BRITISH INDIA

COMPILED IN THE OFFICE OF THE DIRECTOR-GENERAL OF COMMERCIAL INTELLIGENCE

CALCUTTA

OFFICE OF THE SUPERINTENDENT OF GOVERNMENT PRINTING, INDIA

1906

CALCUTTA
GOVERNMENT OF INDIA CENTRAL PRINTING OFFICE
8, HASTINGS STREET

NOTICE

In the present issue of the volume of Financial and Commercial Statistics, the undermentioned additions and changes have been made—

A Table (No. 4) has been added to Section IX—Railways, shewing the number of servants of all races employed on open railway lines at the close of each year from 1881. Tables Nos. 1 and 2 have undergone revision, and are now based on the Report on the Administration of Railways published by the Railway Board.

A supplementary table (No. 8-A), shewing the number of pieces of several denominations of copper coins other than those of the Government of India struck in the Calcutta and Bombay Mints since 1881-82, has been inserted in Section XV—Mint and Coinage.

A new table (No. 7) has been appended to the tables relating to Indian Joint Stock Companies in Section XXIX of the volume, to shew the number, description, and capital in sterling of Companies working exclusively in India during the year 1904. In other tables of the Section, the details for different provinces have been shewn.

Table No. 6 of Section XXVII—Mineral Production, has been amplified. The statistics relating to chromite, diamonds, graphite, iron ore, jadestone, magnesite, rubies, and saltpetre have been added in order to make the tables in this section correspond with the memorandum published by the Director of the Geological Survey of India.

The name of the tables in Section No. XXVIII hitherto styled “Large Industries” has been changed to “Sundry Industries,” as the figures deal with only a limited number of industries. Additional information is given about dock-yards, kerosene tinning and packing works, petroleum and plumbago mines, railway workshops, and tramway works.

FREDERICK NÖEL-PATON

Director-General of Commercial Intelligence

January 25, 1906

FINANCIAL AND COMMERCIAL STATISTICS

CONTENTS

INTRODUCTION		PAGES
SUMMARIES OF THE TABLES AND EXPLANATORY MEMORANDA		xix to lxxii
SUMMARY TABLE OF THE FINANCIAL AND COMMERCIAL STATISTICS OF BRITISH INDIA		1 to 4
I.—AREA AND POPULATION		
No. of TABLE

11.	NUMBER of NEWSPAPERS RECEIVED for DELIVERY in each PROVINCE, from 1853-54 to 1904-05	208
12.	NUMBER of PAID, UNPAID, INSURED, and VALUE-PAYABLE PARCELS RECEIVED for DELIVERY in each PROVINCE, from 1853-54 to 1904-05	209
13.	NUMBER of UNREGISTERED, REGISTERED, and VALUE-PAYABLE PACKETS RECEIVED for DELIVERY in each PROVINCE, from 1853-54 to 1904-05	210 and 211
14.	NUMBER of POSTAGE STAMPS of each DENOMINATION sold by the POSTAL DEPARTMENT, and the VALUE REALISED, from 1856-57 to 1904-05	212 and 213
15.	NUMBER of ARTICLES RECEIVED and DISPOSED of by the DEAD LETTER OFFICES, from 1895-96 to 1904-05	214 and 215
16.	NUMBER of ARTICLES SENT to, and RECEIVED from, the DISTRICT POST by the GENERAL POST OFFICE, in each CIRCLE, from 1895-96 to 1904-05	216
	<i>Money Orders</i>	
17.	NUMBER of MONEY ORDER OFFICES OPEN, NUMBER and VALUE of MONEY ORDERS ISSUED and PAID, and REVENUE therefrom, from 1862-63 to 1904-05	217 to 219
18.	NUMBER and VALUE of MONEY ORDERS ISSUED in each PROVINCE, from 1866-67 to 1904-05	220 to 225
19.	NUMBER and VALUE of MONEY ORDERS PAID in each PROVINCE, from 1866-67 to 1904-05	226 to 231
20.	COMMISSION on MONEY ORDERS RECEIVED in each PROVINCE, from 1866-67 to 1904-05	232
	 XII.—BANKS OF DEPOSIT, EXCHANGE, AND DISCOUNT	
1.	CAPITAL, RESERVE, DEPOSITS, and CASH BALANCES of the PRESIDENCY BANKS and of the JOINT-STOCK BANKS whose HEAD OFFICES are in INDIA, from 1870 to 1904	234 and 235
2.	CAPITAL, RESERVE, DEPOSITS, and CASH BALANCES of the JOINT-STOCK BANKS whose HEAD OFFICES are not in INDIA, from 1870 to 1904	236

No. of Tables	Pages
XIII.—SAVINGS BANKS	
1. NUMBER of DEPOSITORS and AMOUNT of DEPOSITS in the POST OFFICE SAVINGS BANKS, from 1870-71 to 1904-05	237
XIV.—PAPER CURRENCY	
1. RECEIPTS, CHARGES, and NET PROFITS of the PAPER CURRENCY DEPARTMENT, from 1862-63 to 1904-05	238
2. NUMBER of each DENOMINATION of CURRENCY NOTES in CIRCULATION on the last day of each year, from 1874-75 to 1904-05	239
3. VALUE of NOTES in CIRCULATION, of the RESERVE in GOLD and SILVER and in GOVERNMENT SECURITIES, on the last day of each year from March 1862 to March 1905, in totals for all INDIA and for each PRESIDENCY; also of NOTES forming part of the CIRCULATION which were in GOVERNMENT TREASURIES on the same dates	240 to 242
4—A. AVERAGE VALUE of NOTES in CIRCULATION, and of the RESERVE in GOLD and SILVER, in each PRESIDENCY, from 1862-63 to 1899-1900	244 and 245
B. VALUE of NOTES in CIRCULATION, and of the RESERVE in GOLD and SILVER, on the last day of each month in each PRESIDENCY, from April 1900 to March 1905	246 and 247
5—A. AVERAGE VALUE of NOTES in CIRCULATION and of the SILVER COIN RESERVE, in the CIRCLES of the BENGAL PRESIDENCY, from May 1864 to March 1900	248
B. VALUE of NOTES in CIRCULATION and of the SILVER COIN RESERVE, on the last day of each month, in the CIRCLES of the BENGAL PRESIDENCY, from April 1900 to March 1905	249
6—A. AVERAGE VALUE of NOTES in CIRCULATION and of the SILVER COIN RESERVE, in the CIRCLES of the BOMBAY PRESIDENCY, from September 1864 to March 1900	250
B. VALUE of NOTES in CIRCULATION and of the SILVER COIN RESERVE, on the last day of each month, in the CIRCLES of the BOMBAY PRESIDENCY, from April 1900 to March 1905	251
7—A. AVERAGE VALUE of NOTES in CIRCULATION and of the SILVER COIN RESERVE, in the CIRCLES of the MADRAS PRESIDENCY, from January 1865 to March 1900	252
B. VALUE of NOTES in CIRCULATION and of the SILVER COIN RESERVE, on the last day of each month, in the CIRCLES of the MADRAS PRESIDENCY, from April 1900 to March 1905	253
8—A. AVERAGE VALUE of NOTES in CIRCULATION and of the SILVER COIN RESERVE, in the RANGOON CIRCLE, from August 1883 to March 1900	254
B. VALUE of NOTES in CIRCULATION and of the SILVER COIN RESERVE, on the last day of each month, in the RANGOON CIRCLE, from April 1900 to March 1905	ib
9. VALUE of CURRENCY NOTES in CIRCULATION and held in GOVERNMENT TREASURIES, and of the RESERVE held in GOVERNMENT SECURITIES, on the last day of each month, from 1875-76 to 1904-05	
A. NOTES in CIRCULATION, less THOSE CASHED in other CIRCLES	255
B. NOTES held in GOVERNMENT TREASURIES	256
C. RESERVE held at CALCUTTA in GOVERNMENT SECURITIES	257
10—A. GOLD RESERVE HELD by the CURRENCY DEPARTMENT on the last day of each month, from 1871-72 to 1904-05	258
B. SILVER RESERVE HELD by the CURRENCY DEPARTMENT on the last day of each month, from 1875-76 to 1904-05	259
XV.—MINT AND COINAGE	
<i>British India</i>	
1. VALUE of GOLD IMPORTED into and EXPORTED from BRITISH INDIA from and to FOREIGN PORTS; of the GOLD received in the MINTS; and of the GOLD COINAGE in the MINTS, from 1835-36 to 1904-05	260
2. VALUE of SILVER IMPORTED into and EXPORTED from BRITISH INDIA from and to FOREIGN PORTS; of the SILVER received in the MINTS; and of the SILVER COINAGE in the MINTS, from 1835-36 to 1904-05	261
3. QUANTITY of GOLD and SILVER IMPORTED into and EXPORTED from BRITISH INDIA from and to FOREIGN PORTS, from 1873-74 to 1904-05	262
4. VALUE of SMALL SILVER COIN, and TOTAL VALUE of the GOLD, SILVER, and COPPER COINAGE at the MINTS, from 1835-36 to 1904-05	263
5. VALUE of OLD GOVERNMENT of INDIA RUPEES (including SMALL SILVER COINS) received in the MINTS in INDIA for RECOINAGE and of the SILVER COINAGE in each MINT, from 1835-36 to 1904-05	264
5—A. VALUE of COINS OTHER than the GOVERNMENT of INDIA RUPEES RECEIVED in the MINTS for RECOINAGE from 1869-70 to 1904-05	265
6. TALE and VALUE of each DENOMINATION of GOLD and SILVER COINS STRUCK in the MINTS, from 1835-36 to 1904-05	266
6—A. TALE and VALUE of each DENOMINATION of COPPER COINS STRUCK in the MINTS, from 1835-36 to 1904-05	267
7. NUMBER of GOLD, SILVER, and COPPER COINS STRUCK in each MINT, from 1835-36 to 1904-05	268 to 271
8. NUMBER of each DENOMINATION of COPPER COINS, exclusive of CENTS, STRUCK in each MINT, and the TOTAL STRUCK, from 1835-36 to 1904-05	272
8—A. NUMBER of PIECES of the SEVERAL DENOMINATIONS of COPPER COINS other than those of the GOVERNMENT of INDIA STRUCK in the CALCUTTA and BOMBAY MINTS from 1881-82 to 1904-05	273

XV.—MINT AND COINAGE—*continued*

No. of TABLE	PAGES
<i>Bengal</i>	
9. VALUE of GOLD IMPORTED into and EXPORTED from the BENGAL PRESIDENCY (including BURMA) from and to FOREIGN PORTS, and of the GOLD RECEIVED and COINED in the CALCUTTA MINT, from 1835-36 to 1904-05	274
10. VALUE of SILVER IMPORTED into and EXPORTED from the BENGAL PRESIDENCY (including BURMA) from and to FOREIGN PORTS, and of the SILVER RECEIVED and COINED in the CALCUTTA MINT, from 1835-36 to 1904-05	275
11. VALUE of each DENOMINATION of SMALL SILVER COINS and COPPER COINS STRUCK and TOTAL VALUE of GOLD, SILVER, and COPPER COINAGE at the CALCUTTA MINT, from 1835-36 to 1904-05	276 and 277
<i>Bombay</i>	
12. VALUE of GOLD IMPORTED into and EXPORTED from the BOMBAY PRESIDENCY (including SIND) from and to FOREIGN PORTS, and of the GOLD RECEIVED and COINED in the BOMBAY MINT, from 1835-36 to 1904-05	278
13. VALUE of SILVER IMPORTED into and EXPORTED from the BOMBAY PRESIDENCY (including SIND) from and to FOREIGN PORTS, and of the SILVER RECEIVED and COINED in the BOMBAY MINT, from 1835-36 to 1904-05	279
14. VALUE of each DENOMINATION of SMALL SILVER COINS and COPPER COINS STRUCK, and TOTAL VALUE of GOLD, SILVER, and COPPER COINAGE at the BOMBAY MINT, from 1835-36 to 1904-05	280
15. NUMBER of BRITISH DOLLARS COINED in the INDIAN MINTS, and QUANTITY and VALUE of BRITISH DOLLARS EXPORTED from BRITISH INDIA, from 1895-96 to 1904-05	281
16. QUANTITY of SILVER passed into the MINTS in NATIVE STATES from 1891 to 1904	282
17. RATIO of GOLD to SILVER, and COST in PENCE of RUPEES COINED in the INDIAN MINTS based on the PRICE of SILVER	283 and 284

XVI.—REGISTERED DEBT

1. ABSTRACT STATEMENT of the RUPEE and STEELING DEBT and the INTEREST thereon; ANNUAL INCREASE or REDUCTION of the DEBT; PROPORTION of the RUPEE DEBT held by NATIVES and by EUROPEANS, and PROPORTION held in LONDON; from 1820-21 to 1903-04... ..	286
2. DETAILED STATEMENT of the REGISTERED DEBT in INDIA and in ENGLAND at the end of each year, from 1820-21 to 1903-04, also the ANNUAL AMOUNT of INTEREST thereon	287 to 291
3. TOTAL REGISTERED DEBT in INDIA and ENGLAND; NET AMOUNT BORROWED and PAID off; and CASH BALANCES on the last day of each year, from 1820-21 to 1903-04	292 and 293
4. DETAILED STATEMENT of INCREASE and DECREASE of REGISTERED DEBT in INDIA and ENGLAND, and the CASH BALANCES on the last day of each year, from 1820-21 to 1903-04	294 to 297
5. REGISTERED DEBT, and other LOANS and LIABILITIES BEARING INTEREST in INDIA, from 1820-21 to 1903-04	298 and 299
6. PROPORTION of the REGISTERED DEBT held by EUROPEANS and NATIVES, from 1868 to 1904	300 and 301
7. AMOUNT of the RUPEE DEBT held in INDIA and LONDON on the 31st March of each year, from 1869 to 1905	302
8. DETAILED STATEMENT of the REGISTERED DEBT held by EUROPEANS and NATIVES, in the half-year ending 31st December 1904	304 and 305
9. LOANS RAISED in ENGLAND and OUTSTANDING on the 31st March 1904	306 and 307
10. AMOUNT of each RUPEE LOAN held in INDIA and LONDON on the 31st March 1905	308
11. AMOUNT of INTEREST due on the PUBLIC DEBT in each month, from 1889-90 to 1904-05	309 to 311
12. CASH BALANCES in the TREASURIES and in the PRESIDENCY BANKS and their BRANCHES on the last day of each month, from 1876-77 to 1904-05	312
13. AMOUNT in the RESERVE TREASURIES on the last day of each month, from 1890-91 to 1904-05	313

XVII.—DRAWINGS OF THE HOME GOVERNMENT

1. AMOUNT of COUNCIL BILLS PAID in INDIA, from 1854-55 to 1904-05	314
2. AMOUNT of BILLS DRAWN on INDIA by the HOME GOVERNMENT in each month, and the AVERAGE RATE of EXCHANGE in each year, from 1881-82 to 1904-05	315
3. AMOUNT of COUNCIL BILLS DRAWN on CALCUTTA, BOMBAY, and MADRAS, with the DRAWING RATES; the PAYMENT of RAILWAY CAPITAL into the HOME TREASURY, less withdrawals in ENGLAND and the sums BORROWED in ENGLAND; from 1834-35 to 1904-05	316 and 317

XVII.—DRAWINGS OF THE HOME GOVERNMENT— <i>continued</i>		PAGES
No. of TABLE		
4.	HIGHEST and LOWEST RATES of EXCHANGE on BILLS DRAWN by the SECRETARY of STATE in each month, from 1885-86 to 1904-05	318 and 319
5.	AMOUNT of COUNCIL BILLS DRAWN and the AVERAGE RATE of EXCHANGE in each month, from 1885-86 to 1904-05	320 and 321
6.	AMOUNT of COUNCIL BILLS PAID in CALCUTTA, BOMBAY, and MADRAS, from 1854-55 to 1904-05	322
XVIII.—WAYS AND MEANS OF THE HOME GOVERNMENT		
1.	DISBURSEMENTS in ENGLAND, and the WAYS and MEANS by which they were met, from 1834-35 to 1904-05	324 and 325
2.	PARTICULARS of LARGE or EXCEPTIONAL PAYMENTS included in the DISBURSEMENTS entered in Table No. 1	326
XIX.—SECURITIES ENFACED FOR PAYMENT OF INTEREST IN LONDON		
1.	AMOUNT of GOVERNMENT PROMISSORY NOTES ENFACED for PAYMENT of INTEREST in LONDON at the end of each month from 1860 to 1904	327

2.	DETAILED STATEMENT of PAPER MILLS in 1904	382
 XXV.—BREWERIES		
1.	STATEMENT of the PROGRESS of the BREWING INDUSTRY, from 1877 to 1904; and detailed STATEMENT of the PRODUCTION of BEER in 1903 and 1904	383
 XXVI.—COAL MINES		
1.	QUANTITY of COAL PRODUCED in each PROVINCE, from 1878 to 1904	384
2.	AVERAGE NUMBER of PERSONS EMPLOYED in the COAL MINING INDUSTRY, from 1878 to 1904	ib
3.	STATEMENT of the COAL MINES in each PROVINCE, QUANTITY of COAL PRODUCED, and NUMBER of PERSONS EMPLOYED at each, in 1904	385 to 391
 XXVII.—MINERAL PRODUCTION		
1.	ABSTRACT STATEMENT of the QUANTITY and VALUE of SALT, COAL, GOLD, and PETROLEUM PRODUCED from 1890 to 1904	392
2.	QUANTITY and VALUE of SALT PRODUCED, from 1895 to 1904	393
3.	QUANTITY and VALUE of COAL EXTRACTED, from 1895 to 1904	394
4.	QUANTITY and VALUE of GOLD EXTRACTED, from 1895 to 1904	395
5.	QUANTITY and VALUE of PETROLEUM PRODUCED, from 1895 to 1904	ib
6.	QUANTITY and VALUE of OTHER MINERALS PRODUCED, from 1895 to 1904	396 to 398
 XXVIII.—SUNDRY INDUSTRIES		
1.	ABSTRACT STATEMENT of the PROGRESS of SUNDRY INDUSTRIES, (NUMBER of WORKS and PERSONS EMPLOYED), from 1901 to 1904	399
2.	STATEMENT of SUNDRY INDUSTRIES in each PROVINCE (as far as reported) from 1901 to 1904	400 to 405
 XXIX.—JOINT-STOCK COMPANIES		
1.	NUMBER of COMPANIES at WORK in INDIA, and their NOMINAL and PAID-UP CAPITAL, at the end of each year from 1881-82 to 1904-05	406
2.	NUMBER of COMPANIES, and the AMOUNT of PAID-UP CAPITAL, in each PROVINCE, at the end of each year from 1895-96 to 1904-05	ib
3.	NUMBER, DESCRIPTION, and CAPITAL of COMPANIES AT WORK in each Province at the end of 1904-05	408 and 409
4.	NUMBER and PAID-UP CAPITAL of each CLASS of COMPANIES in existence at the end of each year from 1881-82 to 1904-05	410 and 411
5.	NUMBER, DESCRIPTION, and CAPITAL of COMPANIES REGISTERED in 1904-05	412 and 413
6.	NUMBER, DESCRIPTION, and CAPITAL of COMPANIES which CEASED to WORK in 1904-05	414 and 415
7.	NUMBER, DESCRIPTION, and CAPITAL in STERLING of COMPANIES working exclusively in India in 1904	416 and 417

XXXII.—PORT TRUSTS		PAGES
No. of Tables		
1.	STATEMENT of the CONSTITUTION, INCOME, EXPENDITURE, and DEBT, of the COMMISSIONERS for the PORTS of CALCUTTA, BOMBAY, MADRAS, KARÁCHI, RANGOON, and CHITTAGONG, from 1894-95 to 1903-04 ...	471
2.	INCOME of the COMMISSIONERS for the PORTS of CALCUTTA, BOMBAY, MADRAS, KARÁCHI, RANGOON, and CHITTAGONG, from 1894-95 to 1903-04	472
3.	EXPENDITURE of the COMMISSIONERS for the PORTS of CALCUTTA, BOMBAY, MADRAS, KARÁCHI, RANGOON, and CHITTAGONG, from 1894-95 to 1903-04	473
 XXXIII.—MERCHANDISE MARKS		
1.	DETENTIONS under the INDIAN MERCHANDISE MARKS ACT, from 1890-91 to 1904-05	474
 XXXIV.—INVENTIONS AND DESIGNS		
1.	PROCEEDINGS under the INVENTIONS and DESIGNS ACT, from 1895 to 1904	475
 XXXV.—EMIGRATION		
1.	NUMBER of EMIGRANTS who LEFT, and of those who RETURNED to, INDIA, from 1878-79 to 1903-04 ...	476
2.	DESTINATIONS of EMIGRANTS who LEFT INDIA, from 1878-79 to 1903-04	ib
3.	NUMBER of EMIGRANTS, their PORTS of SHIPMENT, and their DESTINATIONS, from 1894-95 to 1903-04 ...	477 and 478
4.	DISTRICTS from which the EMIGRANTS were drawn, from 1894-95 to 1903-04	479
 XXXVI.—NATIVE PASSENGER SHIPS		
1.	ABSTRACT STATEMENT of the NUMBER of PASSENGERS (other than EMIGRANTS and PILGRIMS) carried in NATIVE PASSENGER SHIPS, from 1891-92 to 1904-05	480
2.	DETAILED STATEMENT of the NUMBER of PASSENGERS (other than EMIGRANTS and PILGRIMS) carried on LONG VOYAGES from INDIAN PORTS from 1902-03 to 1904-05	481
3.	DETAILED STATEMENT of the NUMBER of PASSENGERS (other than EMIGRANTS and PILGRIMS) carried on SHORT VOYAGES within the PROVINCE whence they SAILED from 1902-03 to 1904-05 ...	482
4.	DETAILED STATEMENT of the NUMBER of PASSENGERS (other than EMIGRANTS and PILGRIMS) carried on SHORT VOYAGES beyond the PROVINCE whence they SAILED to PORTS in INDIA from 1902-03 to 1904-05	483
5.	DETAILED STATEMENT of the NUMBER of PASSENGERS (other than EMIGRANTS and PILGRIMS) carried on SHORT VOYAGES beyond the PROVINCE whence they SAILED to PORTS out of INDIA from 1902-03 to 1904-05	ib
 XXXVII.—WRECKS		
1.	NUMBER and TONNAGE of BRITISH and BRITISH INDIAN VESSELS and NATIVE CRAFT TOTALLY LOST in INDIAN WATERS, from 1876 to 1904	484

SUMMARY OF CONTENTS AND EXPLANATORY MEMORANDA

I

AREA AND POPULATION

[TABLES 1 TO 8, PAGES 5 TO 26]

(Compiled from the last census tables (Nos. I, III, VI, VII, and XV), and revised every year by all the local Governments and Administrations, who also supply the figures of land revenue for table No. 2)

The area of the empire, including Aden and the Andamans and Nicobars, is 1,773,168 square miles, containing a population of 294,861,056, the average density of the population being approximately 166 to the square mile. In 1891 the density in the smaller area included in that census was 184 to the square mile. The general results of the census of 1901, compared with those of the enumerations taken in 1881 and 1891, are stated below :

	1881	1891	1901
Males	129,941,890	146,683,006	149,902,599
Females	123,950,010	140,502,915	144,389,834
TOTAL	253,891,900	287,358,608	294,292,433

This total for 1901 excludes Aden and the Andamans and Nicobars, which were not included in the former enumerations : the population of these places is only 68,623. The figures include Native States : the population of British territory is 230,119,912, compared with 221,280,663 in 1891. The increase in the decade is about two-fifths of the increase indicated by the census of 1891 over the census of 1881, and no doubt the reduction is, in a material degree, to be assigned to the effects of famine and plague, the former having hardly been absent from one or more regions of the Empire since 1894, and plague having been epidemic in various regions since the autumn of 1896.

In the Feudatory States the population has decreased from 66,077,945 to 64,172,521 or by nearly 3 per cent, chiefly in Baroda, Central India, and Rajputana.

The three most densely populated provinces are Oudh with 535, Bengal with 474, and the Province of Agra with 419, persons to the square mile. The nearest approach to this density is found in the Feudatory States of the Madras Presidency including Travancore and Cochin with an average of 420 to the square mile. In the British districts of Madras the average is 269, and in all other British territory the average is much lower, being as small as 68 in Sind, 67 in Lower Burma, and 44 in Upper Burma. In Kashmir the average falls to 36, the mountain ranges surrounding the valley being very sparsely inhabited.

