID. 1.—Crops cultivated.	B.—Crops cultivated	
IIID. 2.—Agricultural stock	IIID. 2.—Agricultural stock	B.—Prices of produce.
IIIE. 1.—Prices of produce	IIIE. 1.—Prices of produce	
IE. 2.—Surveyed and assessed area.	C.—Surveyed and assessed area.	C.—Incidence of the land revenue on area and population.
IE. 3.—Varieties of tenure held direct from Government.	IE. 3.—Varieties of tenure held direct from Government.	D.—Varieties of tenure held direct from Government.
IE. 4.—Varieties of tenure not held direct from Government.	Discontinued	Discontinued.
IE. 5.—Register of transfers.	IE. 5.—Register of transfers.	E.—Register of transfers of landed property.
IIID. 3.—Rates of rent and produce.	Discontinued	Discontinued.

The notes which follow explain the changes which have been made since 1866 in the tables now published, the general instructions for the compilation of the existing series (*vide* "General Notes"), and the peculiarities (if any) in the method adopted in each province in filling up the returns (*vide* "Provincial Notes"). Figures of particular districts requiring explanation are dealt with in foot-notes to the tables.

The only Native Administration which furnishes the returns at present is that of Mysore, from which State they have been received since 1886-87. For the permanently settled Province of Bengal no figures have been available until very recently. Such statistics as can now be supplied (or their successors) were included for the first time in the Imperial Returns based upon accurate surveys or village papers, and regarded as estimates.

## TABLE A.

This table is a combination, in somewhat modified form, of the four tables A, B, Irrigation Form, and III-D-2, prescribed by the Government of India in 1884. It is divided into four sections, and was first published in its present form in 1887-88.

## TABLE A-I.

In this section the total areas of districts are dealt with, and the areas for which statistics are, and are not available, are distinguished.

The corresponding tables of the earlier series are I-A-1 of 1866 and A of 1884. The headings differ as shown below:—

	1866 I-A-1.	1884 A.	1891 A-1.
Total area in square miles .		Area shown by the Survey Department in acres. Deduct— (a) Feudatory and Tributary States. (b) Area for which returns are otherwise not available. Net area dealt with in this return.	Area according to Professional Survey in acres. Deduct— (a) Feudatory and Tributary States. (b) Area for which no returns exist. Net area by Professional Survey. *Corresponding area in village papers.

## GENERAL NOTES.

The year to which the Provincial returns relate ends on different dates in different provinces: in Madras, the North-Western Provinces, Oudh, Upper Burma, Lower Burma, Ajmere-Merwara and Mysore the year ends on 30th June, in Bombay on 31st July, in the Punjab on 30th September, in the Central Provinces on 31st May, and in Bengal, Assam, Berar, Coorg and Manpur on 31st March.

*Column 1.*—The Professional Survey is that carried out by the Survey of India Department in Northern India, and by the corresponding Departments in the Southern Presidencies. The Provincial areas shown in this column are exclusive of Native States in direct political relations with the Government of India in the Foreign Department, but are in most instances inclusive of Feudatory or Tributary States politically controlled by Local Governments.

*Column 2 (a)* shows the area of any Feudatory or Tributary States included in column 1.

*Column 2 (b).*—In this column is deducted the entire area (exclusive of Native States) for which the statistics required for the second and third sections of the table are not forthcoming in whole or in part. It comprises chiefly estates held in permanent settlement or on privileged tenure, which have not been cadastrally surveyed and which possess at present no agency for the annual collection of agricultural statistics. As surveys extend and the organisation of village statistical establishments develop, the area in this column is reduced, and that dealt with in sections 2 and 3 correspondingly increased.

*Columns 3 and 4.*—Column 3 is a check on the accuracy of column 4. In the latter, "Village papers" means "the papers prepared by the village accountants." They do not in several provinces relate to the whole area included in column 3; for instance, the village returns often do not include the Forest areas. In such cases, column 4 must be taken to be the total area for which returns are available, corrected by the village papers in respect of the areas for which such papers exist. The areas of provinces and districts which are calculated from village papers are necessarily somewhat different from those given by the Survey Department, (a) because while the survey area of a district or province is calculated in block, the area by village papers represents the added total of field and village areas, and (b) because the system followed as regards the inclusion or exclusion of areas covered by water, etc., is not uniform in the two sets of returns.

## PROVINCIAL NOTES.

*Column 1.*—Shows the area as ascertained by the local Survey and Settlement Department, supplemented for tracts which have not come under the operations of that Department.

GRAND TOTAL, INDIA	18,017	and Cochin States have for the first time been included in the
	1,601	shown in the returns of the North-Western Provinces and Oudh and the
	569	ely.

*Column 2 (b)*—Exhibits chiefly the area of wild hill tracts and of tracts permanently settled which possess no agency for the collection of statistics.

*Column 1*—Shows the area as ascertained by the local Survey and Settlement Department.

*Column 2 (b)*—The area shown in this column in the return for 1892-93 related to the unsurveyed tract of the Melghat Taluka which has not yet come entirely under the operations of the local Survey and Settlement Department.

*Column 4*—The areas shown in this column are based on the old native "Bhatties"—a measurement the extent of which varied with the quality of the soil,—but 100 Bhatties roughly equal 3 acres.

*Column 1*—Shows the area as given in the settlement records. Previous to 1890-91 the area of privileged tenures known as jagir and istamrari villages were excluded from this column, while in 1890-91 jagir and minor istamrari areas were included, and from 1891-92 the entire area of the province has been shown.

*Column 1*—Shows the area ascertained by the local Survey and Settlement Department supplemented, for tracts for which survey areas have not yet been reported, by the areas given in the Revenue Accounts.

*Column 2 (b)*—Exhibits the areas of Inam villages for which no detailed returns exist.

TABLE A-2.

The first part of this section deals with the classification of the area shown in column 4 of section A-1 and gives the portions respectively—(columns 1 and 2) withdrawn from cultivation by inclusion under forests or for some other reason, (3) cultivable land available but not yet taken up, (4) land occupied but not under crop during the year of report, (5) the net area under crop, *i.e.*, after deduction of the area cropped more than once in the year. The second part (columns 6 and 7), which was first prescribed in 1884, gives the area aggregated from various sources, to which is added a statement of the distribution of the said area amongst various crops.

The headings which have undergone alteration since 1866, are noted below:—

	1866	1884	1891
	I-A-1	A	A-2.
Cultivated	. . .	{ Actually cropped . . . Current fallows . . .	. . . Net area cropped. Current fallows.
Culturable	. . .	. Available for cultivation	. Culturable waste other than fallow.
Unculturable	. . .	. Not available for cultivation.	. Not available for cultivation.
Unappropriated waste.	cultivable	Omitted . . .	Omitted.
Communications.		Ditto	Ditto

• Lands covered by water, roads, and rail-roads, which are separately shown in the form of 1866, are included in column "Not available for cultivation" in the forms of 1884 and 1891.

#### GENERAL NOTES.

*Column 1*—"Forests" means in the returns of 1891 "any land classed or administered forest under any legal enactment dealing with forests," and in those of 1884, all Government forests and forests administered under any Forest Act. Any cultivated areas which may be within such forests may be excluded and shown in column 5 (net area cropped during a year), an explanation being given in a foot-note.

*Column 2*—Includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to uses other than agriculture.

*Column 3*—Includes groves not classed in the cropped area.

*Column 6*—Shows the area actually irrigated during the year, areas cropped more than once being counted once only.

*Column 7*—Shows the gross area of irrigated crops, areas cropped more than once being counted as separate areas for each crop.

#### PROVINCIAL NOTES.

*Column 3*—The entire area of wholly Inam villages of the Salem district was shown in *Madras* this column previously to the return of 1892-93.

*Column 4*—Includes all occupied waste, that is to say, waste portions of land for which revenue is paid. This column also includes in the return for 1893-94 unoccupied lands in wholly Inam villages of the Nellore district which were previously shown in columns 2 and 3, and current fallows in wholly Inam villages of the North Arcot district.

*Column 6*—The term "tanks" refers to a particular kind of dammed reservoirs. Previous to 1891-92 the area entered in this column was the gross, not the net, area irrigated, areas cropped more than once being added to the net area.

*Column 1*—Includes land administered by the Forest Department whether formally *Bombay* declared forest under an Act or not.

*Column 2*—Includes all land recorded at the Survey and Settlement as unculturable, though at times parts of this land are cultivated.

*Column 4*—The maximum period for which land thrown-out of cultivation is reckoned as fallow is ten years.

*Column 6*—The figures given for private canals, tanks, wells, and other sources are rough estimates. Previous to 1892-93 figures for private canals were included in "Government canals" and those for tanks and wells in "Other sources."

*Column 7*—By "Miscellaneous food crops" is understood the crops entered in Table A-3 as sugar, orchards and garden produce, and miscellaneous food crops.

*Column 1*—Shows Government forests under the administration of the Forest Department and those administered by the Deputy Commissioner of the Sonthal Perganas district under Act VII of 1865.

*Columns 2 and 3*—Include private forests.

*Columns 6 and 7*—Irrigation statistics are not available except for the area irrigated from Government canals.

*Column 4*—The maximum period for which land left untilled is reckoned as fallow *N.-W. P.* is three years.

