PREFATORY NOTE

The National Bureau of Economic Research, Incorporated, was chartered in 1920 to conduct quantitative investigations into subjects that affect public welfare. Its aim is to ascertain fundamental facts within its field as accurately as may be, and to make its findings widely known. By so doing, the Bureau hopes to aid all thoughtful men, however divergent their views of public policy, to base their discussions on objective knowledge as distinguished from subjective opinion.

The organization of the Bureau is designed to ensure not only scientific and impartial work on the part of its staff, but also a review of their findings by men who represent all the important viewpoints from which economic problems are regarded. Control is vested in a board of nineteen directors. The present constitution of this board is as follows:

Directors-at-large:

T. S. Adams, Adviser to the U. S. Treasury Department.

PREFATORY NOTE

- John R. Commons, Professor of Political Economy,
University of Wisconsin.
- John P. Frey, Editor of the *International Workers' Journal*.
- Edwin F. Gay, President of the *New York Evening Post*.
- Harry W. Laidler, Secretary of the Intercollegiate Socialist Society.
- Elwood Mead, Professor of Rural Institutions, University of California.
- Wesley C. Mitchell, New School for Social Research.
- J. E. Sterrett, Member of the firm of Price, Waterhouse & Company.
- N. I. Stone, Labor Manager, Hickey, Freeman Company.
- Allyn A. Young, Professor of Economics, Harvard University.

Directors-by-Appointment representing organizations:

- F. P. Fish, The National Industrial Conference Board.
- Hugh Frayne, The American Federation of Labor.
- David Friday, The American Economic Association.
- W. R. Ingalls, The Engineering Council.
- J. M. Larkin, The Industrial Relations Association of America.
- George E. Roberts, The American Bankers' Association.
- Malcolm C. Rorty, The American Statistical Association.
- A. W. Shaw, The Periodical Publishers' Association.
- Gray Silver, The American Federation of Farm Bureaus.

The directors, through their Executive Committee, choose the topics for investigation and appoint the scientific staff. The by-laws provide that all reports made by the staff shall be submitted to the directors for criticism before they are published, and that a director who dissents from any finding approved by the majority of the board shall have his dissenting opinion published in the report if he so desires. The present report owes much to the active coöperation of the directors, and many suggestions made by them are incorporated in the text. It is believed that this critical review of the staff's work by a group of men representing varied training, experience, and opinions safeguards the reports against bias.¹

The chief financial support of the Bureau has come from two philanthropic foundations, the Commonwealth Fund and the Carnegie Corporation. Several other contributions, none exceeding \$1,000, have been made by public-spirited individuals and business enterprises. The General Theological Seminary of New York has generously furnished office space in one of its buildings. To all of these donors the Bureau takes this occasion, its first public opportunity, to express its thanks.

¹ Because of absence in Europe Mr. Fish has not been able to read the present report.

The present report deals with a subject of fundamental importance in which the truth is hard to find—a subject so important that despite manifold difficulties, it has attracted investigators in many countries. Australia took an actual census of wealth and incomes in 1915 as a war measure. Excellent estimates have been made of the national income of Great Britain and Germany, where well-administered income taxes with low exemption limits provide a solid foundation to build upon. Approximations that are less accurate because the underlying statistics are less abundant have been published for France, Italy, Spain, Austria-Hungary, Canada, and Japan. In the United States, statisticians attacked the problem from time to time before the war—notably Charles B. Spahr, Frank H. Streightoff, Willford I. King, and Scott Nearing. They found the American data bulky but miscellaneous and hard to fit together. The war lent the problem pressing importance; and several estimates of the national income, most of them based directly or indirectly upon Mr. King's figures for 1910, were made by men interested in the government's financial policy. These estimates were all rough approximations, hastily constructed. Quite naturally, they differed considerably in their results.

A desire to learn whether the National Income is adequate to provide a decent living for all persons, whether this income is increasing as rapidly as the population, and whether its distribution among individuals is growing more or less unequal, and to sift the divergencies among the current estimates led the National Bureau of Economic Research to choose this field for its first investigation. Its staff was directed to undertake a thorough canvass of all the available materials and to make as close an estimate as possible of the size of the National Income, its variations from year to year in dollars and in goods, and the way in which this income is divided among the people. More than a year has been spent upon this work, the results of which are summarized in the chapters that follow.

Even with the addition of the income-tax tables which have recently become available, the American data leave much to be desired. Moreover, the wild fluctuations of prices, wages, and profits during the war introduce new complications into a task that is difficult under the most stable conditions. Nevertheless, it is believed that the results here presented, while necessarily subject to a margin of error, are more reliable than those which earlier American investigators, working with less

PREFATORY NOTE

help and fewer data, have been able to obtain; and that, in reliability, these results compare not unfavorably with the estimates available for foreign countries. The Bureau is planning to continue the work of estimating the National Income from year to year on a basis comparable with that followed in this volume. The results for later years will be announced as the necessary data become available.