The population consists mostly of Hindus (207,135,037), who make up 70 per cent of the total, the Muhammadans (62,420,291), being less than a third of Hindus, and Buddhists and Jains (10,808,652), a sixth of Muhammadans. The number of Christians (2,918,736) is about 1½ per cent of Hindus and 1 per cent of the total population.

Of the total population, 195,666,845 persons (male and female), being 66·5 per cent of the whole, are dependent on agriculture. There are also 17,953,230, being 6 per cent, classed as labourers. These two classes constitute nearly 73 per cent of the population, and as the majority of the labourers work in the fields, it may be said that well over two-thirds of the people are dependent directly on the land. Persons engaged in commerce and trade number 7,725,737, being nearly 3 per cent, and persons engaged in industries 45,719,645, or 15½ per cent, of the population.

There are 78 towns with a population exceeding 50,000, of these 27 having a population above 100,000, including 9 above 200,000.

II

REVENUE AND EXPENDITURE

[TABLES 1 AND 2, PAGES 27 TO 31]

(Compiled from the Finance and Revenue Accounts and the Financial Statement of the Government of India)

Since 1898-99 the figures are stated in sterling, the pound representing fifteen rupees.

The figures are set forth in abstract form for a period of twenty-eight years during which the revenue has risen from R619·72 millions to R1,270·49 millions, the increase being at the rate of over 105 per cent. The expenditure has also risen from R662·85 millions to R1,218·2 millions, the increase being at the rate of 84 per cent. Much of the increase in both heads is due to railways, as stated below. Excluding railways, the revenue has increased by 66·4 per cent, and the expenditure by 51·6 per cent.

II—REVENUE AND EXPENDITURE—*continued*

Revenue

The Land revenue constituted 31·6 per cent of the whole in the first, and 22·4 per cent in the last, year of the series. It is not of rapid growth, the revenue being settled permanently in the greater part of Bengal, nearly one-third of Madras, some districts of the United Provinces, parts of Assam and other scattered tracts, and for terms of years elsewhere.

The Forest revenue has largely increased from R6·81 millions to R23·41 millions, and, deducting expenditure, the net revenue has likewise increased from R2·4 millions to R10·23 millions or about four-fold in the course of the last twenty-eight years.

The Opium revenue in the first year of the series amounted to R91·83 millions and constituted 14·8 per cent of the revenue; in the last year it amounted to R90·66 millions, being 7·1 per cent of the revenue. The price of Bengal opium was unexpectedly high throughout the year 1904-05, and the net revenue from Opium (that is, deducting expenditure) for that year is estimated at £4,072,500=R61·09 millions.

The Salt revenue is much larger than at the beginning of the twenty-eight years, namely, R80·27 millions in 1904-05 against R64·61 millions in 1877-78, the increase being 24·2 per cent. The general duty on salt was reduced by 8 annas a maund from the 18th March 1903, and a further reduction by the same amount from the 22nd March 1905 reduced the duty to R1-8 throughout India (except Burma where the rate was previously R1). The second remission of duty is estimated to involve a loss of revenue of six lakhs in the remainder of 1904-05; but for the year as a whole there is an increase of R32,75,000 by reason of larger consumption in Bombay and Madras.

The revenue from Stamps has steadily and largely increased from R29·93 millions in 1877-78 to R56·14 millions in 1904-05, or 87·6 per cent.

Receipts under Excise have increased from R24·58 millions in the first year to R79·53 millions in the last year of the series, the increase being 223·6 per cent.

The Customs revenue has fluctuated with changes in the fiscal system, the import duties having practically ceased to exist from 1882 to 1894, except for liquors, arms, and opium, and a duty on petroleum imposed in 1888. Since the reimposition of the general duties they have gradually but slowly increased from R38·55 millions to R65·42 millions except for the fall which resulted in 1896 from the reduction to 3½ per cent from 5 per cent of the duty on cotton goods. Countervailing duties on sugar have in recent years contributed to the increase under this head. Large imports of cotton goods and expansion of rice exports chiefly account for an increase in the receipt in 1904-05.

The Provincial rates revenue has also steadily increased from R22·56 millions to R42·37 millions or 87·8 per cent.

The revenue from Income-tax (assessed taxes) like that from Customs has fluctuated with changes in the system of taxation. Since 1886, when the tax was imposed in its present form, the revenue has risen from R13·55 millions to R18·84 millions, an increase of 39 per cent in the nineteen years. By the Indian Income Tax (Amendment) Act, IX of 1903, the taxable limit was raised from R500 to R1,000 per annum, and this resulted in a loss of revenue of R2·94 millions in 1903-04 under this head.

The gross revenue from the Post Office and the Telegraphs has increased, respectively, from R8·50 and R3·45 millions to R23·36 and R13·34 millions, or 180·5 and 283·6 per cent, respectively, but taking into account the expenditure incurred there have been net receipts under the Post Office in 1890-91 and from 1903-04 onward, and under Telegraphs, since 1888-89, except in the last three years of the series when the deficits were R1,91,445, R8,87,935 and R3,91,500 respectively, owing primarily to the reduction of the tariff for foreign messages. The increase in the Telegraph revenue in 1904-05 is mainly due to enhanced inland traffic consequent on the reduction in the charges for telegrams effected in January 1904, and to India's share of an increased foreign traffic in consequence of the Russo-Japanese war.

The importance of the railways in the financial administration of the country is indicated by the increase of the revenue under that head from R72·44 millions to R359·96 millions (£23,997,800), this sum being 28·3 per cent of the whole revenue of 1904-05. The expenditure on railways has in the same period increased from R73·94 millions to R326·14 millions, this sum being 26·8 per cent of the total expenditure. The improvement in the last two years was due mainly to exceptionally heavy grain traffic, notably on the North-Western Railway.

The most important items of revenue, and the proportion borne by each to the whole revenue, in 1904-05 are :

	£	Per cent
Railways	23,997,300	28·3
Land Revenue	18,962,900	22·4
Opium	6,044,000	7·1
Salt	5,351,700	6·3
Excise	5,302,000	6·3
Customs	4,861,400	5·1
Stamps	3,743,000	4·4
Irrigation	3,031,200	3·6
Provincial Rates	2,825,000	3·3

II—REVENUE AND EXPENDITURE—*concluded*

Expenditure

The most important items of expenditure are:

	£	Per cent
Railways	21,742,800	28·8
Military Services	21,450,200	26·4
Civil Services, including civil works	21,137,500	26
Collection of land revenue, including district administration	3,192,900	3·9
Irrigation	2,811,300	3·5
Debt Services	1,638,400	2

Surplus or Deficit

In the twenty-eight years, there was a surplus in eighteen years aggregating R498·75 millions and a deficit in ten years aggregating R237·83 millions, the net surplus being R261 millions.

[These figures relate only to expenditure from revenue, not from borrowed capital.]

III

SALT

[TABLES 1 TO 19, PAGES 32 TO 53]

(Compiled from figures specially supplied by the Governments of Bengal, Bombay, Madras, and Burma, the Commissioner of Northern India Salt Revenue, and (for Gwalior) by the Agent to the Governor General in Central India, and published in their respective reports on the administration of the Salt Revenue)

Production

The total quantity of salt produced in India in 1904 was 30 millions of maunds (1,104,207 tons). This quantity was supplemented by 13 millions of maunds (488,588 tons) of imported salt, the total quantity produced and imported amounting to 43 millions of maunds (1,592,795 tons). From two-thirds to three-fourths of the quantity annually consumed are produced in India. Importation is practically limited to salt landed in Bengal and Burma from England, Germany, other countries in Europe, Aden, Muscat, Jeddah, and some Egyptian ports in the Red Sea. Only a quite insignificant quantity is imported elsewhere than in Bengal and Burma, but there is also a trifling trans-Himalayan import. The localities in India where salt is produced, and the quantity produced (maunds) in each of the last three years, are:

	1902	1903	1904
Burma: on the coast from sea-water and in Upper Burma			
from brine wells	544,801	705,606	558,931
Bengal: reduced in the process of refining saltpetre	1,200	1,721	2,400
Northern India:			
Sambhar lake	2,726,252	3,328,471	3,434,263
Panjab mines and Kohat	2,777,091	2,892,290	3,377,361
Rajputana sources other than Sambhar	1,565,133	887,099	827,146
Mandi, Sultanpur, Gwalior, and the saltpetre refineries	272,261	262,246	259,531
	<u>7,340,737</u>	<u>7,365,106</u>	<u>7,698,301</u>
Sind: Moach (near Karachi), Saran and Dilyar deposits	283,818	376,115	368,599
Bombay: on the coast and in the Runn of Kutch	10,388,198	7,285,126	11,716,684
Madras: on the east coast	9,757,725	6,667,297	9,713,822
TOTAL	<u>28,316,479</u>	<u>22,400,971</u>	<u>30,058,737</u>

Rather more than half of the production in 1901 was made by the Government for sale to the public, but for some years previously and also in 1902 the quantity produced by manufacturers exceeded the quantity produced in the State factories. In 1903, however, the quantity manufactured by Government exceeded the quantity produced by manufacturers by nearly two millions of maunds. In 1904, the quantity manufactured by Government was about 13 millions of maunds, while the private manufactures produced 17 millions of maunds.

Sea salt made on the coast of Burma is produced by artificial heat; on the coasts of Bombay, Sind, and Madras by solar evaporation. In Rajputana and Central India the salt is obtained by evaporation from brine deposits at Sambhar and other places. In the Panjab and Kohat, rock salt is obtained from the Salt Ranges and at Mandi and brine salt from the sources at Sultanpur, near Delhi. More than half of the whole production is represented by sea salt evaporated on the coasts of Bombay and Madras.

III—SALT—*continued**Consumption and Revenue*

The figures below indicate the progress in consumption in the last thirty-seven years :

		Average annual quantity	Average annual duty
		Maunds	R
1868-69 to 1872-73	...	22,973,433	5,75,19,726
1873-74 to 1877-78	...	24,184,497	5,95,69,568
1878-79 to 1882-83	...	27,761,017	6,59,00,598
1883-84 to 1887-88	...	32,428,815	6,21,11,126
1888-89 to 1892-93	...	33,431,396	8,02,89,704
1893-94 to 1897-98	...	34,210,675	8,25,80,982
1898-99 to 1902-03	...	35,678,603	8,37,58,609
1903-04	...	37,602,944	7,38,27,506
1904-05	...	39,377,568	7,60,28,401

The administrative system for the control of production and the collection of the revenue varies in accordance with local conditions and methods of production. The facts of most interest and importance are stated in the subjoined paragraphs for each province.

Burma

Imported salt.—Under the provisions of section III, Act XXX of 1854, which took effect from the 1st January 1855, the maximum duty fixed on salt imported by sea into any part of the Arakan, Pegu, Martaban, and Tenasserim provinces was eight annas a maund, but it is not known whether the maximum rate was ever imposed. The Act also provided for an export duty of four annas a maund on salt exported beyond the northern frontier of Pegu by the Irrawaddy or the Sittang. By the tariff of 1875, the rate of import duty on salt imported into British Burma was fixed at three annas per maund. In January 1899 the rate was raised to one rupee per maund.

Lower Burma.—Salt is made at many widely scattered points along the coast by the boiling of sea-water and in a few places, of saline earth, in pots and cauldrons. Except in two districts, no attempt has been made to control the manufacture as it is controlled in India; and, instead of ascertaining the quantity of salt actually produced, the productive capacity of the vessels employed is estimated, and a charge made on each which is supposed to be about equivalent to the duty on imported salt from time to time.

In 1862 the rates were :

For each earthen pot holding about 6 gallons, 8 annas; each iron cauldron, R5 (or at these rates according to capacity).

In 1867 the rates were :

In the Pegu Division—

Rangoon district—each earthen pot holding about 6 gallons, 12 annas; each iron cauldron, R5 (or at these rates according to capacity).

Bassein district—each earthen pot holding about 6 gallons, 8 annas; each iron cauldron, R5 (or at these rates according to capacity).

Henzada and Tharawaddy districts—each earthen pot, if used, 2 annas; each iron cauldron, if used, R1.

In the Tenasserim Division, except the Thaton district—each earthen pot producing on the average one viss of salt at the boiling, 8 annas; each iron cauldron, R2-8 (or at these rates according to capacity); in the Thaton district—each earthen pot, 6 annas.

In the Arakan Division—each earthen pot, 8 annas.

Between 1879 and 1882 the salt excise revenue was levied under the authority of the Land and Revenue Act, 1876, section 39 of which authorised the Chief Commissioner to make rules—

- (a) for granting licenses to manufacture salt;
- (b) for imposing on all salt manufactured a duty at a rate not exceeding the rate of customs duty for the time being payable on salt imported by sea;
- (c) for compounding with any holder of a license for the payment by him of an annual sum assessed upon the plant employed by him instead of the duty which would be payable to him on the salt produced with the aid of such plant.

Rules made under this section in 1879 provided—

- (i) that on all salt manufactured an excise duty should be levied at the rate at which customs duty was for the time being levied on salt imported by sea
- (ii) that instead of the said duty an annual sum should be assessed upon the pots or cauldrons used in the manufacture, at a rate not exceeding R1 per pot and R5 per cauldron.

III—SALT—*continued*

The rates in force before the passing of the Act were still maintained.

Section 39 (b) of the Act was repealed by Act XII of 1882, and a Notification No. 751, dated the 28th April 1882, provided that the excise duty levied on manufactured salt should be three annas a maund. The practice of compounding this excise duty for an annual sum calculated on the implements of manufacture was still maintained and no change was made in the rates of composition. On the 19th January 1888 the duty on salt was raised to ₹1 a maund. This increase involved a corresponding increase in the rates of composition duty, and successive notifications were published in 1888, 1889, 1890, 1895, 1897, and 1900 gradually raising the composition duty until it reached the amount which was believed to represent the sum that would have been obtained if an excise duty had been directly levied.

Each license issued specifies the number, description, and maximum capacity of the vessel or vessels used and the area within which manufacture is permitted; and it is current from the date of issue to the 31st December following when all licenses expire and must be renewed.

The composition duty under each license is payable either wholly in advance or half in advance and the balance in one or more instalments on such date or dates as the Deputy Commissioner may fix.

In January 1902 the system of direct taxation on output was introduced into the Hanthawaddy and Bassein districts, the rate of duty being fixed at eight annas a maund. The system was extended to the Myangmya district in 1903 and to the Mergui and Tavoy districts in 1904 and from the 1st January 1905 to the Amherst district.

Upper Burma.—Before annexation the manufacture of salt by boiling the liquor from brine wells was carried on in various parts of the country, and a certain amount of revenue was derived from it by taxing the implements of manufacture. In 1888 a duty of ₹5 on each pan used in manufacture was imposed in all districts in which the manufacture of salt had previously been untaxed, and of ₹10 where it had been customary to pay a tax. Manufacturers of salt were also required to take out licenses. In June 1889 the same duty was imposed on salt imported into or manufactured in Upper as in Lower Burma, namely, ₹1 a maund, and in 1890 a composition duty on the pots or cauldrons used in manufacture was fixed in substitution for the excise duty of ₹1 per maund. The composition duty payable on account of each license is collected either wholly in advance or half in advance and the balance in one or more instalments on such date or dates as the Deputy Commissioner may fix.

Bengal

Under the Muhammadan rule a tax was levied on salt by means of imposts on the privilege of manufacture and by duties on the transportation of salt from the places of manufacture to the interior of the country.

A monopoly of the manufacture and sale of salt was established by Lord Clive in 1765, the chief object being to provide adequate emoluments from the profits for the principal persons concerned in the Government, and thus to prevent their mixing in the intrigues and questionable transactions by which civil servants and others in those days often amassed large fortunes. Half the profit from the monopoly was to be distributed among the officers of Government, and the other half was to be credited to the Company. In his minute of the 3rd September 1766, Lord Clive assumed that this share would yield, "according to the present state of the salt trade, from 12 to 13 lakhs of rupees annually." The rate fixed for deliveries was ₹2 per maund.

The existence of this monopoly was of short duration, the Court of Directors disapproving the arrangements, though they stated that they did not object to the levying of the ancient duties on salt, which had always constituted part of the revenues of Bengal.

In the year 1772 the manufacture and wholesale trade of salt was farmed out by Government to private individuals; but this complicated farming system was never very productive and soon failed.

In 1780 Warren Hastings introduced a system for the control of the manufacture and sale of salt by the agency of the Company's civil servants. Under this system, the salt manufacturers (*mulanghis*) received advances from the agents at the beginning of the season, on the stipulation that the salt, when made, was delivered to the Government at a certain price. The agents stored the salt and sold it to wholesale dealers at a price fixed from year to year by the Government. The difference between the price agreed upon with the *mulanghis* and the price at which it was sold from the store to traders represented in effect a duty levied upon the salt.

In 1788 the sale of salt by public auction, instead of at fixed rates, to traders was introduced by Lord Cornwallis. The revenue immediately rose, but the system was abolished by the Court of Directors in 1837, as it was found to lead to the establishment of sub-monopolies, injurious to the interests of both the people and the Government.

In their despatch of the 4th January 1837, the Court of Directors ordered that the price to be thenceforward paid by the purchasers of salt should be determined by the cost of manufacture, added to a fixed rate of duty. The rates of duty since fixed from time to time have varied between ₹3½ and ₹1½ per maund; but the system for the control of the manufacture and sale of salt, introduced by Warren Hastings, continued in force with but

III—SALT—*continued*

few modifications until the year 1862, when the salt agencies were gradually abolished, leaving the supply of salt whether imported or locally made, to private enterprise. The salt agencies were situated in the province of Orissa and in the districts of Chittagong, the 24-Parganas, Jessore, and Midnapur.

The full rate of duty on salt was not, however, levied uniformly throughout Bengal until 1862. From the year 1810 a system of retail sales at reduced prices from shops established on behalf of Government was introduced in districts and localities where salt was manufactured, or was capable of being easily produced; the object being, as stated at the time, to leave the people residing in such tracts without excuse for violating the law under the temptation of a high rate of duty, and to obtain some revenue in a part of the country where, from the great facilities for smuggling, it had been found impracticable to realise full prices.

From inquiries made in 1860 and 1861, the Government concluded that the loss of revenue entailed by the remission of a large proportion of the duty on the salt consumed within the saliferous tracts was, under existing circumstances, far larger than would arise were the full duty levied. The system of retail sales at reduced prices was therefore abolished from the year 1862.

From the creation of the salt monopoly, a preventive establishment was employed for the protection of the revenue. This establishment was for the most part separate from, and independent of, the agency controlling the manufacture and sale of salt, and was employed in Northern Bihār to prevent the influx of more lightly taxed salt from the westward, and also within certain defined limits which included the saliferous tracts on the sea-coast of lower Bengal. By Regulation X of 1819 the general control of this preventive department was vested in the Board of Customs, Salt, and Opium established in that year. On the passing of Act XIV of 1843, imposing an additional duty of R1 per maund on salt passing from the North-Western Provinces to the eastward of Allahabad, the establishment in Bihār was withdrawn. The R1 was reduced in June 1847 to 12 annas, and in April 1849 to 8 annas. In March 1861 the additional duty was abolished.

In lower Bengal the limits within which the preventive force operated have been narrowed from time to time so as to confine their operations to the salt-producing tracts. As a further check against illicit manufacture within these limits, it was required that all salt under transport should be conveyed by certain specified routes and pass stations, and be covered by protective documents, under penalty of confiscation. Merchants and dealers were also required to record all sales and losses from their stocks on the reverse of their protective documents. The law and rules on this subject of passes (*rawānas*) have been modified from time to time. Those now in force are contained in Act VII of 1864 and the Government Notifications issued under that Act.

In 1863 the special preventive establishment was abolished, and all duties previously discharged by them were delegated to the regular police force. In addition to the sea-coast and salt-producing tracts, the police have also to guard the frontiers of Arakan to prevent the importation of the more lightly taxed salt of Burma.

In 1835-36 the excise manufacture of salt was begun by private individuals, but the discontinuance of the system was ordered by the Court of Directors in 1840. In 1847 the manufacture of salt under certain excise rules was again permitted, but for many years the quantity produced was very small. Excise manufacture was carried on to a considerable extent in Orissa for some years, and the quantities made were at one time sufficient for the supply of the province; but afterwards it was greatly reduced and it is not now carried on. In 1867-68 excise manufacture was again started, though on a small scale, in the district of the 24-Parganas, and continued until 1881-82, after which it was abandoned. In 1891 the direct manufacture of salt by Government was re-introduced into Orissa with a view to afford employment to the *mulanghis* and reduce the price of salt, but was stopped again in 1897.

Foreign salt was first imported into Bengal in 1818-19, but there was no large trade until 1835-36. At first and until the fixed duty system was adopted, customs dues were levied at such rates as were considered necessary to maintain the average prices of the Government sales. The old stocks of salt manufactured at the Government agencies were exhausted in 1873-74, and since then the consumption in the whole of Bengal, with the exception of Orissa, may be said to have been supplied by imported salt.

The administration of the Salt Department in Orissa was made over to the Commissioner of Salt Revenue, Madras, in February 1888, and the Indian Salt Act, XII of 1882, has been in force there since. The management was, however, not as successful as had been hoped, and, with the sanction of the Government of India, it was transferred from October 1897 to the Commissioner of Excise under the Government of Bengal. Advantage was taken of the transfer to create a combined preventive establishment for the whole Bengal littoral, and the Indian Salt Act, XII of 1882, was extended from the 9th April 1898 to the districts of the 24-Parganas, Midnapur, Khulna, Backerganj, and Chittagong, Bengal Act VII of 1884 also remaining in force in them. In March 1901 the Act was extended to the districts of Howrah and Noakhali. No separate establishment has been sanctioned for these districts, and the attempt to deal with Howrah with a portion of the Midnapore force has not proved effective. Salt reduced in the process of manufacture at the saltpetre refineries in Calcutta and its suburbs was subject to a duty of R2-8 a maund until the 18th March 1903, when the duty was reduced to R2 a maund. This duty was again reduced to R1½ a maund from the 22nd March 1905. The control of the refineries was transferred from the Commissioner, Northern India Salt Revenue, to the Commissioner of Excise and Salt, Bengal, in April 1901.

III—SALT—*continued*

The following are the descriptions of salt now commonly imported:

manufactured by solar evaporation: from Bombay, Madras, Ceylon, Jeddah, Muscat, Egyptian Red Sea ports, Aden, Italy, and France;

manufactured by boiling: from Liverpool and Hamburg;

rock salt: from Muscat.

The rate of duty per maund on salt in Bengal has varied as stated below:

	R
1837 to 1844	3-4
November 1844	3
April 1847	2-12
April 1849	2-8
December 1859	3
March 1861	3-4
January 1878	3-2
August 1878	2-14
March 1882	2
January 1888	2-8
March 18, 1903	2
22nd March 1905	1½

In 1815 a convention was made with the French Government, under the terms of which the East India Company agreed to supply sufficient salt for the consumption of the French settlement of Chandernagore at prime cost from the Orissa and Midnapur agencies. The quantities of salt thus supplied free of duty varied from 4,000 to 12,000 maunds annually. This arrangement was in operation until 1839, when the Company entered into an engagement to pay annually a sum of R20,000 to the French Government on their agreeing to buy the salt required for the settlement in the open market. This payment is still continued.

Northern India

The revenue was formerly collected by the officers guarding the Inland Customs line, which was formed in 1843-44 and was extended at various times, until it reached from Torbela near Attock, on the Indus, to the Mahanadi in the Samalpur district of the Central Provinces. This line of 2,472 miles was guarded by 10,496 officers and men. In consequence of the development of railway communication, 764 miles of the line were abolished in the Central Provinces in 1874-75 and eventually in 1878-79 the whole line from the western extremity of the Multan division in the Punjab to the Central Provinces was removed. The remaining portion of the line, 553 miles in length, extended from Torbela and afterwards from the northern extremity of the Hazara district of the Panjab along the Indus to the junction of that river with the Sutlej, and was maintained for the purpose of preventing the low-taxed Kohat salt from crossing into the Panjab. This section of the line was abolished from the 31st March 1893. The duties taken on the line were levied on salt crossing it from south to north and on sugar crossing it from north to south.

Outside of this line, the Inland Customs Department in February 1870 assumed charge of the Sambhar lake which belongs conjointly to the States of Jaipur and Jodhpur and was leased to the British Government by them. The Department assumed charge of the Didwana salt source in April 1878, and of Pachbadra, Falodi, and the Luni in October 1878, from the Jodhpur State. Salt has not been produced at the Luni source since 1880-81, and the establishment posted there is solely preventive. The Falodi source was abandoned in October 1897.