*Column 6*—Figures for "Government canals" include those for "Private canals," and those for "Other sources" included tank irrigation until 1892-93. From 1893-94 separate figures for tank irrigation have been supplied. There are very few private canals in the North-Western Provinces.

*Column 1*—Includes from 1884-85 to 1891-92 all lands specially devoted to forest growth *Punjab* under the control of Government or any Local Board or Municipality.

*Column 3*—Includes large areas of Government waste not allotted for cultivation.

*Column 4*—The maximum period for which land is reckoned as fallow is two years, but the change in classification is not generally made until the year for quadrennial statements comes round, and so the old classification may be kept up from one to three years longer than the prescribed period. In certain districts in the south-west of the province, however, the classification of land is annually amended.

*Columns 6 and 7*—Show gross area irrigated, *i.e.*, land irrigated in both seasons is counted twice.

*Column 2*—Shows areas covered with water, hill, or rock, and land occupied by build- *Central Pro* ings and roads.

*Column 3*—Shows (1) the area and waste within holdings (including fallows of more than three years), (2) land under tree forest which is not administered under any Act dealing with forests, (3) land under scrub jungle or grass, and (4) groves not included in holdings.

*Column 4*—Land which has been fallow for a period not exceeding three years is reckoned as current fallow.

*Column 1*—The area shown in this column is that given in the Forest Administration *Bur* Report, and includes reserved, and in *Thayetmyo*, village forests, but not protected forests.

*Column 2.*—In 'settled' tracts the unculturable area is taken from the registers, but in 'unsettled' tracts it is obtained from the best source available.

*Column 3.*—Includes land thrown out of cultivation and abandoned.

*Column 4.*—Includes only such land left uncultivated as is actually in possession of cultivators and subject to assessment.

*Column 7.*—Includes only crops actually irrigated, *e.g.*, where an unirrigated crop of sessamum is taken off land which is later on irrigated and planted with paddy, the area grown with sessamum is not included in this column. There is no irrigated area growing more than one crop in Lower Burma.

*Assam.*

*Column 1.*—In this province "Forests" used formerly to include protected and reserved forests. In the return for 1893-94 reserved forests have alone been shown; protected forests now being included in "Unclassed State Forests," are not recognized as a special class under the Assam Forest Regulation.

*Columns 2 and 3.*—Separate figures for these columns cannot be given for the districts of Cachar, Sylhet and Khasi and Jaintia Hills until the areas to which they refer have been surveyed.

*Column 4.*—Includes generally all lands which are thrown out of cultivation or not cultivated, but remain in the occupation of leaseholders. For the hill districts no figures can be given except for tea estates in the Khasi and Jaintia Hills; and in the Surma Valley, which is mostly permanently settled, figures are available only to show the uncultivated portion of tea estates and of settled estates in the area cadastrally surveyed.

*Columns 6 and 7.*—There is practically no artificial irrigation. The small area irrigated from hill streams has never been distinguished from other cultivation.

*Column 1.*—Includes the forest area administered by the Forest Department.

*Column 2.*—Includes village sites, and land taken up for public purposes or devoted to uses other than agriculture; it also includes unculturable portions of culturable fields. Free grazing, paramboke, and unoccupied assessed lands in the Akola district were excluded from the return for 1892-93, but included in the return for 1893-94.

*Column 3.*—Includes land available for cultivation but not given out; but in the Wun district land given out for cultivation but not cultivated by the occupant is included in the return.

*Column 4.*—Includes occupied culturable land left fallow for private reasons, such as grazing, rotation, etc.; but in the Wun district it includes land available for cultivation but not given out (instructions have been issued for the correction of this error).

*Column 6.*—Figures for land partly irrigated from springs and mountain streams are not available.

*-Merwara.*

*Column 1.*—The forest area exhibited in the returns previous to 1890-91 relates to khalsa or Government villages only, and that shown in the returns for 1890-91 to khalsa, jagir, and minor istamrari villages.

*Column 1.*—Includes barren land.

*Column 2.*—Includes not only lands absolutely unfit for cultivation, but also lands reserved or pasture, and plantations intended for public use and therefore left unassessed. A large portion of the pasture lands is fit for cultivation, and is given out for cultivation from time to time under special orders, such lands when given out for cultivation being transferred from column 2 to column 4 or 5 as the case may be.

*Column 4.*—There is no system of fallows in this province, *i.e.*, lands are not systematically left uncultivated for the purpose of giving them rest. Individuals occupy large areas and pay full assessment thereon, leaving portions uncultivated, generally for the use of their cattle. For the purposes of account the difference between the areas of the lands occupied by individuals and of those actually cultivated by them is shown as fallows. The lands occupied and assessed are sometimes unfit for cultivation, they having been taken up on full assessment merely for use as pasture; but the exact area of such lands cannot be ascertained, nor can it be large.

*Columns 6 and 7.*—Formerly these columns used in some districts to include areas occupied but not cultivated. The error has been rectified in the return for 1893-94.

TABLE A-3.

The third section of Table A shows the gross cultivated area under each crop, irrespective of irrigation and double-cropping, the area under the latter

being included in the statement, but subtracted at the foot thereof. The area dealt with is that shown in column 5 of section A-2.

The headings which have undergone alteration since 1866 are shown below:—

1866 III-D-1.	1884 B.	1891 A-3.											
Other food-grains . . . . .	Other food-grains, including pulses.	<table border="0" style="display: inline-table; vertical-align: middle;"> <tr><td rowspan="10" style="font-size: 2em; vertical-align: middle;">}</td><td>Barley.</td></tr> <tr><td>Cholum or jowar.</td></tr> <tr><td>Cumbu or bajra.</td></tr> <tr><td>Ragi or mandua.</td></tr> <tr><td>Maize (seed).</td></tr> <tr><td>Gram.</td></tr> <tr><td>Other food-grains, including pulses.</td></tr> <tr><td>Linseed.</td></tr> <tr><td>Til or jinjelly.</td></tr> <tr><td>Others.</td></tr> </table>	}	Barley. 	Cinchona . . . . .	Cinchona.											

The following items were added in 1891:—

Condiments and spices. Other dyes. Indian hemp.	Other drugs and narcotics. Fodder crops. Orchards and garden produce.
-------------------------------------------------------	-----------------------------------------------------------------------------

#### GENERAL NOTES.

In cases where two or more crops are grown together, an estimate is made of the area covered by each, and the areas so estimated are separately returned. The estimate is made by the village accountant, or is subsequently determined on formulæ determined by the provincial authorities.

The crops selected for inclusion in columns 9, 12, 15, 18, 20, 27, and 30 are determined by the provincial authorities.

#### PROVINCIAL NOTES.

*Column 9*—Includes all miscellaneous food-crops which elsewhere are shown in column 30. *Madras*

*Column 28*—Shows the areas sown with grass and crops raised solely for purposes of fodder. Lands left waste for grazing purposes and on which grass grows spontaneously are not included in this column.

*Column 29*—Includes green fodder for cattle.

*Bombay.*

As no returns are at present prepared by village or circle officers, the figures shown in this *Bengal* table are only estimates, except those given for the Chittagong district. The figures shown against the heads "Orchards and garden produce" and "Miscellaneous food and non-food crops" are not complete.

In these provinces the area sown with mixed crops, for which no separate heading is provided in the provincial crop statements, is credited to the principal crop.

In the case of the Almora district no statistics of crops other than tea and Indian hemp are available.

*Column 29*—Includes groves situated within the home farm of the landlord or the *Central Provs.* holding of a tenant.

*Assam.*

This table shows only the area under tea cultivation in Cachar and the Khasi and Jaintia Hills. In the case of Sylhet the area under crops other than tea is available only for the cadastrally surveyed tracts, and the information has for the first time been given in the return for 1893-94. The cropped areas shown under the five upper districts of the Assam valley relate to the tracts cadastrally surveyed, and to the *Kheraj* lands and the tea estates not cadastrally surveyed. In the case of the Garo and Naga hills districts the areas under different crops are available for the plain tracts only, and have been shown for the first time in the return for 1893-94.

*Column 29*—Includes area occupied by village sites.

*Column 30*.—Separate figures for miscellaneous food and non-food crops are not available for the Goalpara, Nowgong and Lakhimpur districts.

*Berar.*

*Column 32*.—No information about double cropped areas is at present available. The matter is being investigated.

*Coorg.*

*Column 25*.—There are no separate cinchona plantations in Coorg, the plant being grown among the coffee in coffee estates. The area shown is therefore an estimate of that actually occupied by cinchona.

*Ajmere-Merwara.*

The cropped area exhibited in the returns previous to 1890-91 related to khalsa or Government villages only, and that shown in the return for 1890-91 to khalsa, jagir, and minor istamrari villages. The whole of the cropped area in the province has been shown since 1891-92.

TABLE A-4.