TABLE OF CONTENTS

	PAGE
PREFATORY NOTE	v
CHAPTER 1. INTRODUCTION	1
I. The Questions to be Answered	1
II. Material and Methods	2
III. The Two Ways of Estimating the National Income	9
CHAPTER 2. THE SIZE OF THE NATIONAL INCOME .	12
I. The Two Estimates of the National Income Compared	12
II. Analysis of the Estimate by Sources of Production	16
III. Analysis of the Estimate by Incomes Re- ceived	29
IV. What these Estimates Count as National Income	42
V. Final Estimate of the Size of the National Income	60
VI. The National Income Reduced to Pre-War Values	69
VII. Total and Per Capita Income in Different Countries,	81
CHAPTER 3. THE DISTRIBUTION OF THE NATIONAL INCOME	89
I. The Share of Employees in the National In- come	89

INDEX

- Agricultural laborers, wages of, 33.
- Agriculture, effect of business cycles on, 26, 27; employees, 92, 93, 102, 104, 106; value product, 21, 23, 24.
- Anderson, B. M., estimate of National Income, 65, 66, 68.
- Australia, census of incomes, 2, 83, 85-87.
- Austria-Hungary, income of, 85-87
- Banking, employees, 92, 93, 103; value product, 18, 19, 21, 23, 24, 26, 28.
- Bankers Trust Company, estimate of National Income, 65, 66.
- Barthe, André, income of Spain, 83, 85-87.
- Bogart, E. L., income of Austria-Hungary, 83; income of Italy, 83.
- Bowley, A. L., income of United Kingdom, 82, 85.
- Building, effect of war restrictions on, 26.
- Business cycles, and incomes under and over \$2,000, 35-37; and size of National Income, 74-77; and value product of different industries, 26-28.
- Canada, income of, 84-87.
- Census of incomes, Australia, 2, 83, 85-87.
- Construction, value product, 18, 19. See *Manufacturing*.
- Consumption goods, interest on, a part of the national income, 25.
- Corporate surplus, 32, 34, 35, 38, 40, 41, 46-48.
- Cycles, business, see *Business cycles*.
- Data, see *Sources of information*.
- Day, E. E., index of physical production, 79, 80.
- Earnings, of employees, 100-103. See different industries such as *Agriculture, Banking, etc.*
- Edwards, A. M., estimate of number of housewives, 58.
- Electrical industries, employees, 92, 103; value product, 18, 19.
- Emery, A. T., incomes of 2,000 Chicago households, 127.
- Employees, income other than earnings, 103-108. See *Earnings* and industries such as *Agriculture, Banking, etc.*, and *Income, National, Share of employees*.
- Errors, estimated, 60-68, 143.
- Estimate of National Income by Incomes Received, 12-15, 27-42; amount of income, 14, 16, 34-38, 72, 73, 79; effect of inadequate reporting, 44-46; estimated errors, 60-68; income per capita, 13, 15; treatment of taxes, 49-51.
- Estimates of National Income by Sources of Production, 8-15, 16-27; employees, 92, 93, 102, 103, 105, 106; estimated errors, 60-63; income per capita, 13, 15; total value product, 13, 14, 16, 72, 73, 79; treatment of taxes, 49, 51-56;