The salt works at Sultanpur in the Delhi division are worked under the supervision of the Northern India Salt Revenue Department which has also the charge of the mines in the salt range in the Panjab, and of a force designated the Internal Branch maintained in Oudh, the Province of Agra, the Panjab, Rajputana, Bihár, and in Calcutta, for the supervision of the saltpetre trade, the levy of duty on salt deduced from saltpetre, and the control of the manufacture of other saline substances, such as sulphate of soda and carbonate of soda.

The whole Inland Customs Department (now the Department of Salt Revenue in Northern India) is administered by the Commissioner of Northern India Salt Revenue, formerly responsible to each of the local Governments and Administrations within whose jurisdictions the customs organisation worked, but now immediately under the Government of India.

The general rates of duty on Rajputana salt have been per maund (R):

1843-44 to 1845-46	1½ and 2
1846-47 to end of 1859	2
Beginning of 1860 to March 1861	2½
March 1861 to end of December 1877	3
January 1878 to July 1878	2½
July 1878 to 9th March 1882	2½
10th March 1882 to 18th January 1888	2
19th January 1888 to 17th March 1903	2½
18th March 1903	2
22nd March 1905	1½

III—SALT—*continued*

To these rates there were some exceptions. In the Sirsa division of the Panjab, the duty was 8 annas per maund for part of 1843-44, when it was raised to R1 per maund, at which rate it stood until 1846-47 when it was raised to the general rate. In the Saugor division of the Central Provinces a rate of R1-8 per maund prevailed from the formation of the division in 1855-56 until the introduction of the general rate in 1859-60. In the Hoshungabad division, also formed in 1855-56, R1 per maund was levied until a date in 1859-60, and thereafter R1-8 until the general rate was introduced in 1860-61.

The duty on Madras salt entering the Central Provinces was levied, until the abolition of the portion of the line across which it passed, at R1-8 per maund.

Bombay salt entering the Central Provinces was charged at the rate of R1-8 per maund until the 1st May 1874, when a mileage rate was introduced on all salt carried by rail from Bombay, the object of the differential rate being to raise the duty to R3 by the time it reached Jubbulpore, where it met Northern India salt paying that rate of duty. This mileage rate came to an end in 1878, when the salt duty was made uniform throughout India (except in Bengal and British Burma).

Salt excavated in the Sind Saugor Doab and the Kalabagh mines has been subject to duty as follows per maund :

	R
1849-50 to April 1860	2
April 1860 to September 1861	2½
September 1861 to December 1877	3
January 1878 to July 1878	2½
July 1878 to 9th March 1882	2½
10th March 1882 to 18th January 1888	2
19th January 1888 to 17th March 1903	2½
18th March 1903	2
22nd March 1905	1½

Salt excavated at the Kohat mines was subject to a duty of 4 annas, 3 annas, and 2 annas per maund. A uniform rate of 8 annas per Lahori maund (102½ lb avoirdupois) at all the mines was introduced from the 7th July 1883. This rate was raised to R2 per Lahori maund from the 13th July 1896. On the 18th March 1903 the duty was reduced to R1-8 per Indian maund of 82½ lb.

Salt reduced in the process of manufacturing saltpetre has always been subject to the duty prevailing in Northern India.

Sind

Before the establishment of British rule, when the practice was discontinued, a revenue was derived from salt under the system of *batai*, that is, a share of proceeds.

After annexation no duty was levied on salt until 1848, when salt exported from Sind to other parts of India was charged with a duty of 12 annas a maund. Salt intended for consumption in the province continued untaxed until 1861, when it was decided provisionally to regulate the manufacture of salt by license, the fee for the licenses to be determined by the Collector with reference to the probable production of the factories at the rate of eight annas a maund, a duty at the same rate being levied on imported salt.

The system of manufacture under license was prolific of abuses and was superseded for a time by a system of farming the revenue. This was found even more defective and injurious to the revenue, and the license system was again resorted to; but an arrangement under which manufacture was permitted at hundreds of small earth-salt factories scattered over the province was generally condemned, and proposals were approved by Government for the suppression of the manufacture of earth-salt, the working of the natural deposits, and the collection of stocks at central stores while their distribution was left to private enterprise. To put these measures in operation the Salt Department in its present form was organised.

The duty was raised at the commencement of 1878 from eight annas to R2½ as in other parts of India; in 1882 it was reduced to R2 a maund, and in January 1888 it was again raised to R2½ per maund. On the 18th March 1903 a general reduction of the duty lowered the rate to R2 per maund. This duty was further reduced to R1½ per maund on the 22nd March 1905.

There are three salt sources in Sind from which salt is now issued to the public, namely, the Maurypur works and the Saran and Dilyar deposits. The Maurypur works, where salt is manufactured by solar evaporation, were opened in the year 1878, and from these almost the whole province is supplied. The works are situated on the Moach plain adjacent to the end of Karachi harbour, from which by channels the brine is obtained, reaching the storage wells by percolation. Maurypur salt is supplied free of duty to the State of Khairpur, local manufacture there being suppressed.

The Saran and Dilyar deposits were opened in 1879 and 1882 respectively. The salt is formed in a lake from which, when the water dries, salt is excavated and stored. It is supplied to the inhabitants of the neighbouring villages of the districts of Thar and Parkar and Hyderabad through a richly saline soil which greatly increases the strength of it.

III—SALT—*continued*

Bombay

Salt is produced in Bombay for local consumption and for export by land to Central India and Rajputana, the Central Provinces, the North-Western Provinces, and the Nizam's territories, and by sea to the Malabar coast of Madras and to Calcutta. Under existing arrangements exports, both by land and sea, pay full excise duty in Bombay, with the exception of those to Travancore and Cochin, on which a nominal charge of three pies per maund only, to cover cost of establishment at the salt pans, is levied in accordance with a trade convention concluded with Travancore and Cochin in 1865. Payment before export is not, however, imperative, credit for periods varying from sixty to ninety days according to destination being allowed on salt liable to full duty and valued at Rs.2,000 (duty) and upwards, on the exporter entering into an agreement and depositing Government securities of sufficient value to cover the duty. Until 1874 exports to the Malabar coast were free, subject to payment of customs duty on arrival, and the same system was followed temporarily in the case of exports to Calcutta from 1860 (until which year excise duty had been levied subject to four months' credit under bonds) to 1874. In that year the system of prepayment of excise duty was made general. The plan of giving credit on security of Government paper was introduced almost simultaneously, and these arrangements have since been maintained with a short interruption in 1876-77, when exports to the Malabar coast were again allowed for a few months free of excise duty. Exports to Calcutta and to certain ports on the Malabar coast are allowed a drawback on actual wastage not exceeding 5 per cent.

According to Mr. Plowden's report on salt in British India, dated the 24th May 1856, "it was not until the 15th December 1837 that salt was erected, by Act No. XXVII of that year, into a source of considerable revenue in the Presidency of Bombay; prior to that date it was one of many miscellaneous items, as under the Native Government." Under that Act the manufacture of salt was placed under restriction, and locally manufactured as well as imported salt was subjected to a duty of eight annas a maund. The object of the duty was to compensate partially the loss to the general revenue from the abolition of inland transit duties. In 1844, to set off a further loss of revenue from the abolition of the moturpha, or tax on trades and professions, the duty was raised from the 1st September to one rupee a maund, but immediately after it was reduced in the same month, with effect from the same date, to 12 annas a maund, at which rate it continued until August 1859, when it was raised to one rupee a maund, and was again raised on the 13th April 1861 to one rupee and a quarter, and on the 20th January 1865 to one rupee and a half. By Act XXIV of 1869 the duty was raised to one rupee thirteen annas, and by Act XVIII of 1877 to two rupees and a half. In March 1882 the duty per maund was reduced to two rupees. In January 1888 the duty was raised to two rupees and a half, and on the 18th March 1903 this was again reduced to two rupees. A further reduction to Rs.1½ per maund took effect from the 22nd March 1905.

Except in Guzerat, the excise system is followed, under which licenses are issued for private manufacture at approved places which are guarded, and whence no removals are allowed, except upon payment of duty, or under credit for payment. In Guzerat, where all the works in British territory are the property of Government, the monopoly system was introduced in 1873-74, and manufacture was concentrated at two places—Kharaghora on the borders of the Runn, and Dharásna on the sea coast of the Surat district. At Kharaghora salt in large crystals is made from brine wells under departmental supervision, bought from the manufacturers as made, stored, and sold at the cost and risk of Government. At Dharásna the salt is ordinary sea-salt and Government merely fixes the price at which it is to be sold without taking it over or interfering directly with manufacture. A small quantity of salt is issued annually free of duty from the works at Kharaghora to certain Native States and Chiefs in pursuance of the arrangements for the establishment of the monopoly.

There were formerly certain works in Cambay at which the duty was shared between the Nawab, as territorial owner, and the British Government as inheritor of the chouth formerly levied by the Peshwa. This arrangement, however, ceased in 1878, when the works were finally closed by agreement with the Nawab, under which he is paid Rs.40,000 as annual compensation and receives 500 maunds duty-free salt for his own consumption.

Besides the duty-free salt issued to certain Chiefs in Guzerat, the Nawab of Janjira is allowed, under a convention concluded in 1884, to purchase and remove duty-free from the neighbouring salt works in British territory the quantity required for the use of himself and his subjects.

Madras

Little is known of the history of the salt revenue in Madras before the establishment of the Government monopoly in 1805. In 1804 the gross sum obtained from salt is stated to have been 63,316 pagodas or Rs.21,606. This small revenue appears to have been raised in various ways; sometimes the pans were farmed out, sometimes the produce was divided according to customary rates, sometimes revenue posts were established and a transit duty levied.

In 1805 the monopoly system was introduced in all parts of the Presidency, except South Canara and Malabar, to which districts it was extended two years later. Under this system private manufacturers were permitted to sell their salt only to Government. The salt was re-sold by Government at a price calculated to include

III—SALT—*continued*

the purchase money paid to the manufacturers and storage, transport, and other charges, reduced to an average for the whole presidency. This price, which was separate from the duty, was at first two annas, but by Act XVIII of 1877 it was fixed at three annas per maund. This Act was repealed by Act XII of 1882, which prescribed no minimum price for Government salt, but section 3 empowered the local Government to fix a minimum by notification in the local official Gazette. No such notification has been issued and three annas per maund is still generally adopted as the price of salt in most of the Government factories, though in certain special cases its sale at other rates has been sanctioned with a view either to dispose of old stocks or to check the demand in places where stocks were small.

Though the excise system became legally possible in 1871 (the laws relating to the administration of the salt revenue being afterwards consolidated and revised by Act IV of 1889), it was not brought into operation until between the years 1882 and 1886, when it was gradually introduced into certain of the factories on the east coast. It was found advisable to retain some of the factories under the monopoly system owing to the manner in which the excise licensees combined to raise prices. There are thus two systems of salt manufacture in the Presidency, under one of which the salt manufactured is sold to Government only and is disposed of by Government to the trade, whilst under the other Government levies an excise duty, *plus* a small and varying cess to cover interest on capital cost of works, the property of Government, and the cost of any repairs effected by it on account of the licensees at the time of removal from the factory, and allows the manufacturers to make such arrangements as they please for the disposal of the salt. In both cases, the production of salt is only allowed in well-fenced factories and subject to Government supervision, but, except in matters endangering the revenue, little interference is exercised in the details of manufacture under the excise system. The rate paid by Government for its salt varies, but may be taken roughly at an anna and a half per maund. This is only the bare cost of manufacture and does not include cost of works, storage, transport, etc. The duty on salt is ordinarily payable before the salt is removed from the factory, but six months' credit may be allowed to approved merchants on the deposit of security in Government promissory notes and a few other specified kinds of securities.

It was expected that the effect of the excise system would be to reduce the cost of salt to the consumer, but this expectation was not realised, prices having risen in many places owing to the combination of a few capitalists who got the licensees into their hands. To check the rise it was decided in 1888-89 that Government factories should be opened in suitable centres in order to provide for the accumulation of reserve stocks which could be used to control excise prices; but it was soon found that a mere accumulation of stocks was inoperative as a check, because the stock, unless renewed, deteriorated and became unsaleable. It was therefore ordered, in 1895-96, that to provide for the acquisition of fresh stocks, and at the same time to keep down excise prices, auctions of Government salt should be held from time to time, the auction price being in addition to the duty. This system also proved a failure, and since the beginning of 1899-1900, Government salt has been regularly on sale in these as in the ordinary Government factories. There are now 22 monopoly and 45 excise factories.

The export of salt was permitted free of duty on payment of the cost price of the salt until 1876, when this concession was withdrawn, and rules were prescribed under which salt intended for shipment to British Indian ports might be removed for export on prepayment of duty or under bond. Under the present rules, which cover exports to Burma, exporters are given the choice between two systems, under both of which it is stipulated that the salt shall be carried in steamers of not less than 1,000 tons. Under one, the exporter executes a bond for payment of duty and undertakes to carry on board the vessel a preventive officer. He then pays at the port of import duty only on the quantity actually landed. Under the other, salt may be removed for export either on prepayment of duty in cash or in accordance with the rules for the issue of salt on credit and the exporter is on proof of shipment allowed a rebate of 2 per cent on the total duty paid or payable on the quantity of salt actually shipped to cover wastage on the voyage. Salt may also be exported under bond to the Straits Settlements, Mauritius, and Zanzibar if shipped in square rigged vessels or steamers, of not less than 300 tons burden, the bond being cancelled on proof that the salt has been duly landed. An allowance for wastage during the voyage up to a limit of 5 per cent is made.

In Malabar no salt is manufactured, and that region is supplied by imports from Bombay, Goa, and other places. In South Canara the excise system was substituted for the monopoly system in 1877, but local manufacture was abolished in 1883-84, as the salt produced was of inferior quality and the pans were difficult and expensive to guard. Even when salt was manufactured locally, the supply was smaller than the demand and the deficiency was made good by importations from the Bombay Presidency as in Malabar. Act XVI of 1879 makes the transport of salt in any vessel of less than 300 tons burden illegal on the west coast within certain limits, unless under cover of passes which practically confine the privilege to duty-paid salt.

By agreement the French Government undertakes to prevent the manufacture of salt throughout its possessions in India, and in consideration receives payments annually aggregating R4,41,800, and obtains its supply of salt at cost price. The authorities of the French settlements in Madras indent on the nearest British factories for the salt they require and undertake to sell it at approximately the prices charged in British territory. The correspondence is not complete because they sell by measure not by weight.

III—SALT—concluded

Until 1865 the manufacture of salt was a Government monopoly in Travancore and Cochin, the selling price in Travancore being Rs. 1 a maund, and in Cochin annas 12. In that year both States agreed to adopt the British Indian selling price of salt.

A discount of 5 per cent used to be allowed to purchasers of whole heaps of salt (1,200 maunds) and higher rates were sometimes allowed for special reasons. This was discontinued in 1877-78.

Fish-curing.—In order to reduce the hardship caused by the interference of the preventive operations of the Madras Salt Department with the use of illicit salt and salt earth for fish-curing, yards for fish-curing at which salt is sold at cost price (that is, cost plus cost of transport from the factory) were established at all important fishing centres along the coast; there were 136 such yards in 1903-04.

IV

OPIUM

[TABLES 1 TO 17, PAGES 54 TO 76]

(Compiled from the Finance and Revenue Accounts and from special official returns)

BENGAL OPIUM

The region in which the poppy is cultivated comprises ten districts in Western Bengal, situated in the divisions of Patna, Bhágalpur, and Chota Nagpur, and thirty-seven districts in the United Provinces of Agra and Oudh. The former districts are, in respect of opium, under the control of the Bihár Opium Agent, whose head-quarters are at Patna. The latter are under the Benares Opium Agent, whose head-quarters are at Ghazipur. At each of these places there is a Government factory where the crude opium is manufactured into the form in which it passes into consumption. The cultivation of the poppy and the manufacture of opium are regulated by Act XIII of 1857 and are under the general control of the Lieutenant-Governor of Bengal and the Board of Revenue, Lower Provinces, and the immediate supervision of the Opium Agents. The possession, transport, import, and export of opium are regulated by rules framed under section 5, Act I of 1878 (the Indian Opium Act).

Cultivation is permitted only under license granted under the authority of the Opium Agent. The area to be cultivated is fixed by the license, and the cultivator is bound to sell the whole of his production to the Opium Department at the rate fixed by Government. This rate was fixed in 1894-95 at Rs. per ser. of 70° consistency. Advances, on which no interest is charged, are given to licensed cultivators at the time of executing the agreement, and from time to time (though ordinarily not more than two advances are given) until final delivery. In March or April the opium is made over to the officers of the Department and weighed and tested, and as soon as possible afterwards each cultivator's accounts are adjusted, and the balance due is paid to him.

After weighment the opium is taken to the Government factories at Patna and Ghazipur, where it is manufactured in two* forms—

- (a) opium intended for export to foreign countries, mainly China and the Straits Settlements, departmentally known as "provision" opium, and
- (b) opium intended for consumption in various provinces (Bengal, Assam, the United Provinces, the Central Provinces, Burma, and, to a limited extent, the Panjab), departmentally known as "excise" opium.

Provision opium is made up in the form of balls or cakes, each weighing 3.5 lb, and is packed in chests, each chest containing forty cakes, weighing 140½ lb. Bihár opium is generally of 75° and Benares opium of 71° consistency. Excise opium is made up in cubical packets, each weighing one ser, 60 of which are packed in a case. It is of higher consistence than the "provision opium."

Provision opium is sold by public auction in Calcutta. A notification is published annually, about the month of June, stating the number of chests from each agency which will be put up for sale in each month of the next calendar year, and the quantities so notified are not altered without three months' notice. The quantities depend on the quantity manufactured, the reserve stock, and other considerations. Sales are conducted month by month by the Bengal Board of Revenue.

The duty levied by the Government on each chest may be taken to be the difference between the average price realised and the average cost.

Under a convention made in 1815, the French Government has the right to purchase not more than 300 chests of opium each year, at the average price realised for the rest of the opium at the sales. This right was commuted for a money payment amounting to Rs. 5,000 a year, under an agreement which will remain in force until the 31st December 1906.

* A small quantity of opium for medical purposes is also made at Patna, and morphia and ecdeine are made at Ghazipur from opium not fit for other purposes

IV—OPIUM—continued

Excise opium is distributed from the factories, or from the Calcutta warehouse, to the Government treasuries whence it is issued, on payment, to licensed vendors and druggists only. In the accounts, a sum of Rs½ per ser out of the proceeds of this opium is credited under Opium as representing the estimated cost of production. The remainder of the proceeds is credited under Excise.

Assam is supplied from the opium factories at Patna and Ghazipur through the Bengal Board of Revenue, and issues are made from the district treasuries to licensed vendors. The cultivation of poppy is not permitted in the Central Provinces and the only licit supply of opium is Bengal excise opium imported from the Ghazipur factory and supplied to district treasuries.

MALWA OPIUM

Malwa opium is almost entirely produced in the undermentioned Native States in the Central India and Rajputana Agencies, also in Baroda and Khairpur (in Sind) where its production is limited to the Khairpur Taluka and the requirements of the State. It is not produced in British territory except in Ajmer-Merwara.

<i>Kotah Agency</i> Kotah, Jhalawar
<i>Alwar Agency</i> Alwar
<i>Bikaner Residency</i> Bikaner
<i>Western Rajputana States Residency</i> Jodhpur (Marwar), Jaisalmer, Sirsi

In these States the British Government has no concern with the cultivation of the poppy or the manufacture of opium or its local consumption; nor has it any concern with the export, except that it levies a duty on opium which passes into or through British territory, either for local consumption in British India, or for export by sea to China and other foreign countries. It is this duty, commonly called pass-duty, which constitutes the British revenue from Malwa opium and is credited to opium revenue when the opium is passed out for export by sea. The pass duty on Malwa Opium destined for consumption in British territory is an excise receipt, and is as a rule Rs10 per ser equal to Rs700 per chest.

The Government is enabled to raise this revenue because the States in which the opium is produced have no access to the sea except through British territory. The import of the opium into, or transport through, British territory is prohibited except on payment of the pass-duty and under passes granted under the authority of the Opium Agents. The Agent to the Governor-General in Central India, and the Commissioner of Ajmer-Merwara, are *ex-officio* Opium Agents for their respective charges.

For the weighment of the opium, for the issue of necessary passes, and for the recovery of pass fees, Government has established scales maintained by the Opium Agents, the principal scales being located at Indore, Mandisor, Ujjain and Ratlam in Central India, and at Chitor in Rajputana. There are also scales at some other convenient places, namely, at Ahmedabad in Gujrat, at Dhar, Jaora, and Bhopal in Central India, and at Ajmer and Baran (Kotah) in Rajputana.

The poppy is sown in Malwa in November, the plants flower in the beginning of February, and by the end of March the whole of the opium has been collected by the cultivators and is ready for sale. The village bankers and others, into whose possession the raw opium passes, usually retain it until the end of April. During May and June it is bought by the large dealers, who make it up into balls of about twelve ounces each, and expose it in storehouses to dry for the next two or three months, after which it is ready for the scales. It is ready for export by September; but as considerable dryage takes place during the transport of new opium to Bombay, it is commonly kept back until October. A chest of Malwa opium contains 140 lb in weight, to which an allowance of

IV—OPIUM—*continued*

four ounces is added for leaf and dust, making a total of 140½ lb. The opium is of 90° to 95° consistency, and is usually packed in half-chests for convenience of carriage.

From October 1897 until May 1904 the rate of pass-duty was Rs25 at Ajmer, and Rs500 elsewhere, on each chest of opium weighed for export by sea. This duty has since been increased by one hundred rupees, under Finance Department Notification No. 2930-A, dated the 6th May 1904. A higher rate of pass-duty is levied at Ajmer because, these scales being situated in British territory, the opium weighed there is not subject to the dues levied by the Native States. Since 1887-88, however, there have been no exports from the Ajmer Agency except the export of one chest in 1893-94 and 9 chests in December 1904.

Opium which has been weighed and passed for export by sea from Bombay may, after arrival at Bombay, be diverted for local consumption on payment of a higher rate of pass-duty of Rs725 per chest when the pass was granted at Ajmer, and of Rs700 per chest when the pass was granted elsewhere. When opium is weighed directly for local consumption and not for export by sea, the higher duty is charged at once. This duty is an Excise receipt.

The pass-duty on opium weighed for export is generally levied in the form of *hundis*, i.e., bills of exchange drawn on Bombay and payable at six days' sight, and these must be cashed before the consignee can obtain delivery of the opium. At the Ajmer Agency and at Ahmedabad the duty is paid in cash, or by *hundis*, or bills payable at sight drawn on Bombay. After weighing of the opium and delivery of the *hundi*, the opium is transported by railway to Bombay under cover of the pass, the cost of transit being borne by the owner. In Bombay it is received by the Collector of Customs and Opium, who is responsible for seeing that it corresponds with the covering pass and who detains it until the *hundi* has been cashed. The opium is then warehoused, and is at the disposal of the owner for export or for sale locally, subject to the provisions of the Opium Act and the Bombay Opium Rules.

The cultivation of poppy is prohibited in Madras, Coorg, and Berar, and the source of supply is Malwa opium. Since the 1st April 1901, the opium required for the Madras Presidency has been obtained from the Government warehouse at Bombay, stored in two storehouses, one at Tondiarpet (Madras) and the other at Coconada*, and distributed therefrom to wholesale vendors at a fixed price.

PANJAB

The cultivation of the poppy was permitted until 1897 (under license for each crop) throughout the greater part of the Panjab, except in the districts of Delhi, Gurgaon, Rohtak, Hissar, the greater part of Karnal, and part of Ferozpur, where it has long been prohibited. The total area cultivated was usually about 10,000 acres, but there were only five really opium-producing districts—Ambala, Simla, Kangra, Shahpur, and Dera Ghazi Khan. In the remaining districts opium was either not extracted, or, if extracted, only a small quantity became available for sale by licensed vendors, the rest being surreptitiously disposed of; and the produce was consumed, in the shape of a drink called *post* made from poppy-heads, either illicitly or after passing through the hands of licensed vendors. The Government of India prohibited poppy cultivation in the case of most districts of the Panjab generally from the 1st September 1897, cultivation being now (1903-04) restricted, so far as opium production is concerned, to the Thanesar tahsil and Pehowa circle of Karnal, Ambala, the Kotkhai tahsil of the Simla district, the Kulu Sub-division of the Kangra district, Shahpur, and two tahsils of Dera Ghazi Khan. Cultivation of poppy, mainly for the production of poppy heads only (though in Lahore some maunds of opium are produced), is also permitted in the districts of Jalaudhar, Amritsar, in the greater part of Lahore, and in one tahsil of Hoshiarpur.