This table deals with Agricultural stock. The headings of the form now in use differ from those of 1866 and 1884 in the following respects:—

1866 III-D-2.	1884 III-D-2.	1891 A-4.
Cows and bullocks . . . . .	Cows and bullocks . . . . .	{ Bulls and bullocks. { Cows. { Male buffaloes. { Cow buffaloes. Young stock (calves and buffalo calves).
.....	Buffaloes . . . . .	
.....	.....	
Horses } . . . . .	Horses and ponies . . . . .	Horses and ponies.
Ponies }		
Donkeys . . . . .	Mules and donkeys . . . . .	Mules and donkeys.
Sheep and goats . . . . .	Sheep and goats . . . . .	{ Sheep. { Goats. Camels.
.....	.....	

GENERAL NOTES.

The figures given in this return are believed to be on the whole less accurate than those supplied in the other returns of agricultural statistics. It is not certain how far they include animals in towns, cities and cantonments.

The new headings, *i.e.*, those prescribed in 1891, were not fully adopted till 1891-92, when all the provinces furnishing the figures, except the Punjab, Assam and Berar, supplied them in the prescribed form; in 1892-93 the returns of these provinces also were made uniform with the rest.

PROVINCIAL NOTES.

*Madras.*

Statistics for wholly Inam villages in all districts except Nellore and Salem have for the first time been included in the return for 1893-94, but the figures are not very accurate. A census of cattle in Government villages is now taken annually through the agency of village officers and checked by superior revenue officers. Previous to 1884 it was the practice in Madras to take a stock census every five years. Figures for zamindari villages are not yet available.

The table includes stock statistics of all towns and cantonments except those in zamindaris, and those which do not form part of any revenue village and in which the statistics are not collected because there is no agency for the purpose.

*Column 5*.—Cattle under four years of age are classed as young stock.

Stock statistics are not collected from Bombay town. Figures for Ahmedabad and Surat cities were returned for the first time in 1890-91. Broach city does not return its stock. The figures entered in the general table relate to the Presidency proper excluding Sind. No stock statistics have yet been provided from Sind.

*Columns 9 and 10.*—In 1891-92 arrangements were made for the registration of mules and donkeys and camels in all districts. Formerly statistics were collected from those districts only where these animals were numerous.

Stock statistics are not collected at present except from the tracts where surveys are being made or record-of-rights prepared. *Bengal.*

Stock statistics are returned by the Patwaris who do not include, as a rule, the stock in cities, large towns and cantonments. There are, however, some cantonments in which Patwaris' papers are kept and for which the stock statistics are returned. *N.-W. P. & Oudh.*

The village returns on which the figures are based are compiled for each village once in four years, but the returns are compiled in one-fourth of the entire number of villages each year, not in the whole number once in four years. *Punjab.*

*Column 5.*—Cattle up to two years of age are classed as young stock.

Ploughs are considered to mean "ploughs at work", *i. e.*, those provided with a yoke of plough oxen.

No stock statistics were received from these provinces until after 1891-92 and those furnished in 1892-93 related to 13 districts only. No statistics were collected for the Mandla district during 1893-94 and those given for the Balaghat district relate to 73 Patwari circles only. *Central Provs.*

Young oxen if actually on work are classed under the head "Bulls and Bullocks." Heifers which have not reached the usual calving age are excluded from the class "Cows."

Live stock includes all animals in towns. The animals employed in each district by Government and other Departments, such as Transport, Military Police, Municipalities, etc., are included in this return. *Burma.*

"Young stock" includes all animals up to three years of age.

Stock statistics for the six Assam valley districts were received for the first time in 1890-91, and for all the districts except Cachar and the Khasi and Jaintia Hills, in 1893-94. The figures entered under the Naga Hills district in the return for 1893-94 relate to Barpathar and Eastern Bengma mouzas as far as *patta* land is concerned. *Assam.*

The stock in towns and cantonments is not included.

The cattle below the age of three years are classed as young stock.

The figures are based on village returns compiled annually, and include, in the case of the Akola district, cattle in towns and cantonments. *Berar.*

Calves under two years of age are classed as young stock.

Animals in Municipal towns are included.

Calves under three years of age are classed as young stock.

*Coorg.*

No returns of stock were received from this province till 1886-87, after the introduction of the new settlement. *Ajmere-Merwara.*

### Table B.

The object of this table as now designed is to give information as to the price obtained by agriculturists for their produce, and to form a record of agricultural as distinguished from commercial prices; it therefore shows the average wholesale prices at the chief marts of each province.

The headings of the present form differ from those of 1866 and 1884 in the following respects:—

1866 III-E-1.	1884 III-E-1.	1891 B.
Rice.	Rice.	Rice (husked).
Cotton.	Cotton (uncleaned).	Cotton (cleaned).
Sugar.	Sugar.	Sugar (gur or jaggery).
	Ghi.	Ghi (clarified butter*).
	Firewood.	Firewood.

\* This had already been adopted in the return for 1887-88.

The following items\* were added in 1891 :—

Barley.	}	Til or jinjelly.	} Fodder.
Cholum or jowar.		Gram	
Cumbu or bajra.		Straw	
Maize (seed).		Jowar or bajra.	

#### GENERAL NOTES.

The instructions issued in 1884 required that the quality of rice for which the price is given should be stated; that as regards sugar, the price of the simplest form of saccharine produce, commonly known as *gur* or jaggery, should be shewn; and that the prices ruling in the chief market of the district on the last day of the year should be taken.

In July 1887 instructions were given that prices should be confined to produce locally grown for consumption or export and of the ordinary kind consumed by the people.

In December 1888 it was explained that the statement should exhibit local prices in the case of articles locally produced, and the import prices where articles were not locally produced, but were common staples of local consumption.

In July 1891 the following instructions were appended to the form :—

- (a) Columns 2 to 17 should show the average of the wholesale prices, and columns 18 to 23 the average of the retail prices, prevailing during the year in the principal marts of each district.
- (b) In the case of agricultural produce the prices of only those commodities should be given which are produced in the district in considerable quantities, whether for consumption or export.
- (c) The prices taken for each year for the calculation of averages should, as far as possible, refer to the same variety or quality of articles produced or sold.
- (d) For "sugar" the instructions given in 1884 were repeated.
- (e) For "cotton cleaned" the price of cotton freed of its seed, the form in which it is most commonly sold, should be given.
- (f) For "iron" the price of the description of iron commonly employed in the manufacture of agricultural implements should be stated.

In March 1892 it was explained that the average wholesale prices should be the average of prices ruling during the season when the particular commodity comes into the market, and the wholesale trade in it is active, and that the marts at which and the dates on which prices are to be ascertained should be determined under the orders of the Local Government.

In April 1894 instructions were issued to adopt the maund of 82½lb instead of one of 80lb.

The average for India is calculated by dividing the sum of provincial averages by the number of provinces, just as the provincial average is obtained by dividing the sum of the district averages by the number of districts and the district averages by dividing the mart quotations by the number of marts.

The year to which the provincial returns relate ends on different dates in different provinces: in Madras, the North-Western Provinces, Oudh, Upper Burma, Lower Burma, Ajmere-Merwara, and Mysore the year ends on 30th June, in Bombay, Bengal, Assam, Berar, Coorg, Manipur on 31st March, in the Punjab on 30th September, and in the Central Provinces on 31st May.

#### PROVINCIAL NOTES.

##### Madras.

Wholesale prices for articles of agricultural produce have for the first time been shown in the return for 1893-94, instead of retail prices as hitherto.

*Rice.*—The price of second quality rice is shown.

##### Bombay.

Wholesale prices for articles of agricultural produce, except those shown under "Fodder," for which retail prices have been given, have for the first time been exhibited in the return for 1893-94. Formerly retail prices were shown.

No quotation of wholesale prices is given for any district in which an article is not produced, though it may be largely imported, nor is any quotation shown even if the article is produced, when it is not sold by the producer in the form indicated by the heading. For example, though rice is an important product in Gujarat, it is never husked before sale by the cultivator, and therefore column 'rice' is blank.

\* These had already been adopted in the return for 1890-91.

The wholesale prices quoted are obtained by applying to retail prices such rates of *Bengal*. deduction as are found to represent the usual difference between wholesale and retail prices.

The prices quoted for 1890-91 are retail prices.

*Rice*.—The price of 'common rice' is shown. In Bengal 'common rice' is defined to be the common qualities of husked rice, 'mota chaul,' consumed for the time being by the middle and lower classes.

The prices of agricultural produce shown in the returns from 1884-85 to 1889-90 are *N.-W. P. & Oudh*. retail prices.

The prices of agricultural produce shown in the returns from 1884-85 to 1889-90 are *Punjab*. retail prices.

The dates for which the average prices for 1892-93 and for subsequent years have been taken differ from those of the previous years.

*Rice*.—The price of common rice is shown.

*Salt*.—The price of the salt in most general use is given.

The price of common rice is shown.

*Central Provs.*

The price given is that of the ordinary quality consumed by the bulk of the people. *Burma*.

The prices of commodities are not furnished when the areas under cultivation of those commodities amount to less than 1,000 acres.

*Rice*.—The price of common rice is given.

*Assam*.

The prices of agricultural produce given in the returns from 1884-85 to 1889-90 are *Berar*. retail prices.

The prices of agricultural produce given in the returns from 1884-85 to 1889-90 are *Coorg*. retail prices.

### TABLE C.

This table indicates the relation which obtains between area, population, and land revenue, or in other words, it shows the mean burden of the State assessment on the land assessed to it and on the community at large. It was first prescribed in 1884, and was revised in 1893. Previous to 1884, similar information is to be found in Tables I-D, I-E-2, and I-E-6, etc., appended to the General Administration Reports.