- value product by industries, 18, 19, 21, 23, 24, 26-28.
- Exempt income, see *Income, tax-exempt*.
- Factories, employees, 92, 93, 102-105; value product, 18, 19.
- Farmers' income, 34-39, 112.
- France, income of, 83, 85-87.
- Frequency tables, distribution of income among individuals, 128, 129, 132, 134; income tax data, 116, 117.
- Friday, David, estimate of National Income, 65, 66, 68.
- Germany, income of, 82-87.
- Giffen, Sir Robert, income of Canada, 84, 85.
- Government, effect of business cycles on, 26, 28; employees, 92, 93, 102-104, 106; value product, 18, 19, 21-24, 26, 28, 52.
- Hand trades, employees, 92, 102, 103; value product, 18, 19. See *Manufacturing*.
- Helfferich, Dr., income of Germany, 82, 83, 85.
- Home ownership, 42.
- Housewives, amount of National Income including, 67 (note 1); excluded from National Income, 42, 143; number, 57-59; value of services, 57-60.
- Income, distribution among individuals, 115-142; amount received by richest 5 per cent., 115, 116; data used in estimating, 124-127; frequency distribution, 128, 129, 132-135; over \$2,000, except farmers, 29-35, 108-116, 146; over \$2,000, including farmers, 112, 114; Pareto and the double logarithmic scale, 118, 119; soldiers, sailors and marines, 101, 102; under \$2,000, except farmers, 30, 31, 34-39, 108-116, 146; under \$2,000, including farmers, 112, 114.
- Income, farmers', 33-35, 38, 39.
- Income, foreign countries, see *Australia, Austria-Hungary, Canada, France, Germany, Italy, Japan, Spain, United Kingdom*.
- Income, National, amount, 64-66, 71, 74, 75, 79; amounts contributed by various industries, 18, 19, 24, 26; American compared with that of Australia, Austria-Hungary, Canada, France, Germany, Italy, Japan, Spain, United Kingdom, 79-88, 144, 145; commodities and services for which a price is not generally paid, 57-60; definition, 42; definition, difficulties of, 3, 4; estimates by Anderson, Bankers Trust Company, Friday, Ingalls, King, Miller, National Bureau of Economic Research, Stamp, 65-67; estimated errors in, 60-68; per capita income, 13, 68, 76-78, 80, 144; pre-war values, 68-81; share of employees in, 89-108, 145, 146.
- Income, negative, 132, 134, 136. See *Natural resources, depletion of*.
- Income, personal or individual, see *Income, distribution among individuals*.
- Income receivers, number of, 112, 113.
- Income, tax-exempt, 31, 34-39.
- Income tax figures, 120, 121, 140; comparison of American, British and Prussian, 84; intensive drive for incomes under \$5,000, 130; necessary adjustments in, 29, 30, 111.
- Incomes received, Estimate by,

- see *Estimate of the National Income by Income Received*.
- Industries, large scale, share of employees, 95-97, 99, 146; share of management and property, 97.
- Industries, unclassified and miscellaneous income, employees, 92; value product, 18, 19, 21, 23, 26.
- Ingalls, W. R., estimate of National Income, 65-67.
- Italy, income of, 85-87.
- Japan, income of, 85-87.
- King, W. I., estimate of National Income for 1910, 66, 71; index of physical production, 79, 80.
- Knibbs, census of Australian income, 85.
- Lorenz curve, 141, 142.
- Manufacturing, effect of business cycles on, 26, 27; employees' share, 92; value product of factories, construction and other hand trades, 18, 19, 21, 23, 24, 26, 27.
- Miller, A. C., estimate of National Income, 65, 66.
- Mineral production, effect of business cycles on, 26, 27; employees, 92, 93, 102-106; value product, 18, 19, 21, 23, 24, 26, 27.
- Mines or mining, see *Mineral production*.
- Miscellaneous income, see *Industries, unclassified*.
- Mortgages, farm, interest on, 33.
- Natural resources, depletion of, 56, 57, 137.
- Pareto, Vilfredo, use of the logarithmic scale, 118, 119.
- Pareto's law, 119-123.
- Personal income, see *Income, distribution among individuals*.
- Population, U. S., each year, 1909 to 1919, 13.
- Prices, fluctuation in commodity, and size of National Income, 69-81.
- Probable errors of estimate, see *Errors, estimated*.
- Production, Estimate by Sources of, see *Estimate of the National Income by Sources of Production*.
- Production, indices of physical, 79, 80.
- Pupin, René, income of France, 83, 85.
- Railways and allied industries, employees, 92, 93, 102-105; value product, 18, 19.
- Rate regulation, transportation, 26.
- Rent paid by tenant farmers, 33.
- Rental value of homes owned by their occupants, 42.
- Snyder, Carl, index of physical production, 79, 80.
- Sources of information, 2, 3.
- Spain, income of, 83, 85-87.
- Stamp, Sir Josiah, accuracy of income estimates, 5; estimate of National Income, 66, 67; income of Japan, 84, 85; wealth and income of the chief powers, 81, 82, 85.
- Stewart, W. W., index of physical production, 79, 80.
- Street railways, see *Electrical industries*.
- Surplus, see *Corporate surplus*.
- Taxes, treatment under Estimate by Incomes Received, 49-51; treatment under Estimate by Sources of Production, 49, 51, 52.

- Tax-exempt income, see *Income, tax-exempt.*
- Telegraph and telephone companies, see *Electrical industries.*
- Transportation, effect of business cycles on, 26-28; employees, 104, 105, 107; value product, 18, 19, 21, 23, 24, 26, 28.
- Transportation by water, employees, 92, 102, 103; value product, 18, 19.
- Unclassified industries, see *Industries, unclassified.*
- United Kingdom, income tax, 84; National Income, 85-8
- Value product, definition 17 (note); method of estimating, 20. See *Estimate the National Income Sources of Production*, and different industries such as *Agriculture, Banking, etc.*