An acreage duty is levied on the cultivation of the poppy, at the rate of Rs2 per acre in the six chief opium-producing districts, in the Pehowa Circle of Karnal the duty being Rs4 per acre, and at the rate of Rs4 per acre in the rest of the province. The question of imposing, in place of this acreage duty, an excise duty on opium produced in the Panjab is at present under consideration.

A cultivator of opium is not permitted to consume any part of the produce himself. He is bound either to dispose of the standing crop to a license-holder, who extracts the opium and sells it to a licensed wholesale or retail vendor, or to dispose of the produce, either as poppy-heads or as opium extracted by himself, to a licensed retail or wholesale vendor.

Since the 1st April 1896 a duty of Rs2 per ser has been levied on the importation into the Panjab of all opium other than Malwa, including opium produced in Kashmir, the Native States, or elsewhere. Upon Malwa opium an import duty of Rs4 per ser has been levied since the 1st April 1898; its import is at present limited to 638 chests (1,088 maunds) per annum, of which a considerable portion is allotted to the Native States in the province. Imports in excess of 638 chests are liable to the payment of a duty of Rs725 per chest or over Rs10 per ser. No such excess imports have, however, been in practice ever made.

BARODA

The cultivation of the poppy and the manufacture of opium are permitted in Baroda, under a State monopoly, for consumption in the State and for export to China. The State has, by agreement, assimilated its

Bhang,	{ R4 per maund on imports from other British provinces R8 " " " Foreign territory

The figures given in these tables have undergone revision, owing mainly to the inclusion of the duty on Malwa opium realised in the Panjab from 1882-83, the exclusion of certain receipts on account of the Excluded Local Funds in the Central India Agencies from 1893-94, and the inclusion of the license and distillery fees and duties realised in the Military Department from 1897-98 and of the excise revenue for Bangalore from 1900-01, which had hitherto been omitted from the head "India, general."

VI

CUSTOMS REVENUE

[TABLES 1 TO 8, PAGES 111 TO 138]

(Compiled from Official returns and the customs circulars published by the Government of India)

The first two tables of the series state the amount of duty collected each year, and the others state the rate of duty imposed on all principal articles of merchandise by the schedules of the various Tariff Acts passed since 1359 and thus constitute a history of the legislation respecting customs duties since that year.

Import duties.—From 1859 to 1864 the general rate of import duty was 10 per cent; this heavy rate having been imposed as one of the means of redressing the financial position which had been seriously affected by the mutiny of 1857. The rate was found to be so high as to operate in restriction of consumption, and in 1864 it was reduced to 7½ per cent. That rate was allowed to remain until 1875 when it was reduced to 5 per cent. In 1882 the import duties were repealed, the only articles left on the tariff schedule being liquors, arms, opium (the latter giving a nominal revenue, as the duty is meant to be prohibitory), and salt. The last-named article appears at the foot of the first table, but the collections are not included in the total of the Customs revenue, as the entire revenue from imported and Indian salt is credited in the public accounts to a separate head (Salt) and it is dealt with in another section of this volume.

Between 1882 and 1894 the following changes were made in the tariff: the duty on liquors was increased in 1887 and again in 1890, and the duty on salt was increased in 1888; a duty was imposed on petroleum in 1888, and on dry and wet salt-fish imported into Burma from any place beyond the limits of British India in 1893.

VI--CUSTOMS REVENUE—*continued*

In March 1894 the tariff was re-established much as it had stood in 1875: imports generally were subjected to duty at the rate of 5 per cent, but the duty on most classes of iron and steel was fixed at 1 per cent, and a few articles remained exempt from duty, the most important being food-grains, machinery, railway material, coal, and cotton yarn and manufactured goods.

In December 1894 cotton yarn of a certain fineness and cotton manufactures containing such yarn were made dutiable at the general rate of import duty (5 per cent), but a further change was made in February 1896, when cotton yarn and cotton sewing thread were exempted from duty, and the rate of duty on all other cotton goods irrespective of fineness was reduced to 3½ per cent. The imposition of a duty on imported cotton goods was accompanied by the imposition of an equivalent excise duty on cotton goods woven in the Indian mills.

In 1896 the exemption of machinery was restricted to machinery required for certain specified industries, and from time to time additions were made to the list of industries. In 1899 the restriction was removed and all machinery was exempted without reference to the industry for which it was required. In the same year sugar imported from countries which grant bounties on export was charged with an additional duty equivalent to the bounties, and in June 1902 an amendment of the Tariff Act, VIII of 1902, authorised special duties being imposed on sugar produced in countries where the difference between the rate of duty or other taxation to which foreign sugars are subject and that imposed on the home product exceeds 6 fr. per 100 kilos for refined sugar and 5 fr. 50 centimes for other sugar, the duty being limited to half such excess. Such special duties were imposed from time to time by notifications on sugar produced in Austria-Hungary, Germany, France, Denmark, the Argentine Republic, and Russia. Section 8-B of the Act, in pursuance of which these special duties were imposed, expired on the 31st August 1903, but an amending Act passed on the 28th August 1903, authorised the continuance, until the 31st March 1904, of the duties which had been imposed under that section. By a further Act passed on the 25th March 1904, the same section was revived and continued in force with effect from the 1st April 1904 and the special duties are still chargeable on sugar imported from Denmark, the Argentine Republic, and Russia. The additional and special duties were however remitted by notification in respect of sugar produced after the 31st August 1903, in countries which had adhered to the Brussels Sugar Convention of 1902.

Export duties.—The general rate of export duty from 1859 to 1867 was 3 per cent. Many articles were subject to taxation in 1859, but the list was gradually reduced until, in 1867, it consisted of cotton manufactures, indigo, rice, wheat, and other grains, tanned and dressed hides and skins, lac, oils, seeds, spices, and shawls. The list was then further gradually reduced, until finally rice alone remained in 1882, this being the only dutiable export at present, besides rice-flour, which has been subject to duty since August 1893.

A customs duty at the rate of a quarter of a pie (one forty-eighth of an anna) per pound has also been levied from the 1st April 1903, on all tea produced in India and exported from any customs port to any beyond the limits of British India, the collections being paid to a Committee for promoting the sale and consumption of Indian tea.

Customs revenue.—The revenue from the import and export duties in the two quinquennial periods ending 1896-97 and 1901-02, as well as in the years 1902-03, 1903-04, and 1904-05, is stated below (in rupees). The great expansion of the export duties in the last three years is due to the large rice crops in Burma, of which an unusually large proportion was exported to foreign countries, owing to the good harvests in India and consequent smaller demand for Burmese rice.

	Total		Annual average	
	Imports	Exports	Imports	Exports
Five years ending 1896-97	12,28,57,683	3,98,69,436	2,45,71,533	79,73,887
" " " 1901-02	19,56,96,130	4,36,16,691	3,91,39,226	187,23,338
In the year 1902-03	4,44,26,958	1,26,06,624
" " 1903-04	4,45,02,670	1,20,31,363
" " 1904-05	4,88,36,084	1,31,75,772

VII

STAMPS

[TABLES 1 TO 39, PAGES 139 TO 161]

(Compiled from special official returns)

The stamp revenue is derived from two great classes of stamps—judicial or court-fee stamps, and non-judicial or revenue stamps. Judicial or court-fee stamps are provided for by the Court-fees Act, VII of 1870; non-judicial stamps by the Indian Stamp Act, II of 1899, and by the rules under that Act contained in the Notifications by the Government of India in the Finance Department, No. 783, dated the 17th February 1899, No. 582-S. R., dated the

VII—STAMPS—*continued*

31st January 1901, No. 1662-S. R., dated the 21st March 1902, No. 1591-Exc., dated the 15th March 1905, No. 3191-Exc., dated the 2nd June 1905, and No. 5616-Exc., dated the 6th October 1905. The Court-fees Act has been amended from time to time by the Acts specified below :

Act XIV of 1870 (schedule)	Act XI of 1889 (section 84)
" XX of 1870 (section I)	" XIII of 1889 (schedule)
" VIII of 1871 (schedule I)	" VIII of 1890 (schedule)
" XV of 1873 (section 2)	" XII of 1891 (schedule)
" XIII of 1875 (section 6)	Regulation I of 1898 (section 3d)
" XVIII of 1884 (section 71) as amended by Act XXV of 1899 (section 6) and Act IX of 1900	Act XI of 1899 (sections 2 and 3)
" XVII of 1887 (schedule)	" IX of 1900 (schedule)
" VI of 1889 (section 18)	" X of 1901 (sections 2, 19-A, 19-E, and 19-H)
" VII of 1889 [section 13 (2)]	" VI of 1905 (section 7)

The Indian Stamp Act (section 57) has been amended by Act VI of 1900 (schedule I) and by Act XV of 1904 (sections 2, 23, 26, 29, 40, and 56, and schedule I).

The immediate control of the stamp revenue is vested in the local Governments, subject to the general supervision of the Government of India.

The stamps are manufactured in England, the quantities required for consumption being sent to India on annual indents. They are consigned to the Central Stamp depôts at Calcutta, Madras, Bombay, Rangoon, and Karachi, whence supplies are distributed to local depôts and offices on indent. The Central depôts supply the requirements of the different provinces as shown below :

Calcutta	. . .	Bengal, the United Provinces of Agra and Oudh, Eastern Bengal and Assam, Central India, and the Central Provinces (in regard to stamps for copies).
Madras	. . .	Madras Presidency and Coorg.
Bombay	. . .	Bombay Presidency (excluding Sind) and the Central Provinces (except in regard to stamps for copies, which, as stated above, are supplied from the Calcutta Depôt).
Rangoon	. . .	Burma and the Andamans.
Karachi	. . .	Sind, Baluchistan, the North-West Frontier Province, the Panjab, Rajputana, the Residency treasuries in Kashmir, and the Khorasan Agency treasury.

In each province there is an official—the Superintendent or Commissioner of Stamps, as the case may be,—(in Bengal, Eastern Bengal and Assam, and Madras he is a member of the Board of Revenue), who ordinarily combines other functions with the function of administering the stamp revenue. Stamps are sold by certain officials (such as postmasters) and by licensed vendors whose business is conducted under rules framed by the local authorities, and to whom stamps are supplied in quantity at various rates of discount.

Two kinds of stamps—adhesive and impressed—are used to denote the payment of duty on instruments; and impressed stamps are again of two classes, namely, impressed sheets, the paper bearing the impression of stamps of varying values engraved thereon, and impressed labels which are affixed to instruments by Government officers empowered to do so. These officers are required, when affixing the labels, to impress them by means of a stamping machine, and also to stamp or write on the face of the label the date of impression, their initials being added when the duty amounts to five rupees and upwards, and their signatures (under the label) when the duty amounts to twenty rupees or more. The centres provided for the purpose of affixing and impressing labels are—the Calcutta, Godavari, Tinnevely, Malabar, and South Canara collectorates; the Moulmein, Akyab, and Bassein treasuries; the office of the Deputy Commissioner of Kamrup at Gauhati; the offices of the Superintendents of Stamps at Madras, Bombay, Lahore, Rangoon, Karachi, Nagpur, and Aden; and the office of the Commissioner of Stamps, United Provinces of Agra and Oudh.

The various classes of stamps with their values are—

Unified postage and revenue stamps	Half-anna and one anna
Foreign bill stamps from 2 annas to 8 rupees
Share-transfer stamps " " " " 20 "
Special adhesive stamps " " " " 1,000 "
Hundi stamped paper " " " " 18 "
Impressed non-judicial stamps	... " " " " 1,000 "
Adhesive court-fee stamps	... " 1 anna " 6 "
Impressed " "	... " 10 rupees " 1,000 "
Stamps for copies " 2 annas " 2 "

VII—STAMPS—concluded

The revenue from stamps has increased steadily, as will be seen from the figures appended—

	Judicial ₹	Non-judicial ₹	TOTAL ₹
1878-79 to 1882-83 ...	11,01,09,490	5,28,84,980	16,30,84,470
1883-84 to 1887-88 ...	12,66,92,340	5,78,01,740	18,39,94,080
1888-89 to 1892-93 ...	14,04,29,190	6,72,85,160	20,77,14,350
1893-94 to 1897-98 ...	15,95,96,160	7,48,77,240	23,44,73,400
1898-99 to 1902-03 ...	17,31,31,251	7,71,15,862	25,02,47,113
In the year 1903-04 ...	3,07,93,185	1,69,59,972	5,36,66,157
" " 1904-05 ...	3,82,23,652	1,78,06,433	5,60,33,085

The figures given in these Tables under the heads of Receipts and Charges for India, General are less than those recorded under the same head in the Finance and Revenue Accounts on account of the omission from the former of statistics of transactions in stamps at Bangalore, Hyderabad, and certain other places.

VIII

INCOME TAX

[TABLES 1 TO 9, PAGES 162 TO 169]

(Figures supplied by the Local Governments and Administrations)

The Income Tax Act, II of 1886, came into operation on the 1st April 1886. It took the place of various local Acts under which annual licenses were required for the exercise of trades, dealings, or industries. The net revenue obtained from the taxation imposed under those Acts, which were in force in the provinces of Madras, Bombay, Bengal, the United Provinces of Agra and Oudh, and the Panjab, was, in the last year of their existence ₹47,28,000; in the first year of the operation of the Income Tax Act the net revenue realised was ₹1,27,75,100. The proceeds of the tax increased steadily from year to year at an average rate of 3 per cent annually up to the end of 1902-03. With effect from the 1st April 1903 the taxable minimum of income was raised from ₹500 to ₹1,000 by the Indian Income Tax (Amendment) Act, XI of 1903. The proceeds of the tax on incomes of ₹500 but less than ₹1,000 was, in 1902-03, 37 lakhs of rupees or 13 per cent of the total. The net decrease in the proceeds of the tax in the year 1903-04 was 14 per cent. The revenue obtained from incomes of each of the descriptions specified in the Schedule of the Act and the proportion of each was in 1903-04 :

	₹	
I, Salaries and Pensions ...	52,82,470	=29.65 per cent
II, Profits of Companies ...	15,11,919	8.48 "
III, Interest on Securities ...	9,68,973	5.44 "
IV, Other sources of Income ...	1,00,54,177	56.43 "
TOTAL ...	1,78,17,539	100

The variations in these proportions since the Act came into force have been small. The total number of persons assessed to the tax has always been a very small fraction of the total population. In the first year it amounted to 354,594. In 1902-03 it was 507,041. The result of the Indian Income Tax (Amendment) Act of 1903 was to reduce the total number of assesses to 237,673 or 47 per cent of the number assessed in 1902-03.

The number of persons assessed to income-tax in the principal Provinces in 1903-04 and the incidence of the tax on them were as follows:—

	Number	Incidence ₹
Bengal ...	56,333	87.17
Burma ...	14,756	80.4
Bombay ...	44,404	79.37
Central Provinces ...	3,994	71.79
Assam ...	3,560	69.24
United Provinces of Agra and Oudh ...	31,937	62.25
Madras ...	42,971	55.47
Panjab ...	21,023	55.17
North-West Frontier Province ...	1,711	55.8

VIII—INCOME TAX—continued

The tax has been levied at the rate of four pias in the rupee on incomes of less than ₹2,000 and five pias in the rupee on incomes of ₹2,000 and over since its introduction, the incidence of these rates of assessment being 2·08 and 2·6 per cent respectively. The collections of the tax in 1903-04 classified according to the amount of annual income were in classes I to VI (annual incomes of ₹500 to ₹2,000) ₹10·2 lakhs, and in classes VII to XII (annual incomes of ₹2,000 and upwards) ₹137·08 lakhs. The first six classes, that is, those paying the rate of four pias in the rupee, contain 162,764 assesseees or 63 per cent of the total and return only 23 per cent of the total collections. The sum of ₹72,264 paid by 6,593 assesseees in classes I and II represents arrears of the tax assessed in 1902-03. The other six classes contain 76,026 tax-payers who pay 77 per cent of the total collections. The total income on which the tax was assessed calculated from the amount of tax paid was in round figures 7,191 lakhs of rupees, equivalent to about £17,943,000. The annual income of the tax-payers in the first six classes is 1,929 lakhs of rupees, making an average of ₹1,185 for each assessee. The total income of the tax-payers in the six higher classes was 5,262 lakhs of rupees which gives an average of ₹ 6,921 for each assessee.

IX

RAILWAYS

[TABLES 1 TO 4, PAGES 170 TO 175]

1. The figures in table No. 1 are compiled from the Administration Report on the Railways in India published by the Railway Board, and represent the result of the working of the railways in India as a whole. The figures are taken back as far as possible and are complete for the last 34 years.

2. Up to the close of the calendar year 1904 the capital outlay on open lines and lines partly open amounted to ₹35,285·95 lakhs as compared with ₹24,485·05 lakhs at the end of 1895, the increase in the ten years being 44 per cent, irrespective of the rise in the exchange value of the rupees. The number of miles open for traffic increased during the same period from 19,467 to 27,565 or 42 per cent. The outlay on lines wholly under construction amounted to ₹261·91 lakhs and on miscellaneous items connected with railways to ₹83·36 lakhs, the total capital outlay at the end of 1904 being ₹35,636·22 lakhs.

3. The gross earnings of all railways in 1904 were ₹39,64,97,000. The term "Gross earnings" includes earnings from passenger traffic and goods traffic which are shown in the latter columns of the table, and also earnings under the heads of "other coaching traffic," "electric telegraph," and "steamboat and sundries." The average earnings for the last five years under these heads were "other coaching traffic" ₹1,46,26,000, "electric telegraph" ₹7,71,600, and "steamboat and sundries" ₹90,98,200. The gross earnings, the working expenses, and net earnings of railways taken as a whole have increased during the last 10 years by 51, 55, and 43 per cent, respectively.

4. The following Railways shew net earnings of over a crore of rupees :

East Indian	₹ 5,20,44,000
North-Western	3,43,23,000
Great Indian Peninsula	2,98,37,000
Rajputana-Malwa	1,26,57,000
Bombay, Baroda and Central India	1,00,89,000

5. The average number of miles travelled by each class of passengers and the average rate charged per mile during 1904 were as follows :—

	Average miles carried	Average rate charged per mile in pias
First class	95·98	13·41
Second class	74·23	5·69
Intermediate	62·89	3·09
Third class	40·71	2·84

6. The average rate for all descriptions of goods carried during 1904 was 5½ pias per ton per mile. This is the lowest rate recorded since 1884. The average distance over which a ton of goods was carried was 172 miles, the highest recorded hitherto.

7. The railways which carried in 1904 the largest number of passengers and the largest amount of goods were :

	Passengers (numbers)	Goods (million tons)
East Indian	25,181,000	10·64
North-Western	25,523,800	4·19
Great Indian Peninsula	22,454,800	3·51
Bombay, Baroda and Central India	21,685,200	1·59
South Indian	19,164,500	1·37
Eastern Bengal	14,667,400	2·15
Burma	16,118,100	1·38
Rajputana-Malwa	18,194,300	1·72

IX—RAILWAYS—*continued*

8. The chief commodities carried during 1904 were :

	Quantity (tons)	Earnings (Rs)
Grain and Pulse	9,435,343	6,84,73,340
Coal	9,396,946	2,56,27,600
Oil-seeds	2,925,732	2,12,74,543
Salt	1,647,209	1,02,32,706
Cotton, raw and manufactured	1,583,574	2,30,38,134
Sugar	1,446,580	1,15,14,275
Jute	1,339,694	88,20,749
	<u>27,775,078</u>	<u>16,89,81,347</u>

The traffic in these commodities amounted during the past two years to about 71 per cent, both in weight and in earnings of the total traffic carried for the public.

9. The results of chief railways per train-mile run are compared below :

	Total earnings per train-mile	Total working expenses per train-mile	Net earnings per train-mile
	Rs	Rs	Rs
Bombay, Baroda, and Central India	6.25	2.94	3.31
East Indian	4.79	1.60	3.19
Eastern Bengal	5.00	2.74	2.26
North-Western	3.83	1.82	2.02
Bengal-Nagpur	3.77	1.83	1.94
Great Indian Peninsula	3.85	1.92	1.93
Rajputana-Malwa	3.59	1.71	1.88
Bengal and North-Western	2.93	1.16	1.77
South Indian	3.13	1.40	1.73
Madras	3.90	2.27	1.63
Oudh and Rohilkhand	3.23	1.72	1.51
Burma	3.33	1.87	1.46
Southern Mahratta	2.67	1.70	0.97

10. Table No. 2 shows the number of miles of railways open for traffic during each of the past 35 years. The open mileage on the 31st March 1905 was divided between the different gauges as follows :

Standard gauge	14,772	miles
Metre "	11,706	"
Other gauges	1,249	"
	<u>27,727</u>	

11. The revenue shown in table No. 3 includes the gross receipts of State railways, the net traffic receipts of guaranteed Companies, and the repayment of advances of interest of subsidised Companies. The expenditure represents the working expenses, interest and annuity charges of State railways and surplus profits, land and supervision charges for guaranteed and subsidised railways and Miscellaneous railway expenditure.

12. Up to the end of 1898-99 the railways in respect of which Government is financially responsible worked at a loss to the State, owing partly to the increased payments to certain guaranteed Companies necessitated by the fall of exchange and partly to the yearly additions of new and undeveloped lines ; but with the termination of the guarantee of the Great Indian Peninsula railway and the development of traffic, the revenue has exceeded the expenditure, the net results being :

1898-99	—93.02	lakhs of rupees
1899-1900	11.51	" "
1900-01	48.77	" "
1901-02	126.99	" "
1902-03	34.34	" "
1903-04	129.10	" "
1904-05	315.82	" "

13. The total number of persons killed from all descriptions of accidents during 1904 was 1,156 against 1,144 in the previous year, and the number injured was 1,039 against 1,141. Out of a total of 227 millions of passengers travelling, only 11 passengers were killed and 83 injured by causes beyond their control. This gives an average of one fatal casualty in 20 millions of persons travelling.

X

TELEGRAPH

[TABLES 1 AND 2, PAGES 176 TO 179]

(Figures supplied by the Indian Telegraph Department)

Early history and progress.—After prolonged experiments Dr. W. B. O'Shaughnessy, Professor of Chemistry in the Medical College at Calcutta, obtained the sanction of the Government in 1851 to construct experimental lines from Calcutta to Diamond Harbour, making, with branches and additions, a length of 82 miles, and four offices were opened for business, principally connected with the shipping, two more being added in February 1852. The lines were partly overhead and partly underground. The receiving instrument was a small galvanoscope designed by Dr. O'Shaughnessy and made in India, and this pattern continued in use until the Morse instruments replaced them early in 1857.

In 1852 the Governor-General, Lord Dalhousie, obtained the sanction of the Court of Directors to the extension of the service by the construction of lines between Calcutta and Agra, Agra and Bombay, Agra and Peshawar, and Bombay and Madras, these lines extending over 3,050 miles. They were opened from the 1st February 1855, and by 1857 the lines were further extended, bringing Mysore, Ootacamund, and Calicut into the system, which then comprised over 4,555 miles of wire.

In the Mutiny the lines in the North-Western Provinces and [in parts of Central India were greatly damaged by the mutineers, some 760 miles being entirely demolished; but during the following year the lines were reconstructed, and nearly 2,000 more miles laid out. The Department has since steadily expanded, and the following developments of its operations in recent years may be specially noted.

In 1873 the Department was required to supply to the State railways wires, instruments, and the technical supervision of their telegraph offices. The same duties are undertaken for the canal telegraph service, and wires are also provided by it for guaranteed or private railways. On the 31st March 1905, 80,104 miles of wire and cable were maintained for railways and canals, and 4,041 railway and canal offices were technically supervised by the Department.

In 1853 the Department arranged to construct short lines to selected outlying post offices and fit up instruments in them, the Postal Department working the offices thus opened under the technical supervision of the Telegraph Department, charging the latter the cost of the work. The Telegraph Department maintains the line, supervises and supplies all the requirements of the offices, and is credited with the revenue earned. On the 31st March 1905 there were 1,917 offices worked by Postal Agency on behalf of the Telegraph Department.

The Department supplies the military telegraph and telephone systems, it has always a large number of British soldiers in training in telegraphy, and employs a proportion of the trained men in many of its offices, thus providing a reserve of trained military telegraphists for service in war.

The Department also supplies private telegraph or telephone lines to the departments of Government and, in places where their wants cannot be met by telephone companies, to municipalities, and other local bodies, and also to private individuals.