The two main classes of tenure, *viz.*, (1) ryotwari and (2) zamindari and village communities, prescribed in 1884, not being exhaustive, provinces were allowed to make additions to these two classes to suit local requirements. The imperial return now shows all tenures under one or other of 3 heads, *viz.*, (1) Ryotwari, (2) Zamindari and village Communities (temporarily settled), and (3) Zamindari (permanently settled).

The present form differs from that prescribed in 1884 in the following respects :—

1884.	1893.
<p>Column 1.—(1) Ryotwari (2) Zamindari and village communities.</p>	<p>(1) Ryotwari. (2) Zamindari and village communities (temporarily settled). (3) Zamindari (permanently settled).</p>
<p>Column 3.—Deduct area not fully assessed, including estates assessed at privileged rates.</p>	<p>Deduct { (a) Area not fully assessed. (b) Area for which returns required for this table are not available.</p>
<p>Column 4.—Balance of area fully assessed</p>	<p>Balance, <i>i.e.</i>, fully assessed area for which returns are available. (a) Total. (b) Cultivated.</p>

## GENERAL NOTES.

The instructions appended to the form of 1884 laid down that in column 1 the ryotwari area of Bombay, Madras, and Assam should be shown separately from the other areas of those provinces; that a similar distinction should be made between the zamindari and khalsa areas of the Central Provinces, and between the zamindari and Government estates of Bengal; that column 2 should be column 2 of Form A, less column 3 of that form; that small revenue-free plots for which details are not forthcoming need not be included in column 3, and that columns 11 and 12 might be left blank if the information was not obtainable.

In July 1893 these instructions were somewhat modified and the following rules were prescribed:—

*Column 1.*—The varieties of tenure shown should be included, as far as possible, under one or other of the following, *viz.*, (1) ryotwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled).

*Column 3 (a).*—Areas held revenue-free or at privileged rates should be deducted, but the deduction need not be made where the areas in question are in any case less than an entire village, and where there is any difficulty in estimating the corresponding deduction to be made in the population (column 11). In the Madras, Bombay and Berar returns all land on which a full assessment has not been leviable during the year (*e.g.* assessed unoccupied land) should be classed for the purposes of this column as "Area not fully assessed." Areas should not be entered in this column merely because the assessment due from them has been suspended or remitted on account of short crops, etc.

*Column 4.*—This column should be sub-divided into 4(a) to show the total fully assessed area for which returns are available, and 4(b) to show the area cultivated out of the area given in column 4(a). The latter column should be equal to the former after deducting current fallows and fully assessed waste. In the Imperial return these sub-heads are not shown for want of convenient space. In the Presidency Proper of Bombay the occupied area may be taken as equivalent to the cultivated area.

*Column 5.*—Where the land revenue includes the zamindar's share, the net receipts should be entered, and the return should show the payments due by the zamindars to Government, not those due by ryots to the zamindars. The actual realizable demand for the year should be entered, after excluding arrears for past years. Sums remitted on account of unoccupied lands, short crops, etc., should be excluded. Land revenue in this column includes miscellaneous land revenue.

*Column 8.*—As in column 5, but miscellaneous land revenue and land revenue on areas not fully assessed to be excluded.

*Column 9.*—To be column 8, divided by column 4 (a).

*Column 10.*—To be column 8, divided by column 4 (b).

Areas under forest are included in column 2 under the prevailing tenure of the province.

The population exhibited in column 6 is that of the last general census.

The year to which the provincial returns relate ends on different dates in different provinces: in Madras, Ajmere-Merwara and Mysore the year ends on 30th June, in Bombay on 31st July, in Bengal, Upper Burma, Lower Burma, Assam, Berar, Coorg and Mandur on 31st March, in the North-Western Provinces, Oudh and the Punjab on 30th September, and in the Central Provinces on 31st May.

## PROVINCIAL NOTES.

*Madras.*

*Column 3 (a).*—In the case of *Ryotwari* tracts this column shows the area of unoccupied assessed lands, of minor inam lands in Government villages held rent-free or subject to quit-rent, and of all unassessed poramboke and forest lands; and in the case of *Zamindari* tracts the areas of hills, porambokes and minor inams are shown. The entire area of wholly inam villages is deducted in this column.

*Column 3 (b).*—*Ryotwari*; includes the area of Agency tracts.

*Column 4.*—*Ryotwari*; shows the total occupied area.

*Column 5.*—*Ryotwari*; shows the net land revenue demand, excluding remissions and deductions, but including quit-rent on minor inams and miscellaneous revenue pertaining to land, and also water-tax.

In the case of *Zamindari* and wholly inam villages, this column shows *peshcush* or quit-rent payable to Government, together with water-rate on lands included in such tracts, as also jodi or quit-rent on minor inams situated therein.

*Column 8.*—*Ryotwari*; shows the net land revenue demand, excluding remissions and deductions and revenue from minor inams (quit-rent and water-tax). In the case of *Zamindari* this column shows *peshcush* or quit-rent payable to Government, excluding the jodi or quit-rent and water-rate on minor inams.

In the returns for the year 1892-93 and for the previous years, the figures in column 8 against *Ryotwari* are in some districts greater than those in column 5. This is due to the fact that the entry in column 5 included quit-rent on minor inams, water-rate and other miscellaneous land revenue; while column 8 showed the assessment on the fully assessed area, both occupied and unoccupied. Where the fully assessed unoccupied area is large or the miscellaneous revenue included in column 5 is small, the revenue in column 8 is generally in excess of that in column 5.

*Column 10.*—The cultivated area referred to in this column is in the case of *ryotwari* lands the total area cropped out of the area given in column 4. The corresponding information is not available for the *zamindari* area. Previous to 1893-94 the occupied area was for the purpose of this return taken as equivalent to the cultivated area.

*Column 11.*—Shows the entire population of *ryotwari* and *zamindari* villages, respectively.

*Column 1.*—Lands held under special tenures, such as (1) talukdari, mehwas, udhad, *Bombay*, jamabandi, narvadari and bhagdari in Gujrat, and khoti and izafat in the Konkan, which were shown under separate heads in the previous returns, have been classed as "zamindari and village communities (temporarily settled)" in the returns from 1892-93.

*Column 3(a).*—Includes alienated area and the area held free of revenue or the revenue of which has been reduced by special agreement, and the fully assessed unoccupied area in 1893-94.

*Column 3(b).*—Includes land not available for cultivation or unassessed.

*Column 4.*—Includes land under temporary cultivation; also pot inams paying full assessment. The fully assessed unoccupied area, which was formerly included in this column, has been deducted in column 3 (a) in 1893-94.

*Column 5.*—Shows net receipts on account of the land, including quit-rent and miscellaneous land revenue.

*Column 8.*—The assessment on the fully assessed unoccupied area which was previously included in this column has been excluded in 1893-94.

*Column 10.*—The incidence is calculated from the occupied area, which, in the Presidency Proper, is treated as the cultivated area for the purposes of this table, and the assessment on that area.

*Column 11.*—Includes population of pot inams and the like scattered areas which cannot be distinguished from the population of fully assessed area. The population of the fully assessed portion of zamindari estates has been included in 1893-94.

*Column 12.*—The incidence is based on the figures given in column 11 and those in column 8 plus the amount of full assessment on privileged lands held in fully assessed villages at less than that assessment. Previous to 1893-94 miscellaneous land revenue was included in the calculation.

*Column 3(a).*—Includes fallows from 1892-93 and fully assessed unoccupied area from *Sind*, 1893-94. Formerly these were included in column 4.

*Column 4.*—Excludes fallows and the fully assessed unoccupied area (*vide* note to column 3(a)). In *Sind* fallows are assessed once in five years.

*Column 6.*—Includes revenue from alienated area.

*Column 8.*—The assessment on the fully assessed unoccupied area, which was previously included in this column, has been excluded from 1893-94, and that on fallows has ceased to be shown in it from 1891-92.

*Column 10.*—The incidence is calculated from the cultivated area, excluding fallows, and the assessment on that area.

The table is prepared once in five years for this province, the greater part of which is *Bengal*, permanently settled. The figures for 1892-93 have therefore been reproduced in the return for 1893-94.

*Column 1.*—*Zamindari (permanently settled)*—Includes estates managed for proprietors by Government.

*Zamindari (temporarily settled)*—Includes (a) all temporarily settled estates, *viz.*, those settled for periods with proprietors, and private estates leased to farmers for periods; and (b) all estates owned by Government as proprietor.

The classification of estates adopted in the return for 1892-93 is (1) zamindari, and (2) Government estates.

*Column 2.*—Shows the area of estates borne on the revenue roll of the district, whether wholly situated within the district boundaries or not, and does not include lands of estates partly situated within the district boundaries but borne on the revenue roll of another district. This accounts for the discrepancy between the district areas shown in this column and those shown in table A-1.

*N.-W. Provs.  
and Oudh.*

The return for the North-Western Provinces is quinquennial. The revision of the statistics is not however relegated to a single year. It is gradually carried out in one village one year and in another the next year during the whole period of five years.