Telegraph laws.—The first Telegraph Act for India was XXXIV of 1854. The Acts which have since been passed each in turn repealing its predecessor, are—VIII of 1860, I of 1876, and XIII of 1885, with Act XI of 1888. These Acts deal with the privileges and powers of Government in respect to telegraphs, their authority to grant licenses for the establishment of telegraphs, and the regulations under which telegraphs are to be worked. They also provide and regulate the powers of the Department to place telegraph lines and posts on public and private lands, and declare the penalties for infringements of licenses, and for all other offences connected with telegraph lines, and with the transmission of telegrams. Rules and regulations for the acceptance, transmission, and custody of telegrams are published from time to time in the *Gazette of India* by the Governor-General in Council, and have the force of law.

Tariff for inland telegrams.—The rates have been modified from time to time as follows :

From February 1855 to April 1859	...	One rupee for sixteen words per 400 miles of telegraph line
" April 1859 " January 1866	...	One rupee for the first sixteen words and one anna for each additional word per 400 miles of direct distance
" January 1866 " October 1868	...	For the first twenty words eight annas per 100 miles, one rupee per 200 miles, and one rupee and eight annas per 400 miles
" October 1868 " January 1872	...	One rupee for ten words, and the distance limit removed
" January 1872 " July 1881	...	One rupee for six words
" July 1881 " January 1882	...	One rupee for six words or less, and two annas for each additional word
" January 1882 " December 1903	...	'Ordinary' rate—One rupee for eight words and two annas for each additional word
		'Urgent' rate—Double the ordinary rate
		'Deferred' rate—Half the ordinary rate

X—TELEGRAPH—*continued*

From 1st January 1904 to June 1905	... 'Ordinary' rate—One rupee for sixteen words and two annas for each additional word. Address charged for.
	'Urgent' rate—Double the ordinary rate. Address charged for.
	'Deferred' rate—Four annas for four words and one anna for each additional word. Free address limited to six words.
„ 1st July 1905	... 'Ordinary' and 'urgent' rates—Same as above.
	'Deferred' rate—Four annas for ten words and one anna for each additional word. Address charged for.

From January 1872 till the end of 1903 the address was telegraphed free.

Tariff between India and Europe.—Through communication from India to Europe *via* Karachi and the Persian Gulf was established on the 27th January 1865, and the cable route from Bombay *via* Aden and Suez was opened in the spring of 1870. The original tariff was £5 or R50 for messages of 20 words between India and the United Kingdom, which was reduced in 1868 to £2 17s. 6d. or R28-8 for 20 words. In 1871 this tariff was raised to £4 10s. or R45 for 20 words, and in 1875 a word rate was established at francs 5-50 *via* Suez or *via* Teheran, and francs 5 *via* Turkey. In 1885 the rates were reduced to francs 5 and 4-50, respectively. From the 1st March 1902 the rates *via* Teheran and Suez were reduced to francs 3-125, or 2s. 6d., per word, and from the 1st January 1903 the charge *via* Turkey was reduced to 2s. 3d. per word. Since the 1st August 1905 the rates for cablegrams have been reduced to R1-6 *via* Turkey and R1-3 *via* Teheran and Suez. The charge to the continent of Europe generally is the same as to the United Kingdom.

Tariff between India and Australia.—By virtue of an agreement between the Federal Government of Australia and the Eastern Extension, Australasia, and China Telegraph Company, the rates between Australia on the one hand and certain countries in the East and Far East—including India, Burma, and Ceylon—on the other were reduced to a uniform rate of 3-125 frs. or R1-14 per word with effect from the 1st June 1903, before which the rate in force between India and Australia was 5-7708 frs. or R3-8 per word, and between Burma and Australia two annas more.

Payment for telegrams.—All telegrams, whether on the service of the State or for private individuals, are paid for before despatch, except those relating to the telegraph and postal service, and certain State telegrams which are accepted on debit notes signed by privileged officials. Telegrams are paid for, when handed in at a telegraph office, with telegraph stamps; when handed in at post offices they may be paid for either in telegraph or postage stamps. Telegrams posted at places where there is no telegraph, for transmission by post to the nearest telegraph office, may be paid for either in telegraph or postage stamps.

Constitution.—The control of the Department was vested until the 30th September 1867 in the Home Department of the Government of India; until the 30th April 1870 in the Foreign Department; until the 28th February 1905 in the Public Works Department; and since then in the new Department of Commerce and Industry. Its constitution in the superior establishment is as follows:

The Director-General, the Deputy Director-General, 2 Directors, 2 Deputy Directors, 4 Chief Superintendents, 31 Superintendents, and 58 Assistant Superintendents.

The upper subordinate establishment consists of 2 grades of Sub-assistant Superintendents, of whom there are 36 in the 1st and 37 in the 2nd grade. The signalling establishment consists of 2,453 telegraph masters and signallers, including 20 traffic Sub-assistant Superintendents, and the lower subordinate establishment of 1,322 sub-inspectors, line riders, and linemen. There are also 622 military signallers, 59 non-departmental signallers, besides 2,307 postal clerks wholly or partially employed in signalling.

Progress of revenue and expenditure and of messages.—The revenue and expenditure of the Department and the number of messages sent, during the last five years, are entered in the table below:

	Revenue R	Expenditure R	Surplus + or Deficit— R	NUMBER OF MESSAGES					
				Inland			Foreign		
				State	Private	Total	State	Private	Total
1900-01	1,14,98,682	70,84,371	+44,14,311	805,216	4,744,179	5,549,395	17,423	882,554	899,977
1901-02	1,11,14,161	75,50,075	+35,64,086	802,988	4,763,963	5,566,951	16,154	892,440	908,594

XI

POST OFFICE

[TABLES 1 TO 20, PAGES 180 TO 232]

*(Figures supplied by the Postal Department)**Early history and progress*

Until 1837 no general system of postal service existed in India: there were only certain services for the conveyance of letters and parcels instituted by Government for its own purposes, the use of which was conceded as a privilege to private persons. By Act XVII of 1837 a public post was established, and the right to convey letters for hire in the territories of the East India Company was made a monopoly and vested in the Government.

The organisation of the service was at first very imperfect. The presidency postmasters, as postmasters general, supervised a certain number of provincial offices and provided for the conveyance of mails on a few main lines, while the collectors of districts had charge of district offices and local lines. There was no central authority to secure the co-operation of the postal officials of the several provinces or to maintain uniformity of practice. There were no postage stamps, and the charge, levied in cash, for the carriage of a letter varied according to weight and the distance it was carried. From Calcutta to Bombay the charge was one rupee per tola; from Calcutta to Agra twelve annas. In 1850 a Commission was appointed to report on the working of the post office and as a result Act XVII of 1837 was repealed by Act XVII of 1854. This Act, which marks the beginning of the present organisation of the post office, provided for the issue of postage stamps and prescribed rates for the conveyance of letters irrespective of distance, power being conferred on the Government to reduce the rates. A director general of the post office was appointed for the whole of India; the office of postmaster general was separated from that of presidency postmaster; postmasters general were appointed for the direct administration of the services of the larger provinces; and deputy postmasters general, at first designated chief inspectors, were appointed for the smaller provinces and the principal political agencies. A central office of account was established in Calcutta in 1861. The sorting of letters in transit by railway was introduced in 1864, and the sea post office for sorting letters in transit from Suez to Bombay was established in 1868. In 1875 the Postal Union was established for the regulation of the exchange of international correspondence, and in the following year British India joined it. The Act of 1854 was repealed by Act XIV of 1866 and this by Act VI of 1898 which is now the legal sanction for the working of the post office.

Letters and other articles carried

The main business of the post office is the conveyance and delivery of letters, postcards, newspapers, parcels, and book-packets; and the total length of mail lines over which its work is carried on is 143,805 miles. Railway and steamer services now extend over 45,378 miles of this length, and the other 103,427 miles are worked by boats, mail-carts, horses, camels, and runners. The number of post offices is 16,033, of letter-boxes 36,037 (excluding those at post offices), and of postmen and village postmen 21,870. The number of letters, newspapers, packets, and parcels given out for delivery in 1904-05 amounted to about 679 millions.

Parcel post

Before 1854 the post office undertook the carriage of parcels at rates varying with weight and distance, and this system was continued until, in 1870, rates were sanctioned varying only with weight and irrespective of distance. In 1873 arrangements were made for the carriage of parcels to and from England, and for their distribution and collection through the agency of the Peninsular and Oriental Steam Navigation Company. In 1886 an exchange of postal parcels was introduced between India and the United Kingdom through the agency of the British Post Office. In 1899 the Indian Post Office joined the International Parcel Post Union; and parcels are now exchanged by post between India and almost every country in the world.

Value-payable parcels

In 1877 the post office undertook to collect from the addressee the declared value of a parcel or registered article and to transmit the money to the sender. The extent to which this system is used by traders and their customers is indicated by the fact that in 1904-05—27 years after its introduction—the number of value-payable articles carried was 4,813,514 and the value declared for realisation was ₹5,10,83,631.

Insurance of letters and parcels

Since 1878 the post office has undertaken the insurance of letters and parcels. Until 1890 there was no limit to the sum for which an article could be insured; in that year the limit of ₹1,000 was fixed; but in December 1898 this limit was raised for registered letters and value-payable registered letters and registered parcels to ₹2,000, and the procedure in connection with the insurance of articles was simplified, the sender of an insured article being no longer required to declare its contents. The insurance fee was at first fixed at one-half per cent, but shortly afterwards it was reduced to one-quarter per cent. The gross sum for which articles were insured by the post office in 1904-05 was ₹10,82,67,161.

XI—POST OFFICE—*continued*

Money orders

In 1880 the Government of India transferred from the treasuries to the post office the business of the issue and payment of money orders, with the result that within a few months the number of orders issued was quadrupled. The value of inland money orders issued has increased from ₹4,57,08,580 in 1880-81 to ₹31,21,29,193 in 1904-05. Special arrangements have been made to adapt the money order system to remittances of revenue, rent, and miscellaneous Government dues, and in several provinces the system is largely used for those purposes. The commission on inland money orders is 4 annas for each complete sum of ₹25 with lower rates of 1, 2, and 3 annas, respectively, for any sums or remainders not exceeding Rs. 5, Rs. 10, and Rs. 15. Foreign money orders are also exchanged with the principal countries of the world, the maximum limit of a rupee order being ₹800 and of a sterling order £40 except in a few cases in which the maximum limit is either £10 or £20. Since 1884 British postal orders of value ranging from 1s. to 21s. have been sold at Indian post offices.

Savings banks

In 1870 Government savings banks were established in connection with district treasuries. In 1882 sanction was given for the opening of savings banks at post offices, and three years later the closure of the treasury savings banks was ordered. In 1882-83 the number of depositors in the postal savings banks was 39,121 and the sum at their credit ₹27,96,730. By the end of 1904-05 the number of depositors had increased to 1,058,813 and the sum at their credit amounted to ₹13,40,70,130. The accounts of native depositors number 959,833, with a balance of ₹12,21,87,129 at credit, the remainder being held by Europeans and Eurasians. The post office undertakes on behalf of depositors the purchase and sale of Government promissory notes and the transfer of such notes to the Comptroller General for custody on behalf of the purchaser.

Postal telegraphs

In 1883 many post offices were made receiving offices for the transmission of inland telegrams by post to the nearest telegraph office; and telegraph work was also undertaken by the post office in a certain number of offices. The number of telegraph offices has thus been largely increased, and out of 2,189 state (non-railway) telegraph offices on the 31st March 1905, 1,917 were postal telegraph offices. In 1904-05 the number of messages transmitted by receiving offices was 52,894, and the number of messages signalled by postal telegraph offices was 4,024,140, excluding 219,127 free messages.

Cart services

When the post office was first established its agency was largely utilised for the management of staging bungalows, the carriage of goods by bullock train, and the conveyance of passengers by palankeen mail-cart, or parcel van. The extension of the railway system has to a great extent removed the need of these services and the post office now maintains and manages only a single passenger service—the one between Kalka and Simla. Many carriage and cart lines are, however, subsidised for the carriage of the mails.

Sale of stamps and quinine

The agency of the post office is used throughout India for the sale of receipt stamps; and in several provinces for the sale of court-fee stamps, and non-judicial stamps. Post offices in all the provinces also sell packets of quinine manufactured at the Government quinine factories.

Postal life insurance

In 1884 sanction was given to a scheme of life insurance, whereby an officer of the postal service is enabled to obtain a policy for a sum not exceeding ₹4,000 on the security of Government. In 1888 the scheme was extended to the Telegraph Department. In February 1898 the scheme was extended generally to all Government servants, who are subject to civil rules, and a system of Endowment Assurances was added to the scheme. By the end of 1904-05, 11,730 lives had been insured for the aggregate sum of ₹1,72,70,319, and the active policies outstanding were 10,105, of which 3,992 were held by post office servants and 6,123 by servants of other Departments.

Payment of military pensioners

In 1890 the post office undertook the payment of military pensioners in the Panjab at the post offices nearest their homes. The number of pensioners thus paid in 1904-05 was 30,454, and the aggregate sum paid to them ₹21,57,732.

XI—POST OFFICE—*continued*

Rates of postage, inland and foreign

Letters and postcards.—From 1854 to 1869 the lowest rate of postage on an inland letter was half an anna for a weight not exceeding a quarter of a tola. The weight was doubled in 1869, and the rate was half an anna for a weight not exceeding half a tola. This weight has further been raised to three quarters of a tola with effect from the 1st April 1905. Until October 1893 the rate on inland letters exceeding half a tola was one anna a tola, but it was then fixed at one anna for every one-and-a-half tolas. Embossed envelopes bearing a half anna coloured impressed stamp and sold at the face value of the stamp without any charge for the envelopes were introduced in 1873. Formerly an additional charge was made for redirection, equal to the postage paid when the letter was posted, but the additional charge was discontinued in 1877. The introduction of the inland postcard in 1879 gave a still lower rate of postage than that given by the rate of half an anna per half tola with an envelope supplied without charge. The inland postcard has from its introduction been priced at one pice (three pies) per single card and half an anna per reply card, the price in each case covering the cost of the card as well as postage.

Newspapers and packets.—The minimum postage on newspapers was originally one anna for 6 tolas of weight. This rate was lowered in 1866 to one anna for 10 tolas, in 1872 to half an anna for 10 tolas, and in 1895-96 to half an anna for 20 tolas. Additional privileges were also given to newspapers for which the postage for three months was prepaid in cash: if the weight of the newspaper did not exceed 3 tolas, postage was charged at 3 pies per copy; papers packed in bundles and sent to agents for sale were charged half the postage of single copies; and papers exchanged with other newspapers were carried free. From October 1893 these concessions were withdrawn, except that the quarter-anna rate was maintained for registered newspapers and the maximum weight to which this rate applies was raised to four tolas. A new system of "registering" publications as newspapers was introduced in January 1897, under which a "registered newspaper" of weight not exceeding twenty tolas is carried by the inland post for half an anna. From the 1st October 1898 till 1st January 1904, the inland rate for a registered newspaper not exceeding four tolas in weight was one-quarter of an anna and for every registered newspaper exceeding four tolas but not exceeding twenty tolas half an anna; and half an anna for every additional 20 tolas or part of that weight. Since the 1st January 1904 the maximum weight for a registered newspaper admissible for transmission through the post for one-quarter of an anna postage has been raised from 4 to 6 tolas.

The postage on packets other than newspapers was one anna for 10 tolas until 1877, when the rate was reduced to one anna per 10 tolas for book packets and two annas per 40 tolas for book packets and patterns. In 1878 the packet rate was lowered to half an anna per 10 tolas.

Parcels.—Before 1870 postage on parcels, all of which were registered, was charged according to distance, but in that year a uniform rate was fixed of three annas for 10 tolas. In 1873 the minimum charge was fixed at four annas for 20 tolas, but four years later it was raised to eight annas for 40 tolas. In 1880, the rates of postage were fixed at four annas for 20 tolas, eight annas for any weight exceeding 20 and up to 40 tolas, and four annas for each additional 40 tolas or part thereof. In August 1895 a system of unregistered parcels was introduced, under which parcels not exceeding 440 tolas in weight were charged for at the rate of two annas for the first 20 tolas and four annas for every additional 40 tolas. The present rates of postage, which came into force on the 1st July 1901, and which are applicable to all classes of parcels, are (1) in the case of parcels not exceeding 440 tolas in weight, 2 annas for the first 20 tolas, 4 annas for any weight exceeding 20 but not exceeding 40 tolas, and 2 annas for every additional 40 tolas; and (2) in the case of parcels exceeding 440 tolas in weight, Rs 3 for a parcel not exceeding 480 tolas in weight and 4 annas for every additional 40 tolas.

Registration fees.—The fee for registration, originally four annas, was reduced to two annas in 1879 for book and pattern packets. The reduction was extended in 1881 to letters and postcards, and from the 1st July 1901 the fee for the registration of a parcel was fixed at a uniform charge of 2 annas.

Official papers.—Until 1866 official correspondence was carried free under an official frank, and the departments were debited with the postage at the ordinary rates. This system was replaced by the use of service stamps for official correspondence, and the rates were reduced. They now stand as follows:—letters not exceeding half a tola—half an anna; above half a tola to 10 tolas—one anna; and one anna for each additional 10 tolas up to 40 tolas; letters above 40 tolas in weight are charged as if they were private letters. The rates for packets and parcels are the ordinary rates for those articles.

Foreign postage.—Before 1892 the rates of postage on letters, postcards, and packets for foreign countries varied with the cost of transit and other considerations; but in that year the elementary union rates of postage were adopted by India for correspondence for all parts of the world, whether within or without the Postal Union. Those rates are—for letters, 2½ annas per half-ounce; for postcards, 1 anna each; for printed papers, half an anna per two ounces; for business papers entirely or partly in manuscript, half an anna per two ounces, subject to a minimum charge of 2½ annas; for samples, half an anna per two ounces, subject to a minimum charge of one anna. On the 25th December 1898 the rate for letters sent from British India to the United Kingdom and to certain British possessions was reduced to one anna for every half-ounce or fraction thereof. This rate now applies to almost all British possessions.

XI—POST OFFICE—concluded

Mail steamer subsidies

The statement below shows the annual subsidies paid under existing contracts for the carriage of mails by steamer on the Indian coasts and rivers and for the maintenance of communication with Ceylon, the Straits, and the Persian Gulf:

Calcutta and Rangoon (three times a week)			
Chittagong, Arakan ports, and Rangoon (weekly)			
Madras and Rangoon (weekly)			
Rangoon and Moulmein (three times a week)			
Rangoon, Tavoy, and Mergui (weekly)			
Moulmein, Yen, Palaw, Tavoy, Mergui, and Bokpyin (fort-nightly)		R	
Bombay and Karachi (weekly)			
" " <i>via</i> the coast ports (weekly)			
Karachi and Basra <i>via</i> the Persian Gulf ports (weekly)		Contract from the 1st	
Tuticorin and Colombo (daily)		May 1904	10,00,000
Additional services between any of the ports served by the above mentioned lines, between any of the ports on the Coromandel Coast and Rangoon, and between Burma and the Straits.			
Karachi and Basra <i>via</i> the principal Persian Gulf ports (weekly)			
Negapatam and the Straits Settlements (fort-nightly)			
Basra-Bagdad		Contract for 10 years, from the 1st May 1904	24,000
Manlalay and Myingyan			
Myingyan and Pakokku			
Prone and Thayetmyo			
Thayetmyo and Pakokku		Contracts with the Local Administration, the postal share of the subsidies being in 1904-05	40,331
Pakokku and Kindat			
Katha and Bano			
Rangoon and Bassein			
Bassein and Henzada			
Small services or postal contribution to local services	37,438
		TOTAL	11,01,769

For the lines of postal communication under contract with the Peninsular and Oriental company an annual subsidy of £340,000 is paid by His Majesty's Government for the combined Eastern and Australian mail services. The Indian share of this subsidy is £70,089.

XII

Banking Capital in India

BANKS OF DEPOSIT, EXCHANGE, AND DISCOUNT

[TABLES 1 AND 2, PAGES 234 TO 236]

(Figures supplied by the Banks)

The statistics indicating the progress of these institutions were collected for the first time in 1900, and were therefore necessarily limited to the banks then in existence and at work. The figures for former years are defective in so far that they do not include the facts relating to banks which had passed out of existence, or ceased to do business in India, before the statistics were first collected. The unavoidable omission of such banks makes the increase of capital in 1901 over the capital in the former years of the series seem larger than it really was, and it is necessary to bear this in mind when drawing inferences from the recorded increase of capital and deposits. The following table states, with possibly some imperfections and omissions, the banks thus excluded:

Banks	Year of establishment	Year of liquidation	Capital in the last year of the Bank's existence
			R
Indian Joint-stock Banks—			
Oudh and United Service Bank, Ltd. (Lucknow)	—	1871	2,00,000
Bank of Calcutta, Ltd.	—	1872	10,00,000
United Bank of India, Ltd. (Simla)	—	1874	5,00,000
Punjab Bank, Ltd. (Rawalpindi)	1862	1877	20,00,000
Simla Banking Corporation, Ltd.	1860 (May 2) *	1887 (March 16)	8,45,000
Uncovenanted Service Bank	1861 (January 31) *	1890-91	6,00,000
Himalaya Bank	1874 (April 27) *	1891-92	2,00,000
Provincial Bank of India (Delhi)	1884 (June 10) *	1893 (October 31)	2,69,500
Mussoorie Savings Bank	1864 (May 31) *	1893 (June 5)	3,00,000
Rohilkhand and Kumaon Bank	1879 (February 15) *	1893 (August 2)	4,00,000
Agra Savings Bank	1862 (March 8) *	1893 (October 23)	1,96,468

* Date of registration of the company

XII—BANKS—*continued*

Banks	Year of establishment	Year of liquidation	Capital in the last year of the Bank's existence
Exchange Banks—			£
Comptoir D'Escompte de Paris	Before 1870	1889	4,000,000
New Oriental Bank	1885	1893	600,540
Agra Bank	1833	1900	600,000
Credit Lyonnais	1896	1900*	20,000
			{ Reserve fund 8,000,000
			{ Reserve fund 2,000,000

[It may be noted that from these tables are excluded the numerous small native money lending and pawnbroking establishments which are registered annually as "banks" under the Indian Companies Act.]

The share capital of the banks, whose head offices are located in India and which are exclusively Indian, increased by 6·3 per cent in the last ten years. Adding to the capital the reserves, in which the increase was much larger than the increase in capital, the increase in both combined was 28·7 per cent in the decade. The capital and reserves of the joint-stock banks, apart from the Presidency Banks, increased in the decade by 50·13 per cent, the increase in capital being 25 per cent and in the reserves 101 per cent. The amount of their capital and reserves at the end of 1904 was a little over ₹14 millions = £944,000.

The deposits in the Indian banks increased by 64·5 per cent in the same period, amounting to ₹363 million (over £24 millions) at the end of 1904. These figures include "public" (that is, Government) deposits in the Presidency Banks. Excluding these, ordinary deposits in the Indian banks in 1904 amounted to ₹332 million (£22,110,000), having increased in the decade at the rate of 7½ per cent. These deposits are to the capital and reserves of the same banks in the ratio of 4 to 1. Excluding the Presidency Banks, as in the preceding paragraph relating to share capital and reserves, the deposits in the joint-stock banks increased in the decade from ₹6·45 millions of rupees to 111·99 millions, being at the rate of 98 per cent.

The deposits in the Indian branches of the exchange banks increased in the ten years ending 1904 by 58·83 per cent.

The extent to which bank deposits have increased in the ten years, and the proportions in which they are lodged in the different classes of banks, are shown in the figures below. These figures exclude Government deposits in the Presidency banks, and, for the exchange banks, are limited to deposits in India:

	1895	1904
Presidency banks ...	13,12,09,847	21,96,66,637
Exchange banks ...	10,80,86,260	16,32,20,328
Other joint-stock banks	5,64,51,355	11,19,91,684
TOTAL ...	29,07,47,462	49,48,78,449

It therefore appears that capital deposited in the banks, and thus made available for the financing of commercial and industrial operations, has increased from 2,907 lakhs to 4,949 lakhs—say from about £19,388,000 to £32,992,000—being at the rate of 70·21 per cent. The deposits in the joint-stock banks have increased in a greater proportion than the deposits in the other classes of banks, but they still represent a comparatively small share of the aggregate deposits in 1904, the relative proportions being: the Presidency banks, 44·39 per cent; the exchange banks, 32·98 per cent; and the joint-stock banks, 22·63 per cent.

XIII

SAVINGS BANKS

[TABLE 1, PAGE 237]

(Compiled from the annual reports on the Post office of India)

Until 1882-83 the savings bank business conducted under Government control was carried on in the three cities of Calcutta, Madras, and Bombay by the Presidency Banks, and elsewhere by the Government treasuries. So long as this system was maintained, the business grew but slowly. The highest balances in the district treasuries never exceeded ₹75,31,300 (in 1884-85), and in the Presidency Banks the highest balances (in 1882-83) amounted to only ₹2,36,36,220.