In the return for 1892-93 the figures for the temporarily settled estates in the Lucknow district were shown against the permanently settled estates of that district, and *vice versa*.

*Column 3 (a).*—Does not include small revenue-free plots, for which details are not forthcoming.

*Column 10.*—The cultivated area referred to in this column is the cropped portion of the fully assessed area, but previous to 1892-93 it included current fallows.

*Column 11.*—Includes population of revenue-free lands. The inclusion does not materially affect the incidence shown in column 12.

No figures have been shown in columns 8 to 13 opposite "Lucknow, permanently settled" as no portion of the permanently-settled area has been fully assessed to land revenue.

*Punjab.*

*Columns 3(a) and 3(b).*—Include villages receiving frontier remissions, tracts which are entirely unassessed (such as the Kulu mountains), and istamrari tenures.

*Column 5.*—Includes assigned revenue.

*Column 10.*—The cultivated area referred to in this column in the return for 1892-93 and former years included current fallows, except in certain districts in the south-west of the province, mostly under fluctuating assessment. The cultivated area taken for calculating the incidence for 1893-94 is exclusive of current fallows.

*Central Provs.*

*Column 1.*—Previous to 1890-91 the entire area of the province was classed as khalsa or zamindari.

*Column 2.*—Exhibits the area by village papers (column 4 of table A-1) plus the area for which no returns exist (column 2 (b) of the same table). Previous to 1890-91 it showed the area entered in column 1 of table A-1, less Feudatory and Tributary estates.

*Column 3(a).*—Zamindari estates properly so-called (*i.e.*, excluding malguzari) are classed as not fully assessed, but in the returns for 1889-90 and 1890-91 they were classed partly as fully assessed and partly as not fully assessed, and previous to 1889-90 the entire area of such estates was exhibited as fully assessed.

*Column 10.*—The cultivated area referred to in this column includes fallows.

*Upper Burma.*

*Column 3(a).*—The only areas in Upper Burma classed as zamindari are special grants made on the terms given in Appendix I of the Rules under the Upper Burma Land and Revenue Regulation.

*Column 3(b).*—Includes non-State lands which are at present assessed in the form of thathameda (house-tax).

*Column 4.*—Shows only assessed State lands.

*Column 5.*—Includes thathameda (house-tax), water-rate, revenue from State land and miscellaneous land revenue, but excludes remissions under these heads.

*Column 9.*—Shows only the land revenue demand realized on fully assessed area entered in column 4.

*Column 10.*—The cultivated area referred to in this column is the total assessed area shown in column 4, as fallows in Upper Burma are not assessed. The incidences given in columns 9 and 10 are therefore the same.

*Column 11.*—The population of villages and kwins is considered as belonging to fully or not fully assessed area, according as the greater portion of the village or kwin lands are or are not fully assessed.

*Lower Burma.*

*Column 1.*—Grants under the waste land rules of Pegu and Arakan and Lord Canning's rules, and grants of large areas made under special conditions, are classed as zamindari (temporarily settled).

*Column 3(a).*—Excludes settled circles in which temporary reductions of the maximum rates of assessments have been sanctioned, but includes the areas described in the note to column 1, except areas granted under special conditions on which the full revenue rates are assessed.

*Column 3 (b).*—Includes all areas other than those assessed either fully or not fully.

*Column 4.*—Includes current fallows.

*Column 5.*—Shows the actual demand on the land assessed, including miscellaneous land revenue, but excludes remissions granted.

*Column 8.*—Shows the actual demand on the land assessed, excluding miscellaneous land-revenue.

*Column 1.*—Waste land grants held on progressive assessment are now included under the *Assam*, head "Zamindari (temporarily settled)," but previous to 1892-93 such grants were shown under a separate head, except in 1890-91, in which year these as well as Government wastes and forests were included under the head "Zamindari and village communities." In the return for 1893-94 forest area has been included under Ryotwari tenure.

*Column 5.*—Includes the entire revenue of the Garo Hills, *i.e.*, the portion paid to zamindars as well as the Government share in it.

*Column 6.*—Includes the population of the feudatory estates in the Khasi and Jaintia Hills.

*Column 10.*—The incidence has not hitherto been calculated on the same principle each year. For instance, in 1886-87, 1887-88, and 1890-91 the calculation was based on the actually cropped area shown in column 5 of Table A-3 and the revenue shown in column 8 of Table C. In 1888-89 and 1889-90 the incidence in some districts was returned at the same figure as in column 9. In the return for 1893-94 uniformity has been maintained in this respect, *i.e.*, the incidence has been calculated on the cultivated portion of fully assessed area. The cultivated area in the zamindari permanently settled estates in Sylhet and Goalpara not being known, the rates of incidence cannot be given for these estates.

*Column 2.*—Shows the area as given in column 4 of Table A-1. Previous to 1891-92 the *Berar*, area as given in column 1 of Table A-1 was shown.

*Column 3 (a).*—This column shows jagir, izara and palampat villages, all unassessed land, forest areas, village sites, roads, rivers, etc, but it has not hitherto been filled up uniformly in all districts: in some the entire area of the district *minus* the occupied and unoccupied areas of khalsa villages has been included, in some the unoccupied area of villages settled under waste land rules has been excluded, while in others the whole of the occupied and unoccupied area of the district has been excluded.

*Column 4.*—Includes land assessed but not occupied during the year, and potkhrab land.

*Column 5.*—The survey assessment of jagir villages is included in the Akola district, while in the Bassein district the quit-rent of such village appears to be taken.

*Column 8.*—Includes assessment on unoccupied land, but, like column 3 (a), this column does not represent the same statistical facts for all districts in the returns for previous years.

*Column 10.*—The incidence has not hitherto been calculated on the same method each year. For instance, in 1884-85 and 1890-91 to 1892-93 the incidence was based on the actually cropped area and the assessment on the occupied and unoccupied area, and in 1885-86 and 1888-89, it was calculated on the assessed occupied area and the assessment thereon; while in 1886-87, 1887-88, and 1889-90 the calculation was based on the assessed occupied and unoccupied area and the assessment thereon. The incidence for 1893-94 has been calculated on the net cropped area shown in column 5 of Table A-2.

*Column 11.*—Excludes population of jagir and izara villages.

*Column 3.*—Includes bané and cardamum lands.

*Coorg.*

*Column 1.*—From 1886-87 to 1889-90 the khalsa (revenue-paying) area was classed as "zamindari and village communities" and from 1890-91 to 1892-93 as "ryotwari." From 1890-91 to 1892-93 jagir and minor istamrari areas, and from 1891-92 large istamrari areas were classed as zamindari. In 1893-94 the khalsa area has been classed as "zamindari and village communities (temporarily settled)" and the jagir and istamrari areas as "zamindari (permanently settled.)" *Ajmere-Merwara.*

*Column 2.*—The area shown from 1886-87 to 1889-90 related to khalsa land only, and that shown in 1890-91 included jagir and minor istamrari villages. From 1892-93 the entire area of the province has been shown.

*Columns 3(a) and 3(b).*—Jagir villages have been shown as deductions in these columns since 1890-91.

*Column 4.*—Includes in the case of the khalsa villages the assessed cultivated area including assessed fallows. The minor istamrari area was shown as not fully assessed in 1890-91 and 1891-92, and the large istamrari area was shown as such in 1891-92. The whole of the istamrari area, which is now returned as "zamindari (permanently settled)" has been shown as fully assessed since 1892-93.

*Column 8.*—The return for 1890-91 includes land revenue of minor istamrari villages, and for 1891-92 and 1892-93 the revenue of both large and minor istamrari villages.

*Column 10.*—The cultivated area referred to in this column is in the case of the "zamindari (temporarily settled)," the cropped portion of the fully assessed area.

*Column 11.*—Excludes population of jagir villages, but the population of such villages was included in the returns for 1890-91 and 1891-92. The population of large istamrari villages was excluded from the returns for 1890-91, but included in the subsequent returns.

Manpur.

Column 6—Includes in the return for 1893-94 the population of jagir villages which was previously omitted.

Column 11—Excludes population of jagir villages.

N.W.  
and

Mysore.

Column 4—Shows all lands assessed by the Survey Department, whether such lands are under the occupation of ryots or not, and whether full assessment on these lands is leviable from the ryots during the year or not. Minor inams (*i.e.*, inams less than an entire village) fully assessed by the Survey Department, but which are held rent-free or pay only favourable rates known as quit-rents, are included in this column.

Table D.

This table shows the principal varieties of tenure held direct from Government. Owing to the great diversity of tenures the form is not perfectly adapted to the conditions existing in every province, but it was thought desirable to prescribe a form for general adoption in order to admit of the compilation of an abstract for the whole of India to complete the series of Imperial abstracts embodied in the Returns of Agricultural Statistics. The classification finally selected in 1891 was therefore of the most general description possible, but the difficulties experienced in some provinces in moulding their statistics to the Imperial form have not yet been wholly surmounted, and so far it has not been possible to compile an abstract for all India.

Previous to 1884-85, in which year the Return of Agricultural Statistics for British India was first published, the information regarding the varieties of tenure held direct from Government is to be found in Table I.-E.-3 appended to the General Administration Reports. The form was suggested by the Statistical Committee of 1866. It was revised in 1884 and again in 1891.