The establishment of savings banks in the post offices was followed by a rapid change. In the first year of their existence the balances amounted to only ₹27,96,730, but the public soon indicated their preference for business with the post office. By 1886-87 the savings banks in the district treasuries were closed and the balances

* Ceased to do business in India

XIII—SAVINGS BANKS—*continued*

in the post offices amounted to ₹42 millions. During the succeeding years there was a considerable increase, although the Government took steps to prevent it from being inconveniently rapid. For this purpose in 1889-90 the maximum sum receivable was reduced from ₹3,000 to ₹2,000, and in 1894-95 the rate of interest was reduced from 3½ per cent to 3¼ per cent in correspondence with the reduction in the rate of interest on Government securities. In 1893-94 the balances amounted to ₹93 millions; ten years later, in 1902-03, they reached ₹114 millions. Last year the balance of deposits, inclusive of interest, amounted to ₹134 millions or about 9 million pounds sterling.

The Presidency savings banks were maintained until 1895-96, though the deposits in them gradually declined in consequence of the preference given to the post office by the public, and now the whole of the savings bank business of Government is a branch of the postal administration.

The interest allowed on accounts has been as follows: 3½ per cent from 1867-68; 4½ per cent from the 1st January 1880 to the 31st May 1881; 3½ per cent until the end of 1893-94; 3¼ per cent since 1894-95.

The great bulk of the deposits in the savings banks is made by natives of India, the balances of Europeans (and Eurasians) at the end of 1904-05 being ₹1,18,83,001 and those of natives ₹12,21,87,129. The balances held in each of the larger province were:

						1904-05
						₹
Bombay	3,68,80,257
Bengal	3,64,64,991
U. P. of Agra and Oudh	1,62,30,256
Panjab and N.-W. F. Province	1,60,91,108
Madras	1,00,27,810

It is noticeable that in Bombay, with a population which is less than a third of that of Bengal, the deposits are larger than in Bengal. In Bombay the average balance per depositor is ₹180, while in Bengal it is ₹116, the number of depositors being:

						1904-05	
						Europeans	Natives
Bengal	18,364	294,779
Bombay	11,638	193,556

The contrast between Bombay and the other three provinces specified above, especially Madras, is still more marked.

The total number of depositors, both European and native, has greatly increased in the last ten years, but the deposits have not increased in the same proportion, and the average balance per depositor is smaller than in 1895-96, as shown below:

		Europeans		Natives	
		No.	₹	No.	₹
1895-96	...	67,939	230.5	616,884	135.8
1904-05	...	98,980	120.1	959,833	127.3

Of the total number of accounts at the end of the year 1904-05, 90.65 per cent were in the names of natives of the country. The depositors are classed, according to their occupation, as follows:

						No.
1. Professional, fixed income	279,609
variable "	64,984
2. Domestic	187,123
3. Commercial	40,591
4. Agricultural	18,014
5. Industrial	35,766
6. Indefinite or persons of no occupation whose incomes are derived from others or from their own property	432,726

The accounts (1,058,813) in existence at the end of 1904-05, with the amounts deposited, are classified as under:

						No.	₹ (lakhs)
Security deposit accounts	49,224	59.6
Public accounts	8,334	40
Regimental and other conjoint accounts	346	8
Accounts held on behalf of minors	129,941	225.8
Accounts opened and held by depositors on their own behalf	871,868	1,007.8

It will be thus seen that 94.53 per cent of all the accounts, and 91.98 per cent of the total balance of ₹1340.7 lakhs, represent the savings of private persons deposited either for their own benefit or for that of their minor charges.

XIV

PAPER CURRENCY

[TABLES 1 TO 10, PAGES 233 TO 259]

(Compiled from special returns made by the Head Commissioner of Paper Currency)

Under Acts VI of 1839, III of 1840, and IX of 1843, the Presidency Banks of Bengal, Bombay, and Madras were authorised to issue notes payable on demand, but the issue of the notes was practically limited to the three cities of Calcutta, Bombay, and Madras. These Acts were repealed, on the 1st March 1862, by Act XIX of 1861, providing for the issue of a paper currency through a Government Department, by means of notes of the Government of India payable to bearer on demand. Since then no banks have been allowed to issue notes in India.

This Act was replaced first by Act III of 1871 and subsequently by Act XX of 1882. The Act of 1882 was amended by Acts XV of 1890, VIII of 1893, XXI of 1896, II of 1898, VIII of 1900, IX of 1902, and VI of 1903; all these Acts were superseded by Act III of 1905, which is the law now in force.

By the Act of 1882, the Paper Currency was extended to Burma, which province had not been included in the former arrangements.

By Act XV of 1890, the maximum limit of that portion of the reserve held against the note circulation which may be invested in Government securities was raised from sixty millions to eighty millions of rupees.

Act VIII of 1893 gave effect to the decision of the Government of India (1) to close the Indian mints to the unrestricted coinage of silver for the public, and (2) to issue currency notes in exchange for gold coin or bullion to any amount, the law until then having provided only for the issue of notes against silver.

Act XXI of 1896 empowered the Government of India to raise the limit of the reserve which may be invested in Government securities to one hundred millions.

Act II of 1898, which was designed as a temporary measure of relief to a stringent money market, empowered the Governor General in Council to issue currency notes on the security of gold deposited in England. The Act terminated on the 21st July 1900, but the authority given to Government was continued, by Act VIII of 1900, for another two years, this Act also giving the Secretary of State for India power to expend the gold so deposited in the purchase of silver for remittance to India for coinage. The Act of 1900 was continued by Act IX of 1902, and the authority given as a temporary measure was made permanent.

Act VI of 1903, which was designed to increase the circulation of five-rupee notes, declared such notes, when issued from any town outside Burma, to be legal tender throughout British India, except Burma, and authorised their encashment at any office of issue in British India, except Burma.

Act III of 1905 repealed all these Acts and re-enacted their provisions in a consolidated form. It further raised the limit of the invested portion of the reserve from 100 to 120 millions of rupees, and allowed a part of the investment not exceeding 20 millions of rupees to be made in sterling securities.

The Department of Paper Currency.—The function of this department is to issue, without any limits, promissory notes (called currency notes) of the Government of India payable to the bearer on demand, of the denominations of Rs. 10, 20, 50, 100, 500, 1,000, and 10,000, the issue being made in exchange for rupees or half rupees or for gold coin, which is legal tender, from any Paper Currency office or agency and for gold bullion and gold coin from circle offices on the requisition of the Comptroller General.

The circles and offices of issue of the notes, and the territories within which the notes of each circle or sub-circle are legal tender, are as follows:—

Head offices of issue	Subordinate offices of issue	Officers in charge	Circles or geographical limits within which notes are legal tender
Calcutta	...	Head Commissioner of Paper Currency (Comptroller General)	All the territory under the Lieutenant-Governor of Bengal and the Chief Commissioner of Assam
	Allahabad	Deputy Commissioner of Paper Currency	The territory under the Lieutenant-Governor of the United Provinces of Agra and Oudh
	Lahore	Deputy Commissioner of Paper Currency	The territory under the Lieutenant-Governor of the Panjab and the Chief Commissioner of the North-West Frontier Province
Madras	...	Commissioner of Paper Currency (Accountant General, Madras)	All the districts in the Madras Presidency not particularised under Calicut
	Calicut	Deputy Commissioner of Paper Currency	The districts of Malabar, South Canara, Coimbatore, Nilgiris, and Coorg
Bombay	...	Commissioner of Paper Currency (Accountant General, Bombay)	All the districts of the Presidency of Bombay proper and the Central Provinces
Rangoon	Karachi	Deputy Commissioner of Paper Currency	The province of Sind
	...	Commissioner of Paper Currency (Accountant General, Burma)	All the territory under the Lieutenant-Governor of Burma (except the Shan States)

XIV—PAPER CURRENCY—*continued*

Five other subordinate offices, Nagpur, Akola, Trichinopoly, Vizagapatam, and Cocanada, were open for several years, but were closed, the first two and the fifth in 1882, the two others in 1872.

Supply and issue of currency notes.—Currency notes are supplied by the Secretary of State through the Bank of England on an indent from the Head Commissioner. The Head Commissioner or Commissioners supply Deputy Commissioners and Currency Agents with all the notes required for the purposes of the Paper Currency Act. Every such note, other than a five rupee note issued from any town not situate in Burma, bears upon it the name of the place from which it is issued and every note is impressed with the signature of the Head Commissioner or of a Commissioner or Deputy Commissioner.

The officers in charge of the circles of issue are authorised to issue, from the office or offices established in their circles, currency notes in exchange for the amount thereof (1) in rupees or half rupees or in gold coin which is legal tender under the Indian Coinage Act; or in rupees made under the Native Coinage Act, IX of 1876, and (2) on the requisition of the Comptroller General, to all treasuries, in gold coin which is not legal tender under the Coinage Act or gold bullion at the rate of one Government rupee for 7·53344 grains troy of fine gold. Currency notes can also be issued against gold coin or bullion or silver bullion or sterling securities held by the Secretary of State for India in Council.

Notes when legal tender and when payable.—Every note is a legal tender in its own circle (except by Government at the office of issue) for the amount expressed in that note; that is to say, whenever a note forms the integral sum or a portion, of any payment, either to Government on account of a revenue or other claim, or to any body corporate or person in British India, it is a legal tender. Payment of dues to Government can be made in currency notes of any circle; and railway companies may receive notes of any circle in payment of fares and freight, recovering the value of them from Government. Five-rupee notes, issued from any town outside Burma, are legal tender throughout British India except Burma.

Notes of higher denominations than five rupees are payable only at the office or offices of issue of the town from which they have been issued. Notes of subordinate circles are also payable at the office of the Presidency circle to which those sub-offices are subordinate. Five-rupee notes, issued from any town not situate in Burma, are payable at any office of issue not situate in Burma; five rupee notes issued in Burma are payable only in Burma. Beyond this, the law imposes no obligation to pay; but, for the accommodation of the public, notes of other circles are cashed at any Paper Currency office to such extent as the convenience of each office will permit. In ordinary circumstances every Government treasury, of which there are about 250 in British India, cashes or exchanges notes if it can do so without inconvenience; and when this cannot be done conveniently for large sums, small sums can generally be exchanged for travellers.

Reserve.—The whole amount of currency notes in circulation is secured by a reserve of gold and silver coin or bullion and securities of the Government of India or of the United Kingdom. The total amount of such securities is limited to 120 millions of rupees, of which not more than 20 millions of rupees may be in sterling securities. Under the Act of 1882 the maximum limit of the securities was fixed at sixty millions of rupees; but, the issues having largely expanded, the Government of India was empowered by Act XV of 1890 to raise the limit to eighty millions. The power was utilised to raise the invested reserve to seventy millions on the 19th December 1890, and to eighty millions a year later, on the 3rd December 1891. By Notification No. 5366 of the 18th December 1896, the invested reserve was raised to one hundred millions, the power to do so having been given by Act XXI of 1896. Act III of 1905 raised the limit to 120 millions.

The metallic reserve may consist of sovereigns, half sovereigns, rupees and half rupees, and gold and silver bullion, the last-named being valued at the sum spent on the purchase of such bullion. No gold was contained in the reserve between March 1876 and February 1898, and then the quantity increased very slowly until February 1899. In another month the gold reserve was almost doubled, and during the succeeding months of 1899 it increased rapidly. By the end of March 1900 the gold in the reserve in India had risen to £7,500,012, but the Government thereafter took measures to reduce what was considered to be an inconveniently large gold reserve, and at the end of March 1901 the value of the gold reserve had fallen to £5,778,518. In the next three years it again increased, standing at the end of 1901-02 at £7,023,921, at the end of 1902-03 at £9,859,564, and at the end of 1903-04 at £10,789,567. The amount held on the 31st March 1905 was £10,740,139.

The interest accruing on the invested reserve is entered in a separate account, and paid to the credit of the Government of India, under the head "Profits of note circulation." The interest on the one hundred and twenty millions of rupees in the invested reserve represents about ₹38,90,000, the expenditure of the Department being about ₹8,41,000 on the average for the last five years.

XIV—PAPER CURRENCY—concluded

The average monthly circulation of the notes has been, in millions of rupees :

Five years ending 1880-81	129.07
" 1885-86	142.65
" 1890-91	171.87
" 1895-96	282.44
" 1900-01	265.39
For the year 1901-02	300.34
" 1902-03	337.40
" 1903-04	364.09
" 1904-05	392.01

The circulation in each province on the 31st March 1903, 1904, and 1905 was (R) :

	1903	1904	1905
Bengal (including Assam, the United Provinces, the Panjab, and the N.-W. Frontier Province) ...	19,43,31,195	23,57,01,460	31,34,62,630
Bombay ...	10,28,47,945	11,51,74,210	11,58,18,915
Madras ...	4,50,84,390	4,57,24,560	4,50,83,175
Burma ...	1,49,72,540	1,55,16,310	1,74,15,150

The circulation of the different denominations of notes on the 31st March 1886 and 1905 was as follows :

	1886	1905	1886	1905
	₹	₹	₹	₹
5 rupees	26,79,965	54,26,580	100 rupees	3,16,59,900
10 "	2,25,26,670	7,08,40,040	500 "	1,44,51,000
20 "	51,39,940	97,32,900	1,000 "	3,66,49,000
50 "	87,37,250	1,35,08,750	10,000 "	1,93,70,000
				8,23,10,000

Looking back over the twenty years since 1885-86 the relative popularity of each denomination of note may be measured by the increase in its circulation, an exception, however, being made in the case of notes for 10,000 rupees which are chiefly used as a convenient form in which to hold the balances in the Government reserve treasuries. In notes for 5 rupees there is only a comparatively small increase of 102 per cent, while notes for 10 rupees have increased 214 per cent. Notes for 100 rupees have increased 231 per cent. The circulation of notes for 20 rupees has suffered from time to time from a scare brought about by the operations of forgers. It suddenly dropped in 1882-83 to hardly more than half the circulation in the preceding year and did not recover until 1890 ; thereafter there was a gradual increase, but even last year the circulation, though materially larger than in 1882, remained at a much lower level than in the years before 1882. It has been suggested that notes of this denomination are perhaps being displaced by sovereigns, and this may be the case to some extent ; but it is probably as likely that the note is too large for common daily transactions and too small for commercial and banking purposes. Notes for 50 rupees also apparently do not supply any extensive demand, for they have increased by only 55 per cent. Notes for 500 and 1,000 rupees, which are commonly employed in commercial and banking operations, have increased 120 and 100 per cent respectively.

XV

MINT AND COINAGE

[TABLES 1 TO 17, PAGES 260 TO 284]

(Compiled from special returns made by the Masters of the Mints at Calcutta and Bombay)

Gold

The standard for coinage in Bengal was 99½ parts of fine gold and three-quarters of a part of alloy until it was altered by Regulation XIV of 1818 to eleven-twelfths of fine gold and one-twelfth of alloy ; but the law having become inoperative, the old standard was reverted to for a time. Act XVII of 1835 re-established the standard of eleven-twelfths fine, but declared that no gold coin should thenceforward be a legal tender of payment in India.

Act XXIII of 1870 permitted the coinage by Government on the standard of 1835 of the under-mentioned gold coins :

	Fine Gold grains	Alloy grains	Total grains
Double mohur or 30-rupee piece ...	330	30	360
Mohur or 15-rupee piece ...	165	15	180
Two-thirds of a mohur or 10-rupee piece ...	110	10	120
One-third of a mohur or 5-rupee piece ...	55	5	60

Notification No. 3764, dated the 12th December 1870, stopped the coinage of double mohurs.

XV—MINT AND COINAGE—*continued*

By Notification No. 3287, dated the 23th October 1868, sovereigns and half-sovereigns coined at any authorised Royal Mint in England or Australia, of current weight, were receivable in all Government treasuries in payment of sums due to Government as the equivalent of ten rupees and four annas, and of five rupees and two annas, respectively; and, whenever available at any Government treasury, they were payable at the same rates to any person willing to receive them in payment of claims against the Government. The notification, which was a dead letter from the beginning, was superseded and cancelled by the notification mentioned in the next paragraph.

On the 26th June 1893, the Indian mints were closed to the unrestricted coinage of silver for the public in view to the eventual adoption of a gold standard for India. Pending the final adoption by legislation of a gold standard, it was declared, by Notification No. 2662 of the same date, that gold coin and bullion would be received at the mints in exchange for Government rupees at the rate of 7.53344 grains troy of fine gold for one rupee, being equivalent to an exchange of 1s. 4d. the rupee. It was also declared, by another Notification No. 2663 of the same date, that sovereigns and half-sovereigns of current weight coined at any authorised Royal Mint in England or Australia would be received in all treasuries in British India in payment of sums due to Government at the rate of fifteen rupees for each sovereign and seven and a half rupees for each half-sovereign. Under Notification No. 4071, dated the 11th September 1897, such sovereigns and half-sovereigns are receivable at the rates specified at the reserve treasuries at Calcutta, Madras, and Bombay; they are also so receivable at Bangalore.

The full legal weight of sovereigns and half-sovereigns is 133.27447 grains and 61.63723 grains and their least current weight is 122.5 and 61.125 grains respectively, but sovereigns and half-sovereigns which have not lost more than three grains, and have not been illegally dealt with, are received at face value, those which have lost more than three grains being receivable as bullion only.

In pursuance of the decision taken to establish the gold standard in India, Act XXII of 1899, passed on the 15th September 1899, provided that gold coin (sovereigns and half-sovereigns) whether coined at Her Majesty's Royal Mint in England, or at any mint established in pursuance of a Proclamation of Her Majesty as a branch of the Royal Mint, shall be a legal tender in payment or on account at the rate of fifteen rupees for one sovereign; provided that such coins have not been called in or lost weight beyond the limit prescribed as the least current weight.

Silver

On the 31st August 1835, the only rupees of legal tender in British India, within the local limits specified in the regulations prescribing the coinage, were the Bombay, Madras, Farukhabad, Sonat, and sicca rupees.

Act XVII of 1835, which took effect on the 1st September 1835, directed the coinage of a Company's rupee weighing 180 grains, and of a standard fineness of eleven-twelfths, or 165 grains, of fine silver, and one-twelfth, or 15 grains, of alloy; and declared it equivalent to the Bombay, Madras, Farukhabad, and Sonat rupee, and to fifteen-sixteenths of the Calcutta sicca rupee.

Act XIII of 1836 discontinued the sicca rupee as legal tender in discharge of any debt, but permitted its receipt by collectors of land revenue and at all treasuries, by weight, subject to a charge of one per cent for re-coinage.

By Notifications dated the 21st March and the 12th May 1838, the Madras, Bombay, and Farukhabad rupees, and generally the rupees issued from any mint of the British Government that were still a legal tender in any part of India, were declared to be receivable by the Calcutta mint for re-coinage, if of full weight, at their intrinsic par, namely, as equal to Company's rupees, without any charge of seignorage for re-coinage.

Act XXIII of 1870 repealed all former Coinage Acts, but made no change in the weight or fineness of the coin. All rupees and half-rupees coined under Acts XVII of 1835, XIII of 1836, and XXIII of 1870, are legal tender in satisfaction of all engagements (unless clipped, filed defaced, or diminished otherwise than by use) until by gradual wear they have lost more than two per cent of their original weight. Coins which have lost by reasonable wear more than two and not more than 6½ per cent in weight are, when tendered at a treasury, received at their full nominal value, and are immediately cut or broken. Coins which have lost more than 6½ per cent in weight are presumed to have been maltreated.

By Notification No. 2466 of the 7th December 1877, all silver coins coined and issued under the authority of the Government of India before the 1st September 1835 were called in with effect from the 1st June 1878. From that date such coins ceased to be legal tender and were thenceforth only receivable by weight at the treasuries of Government under Section 17 of the Coinage Act of 1870, at one rupee per tola.

In 1896, the Government of India issued orders that silver coins of 1835, received at Treasuries, Currency offices, and Presidency Banks, should not be reissued to the public; and in 1901 and 1902, similar orders were passed for the withdrawal of the rupees of the two issues of 1840. It should be explained that all rupees issued in the years 1840 to 1862 bear the date of 1840.

Four-anna and two-anna pieces are legal tender only for fractions of a rupee. They are allowed to pass current as long as they have lost weight only by fair abrasion, but if they have lost weight from any other cause they are treated as bullion.

XV—MINT AND COINAGE—continued

The weight and fineness of the silver coins struck under Act XXIII of 1870 are the same as were prescribed by Act XVII of 1835, namely:

	FINE SILVER	ALLOY	TOTAL
	grains	grains	grains
Rupee	165	15	180
Half-rupee	82½	7½	90
Quarter-rupee or 4-anna piece	41¼	3¾	45
Eighth of a rupee or 2-anna piece	20½	1¾	22½

One rupee = 165 grains of fine silver
 One shilling = 80½ grains of fine silver
 One rupee = shillings 2·0439*

The expression "Government rupee" in supersession of "Company's rupee," was introduced by Act XIII of 1862. That Act also repealed an inoperative clause of Act XVII of 1835, which had empowered the issue of a double rupee.

By Act IX of 1876 the Government mints may coin money for Native States, such coin being identical in weight and fineness with British Indian coin and legal tender in British India. Only two Native States (Alwar and Bikaner) were supplied with coin minted for them under the Act by the Government of India, and the Act is necessarily now a dead letter.

The Monetary Convention (Act XVII of 1881) made between Great Britain and Portugal in pursuance of Article V of the treaty of commerce and extradition between Her Majesty and the King of Portugal ratified in January 1880, provided for the coinage in the Indian mints for the Portuguese possessions in India of a rupee, half-rupee, quarter-rupee, and eighth of a rupee. They were of the same standard weight and fineness as British Indian coins of the same denominations, and were legal tender throughout British India. British Indian coins were similarly legal tender throughout the Portuguese possessions in India. This Convention terminated on the 4th February 1892, and from that date the coins ceased to be legal tender. The attention of the public was drawn to this fact by Notification No. 2923, dated the 8th July 1893.

As stated under the head "Gold," the Indian mints were closed to the unrestricted coinage of silver for the public from the 26th June 1893, and Act VIII of 1893, passed on that date, repealed Sections 19 to 26 of the Indian Coinage Act of 1870, which provided for the coinage at the mints for the public of gold and silver coins of the Government of India. After 1893 no Government rupees were coined until 1897, when, under arrangements made with the Native States of Bhopal and Kashmir, the currency of those States was replaced by Government rupees. The recoinage of these rupees proceeded through the two years 1897 and 1898. In 1899 there was no coinage of rupees; but in the following year it seemed that coinage was necessary, and it was begun in February 1900, the Government purchasing the silver required, and paying for it mainly with the gold accumulated in the Paper Currency Reserve. In that and the following month a crore of rupees were coined and over 17 crores of rupees in the year ending the 31st March 1901, including the rupees issued in connection with the conversion of the currencies of Native States. From the profit accruing to Government on the coinage it was decided to constitute a separate fund called the Gold Reserve Fund. On the 31st March 1905 the fund amounted, including interest on investments, to £8,523,631, held in Consols, National War Loans Stock, Local Loan Stock, Transvaal Government Guaranteed Stock, and Treasury Bills.

As stated in the preceding paragraph, arrangements were made in 1897 with Bhopal and Kashmir for the conversion of the local currency. These States agreed to cease further coinage and to withdraw their currency substituting Government rupees for the State coinage in circulation. The Government of India agreed to take over all the coin circulating in the States, giving to Bhopal 100 Government rupees for every 12½ Bhopal rupees, and to Kashmir 59 Government rupees for every 100 Chilki rupees and 47½ Government rupees for every 100 Kham rupees. Similar arrangements have since been made with Baroda, Jodhpur, Navanagar, Radhanpur, Kotah, Jhalawar, Indore, Khairpur, Cambay, Sirohi, Dungarpur, Bunsawra, and Partabgarh. These States have introduced the Government coin as the sole legal tender. The rates of exchange given were: Baroda, 100 rupees for 130 Babashahi coins; Jodhpur, 100 rupees for 150 Iktisandas and for 110 Bijeshahis; Navanagar, 100 rupees for 435 Koris; Radhanpur, 100 rupees for 112½ Jorawarsai coins; Kotah, 100 rupees for 114 Kotah rupees; Jhalawar, 100 rupees for 118 Jhalawar rupees; Indore, 100 rupees for 118 Hali rupees; Khairpur, 100 rupees for 140 chalan

* NOTE.—The metallic value in sterling of the 165 grains of fine silver in a rupee is as follows, with the price of silver at the rate stated below per standard ounce:

60 d. = 22·297 d.	26 d. = 9·662 d.
50 d. = 18·581 d.	25 d. = 9·291 d.
40 d. = 14·865 d.	24 d. = 8·918 d.
35 d. = 13·07 d.	23 d. = 8·547 d.
30 d. = 11·149 d.	22 d. = 8·176 d.
29 d. = 10·777 d.	21 d. = 7·804 d.
28 d. = 10·406 d.	20 d. = 7·432 d.
27 d. = 10·034 d.	