The modifications introduced in the form since 1866 are noted below:—

1866. I.-E.-3.	1884. I.-E.-3.	1891. D.
COLUMN 1.	COLUMN 1.	COLUMN 1.
1. Great zamindaries paying more than R50,000 revenue. { Held by individuals under law of primogeniture. Held by individuals and families under ordinary law.	1. No alteration.	1. Revenue payers paying more than R50,000 revenue. { (a) Individuals under law of primogeniture. (b) Individuals and families under ordinary law. (c) Village communities.
2. Large zamindaries paying more than R5,000 revenue. { Under law of primogeniture. Under ordinary law.	2. Large zamindaries paying from R50,000 to R5,000 revenue. { Under law of primogeniture. Under ordinary law.	2. Revenue payers paying from R50,000 to R5,000 revenue. { (a) Individuals under law of primogeniture. (b) Individuals and families under ordinary law. (c) Village communities.
3. Small zamindaries other than those of cultivating communities.	3. Zamindaries paying from R5,000 to R100 revenue.	3. Revenue payers paying from R5,000 to R100 revenue. { (a) Individuals under law of primogeniture. (b) Individuals and families under ordinary law. (c) Village communities.
4. Proprietary cultivating communities paying in common.	4. Small zamindaries other than those of cultivating communities paying less than R100 revenue.	4. Revenue payers paying less than R100 revenue. { (a) Individuals under law of primogeniture. (b) Individuals and families under ordinary law. (c) Village communities.

6. Holders of revenue-free tenures. (In perpetuity. For life.)	6. Holders of wholly or partly revenue-free tenures. (In perpetuity. For life or lives.)	6. Holders of wholly or partly revenue-free tenures. (In perpetuity. For life or lives.)
COLUMN 8.	* COLUMN 8.	COLUMN 8.
Revenue rate per acre.	Revenue rate per acre.	Omitted.
COLUMN 9.	COLUMN 9.	COLUMN 9.
Supposed net profit per acre.	Omitted.	Omitted.

## GENERAL NOTES.

*Class 5.*—“Peasant proprietors paying separately”. This class is intended to represent the occupants of ryotwari lands only.

*Class 6.*—“Holders of wholly or partly revenue-free tenures” includes inamdars and jagirdars. The local Governments are at liberty to sub-divide the minor head “In perpetuity” of this class so as to distinguish between grants (a) absolutely and (b) conditionally held in perpetuity.

*Column 2.*—The number of estates shown in this column represents the number of separate estates recorded on the Land Revenue Registers.

*Column 3.*—A village is often shown more than once in this column when it contains or consists parts of two or more estates separately assessed.

*Column 4.*—One proprietor holding land in two or more villages is entered twice or oftener, according to the number of settlements made with him.

The totalling of the return has been abandoned since 1891-92 as misleading, owing to the double entries in certain columns, such as column 3, in which a village is often shown more than once.

In March 1892 the words “Other than those of cultivating communities” were omitted from the fourth class of tenure in the prescribed form of 1891, in order to admit of such communities being classed under heading 4 (c) of this class.

The year to which the returns relate ends on different dates in different provinces: in Madras, Bombay, Bengal, Upper Burma, Lower Burma, Assam, Berar, Coorg and Manpur the year ends on 31st March, in the North-Western Provinces, Oadh and the Punjab on 30th September, and in Ajmere-Merwara and Mysore on 30th June.

## PROVINCIAL NOTES.

This table is prepared quinquennially, as the variations in the entries from year to year are not great. The table for 1891-92 has therefore been reproduced in the return for 1893-94. *Madras.*

Zamindaris, mittas, palayams, etc., are included in the first four classes; all ryotwari holdings are included in class 5; inams, shrotriems, etc., are included in class 6; inams as well as ryotwari lands on which the quit-rent has been redeemed are included in class 7; lessees of rented villages and other land-holders not coming under the previous items are included in class 9.

*Column 5.*—Includes waste and poramboke lands in the case of zamindaris, mittas, and wholly inam villages, and represents the total area included in *patta* in the case of ryotwari.

*Column 7.*—Shows in the case of zamindaris, inams, and shrotriems the average *pesh-cush* or quit-rent and water-tax payable to Government, and in the case of ryotwari the average assessment on ryoti holding, including water-tax and charge for second crop. The assessment represents the gross demand inclusive of remissions and deductions.

The prescribed classification of tenures has not yet been adopted. The subject is now *Bombay.* under the consideration of the Bombay Government.

*Column 2.*—As regards peasant proprietors (class 1 in the Bombay form) the word “estate” means (as in Madras) the “holding.” So with respect to *pot inams* in *khalsa* villages, each alienated holding is classed as an estate. But in the case of entirely alienated villages the entire village is classed as one estate.

*Column 5.*—As regards ryotwari area the total is for occupied land only. The area of other estates is given in the gross, and includes unculturable and unoccupied land.

*Bengal.*

This table is prepared triennially, as the variations in the entries from year to year are very slight. The table for 1892-93 has therefore been reproduced in the return for 1893-94.

There are no peasant proprietors in Bengal. Class 9 'others' includes Government estates under direct management, and also estates of recusant proprietors under the management of Government.

*Column 3*—Shows in a lump the number of villages as returned by the Revenue Survey.

*Column 4*.—"Number of holders or shareholders" is, for the purposes of classes 1 to 4, 6, 7, and 8, taken as equivalent to "Proprietors registered in the collectorate."

N.-W.  
and

*N.-W. Provs.  
and Oudh.*

The word "estate" means a property separately assessed to land revenue.

Forest land, State properties, Government grants, Nazul and Government appropriations are shown opposite class 9, "Others."

*Column 2*.—An estate paying a certain amount of revenue, but situated in three parganas of the district and shown in the Land Revenue Registers as three separate estates, each under that amount of revenue, is treated as one estate and not three estates.

*Column 3*.—Forty-four thousand two hundred and eighteen villages have been shown more than once in 1893-94.

*Column 4*.—Six hundred and two thousand six hundred and thirty five proprietors have been recorded more than once in 1893-94.

*Column 7*.—The figures in this column are obtained by dividing the gross revenue by the number of estates. The gross revenue is the gross land revenue for each description of tenure. In the case of revenue-free tenures, or where the revenue is not ascertainable, the estimated revenue obtained for the purpose of assessing the 10 per cent. cess is taken.

Pu

The divisions of tenures prescribed by the Government of India in 1884 were not adopted for Oudh until after 1889-90.

*Punjab.*

The return is prepared quadrennially. The revision of statistics is not however relegated to a single year, but is gradually carried out in one village one year and in another the next during the whole period of four years.

*Column 1*.—About 90 per cent. of the villages come into the third class of tenure.

*Columns 2, 3, 6 and 7*.—In the case of "Holders of wholly or partly revenue-free tenures," these columns cannot be filled up unless only whole estates which are partially or entirely assigned or released are shown as revenue-free holdings, and all smaller holdings are omitted. The figures for this class are necessarily included in the total for classes 1 to 4 so long as class 6 is not made to consist exclusively of entire estates, for classes 1 to 4 and 9 now include every estate in the province.

*Column 4*.—The number of holders entered against class 6 is the number of revenue assignees.

The prescribed form was not adopted until the year 1891-92. Previous to 1891-92 (the return for 1884-85 excepted) the return was prepared in a form prescribed by the Punjab Government to suit local requirements.

*Central Provs.*

Previous to 1891-92 the Bhandara and Balaghat zamindaris were classed as "Individuals under law of primogeniture," and small plot properties, known as Malikmakbuza holdings, were included in the malguzari area and classed as "Individuals and families under ordinary law" and "Village communities." The former are now classed as "Individuals and families under ordinary law," as they are not held under special *sanads*, and the latter as "Peasant proprietors paying separately."

*Column 2, class 5*—Includes 69,050 Malikmakbuza plots in the return for 1893-94.

*Upper Burma.*

In the case of the Shwebo district, tenants of State lands and owners of bahahaing land who paid water-rate, were classed as "Individuals under law of primogeniture" in 1891-92, whereas in 1892-93 and subsequent years they have been classed as "Individuals and families under ordinary law."

Holders of State land are classed as "Peasant proprietors paying separately," and those of non-State land as "Holders of wholly or partially revenue-free tenures," the ordinary non-State land tenure being included under the sub-head "In perpetuity."

*Lower Burma.*

With the following exceptions all tenures in Lower Burma are classed as "Peasant proprietors paying separately" :—

(a) Grants under the old waste land rules of Pegu and Arakan, which are classed under the heading "Holders of wholly or partly revenue-free tenures."

(b) Grants under Lord Canning's rules, which are classed under the heading "Land-owners who have redeemed the revenue."

(c) Grants on special conditions of large areas, such as the grant to Mr. Mylne in Shwegyin or the grant to Messrs. Solomon and Cohen in Hanthawaddy, which are classed under the heading "Others."

*Classes 1 to 4* refer to permanently-settled estates only. All entries against these classes come under the sub-head "Individuals and families under the ordinary law," as there are, as at present ascertained, no individuals holding under the law of primogeniture, and no village communities, properly so-called, in the province. *Assam.*

*Class 5.*—"Peasant proprietors paying separately" does not include ryotwari area in a permanently settled tract.

*Class 6.*—"Holders of wholly or partly revenue-free tenures" includes holders of *lakhiraj* and *nisfakhiraj* estates, special tenures and revenue-free estates.

*Class 7.*—"Land-owners, who have redeemed the revenue" includes holders of commuted estates and fee-simple grants compelled to redeem.

*Column 3.*—Shows collectively the number of villages which has been taken from the last census report, as the number comprised in each class is not at present known.

*Column 4.*—This column cannot be filled up, as the number of shareholders in an estate is not usually known. It is not the custom in any part of Assam (except, perhaps, in Goalpara) for all the shareholders to register their names.

In the Wun district *izara* and *palampat* villages are shown under classes 3 and 4, sub-head (c) 'Village communities,' while in the Basim district *palampatdars* are entered under class 7 (Landholders who have redeemed the revenue) and *izardars* under class 8 (Purchasers of waste lands). Class 9 "Others" is blank in this province, as there are no tenures that would come under this class. The figures under this class in the return for 1892-93 are incorrect. *Berar.*

*Class 5.*—"Peasant proprietors paying separately" shows the occupants of survey numbers.

*Column 2.*—The number of estates in the Akola district is the number of survey numbers, each number being considered a separate estate; while in the Wun district each *khatedar's* holding is entered as an estate.

*Column 5.*—Shows the occupied area.

*Class 6.*—"Holders of wholly or partly revenue-free tenures" includes the *jamma*, *umbli* and *jodi* holdings. *Coorg.*

*Class 8.*—"Purchasers of waste lands" includes coffee estates paying assessment.

*Column 3.*—Shows the number of villages collectively, instead of against each class of estate.

*Column 5.*—Excludes bane, fallow, and cardamum lands. The area given in this column is approximate, the survey of all holdings not having been completed.

The return was first prepared in 1890-91.

*Class 5.*—"Peasant proprietors paying separately" includes all ryotwari holdings. *Ajmere-Merwara.*

Some of the ryotwari lands have hitherto been shown under the first four classes of tenure and some under class 5. In the return for 1893-94 class 5 shows all ryotwari holdings and class 6 all *inams* (minor and whole villages). *Mysore.*

### Table E.

The object of this table is to show the number of voluntary and compulsory transfers of ownership of land or tenant-right, and the area so transferred. By voluntary transfers are meant those made by actual contract or gift, transfers by inheritance not being taken into account.

Instructions were issued in 1891 to the Central Provinces and Punjab authorities to the effect that the entries under "by order of Court" are intended to show not merely the transfers occasioned by debt, but all forms of transfer effected through the medium of a Court. It is believed that this rule is observed in other provinces, but no definite information is available on this head.

The form now in use was prescribed in July 1891. It differs from the form prescribed in 1894 and that suggested by the Statistical Committee of 1866 in the following respects:—

<u>1866</u> I.-E.-5.	<u>1884</u> I.-E.-5.	<u>1891</u> E.	
<i>Nature of tenure.</i>	<i>Nature of tenure.</i>	<i>Nature of tenure.</i>	
Great zamindaris, complete.	Proprietors. { Revenue-paying. Revenue-free.	Revenue-paying.	
Shares in zamindaris, complete.		Wholly or partially revenue-free.	
Large zamindaris.			
Shares in zamindaris.			
Small zamindaris.			
Shares in zamindaris.			
Villages owned by cultivating communities.		Tenants who have statutory (or otherwise recognized) powers of transfers.	No alteration.
Shares in villages owned by cultivating communities.			
Holding of proprietary cultivators.		} No alteration.	
Intermediate holding of a transferable character.			
Holdings of ryots at fixed rates.			
Holdings of ryots with right of occupancy.			
Revenue-free tenures.			
<i>Number of transfers recorded.</i>	<i>Number of transfers.</i>	} No alteration.	
(a) By voluntary sale or gift.	(a) By private contract or gift.		
(b) By compulsory sale.	(b) By order of court.		
(c) By inheritance.	Omitted.	} No alteration.	
<i>Average area in acres of each holding transferred.</i>	<i>Total area transferred.</i>		
(a) By voluntary sale.	(a) By private contract or gift.		
(b) By compulsory sale.	(b) By order of court.	} No alteration.	
(c) By inheritance.	Omitted.		

#### GENERAL NOTES.

Transfers by inheritance are not included in this return:

It is optional with Local Governments to show or omit transfers of lands held by tenants.

The year to which the provincial returns relate ends on different dates in different provinces: in the Central Provinces, Upper Burma, Lower Burma, Assam, Berar and Coorg the year ends on 31st March, in Madras, the North-Western Provinces, Oudh, Ajmere-Merwara, and Mysore on 30th June, and in the Punjab on 30th September.

#### PROVINCIAL NOTES.

*Madras.* Transfers from one party to another by purchases at sales for arrears of revenue are included under transfers by order of court. Cases in which lands were bought in by Government at such sales for want of bidders have been excluded from the return.

Transfers of tenant-right are not shown, the information not being available.

The entry under the head "Revenue-paying" includes ryotwari holders paying full assessment, and permanently settled estates paying *peashcush*; while that under the head "Wholly or partially revenue-free" relates to minor inams and wholly inam villages.

*Bombay.* The return is not prepared. The question of registration of transfers is now under the consideration of the Bombay Government.

*Bengal.* The return is not prepared, the necessary information not being available.

Statistics of transfers of tenant-right are not given. Transfers by gifts have not hitherto been shown, as the information was not available. *N.-W. P. and Oudh*

*Column 2. Revenue-paying.*—Figures of the Fyzabad and Partabgarh districts for 1893-94 are incomplete, the information for some of the parganas, which are under settlement, not being available.

*Column 3. Revenue-paying.*—Figures for the Fyzabad and Barabanki districts for 1893-94 are incomplete, the information for some of the parganas, which are now under settlement, not being available.

*Column 3. Revenue-free.*—Lambardari cases in the Dera Dun district have for the first time been included in 1893-94.

The return is prepared in a form prescribed by the Local Government, as the Imperial form is not applicable to the Punjab. Statistics for the different kinds of tenure are given collectively, figures for each kind not being available. *Punjab.*

The return for 1884-85 shows only transfers to new agriculturists and by order of court.

Transfers of tenant-right have been included in the return since 1892-93. *Central Provs.*

Transfers of landed property are not at present registered; the information is collected by Township Officers. *Upper Burma.*

In the case of the Saigaing district, transfers by private contract or gift were not included in the returns for 1891-92 and former years.

*Columns 4 and 5.*—Exclude the areas transferred in the Sylhet and Goalpara districts, the information not being available. *Assam.*

The first return received from this province was for 1887-88.

*Ajmere-Merwara.*

Transfers of landed property are not permitted in Manpur.

*Manpur (Central India).*

List of Vernacular terms used in the Memorandum.

---

MADRAS.

*Inam*.—Wholly or partially revenue-free tenure.

---

*Shrotriems*.—Villages held on grant (originally to Brahmins), wholly or partially revenue-free.

---

*Jodi*.—Portion of the assessment reserved or left unalienated when lands were originally granted on favourable assessment. It is distinguished from quit-rent, which represents an additional charge (generally a certain proportion—one-eighth, one-fourth, one-half or five-eighths—of the full assessment, minus the Jodi) imposed when the tenures were enfranchised or converted into free-holds.

---

*Mittas, Palayams*.—Certain classes of permanently-settled estates differing in their origin from zemindaris. Mittas were artificial estates created under Madras Regulation, XXV of 1802, while Palayams are the estates of Poligars or old Chieftains. Most of the latter have been granted title-deeds of permanent-settlement under the Regulation referred to above, but a few have not been settled, though in practice their revenue is treated as fixed.

---

*Peshcush*.—The fixed land revenue payable to Government on all permanently-settled estates.

---

*Poramboke*.—Lands reserved for public or village communal purposes.

BOMBAY.

*Talukdari*.—A form of proprietary right in force in the northern districts of Bombay.

---

*Narvadari, Bhagdari*.—Forms of proprietary tenure involving joint responsibility for the assessment: the revenue in the former case being fixed in the lump, in the latter distributed by rates over fields.

---

*Mehwasi*.—A proprietary tenure assessable to revenue at a lump sum.

---

*Udhad-jamabandi*.—A proprietary tenure subject to fixed assessment.

---

*Izafat*.—A form of service tenure.

---

*Khoti*.—A form of tenure, found chiefly in the Konkan, the holder of which is, in return for certain semi-proprietary rights, held responsible for payment of assessment on the area held.

BOMBAY—*contd.*

*Pdt inams.*—Lands sub-alienated in alienated villages.

---

*Khalsa.*—Government occupancy or Ryotwari tenure.

N.-W.  
and

## NORTH-WESTERN PROVINCES.

*Lambardar.*—The headman or village representative, who is primarily responsible for the collection and payment to Government of the land revenue of a village or a section of a village.

## PUNJAB.

Pu

*Istámrari.*—A tenure which, though the revenue is assigned, is charged with a permanently fixed quit-rent.

## CENTRAL PROVINCES.

C

*Malguzari.*—A form of tenure, the holder of which is responsible for the payment of the revenue assessed on a village or number of villages.