IX--MINT AND COINAGE--*concluded*

rupees; Cambay, 100 rupees for 131 Cambay rupees; Sirohi, 100 rupees for 120 Bhilari rupees; Dungarpur, 100 rupees for 136 Chitori rupees or 200 Salim Shahi rupees; and Bunswara and Partabgarh, 100 rupees for 200 Salim Shahi rupees.

By an agreement with certain exchange banks, silver was also received, under the conditions stated in Notifications No. 2457, dated the 25th May 1895, and No. 1736, dated the 10th April 1900, for coinage into British dollars intended for circulation in the colonies of Hongkong and the Straits Settlements. This agreement terminated on the 10th December 1903 and no fresh agreement has been entered into for the coinage of this dollar. Owing to a change in the currency policy of the Government of the Straits Settlements, a new dollar has been introduced there, the coinage of which has been undertaken at the Bombay mint since September 1903.

Copper

The copper coinage was introduced into the Bengal Presidency by Act XVII of 1835, and into the Madras and Bombay Presidencies by Act XXII of 1844.

The weight of the copper coins now struck under Act XXIII of 1870 remains the same as it was in 1835. It is as follows:

	GRAINS TROY		
Double pice, or half-anna	200
Pice or quarter-anna	100
Half pice or one-eighth of an anna	50
Pie, being one-third of a pice or one-twelfth of an anna	33½

Ninety rupees' worth of pice weigh 576,000 grains troy, or 82½ lb avoirdupois.

The two Native States of Alwar and Bikaner, which were supplied with silver coin under the Native Coinage Act, are also supplied with copper coin struck at the Indian mints. Two other States, Dhar and Dewas, which have also ceased to mint copper, are supplied with copper coins struck at the Government mints. Copper coins were also struck for Portuguese India during the continuance of the Monetary Convention before mentioned.

Native Mints

To the tables in this section of the volume one has been added (No. 16), in which the coinage of the mint of the Native States has been set out since 1891. With the fall in the price of silver, which preceded the closure of the Calcutta and Bombay Mints in 1893, there was a very large importation of the metal into India and excessive quantities were coined by some of the Native States during that period and for some years following the closure. It was found, thereafter, that the coinages were greatly in excess of the needs of the States, and operations abated in 1898. The arrangements made with some of the States for the substitution of the British for the local rupee which have been mentioned under the head "Silver" in this summary, had the effect of closing the mints of those States. The only States in which coinage has been carried on to any considerable extent in the last three years are Hyderabad and Udaipur. In other States the total coinage from new silver in 1904 aggregated only 8,382 tolas.

XVI

REGISTERED DEBT

[TABLES 1 TO 13, PAGES 286 TO 313

(Compiled from the Finance and Revenue Accounts of the Government of India and from special official returns)

The registered debt of India consists of rupee loans raised in India and sterling loans raised in England. At the end of 1903-04 the rupee loans, bearing interest, amounted to ₹119,19,94,525 (=£79,466,302) and the sterling debt to £133,008,146. There were also at the end of the year ₹22,43,510 (=£149,901) and £37,698 of the rupee and sterling loans, respectively, not bearing interest, chiefly representing unconverted paper.

When the trading charter of the East India Company expired in 1835, the rupee debt was ₹332·95 millions. Fifteen years later, in 1850-51, the debt reached ₹453·36 millions, and it stood at almost exactly that sum in the year preceding the mutiny of 1857. That convulsion caused a large increase in the rupee debt which stood at ₹635·55 millions in 1859-60, the year following the suppression of the revolt. The debt then gradually rose to ₹697·57 millions by 1874-75, and another large increase occurred in the succeeding decade, due to the great famine of 1877-78 and to the military operations in Afghanistan which followed the famine. By 1883-84 the rupee debt exceeded ₹930 millions. There was then a further increase to ₹980·4 millions in 1887-88, to ₹1,007·48 millions in 1888-89, and to ₹1,052·8 millions in 1893-94. The increase since then to the end of 1903-04 is ₹139·2 millions.

The interest-bearing sterling debt was very small until the mutiny year, but the increase was rapid after that. As in India, the rate of interest on the sterling debt has been gradually reduced from 4, 4½, and 5 per cent to 2½,

XVI.—REGISTERED DEBT—*continued*

3, and 3½ per cent, respectively. The proportions of the debt held at these rates are £11,892,207 at 2½ per cent, £50,135,384 (including 3 per cent India stock of the nominal value of £3,000,000 issued in August 1900, £2,009,500 issued in 1901-02, £1,500,000 issued in May 1902, and £1,500,000 issued in 1903-04) at 3 per cent, and £62,817,689 at 3½ per cent.

A large proportion both of the sterling and of the rupee debt was incurred in connection with the construction of railways and other public works. Considerable additions to the rupee and sterling debt were made in the two years 1896-97 and 1897-98 in consequence of famine, plague, war, and the prosecution of railway extension, and to the sterling debt in 1900 and 1902 for the purchase of the G. I. P. Railway and the discharge of its debentures.

The interest on the rupee debt was at the rate of six per cent in 1822, and the debt bearing this rate was not finally paid off until 1858-59. Meanwhile the Government borrowed, from 1823 until 1852-53 at five per cent, and from 1824 (but in a small way until 1835) at four per cent. The bulk of the five per cent debt was converted to four per cent in 1854, but the shock to the credit of the State caused by the mutiny necessitated more borrowing at the higher rate of five per cent, and that loan was not finally extinguished until 1871. Meanwhile the Government were compelled to borrow at 5½ per cent in 1859, and this 5½ per cent loan was not closed until 1878-79. A small sum was borrowed at 4½ per cent in 1856-57, and the debt at this rate of interest was largely increased in 1871 by the conversion of the 5½ per cent loan. By 1878-79 practically the whole rupee debt bore interest at 4½ and 4 per cent, R151·48 millions at 4½, and R613·33 millions at 4 per cent. The 4½ per cent loans were all converted to 4 per cent by 1893, save for a sum of R10 millions, being a loan from the Maharaja Holkar on account of the Indore State Railway, which is not convertible until about 1970. In the same year a small loan of R35·5 millions was raised at 3½ per cent, and in the following year the bulk of the 4 per cent loans was converted to the rate of 3½ per cent. In 1896-97 a new loan of R40 millions was raised at 3 per cent. On the 4th July 1900 a loan of R30 millions was raised at 3½ per cent, and this was followed by other loans at the same rate of interest of R10 millions on the 14th August 1901, R15 millions on the 9th July 1902, and R20 millions on the 22nd July 1903. At the end of 1903-04 R1,006·5 millions bore interest at 3½ per cent, R110·7 millions at 3 per cent, and R48·9 millions at 4 per cent.

The total interest charge on the rupee debt at the end of 1903-04 was R4,149,065 and on the sterling debt £4,238,273.

Of the rupee debt it is estimated that, including R165·7 millions held in London, R714·1 millions were held by Europeans at the end of 1904 and R508·9 millions by natives, the holdings by natives being 42 per cent of the whole debt. It should be noted, however, that the invested currency reserve is included in the sum held by Europeans. None of the sterling debt is held by natives of India.

XVII

DRAWINGS OF THE HOME GOVERNMENT

[TABLES 1 TO 6, PAGES 314 TO 322]

(Compiled from special official returns)

These tables state the sterling amounts of the annual drawings of the Secretary of State on Calcutta, Bombay, and Madras (the three centres on which Council bills are drawn), and the total sum, with the highest, lowest, and average rate of exchange at which the bills were sold, for each of the three cities. The tables also state the sums borrowed in England annually, and the payments of railway capital into the home treasury, less the withdrawals of such capital for each year, beginning with 1848-49 when such transactions first appeared.

Until 1898-99 the largest proportion of the drawings was always on Calcutta. In that year the drawings on Bombay were slightly larger, representing 45 per cent of the whole drawings, while those on Calcutta represented 43 per cent of the whole. In 1899-1900 the drawings on Calcutta were 58 per cent and Bombay obtained only 26 per cent. In 1900-01 the proportions were 58 and 21, in 1901-02, 52 and 34, in 1902-03, 56 and 28, in 1903-04, 47 and 42, and in 1904-05, 51 and 39 per cent, respectively.

Since 1871-72 the aggregate sterling amount of Council bills, and the sums borrowed in sterling, have been :

	Council Bills	Borrowed
Five years 1871-72 to 1875-76	... 60,766,339	8,728,002
" 1876-77 to 1880-81	... 67,280,306	32,891,974
" 1881-82 to 1885-86	... 75,184,356	21,147,008
" 1886-87 to 1890-91	... 73,201,245	35,544,718
" 1891-92 to 1895-96	... 76,725,897	30,330,000
" 1896-97 to 1900-01	... 78,092,300	44,120,004
For the year 1901-02	... 18,539,071	6,000,500
" 1902-03	... 18,409,947	5,000,000
" 1903-04	... 23,859,303	8,500,000
" 1904-05	... 24,425,558	8,000,000

Much of the borrowing is for capital expenditure on railways, and the expenditure which is met from Council bills is also, to the extent of about 6½ millions annually, on account of railways: it was £0,416,373 in 1901-02, £6,538,723 in 1902-03, £8,590,102 in 1903-04, and £8,809,145 in 1904-05.

XVIII

WAYS AND MEANS OF THE HOME GOVERNMENT

[TABLES 1 AND 2, PAGES 324 TO 326]

(Compiled from the Home Accounts of the Government of India)

In the early years of the period, for which figures are given in the table, the disbursements in London of the East India Company were met to a considerable extent, in addition to bills, by the realisation of commercial assets and by repayments of advances made on goods in India and China. These ways and means gradually declined and became extinct in about 1850. Thereafter Council bills became the principal item in the financing of the Government in England, supplemented by borrowing, by deposits made by railway companies against expenditure in India, and by very occasional resort to remittances in gold or silver from India, the last remittance of silver having been made in 1870-71 and of gold in 1879-80. Such remittances of the precious metals then ceased until 1900-01 when gold was again remitted to the amount of £3,967,362, followed by a remittance of about a million in 1901-02, nearly half a million in 1902-03, and about four millions in each of the years 1903-04 and 1904-05. In the ten years from 1895-96 to 1904-05 the disbursements amounted to £263,731,312, and on the other side Council bills represented £179,080,670 and borrowings £63,629,504 both items totalling £242,710,174.

XIX

SECURITIES ENFACED FOR PAYMENT OF INTEREST IN LONDON

[TABLES 1 TO 3, PAGES 327 TO 329]

(Figures supplied by the Public Debt Office)

The amount of Government promissory notes enfaced for payment of interest in London, retransferred from London to India, and the net amount outstanding in London have been as follows:

		Enfaced	Retransferred	Outstanding
		R	R	R
Five years 1863-1867	...	9,37,48,220	5,54,60,640	15,68,33,770
" 1868-1872	...	16,82,37,660	13,98,89,760	13,52,11,680
" 1873-1877	...	10,19,73,460	9,61,99,930	14,09,84,530
" 1878-1882	...	22,72,92,480	15,67,74,770	21,15,02,240
" 1883-1887	...	9,96,97,960	11,49,15,930	19,63,84,270
" 1888-1892	...	25,12,12,430	18,30,86,790	26,45,10,090
" 1893-1897	...	17,43,68,200	21,91,49,160	22,07,29,120
" 1898-1902	...	13,77,12,600	16,55,40,090	19,29,01,634
For the year 1903	...	88,66,200	2,85,22,400	17,12,45,434
" " 1904	...	80,41,600	1,36,03,700	16,56,80,334

Until 1866 the average amount outstanding annually varied between 64 and 79 millions of rupees, but from that year it rapidly rose from 119 millions to 169 millions in 1870. From 1871 it again declined and until 1877 it stood between 130 and 142 millions of rupees. There was then a rapid increase to 150, 170, and 192 millions in the following three years. In 1881 the amount was about 197 millions. Then followed a slower rate of increase attended with fluctuations which were dependent on fluctuations in the price of silver and in the conditions of the money market, Government promissory notes having become a regular form of remittance and re-transfer by the exchange banks. The amount outstanding rose to 212 millions in 1882 and declined again to about 192 in 1887, rising again by 1889 to 218 millions. Then followed another period of very rapid increase, largely determined by speculative influences. In 1891 and 1892 the amount outstanding at times approximated to 230 millions. Since 1891 there has been a decline, interrupted only by an increase to 260 millions in 1896. The average amount outstanding fell from 182½ millions in 1903 to nearly 169 millions in 1904, and the balance of 165½ millions in December 1904 is the lowest recorded in the last twenty-five years, being approximately the same as in June 1879. It is further noticeable that the amount enfaced for payment of interest in London in 1904, though somewhat larger than in 1903, was lower than in any other year from 1865 onwards, and the amount retransferred to India in the last year was much below the level prevailing from 1873.

XX

PRICES

[TABLES 1 TO 8, PAGES 330 TO 360]

(Compiled from Messrs. Pixley and Abell's annual circular, the Prices Current of the Chambers of Commerce, and from special official returns)

The first table, which is almost entirely a reproduction of a table published annually by Messrs. Pixley and Abell of London, is a record, from the year 1833, of the minimum and maximum prices of standard silver in London

XX—PRICES—*continued*

during each month, the yearly value of silver coined in England, and the imports and exports of silver into and from England. The table also states the annual sum of Council bills and the Bank of England average rate of discount.

There was but little variation in the price of silver until 1872, when the downward tendency set in, the price falling from $60\frac{5}{8}d.$ per ounce to about $50d.$ in ten or eleven years. The price then began again to fall heavily with violent fluctuations, until in August and September 1897, it fell to the lowest point then known, $23\frac{3}{4}d.$ It rose again up to $30\frac{3}{8}d.$ in October 1900, the average for the year being $23\frac{1}{2}d.$ The higher price in 1900 was to a material extent the outcome of the large purchases made by the Government of India for coinage into rupees. The price fluctuated between $29\frac{1}{8}d.$ and $24\frac{1}{8}d.$ in 1901, the average being $27\frac{3}{8}d.$, but towards the end of 1902 the price fell heavily and reached the lowest level yet recorded, namely, $21\frac{1}{4}d.$ in November, the average for the year being $24\frac{1}{8}d.$ In 1903, however, the price began again to rise in consequence of the large purchases made by the Government of India and demands for coinage in other silver-using countries of the East. The highest price in the year was $27\frac{3}{8}d.$ (in November) and the average for the year $24\frac{1}{4}d.$ In 1904, the price fluctuated between $28\frac{1}{8}d.$ and $24\frac{1}{8}d.$, the average being $26\frac{3}{8}d.$, the rise being due to the buying of silver by the Government and the monetary reform in Mexico.

In table No. 2 are stated the prices of standard silver and of bar gold ruling at or about the close of each fortnight since 1862; also the relative values of the two metals in London and India. The mint price in London of gold $\frac{1}{10}$ fine is £3-17-10½ per ounce troy, but as standard silver is $\frac{2}{10}$ fine, the comparative value per ounce of gold $\frac{1}{10}$ fine or £3-18-7 is divided by the market price of an ounce of standard silver and thus the relative value of the two metals is obtained. In India up till June 1893, when the mints were closed to the coinage of silver for the public, the comparison was made between the price of a tola of bar gold and the rupee which itself weighs one tola (180 grains) and contains 165 grains of pure silver. Thus the rupee price of a tola of gold was multiplied by a fraction of which 165 was the numerator and the denominator the number of grains of pure gold per tola of bar gold, that is to say 179.1 up to the close of 1887, when the touch of the bar gold was 99½, and 180 from January 1888, from which month prices were quoted for gold of 100 touch. From the latter half of June 1893, when the mints were closed, the relative values in India have been calculated on the market prices of the two metals at Bombay, excluding 5 per cent import duty levied on silver with effect from the 10th March 1894.

In table No. 3 is stated the course of the price of silver in London and of the rate of exchange in Calcutta since January 1892, the figures representing the average for each half month, and the variations in both are also worked out on the basis of the price of silver, the rate of exchange on the 1st June 1893 being taken as equal to 100.

Table No. 4 states, from the year 1861, the course of exchange on London, the Bank of England rate of discount, the price of sovereigns, and the price per tola of uncoined gold (China leaf of 100 touch) in India; also the Bank of Bengal rates of interest, the price of silver repeated from table No. 1, and the drawings of the Home Government.

Table No. 5 records the course of the price of bar silver in Bombay, inclusive of 5 per cent import duty and the course of exchange between India and China since the closure of the mints.

With the substitution of the gold for the silver standard in the Indian monetary system, the facts presented in these five tables have lost their once absorbing interest and importance, and are now retained in this volume merely as historical data.

The last three tables of the series in this section record the prices of Government securities in Calcutta since 1880-81 and in London since 1864. The prices in Calcutta for years previous to 1880-81 are contained in former volumes, but cannot be reproduced for want of space.

XXI

COTTON MILLS

[TABLES 1 TO 9, PAGES 361 TO 376]

(Compiled from special official returns which, as regards the production of yarn and woven goods, are based on returns made under the Cotton Duties Act, 1896, by the millowners.)

At the end of 1904-05 there were in India 203 cotton mills, containing 47,305 looms and 5,196,432 spindles. Of this number 109 were exclusively spinning mills; 5 were exclusively weaving mills; and in 89 both spinning and weaving were carried on. They employed a daily average number of 196,369 persons: 127,607 men, 37,728 women, 18,784 young persons, and 11,865 children. Five of these 203 mills, with 97,604 spindles and 36 looms, were closed throughout the year.

XXI—COTTON MILLS—*continued*

The nominal capital of the mills, as far as this information has been furnished, is $\text{R}17,57,49,976$, including the sterling capital of $\text{£}1,067,245$, of which $\text{£}904,245$ is paid up; and of the rupee capital $\text{R}13,59,93,884$ is paid up. There are further sterling debentures amounting to $\text{£}30,000$ and rupee debentures to the value of $\text{R}1,81,77,251$ issued by 38 companies. Ten mills also out of thirty-six worked by private proprietary have not reported the capital employed by them, and for these 10 millions of rupees would seem to be a fair estimate. The aggregate of the nominal capital and debentures is thus slightly in excess of 205 millions of rupees, and of this $159\frac{1}{2}$ millions of rupees or $\text{£}10\cdot64$ millions is paid up.

The mills are located as follows :

	Number	Nominal Capital (R)		Number	Nominal Capital (R)
Bombay, city	83	7,69,75,000	Panjab: Lahore	2	18,40,000
" Ahmedabad	33	1,81,93,000	" Amritsar	1	7,00,000
" elsewhere	25	{ 1,27,00,750 }	Central Provinces: Nagpur...	2	61,87,500
		{ £200,000 }	" elsewhere	5	30,10,000
Bengal, all near Calcutta ...	10	{ R1,13,75,000 }	Berar: Badnera	1	5,50,000
		{ £450,000 }	" Akola	1	6,00,000
Madras, city	4	23,98,051	Ajmer-Merwara	1	7,00,000
" elsewhere	7	45,50,000	Rajputana: Kishengarh ...	1	5,00,000
United Provinces of Agra and			Central India: Indore	1	Private
Oudh:			" Ujjain	1	"
Cawnpore	4	72,00,000	Nizam's Territory	3	31,00,000
Agra	3	23,00,000	Mysore: Bangalore	2	13,00,000
Aligarh	1	7,00,000	Travancore: Quilon	1	9,00,000
Mirzapur	1	10,00,000			
Panjab: Delhi	5	28,50,000	French India: Pondichery ...	5	{ R1,12,000 }
					{ £417,245 }

The Bombay Presidency possesses 70 per cent of the mills, 70 per cent of the spindles, and 76 per cent of the looms. In the Native States and French Territory there are 19 mills, with 3,565 looms and 284,050 spindles. Only 36 of the mills are owned otherwise than by joint-stock companies.

The industry dates from 1851, when the first mill was started. In the last twenty years the number of mills has increased by 128 per cent and their working capacity has been proportionately augmented, the number of looms having increased by 193 per cent and of spindles by 138 per cent.

Production of yarn

The total production of yarn in the mills in British India is, as far as reported, (lb) :

	Nos. 1 to 25	Above No. 25	Total
1899-1900	481,009,821	20,675,374	501,685,195
1900-01	315,810,463	27,467,144	342,777,647
1901-02	527,443,637	32,556,211	560,004,848
1902-03	523,565,053	35,246,937	558,812,040
1903-04	515,203,375	40,987,417	556,190,792
1904-05	510,075,140	45,873,286	555,948,426

The great decline in 1900-01 was due partly to the drought in India, which impaired the purchasing power of the people at the same time that it raised the price of the raw material, and partly to the collapse of the markets in China, which after being overstocked with supplies from India and Japan were prevented from operating by the serious disturbances in that country. With the passing away of these causes of depression, and a reduction in the prices of raw cotton following on larger crops, the mills resumed operations with great activity, but in the latter half of 1903-04 the rising price of the raw material, which was in great demand for export, without a corresponding rise in the price of yarn, made profitable business difficult, so that several mills either closed or worked short time. The latter part of the following year, however, saw a complete revolution of the conditions affecting the spinning industry, caused by the fall in the price of raw cotton and the large off-take of the principal markets, so that to meet the forward contracts all the spindles had to be brought into full use and a state of unusual financial prosperity was created.

The spinning of yarn is in a large degree centred in Bombay, the mills of that province producing nearly 76 per cent of the quantity produced in British India. Bengal produced 7 per cent, the United Provinces of Agra and Oudh about 5 per cent, Madras 5 per cent, and the Central Provinces 4·7 per cent. Elsewhere the production is as yet very limited.

A noticeable fact is the continued increase in the production of yarn of counts higher than number 25, which is as much as 46 million lb, being 8 per cent of the whole production. In Bengal, the United Provinces, and the Panjab the mills spin hardly any yarn above number 25, yarn of that count and lower numbers representing 99 per cent of the whole production. In Bombay, however, the spinning of the higher counts (above 25) is 10 per cent of the whole, and in Madras 9 per cent, in the Central Provinces it is 5 per cent. Using Egyptian and other imported cotton, the Bombay mills are now spinning in appreciable quantity yarns of No. 40 and upwards. The production of the finer yarns—Nos. 31 to 40—increased last year to about 17 million pounds from $16\frac{1}{2}$ million lb in 1903-04 and less than $12\frac{1}{2}$ million pounds in the two preceding years.

XXI—COTTON MILLS—concluded

Production of woven goods

The production of woven goods during the last six years has been, (lb) :

		Grey	Other kinds	Total
1899-1900	...	82,028,414	18,291,944	95,320,358
1900-01	...	79,588,046	16,261,544	95,844,590
1901-03	...	96,210,170	19,755,989	115,966,159
1902-03	...	95,645,472	21,633,160	117,278,632
1903-04	...	106,515,125	25,361,102	131,876,227
1904-05	...	124,363,183	28,378,647	152,741,830

The weaving mills were less affected than the spinning mills by the high price of raw cotton in 1903-04, for there was a considerable advance in the price of cloth, both the home and the foreign demand being good, and in the following year these high prices were still realised when the prices of raw cotton had fallen to normal levels. The production therefore increased by about 12½ per cent in 1903-04 and by 15·8 per cent in 1904-05.

Weaving is concentrated in the Bombay mills to an even greater degree than spinning, the mills of that province producing about 86 per cent of the whole quantity woven in British India. Madras and the United Provinces produce about 4 per cent each and the Central Provinces 5 per cent of the whole. The goods woven are mainly grey (unbleached) goods, these representing 81 per cent of the whole production.

The most important kinds of grey goods woven in the mills are specified below (in lb) :

	1902-03	1903-04	1904-05
Shirting and longcloths	...	32,445,119	38,033,248
Dhutis	...	22,150,309	25,540,544
T-cloths, domestics, and sheetings	...	16,767,953	17,470,806
Chadars	...	13,575,818	13,713,078
			13,995,886

The proportion of woven goods other than grey goods was highest in Madras, where last year it was 49 per cent. In the Central Provinces the proportion was 28 per cent and in Bombay 17 per cent.

Production of yarn and woven goods in non-British Indian territory

To the figures given above for mills in British India may be added the production in Bihar prior to the 1st October 1903 and in the Native States which is stated below (in lb). The States are Mysore, Indore, Baroda, Nandgaon, Bhavnagar, Hyderabad, Wadhwan, Quilon, Kishengach, and Ujjain. The production of the five mills in Pondichery has not been reported.