---

*Malikmakbuza.*—The proprietor of a small plot of land who has no interest in the village common lands.

---

*Khalsa.*—Land paying revenue to Government.

## ASSAM.

*Khiraj.*—Land assessed to full revenue.

---

*Lakhiraj.*—Revenue-free land.

---

*Nisfkhiraj.*—Land liable to pay half whatever revenue is ordinarily payable for the term of settlement.

## BERAR.

*Jagir.*—Alienated villages or lands granted as rewards for service either rent-free or on payment of a quit-rent ; such lands are hereditary.

---

*Izara.*—Land leased under the waste-land rules on stipulated terms.

---

*Palampat.*—Land held on payment of a quit-rent, but not necessarily hereditary.

BERAR—*contd.*

*Khalsa*.—Government land paying full revenue to Government.

---

*Pothrab*.—The unculturable area included in a survey number.

---

*Khatedar*.—A registered occupant whose name is entered by authority in the Government records as holding unalienated land.

## COORG.

*Band*.—Forest land granted for the service of the holding of rice-fields to which it is allotted to be held free of revenue for grazing, leaf manure, fire-wood and for timber required for the farm.

---

*Jamma*.—A military tenure in Coorg under which certain Coorgs hold lands on half the ordinary assessment, and in return are liable to be called on to perform certain services, such as escorting treasure and military service if required

---

*Umbli*.—Lands granted on reduced rates to individuals on account of services rendered to the State by themselves or their ancestors.

---

*Jodi*.—Lands on which half the assessment is paid to Government and half to the village or other temple.

## AJMERE-MERWARA.

*Khalsa*.—Land paying full revenue to Government.

---

*Istamrar*.—A tenure the revenue of which has been assigned, but which is charged with a permanently-fixed quit-rent.

---

*Jagir*.—Land granted revenue-free on condition of military or in consideration of political service.

---

*Total Acreage, Classification of Areas, Irrigation, Crops, Current Fallows and Stock*

## TABLES.

Table 4.—Stock, &c.

	No.	No.	No.	No.	No.*	No.†	No.
1. Bulls and Bullocks	9,836,923	4,332,697	4,285,413		1,941,996	2,622,477	523,896

5. Young stock (Calves and Buffalo Calves)	(a)	2,653,267	2,673,703		1,094,661	1,354,796	245,281
6. Sheep		3,208,249	3,335,549		240,216	337,395	1,807
7. Goats	6,402,215	3,464,114	3,463,805	Not available.	406,729	543,862	1,647
8. Horses and Ponies	226,205	269,231	269,672		80,467	96,195	14,404
9. Mules and Donkeys	463,579	538,422	541,207		22,153	20,007	562
10. Camels	198,221	210,140	215,841		396	1,352	
11. Ploughs	2,165,239	2,191,437	2,191,793		858,325	1,074,654	290,896
12. Carts	180,846	206,628	219,138		233,278	365,801	189,422

(a) Not reported.

(b) Includes the areas under "culturable waste other than fallows" in the Cachar, Sylhet, and Lakhimpur districts, as they cannot be distinguished from the areas not available for cultivation.

(c) Includes *bagai* land.

(d) Does not correspond with the total obtained by adding up the details, as it includes the cropped area in the Naga Hills (1,233 acres) and the Garo Hills (21,723 acres,) for which details are not available.

(e) Revised figures.

† Excludes the area (4,228 acres) of the Kamptee Cantonment.

(a) Not reported  
 (b) Includes the areas under "culturable waste other than fallows" in the Cachar, Sylhet, and Lakhimpur districts, as they cannot be distinguished from the areas not available for cultivation.  
 (c) Includes best land  
 (d) Does not correspond with the total obtained by adding up the details, as it includes the cropped area in the Naga Hills (1,233 acres) and the Gare Hills (21,723 acres) for which details are not available.  
 (e) Revised figures.  
 † Excludes the area (4,228 acres) of the Kamptee Cantonment.

in each Province of British India during the three years 1891-92, 1892-93 and 1893-94.

(f) The figures given for private canals, tanks, wells, and other sources are rough estimates.  
 (k) Includes 26,000 acres under Fibres (not specified) in the Birbhum and Singhbhum districts.  
 (l) Includes 62,000 acres under Dyes (not specified) in the Moughyr, Buaugampur, and Purneah districts.  
 (m) Not reported.  
 (n) Differs from the area given in column 5 of Table A. 2, for which no explanation has been furnished.  
 (o) Differs from the area shown in column 5 of Table A. 2, (by 15,985 acres) which is the cropped area in the whole Inam villages of the North Arcot and Trichinopoly districts, the details of which are not given.  
 (p) Includes goats for the Bellary, Anantapur, Madras, and Tanjore districts.  
 (q) Includes goats for the Kistna, Bellary, and Chingleput districts.  
 † Exclusive of the area of the Chittagong Hill Tracts for which no return received.

(j) The figures in columns 1, 2, 3, and 4 of Table A. 3, so far as they concern large istimrar villages in the Ajmere district, are conjectural.  
 (k) Includes, in the case of Bengal, the area under "culturable waste other than fallows" and "current fallows," and in the case of Assam, the whole of the area under "culturable waste other than fallows."  
 (l) Includes the area under "culturable waste other than fallows" in the Cachar, Sylhet, and Lakhimpur districts of Assam (vide note (b) in page 6).  
 (m) Vide note (b).  
 (n) Excludes Bengal, for which Irrigation and Stock statistics are not available.  
 (o) Includes the total area of crops irrigated in large istimrar villages in Ajmere, the details of the crops irrigated not being available.  
 (p) Includes the area under Bajra in Bengal.  
 (q) Includes 12,032,600 acres shown in a lump against items 3 to 9 under Bengal.  
 (r) Includes the area under "Other oilseeds" in Bengal.  
 (s) Includes the area shown in a lump against items 10 to 12 under Bengal.  
 (t) Includes miscellaneous non-food-crops (1,334 acres) in large istimrar villages of the Ajmere district.  
 (u) Includes the area under miscellaneous non-food-crops in Bengal and Assam.  
 (v) Vide note (c).  
 (w) Differs from the total obtained by adding the details (vide note (d) in page 28).  
 (x) Differs from the area shown in column 5 of Table A. 3 (vide note (n) in page 27).  
 (y) Differs from the area shown in column 5 of Table A. 2. (vide note (a) in page 27).  
 (z) Includes cows for the Punjab and Berar and cows and calves for Assam.

(b) Includes the area of fallow land in *msf khira*, *lakhray*, special tenures in tracts not cadastrally surveyed.  
(c) Includes current fallows of *tee-simpe*, *lakhray*, 30 years' lease rules grants in the non-cadastral tracts.  
(d) Shows the total of *khira*, *msf khira*, *lakhray*, and grant fallow and waste, whereas in 1892-93 the assessed waste under ordinary settlement only was shown.  
(e) Shows for the first time the fallow areas of *msf khira*, *lakhray*, and rent-free holdings and jungle lands of *khira* patta.  
(f) Includes lands relinquished and deserted. Prior to 1893-94 no record of current fallows was kept in this district.  
(g) Includes the area planted with *sal* trees in reserved forests which were returned in 1892-93 as "miscellaneous crops."

\* The returns for Coorg and Manpur relate to the year ending 31st March 1894, and those for Ajmere-Merwara and the Mysore State to the year ending 30th June 1894.

(a) The figures in items 1, 2, 3 and 4 of Table A. 2, so far as they concern large istimrar estates in Ajmere, are conjectural.

(b) Only donkeys.

(c) Includes 52,000 acres irrigated in large istimrar villages for which details are not available.

(A—concluded.

in Coorg, Ajmere-Merwara, Pargana Manpur (Central India), and the Native State of 1893-94.\*

\* The return being quinquennial, the figures for 1892-93 have been reproduced.  
† Not reported.  
(a) Includes the whole Inam villages.  
(b) Excludes the population of whole Inam villages.  
(c) The cultivated area on which the incidence has been calculated is estimated at 56,270,103 acres.  
(d) Excludes Jalpaiguri and Lohardugga districts.  
(e) Excludes Lohardugga districts.  
(f) Includes Malguzari and Thikadari.  
(g) Agrees with column 4 plus column 2 (b) of Table A 1.  
(h) Includes revenue from permanently settled zemindaris in Amherst and Tavoy which cannot be separated.  
(i) Calculated on the cultivated area exclusive of that in the zemindari permanently settled portion of Sylhet and Goalpara.  
(j) Information for all districts not available.  
(k) The cultivated areas in the permanently settled zemindaris of the Madras Presidency and of the Sylhet and Goalpara districts of Assam have not been included in calculation, the figures not being available.

\* The area being less than half an acre has been omitted from this statement.

† This is the figure furnished by Planters. The village accounts show an area of 9,202 acres.

‡ This figure is given by Planters, but that according to village accounts is 18,404,330.

§ The figures relate to 18 out of 42 plantations in the district.

¶ In the year the figures have been furnished by a larger number of Planters than the previous year.

§ The figures are left to grow wild and are not harvested.

Statement showing the condition of Cinchona cultivation in British India and the Native States on the 31st March 1894—concl'd.