	Yarn			Woven goods		
	Nos. 1 to 25	Above No. 25	Total	Grey	Other kinds	Total

XXII

JUTE MILLS

[TABLES 1 AND 2, PAGES 377 AND 378]

(Compiled from special official returns)

There were 33 jute mills working at the end of 1904-05. Except one at Cawnpore and one at Chittivalsa in the Vizagapatam district, all the mills are in Bengal, most of them being in the vicinity of Calcutta.

The mills employed a daily average number of 133,162 persons and contained 19,991 looms and 409,170 spindles. The nominal capital of such of the mills as are worked by joint-stock companies and two mills privately owned is stated at Rs. 09,30,370, including the sterling capital of £2,233,358 of which £2,223,894 is paid up, and of the rupee capital Rs. 4,23,57,225 is paid up. There were also debentures of £197,853 and Rs. 1,88,92,804, issued by 19 companies. Three of the mills are privately owned. The capital invested in two of them is Rs. 63,75,000, (including the rupee equivalent of the capital of £400,000 belonging to one mill) and one has not reported its capital.

The producing capacity of the mills and the capital employed have nearly doubled in the last decade. The sterling capital has increased by 76 per cent and the rupee capital by 71 per cent,

	1894-96	1904-05
No. of mills	28	38
Capital	£2,72,12,250	4,66,80,000
	£1,297,222	2,288,358
Persons employed	78,114	133,162
Looms	10,169	19,991
Spindles	214,679	409,170

[N. B.—The small jute mill maintained by the Government of Bengal in the Alipore prison, is not included in these tables.]

XXIII

WOOLLEN MILLS

[TABLES 1 AND 2, PAGES 379 AND 380]

(Compiled from special official returns)

There were six mills at work at the close of 1904—one at Cawnpore, one at Dhariwal in the Panjab, three in the city of Bombay, one of which is private property and has not reported its capital, and one at Bangalore—containing 737 looms and 25,931 spindles. The capital employed is also relatively small, amounting for five of the mills to ₹46,25,000, of which Rs. 42,15,400 is paid up. Only two of the mills, those at Cawnpore and Dhariwal, are of importance, the capital of these two concerns (₹32,00,000) representing 69·2 per cent of the whole. These two mills weave cloth for the use of the army and police, and articles of superior quality generally, using for the higher-class goods Australian wool either pure or mixed with Indian wool.

The production of the mills is still small, being valued at less than 37 lakhs in 1904, and no important expansion can be anticipated, as the demand for woollens is relatively small compared with the demand for cotton goods while most of the woollen goods that meet the popular taste can be imported cheaper than they can be produced in the Indian mills. The last two years have seen a great expansion of the imports, of which the value in 1904-05 reached 307½ lakhs. Cheap German goods are coming much into evidence, the imports of woollen piece-goods from Germany in 1904-05 being over 5 millions yards, valued at 37½ lakhs, and 1,820,000 shawls to the value of nearly 47 lakhs.

There are in various places factories for the weaving of carpets and rugs, and of *pattu* and *pashmina*, but though these industries are in the aggregate extensive, they are individually small, and the weaving is done in hand-loom. Hardly any woollen goods are exported except Indian carpets and rugs, the exports of which, as given in the figures appended, are chiefly to the United Kingdom and the United States.

XXIV

PAPER MILLS

[TABLES 1 AND 2, PAGES 381 AND 382]

(Compiled from special official returns)

There are eight paper mills in operation—three in the Bombay Presidency, four in Bengal, and one at Lucknow. Of the eight, two are private concerns in the Bombay Presidency, one of which has stated the capital invested. So far as information is obtainable, the total capital invested, amounts to ₹67,33,000, (of which ₹57,63,000 is paid up), besides ₹11,07,650 debentures, and shows a decrease of 6 lakhs, compared with 1902, owing to the reconstitution of the Imperial Paper Mill at Kanknara as a branch of the Titagarh Paper Mills Company, Limited. Most of the white and blue foolscap and much of the blotting paper, note paper, and envelopes used in the Government Offices is now obtained from the Indian mills. The total quantity of paper made in 1904 was 45 million lb, and its reported value ₹61,49,416. The mills employ 4,266 persons. The capital employed has been doubled in twenty years since 1835, and the production and number of persons employed have increased about four-fold. Two of the larger mills in Bengal have paid no dividends for five years as they have been unable to compete successfully with the cheap woodpulp paper of attractive appearance which is largely imported from Europe.

XXV

BREWERIES

[TABLE 1, PAGE 383]

(Compiled from special official returns)

The quantity of beer brewed in 1904 amounted to 6,219,761 gallons, of which 46 per cent was bought by the Army Commissariat, the remainder being left for consumption by the civil population, or by soldiers independently of the arrangements under the army contracts with the breweries. The average purchases of the

XXV—BREWERIES—*continued*

Commissariat for the last five years have amounted to 2,758,017 gallons yearly, the average production in the same period having been 5,852,791 gallons. The army therefore consumes under contract nearly half the production. The troops also consume a substantial but unknown quantity outside the contract. Perhaps the total consumption by the troops may extend to two-thirds of the production, the remaining third being drunk by the civil population, mainly Europeans residing in and in the vicinity of the hill stations.

There are 27 breweries, of which one at Delhi did not work. All are by private property except six which are owned by five joint-stock companies with nominal capital of Rs24,80,000, of which Rs23,89,110 was paid up at the end of 1904-05. Twelve of the breweries are located at stations in the Himalayas from Murree to Darjeeling, and much of the beer is brewed there. A large quantity is also brewed at Lucknow, Rawalpindi, Poona, Bangalore, Jubbulpore, at and near Ootacamund, and at Quetta and Mandalay. The largest of the breweries is at Murree, the Kasauli and Poona breweries standing next. More than one-third of the whole production is brewed in the Panjab.

The quantity of beer brewed in India and imported compare as follow, in gallons :

	Brewed in India		Imported
1900	4,947,841	1900-01	3,226,534
1901	5,554,453	1901-02	3,673,852
1902	6,474,860	1902-03	3,820,938
1903	6,067,041	1903-04	4,062,016
1904	6,219,761	1904-05	4,603,827

XXVI

COAL MINES

[TABLES 1 TO 3, PAGES 334 TO 391]

(Compiled from special returns made by Commissioners of Divisions for collieries in Bengal, and by local Government and Political Officers for mines in other provinces and states, and checked with the statutory returns of the output and of the labour employed furnished to the Chief Inspector of Mines in India by the Managing Agents of mines regulated by the Indian Mines Act, VIII of 1901).

The divisions of mining properties show considerable changes in Bengal, the number of mines in that province in 1904 being 61 fewer than in 1901, while there was an increase in 1904 of 17 mines in other provinces, mainly owing to small workings started in the Jhelum district of the Panjab. The total number of coal mines in operation in 1904 was 296 (256 in Bengal), compared with 302 (279 in Bengal) in 1903. The production in Bengal in 1904 represents more than six-sevenths of the whole Indian output of coal, which has been as follows in the five years since 1900 (tons) :

1900	...	6,118,692
1901	...	6,635,727
1902	...	7,424,402
1903	...	7,438,386
1904	...	8,216,706

The output was distributed as follows in the last two years (tons) :

	1903	1904
Bengal	6,361,212	7,069,680
Singareni (Nizam's Territory)	362,733	419,546
Assam (Makum)	239,328	266,765
Central Provinces	159,154	139,027
Central India (Umaria)	193,277	185,774
Panjab	43,704	45,594
Baluchistan	46,909	49,867
Upper Burma	9,306	1,106
Bikaner	21,764	45,078
Kashmir (Jammu)	999	270

The output has increased every year for the last nineteen years, *i.e.*, from 1,294,221 tons in 1885 to 8,216,706 tons in 1904. Dullness of trade caused a very small increase in 1903, but there was a better demand in 1904, and the quantity raised was larger by 778,320 tons or 10.5 per cent. Production has declined in the Warora and Umaria collieries (in the Central Provinces and Central India) and in Burma, but has risen elsewhere, nearly 90 per cent of the rise being in Bengal. The two principal fields of Raneegunj and Jherria, especially the latter, have largely increased their output and the new Palamau field has improved its yield by 50 per cent, but in the Giridih field which ranks next to Jherria, the production was almost stationary. The exports of coal from Calcutta in 1904-05

XXVI—COAL MINES—*continued*

amounted to 2,375,977 tons, about three-fourths of this being loaded into coasting vessels; and including 770,539 tons of bunker coal shipped for use on steamers engaged in the foreign and coasting trade, 3,146,566 tons of coal left the port, or nearly 45 per cent, of the output of Bengal collieries in 1904.

The output of each coal-field in Bengal was as stated below (tons):

	1903	1904
Raneegonj	3,066,720	3,350,257
Jherria	2,493,729	2,849,504
Girdih	766,871	773,128
Palamau	33,557	50,517
Kajmahal	335	274

The first mine was opened in Bengal as far back as 1820, but it was the only mine at work for twenty years. Thereafter there was hardly any further progress until the construction of railways began and the East Indian Railway passed through the coal-fields, about 1854. There was, however, not much development, beyond the supply of the needs of the railway line and of river steamers, until the construction of numerous mills and factories which almost as much in Western India as in Calcutta and the neighbourhood, now depend principally on Bengal coal for fuel.

The average number of persons working in and about the mines in 1904 was 92,740, of whom 64,084 were adult males, 25,010 adult females, and 3,643 children under 12 years of age. The number of workers underground was 64,969, and on the surface 27,771. The industry, however, gives employment to a larger number of persons than is shown by these figures, which represent by an average the number that would have been continuously employed and thus take no account of those out of work. If the returns of employment are reliable, the following statement of the number of tons raised per person employed shows that labour has become more efficient during the last two years than formerly:

	All persons employed	Persons employed below ground
1901	69.8	101
1902	75.5	108.8
1903	84	128.7
1904	88.6	126.5

The capital (paid-up) invested by joint-stock companies amounts to ₹255 lakhs, including ₹3.5 lakhs of debentures, and there is also a large, but unknown, investment of capital by private mine owners and by the State. The companies which work coal in Bengal are 46 in number, but most of them are very small concerns, as only twenty-one have a capital of five lakhs or more. The yield from the mines worked by companies was, however, over 89 per cent of the aggregate output of the province, amounting to 6,267,733 tons, the output from the mines worked by private proprietary being 795,947 tons.

The steady demand did not improve prices which were kept by competition at a very low level, often giving a bare margin of profit. The prices of Bengal coal (Jherria best, loaded into waggons) has been as follows in the last four years:

1902 { January	₹3½ per ton	1904 { January	₹3½ per ton
... July	3¼ "	... July	3¼ "
1903 { January	3¼ "	1905 January	3¼ "
... July	3¼ "			

The exports of Indian coal to places beyond India were greater in 1904-05 than in any previous year, but they are still comparatively small and the trade does not give promise of great development, for both the field and the amount of consumption are limited by the competition of English coal in one direction and of cheap Australian and Japanese coal in the opposite direction. The chief customer for Indian coal is Ceylon, which with the Straits Settlements took 83 per cent of the total exports in 1904-05. The quantities exported during the last three years have been (tons):

	1902-03	1903-04	1904-05
To Ceylon	274,473	257,251	374,754
„ Straits	89,592	142,256	143,729
„ Mauritius	14,700	8,802	13,413
„ Aden	21,214	43,410	14,598
„ Sumatra	14,655	13,975	30,802
„ Other countries	16,918	27,876	17,536
TOTAL	431,552	493,070	594,832

Although India is in a position to supply all her own wants in fuel, the imports of foreign coal are still considerable and amounted in 1904-05 to 252,393 tons imported as merobandise and 22,812 tons as Government stores, this, however, being little more than one-third of the quantity imported ten years previously. Nearly three-eighths of the private imports and the whole of the Government imports were English coal, mostly landed in Bombay, the remainder coming from Australia (10,746 tons) and Japan (55,413 tons). The quantity imported

XXVI—COAL MINES—*concluded*

was 40 per cent greater than in 1903-04 as the British coal trade was depressed and the freights for Welsh coal to Bombay and Karachi fell as low as 6s. a ton owing to the remunerative freights for produce obtainable for the return journey. There was a notable increase of imports from Japan, also due to the cheap freights charged by returning colliers which had carried Welsh coal to Japan.

The railways in India take a large share of the coal produced in the country, the consumption having risen steadily from 1,119,621 tons in 1895 to 2,447,341 tons in 1904, or about 29 per cent of the total output in 1904, while in that year they burnt only 17,482 tons of imported coal.

XXVII

MINERAL PRODUCTION

[TABLES 1 TO 6, PAGES 392 TO 398]

(Compiled from special official returns)

The minerals for which figures are recorded in these tables are those comprised in Group I of the minerals dealt with in the Records of the Geological Survey of India.

Salt.—Statistics are supplied annually by all Local Governments and Administrations. The production averages about a million tons annually. The largest proportion is sea salt made on the coast in Sind, Bombay, Madras, Burma, and Aden. The quantity so made on the Indian coasts in 1904 represented more than two-thirds of the whole production.

[For full details of the system of administration of the salt revenue and the duty levied on salt, see pages *xxi* to *xxviii* of this Volume.]

Coal.—The figures are compiled from special returns made by the Commissioners of Divisions for collieries in Bengal, and by Local Governments and Political officers for mines in other provinces and states. The field in which the greatest development has occurred is Raneeganj, in which the collieries are from 120 to 140 miles only from Calcutta, the port for distribution along the Indian coast and to Ceylon. Jherria, some 40 miles further from the port, is, however, being developed, and is rapidly overtaking Raneeganj as a producer. The coal in these fields occurs mainly in two series of strata—a younger and upper series, known as the Raneeganj series, which yields two-thirds of the coal raised in the Raneeganj field, and an older set of beds known as the Barakar series, which are the only ones being worked in the Jherria field, and the only ones which exist in the Giridih field. It is found that the coal from the Barakar series invariably contains a smaller proportion of moisture than that obtained from the Raneeganj series, whilst it has on an average a higher percentage of fixed carbon with less volatile hydrocarbons.

The coal which is now being largely worked in Assam is much younger in age than that mined in Bengal, and is very different in chemical composition. The Assam coal has often a remarkably low percentage of ash, but generally with a considerable quantity of moisture. Much of it has a high calorific value and forms an excellent coke for metallurgical purposes. The principal mining operations are being conducted in the Makum area, where the output in 1904 reached 236,765 tons, but the coal-bearing tertiary rocks stretch for a considerable distance, and in most places yield petroleum as well as coal.

Prospecting operations have been carried on in the Chindwara district, where the coal, if found to be satisfactory, will be well situated to meet the demands of the mill industries on the line of rail to Bombay. Developments have gone on also in connection with the lignite of Bikaner, where attempts are being made to manufacture briquettes. The coal-mining industry in this State, which commenced in 1898, has grown steadily year by year, though the output last year was only 45,078 tons. In Burma good coal has been reported by the Geological Survey on the Upper Chindwin river and near the new Mandalay-Lashio railway extension in the Northern Shan States.

[For further particulars of the local mining industry and details of trade and consumption, see pages *lvii* to *lviii* of this Volume.]

Gold.—The Governments of Mysore and Hyderabad furnish returns of the output of the mines in those states, which are forwarded by the Residents to the office of the Director General of Commercial Intelligence. The Governments of the Panjab, the United Provinces, and Burma include the production of gold in their annual statements of mineral production.

Besides the steady rise in output from Kolar, where the gold-mining industry has gradually expanded since 1885, and during the past year reached an output of over 600,000 ounces, work has commenced in the Nizam's dominions, and in 1904, 10,559 ounces of gold were raised. A certain amount of washing for gold is carried on in the rivers of the Panjab, Chota Nagpur, the United Provinces (Bijnor), and Burma. Dredging operations with promising results have commenced in the upper reaches of the Irawadi river. The reef in the Katha District, where mining had been carried on for several years, was abandoned in 1903.

XXVII—MINERAL PRODUCTION—*continued*

Petroleum.—Returns of actual production are received from the Local Governments of Burma, Assam, and the Panjab. The Panjab shews but a small increase in output compared with the remarkable development which has taken place in Burma, where the quantity produced has increased nearly ten fold in ten years. The principal oil fields in Burma are at Yenangyaung in the Magwe district, Yenangyat in the Pakokku district and the new field at Singu in the Myingyan district. The production of these fields in 1903 and 1904 was as follows:

	1903 Gallons	1904 Gallons
Yenangyaung	56,920,662	73,428,960
Yenangyat	22,665,518	18,660,485
Singu	5,617,381	23,877,450

The production of Indian petroleum is not yet sufficient to meet the home demand, and 76,190,067 gallons of foreign kerosene were imported in 1904-05. The exports of the products of petroleum from Burma to foreign countries in the last three years have been as follows:

	1902-03	1903-04	1904-05
Kerosene oil	gallons 2,080	743,892	3,696,348
Other kinds of mineral oil	" 19,320	25,188	163,865
Paraffin wax	cwt. 49,663	34,617	44,269

Chromite.—The exploitation of the chromite deposits in Baluchistan, which were discovered by the Geological Survey of India in 1901, was begun in 1903. At present the ore is raised entirely for export.

Diamonds.—The figures given in the table represent the production of mines in the Vindhyan belt, which stretches through the Central Indian States of Panna, Charkhari, Ajaigarh, and Bijawar.

Graphite.—The mining for graphite still continues in the Travancore State, where the mineral occurs under geological conditions similar to those of the richer deposits being worked in Ceylon. Attempts to raise the mineral in other areas have not passed beyond the prospecting stage.

Iron-ore.—The iron ore raised in Bengal amounts to 88 per cent of the reported total for India. Elsewhere in India operations are carried on on a very small scale. The value reported for the ore raised in Bengal works out to an average of Rs 4 per ton. Elsewhere the ore is of higher quality and is raised at places distant from the railway and the ports. The reported values are therefore higher, and an average value of Rs 4 per ton has been adopted in the tables for all ore raised outside Bengal.

Jadestone.—The substance which passes as jadestone is mainly the mineral jadeite, which occurs with serpentine in an altered igneous rock in the Myitkyina district of Upper Burma. It is worked in an unadministered tract, and there are no reliable figures of production. The figures given in the tables are those of the exports by sea from Rangoon, together with the exports overland to China.

Magnetite.—It is only worked in the Chalk Hills near Salem in the Madras Presidency.

Manganese ore.—This industry commenced little more than 10 years ago by quarrying in the deposits in the Vizianagram State, and from an output of 3,130 tons in 1893, the production rose rapidly to 92,458 tons in 1900, when the richer deposits in the Central Provinces were also attacked, and are now yielding a larger quantity of ore than the Vizianagram mines. In 1903 the total output for India reached a record of 171,806 tons, which places India amongst the first two of the countries producing high-grade manganese ore. In 1904 however the rapid and continuous rise in production was checked, the total output falling to 150,297 tons. The reason for this was the low market prices which prevailed in 1903 and 1904. The ore raised in the Central Provinces is of a very high grade, ranging from 51 to 54 per cent of the metal, and in consequence of its high quality is able to pay the heavy tax of freight over 500 miles of railway, besides the shipment charges to Europe and America, for the whole of the ore is exported to be used principally in steel manufacture in Great Britain, Germany, and the United States.

By far the largest proportion of ore is raised in the Nagpur district, though work has been begun in the districts of Bhandara and Balaghat, whilst prospecting operations are in progress in the Chhatisgarh district, in the Jhabua State in Central India, and a few other places, besides Vizianagram where mining still continues. The work hitherto has been little more than quarrying, and no approach to exhaustion can be said to have occurred in the chief deposits, which, however, are being worked for the highest grade of ore only. In the Nagpur area and in Vizianagram the ore occurs as lenses in the gneisses and schists, attaining a length in one case of 6 miles, and thicknesses, in the case of pure ore-bodies, of over 100 feet. Layers of nodules also occur as the result of the removal of crystalline limestone through which the nodules were originally disseminated. In the Jubbulpur district the ore is of a lower grade, and is generally a manganese limonite formed by the alteration and concentration of the manganese in the hematites which occur as constituents of the Dharwar (Archæan) schists. The most prominent, and sometimes the only, mineral in the purest ore-bodies is braunite, which is often accompanied by psilomelane. In parts of the Deccan plateau manganese ore occurs as nodules formed by concentration of the oxide in the decomposition products of the great basaltic lava-flows.

XXVII--MINERAL PRODUCTION--*concluded*

Mica.—The figures given in the tables represent only the quantity and value of mica exported from British India. There are no statistics of production available. The mica mining trade shows no serious change in either direction, and India still retains the lead amongst the producers of the mineral. The exports by weight fell from 21,543 cwt in 1903-04 to 19,575 cwt in 1904-05, whilst the value rose from R12,94,453 to R14,63,936. The centres of production are still in the Nellore district in the South and a belt of pegmatites near the borders of the Hazaribagh, Gaya, and Monghyr districts in Bengal. Little or no work has been done in the other areas where the mineral is known to occur in plates of marketable size and quality. Of places, where work has been attempted, may be mentioned the Kishengarh State and the Ruby Mines district in Upper Burma, whilst prospecting has been tried in Coimbatore, Godavari, and Karnul.

Rubies.—The figures in the tables represent the quantity and value of the rubies raised by the Burma Ruby Mines, Ltd., in the Ruby Mines district of Upper Burma. There are no statistics available of the quantity and value of rubies raised by native miners in the district. Rubies are also found in the Mandalay and Myitkyina districts, but the production is on a very small scale.

Saltpetre.—This article, which is largely produced for export, was in former years of much greater importance than now, the diminished demand for gunpowder and the preservation of food, with the competition of the nitrates, having operated to prevent an expansion of the exports. It is most largely produced in Bihar, whence the article is sent to Calcutta for export after refinement. The average production in Bengal, that is, in Bihar, is stated to amount to only about 294,383 cwt, but this greatly understates the production, for the average annual exports of refined saltpetre from Calcutta in the last five years have amounted to 364,957 cwt and this represents a much larger quantity of crude saltpetre.

Tin-ore.—Tin-washing is carried on on a small scale in the Tenasserim Peninsula, and also in the Bawlake State of Karenni.

XXVIII

SUNDRY INDUSTRIES

(NOT MENTIONED IN THE PRECEDING PARTS)

[TABLES 1 and 2, PAGES 399 TO 405]

(Compiled from special official returns)

The statistics are incomplete even as regards large industries which ought to find a place in the tables, and the figures given are sometimes of doubtful accuracy. Domestic industries are excluded, even though, like weaving, they may give employment in the aggregate to a very large number of persons. From 1901 no returns have been made for any factory or establishment which employs an average of less than 25 persons throughout the year or the working season, and from 1902 the returns from the Bombay Presidency exclude all establishments with an average of less than 50 persons as this is the limit which makes a factory liable to inspection under the Indian Factories Act. It is intended that this anomaly shall be removed in the next issue. The tabulated results of the returns from 1901 are therefore not comparable with the figures of previous years, published in earlier editions of this volume, when each reporting officer exercised his own discretion as to what constituted a "large" industry.

Taking the headings in alphabetical order, the table includes:

Bone-crushing mills.—Six in number. The bones crushed in these and other smaller mills are largely exported as manure, the quantities during the last three years ranging from 63,000 to 100,000 tons.

Cotton spinning and weaving establishments, not classed as mills.—Thirty-nine are mentioned, thirty in Bengal and five are in the Madras Presidency, but there are several smaller establishments, and spinning and weaving by hand are carried on as a domestic industry throughout India.

Dye works.—Five are entered, four in the Bombay Presidency and one in Burma. This industry is extensively carried on in Bombay and in all other provinces, but most of the works are individually small and the processes primitive. Dye works are now in operation in Bombay, Madras, and the Central Provinces as adjuncts to cotton mills, where dyeing is conducted in accordance with modern processes.

Flour mills.—There are 42 of these, but the statement is defective.

Hemp mills.—One is entered, which is at Coorla (Bombay) for extracting and preparing the fibre of the agave.

XXVIII—SUNDRY INDUSTRIES—*continued*

- Ice factories.*—These are numerous, but only nine produce on a large scale.
- Indigo factories.*—There are many in Bengal and the United Provinces, all owned as private concerns, except four, — two in Bengal and two in the United Provinces, which are managed on the joint-stock principle with limited liability. Many are owned and worked by natives, but these are small factories. In the Madras Presidency also there are many small factories. The table must be taken more as an indication of the extent of the industry than as a complete record.
- Iron and brass foundries.*—These are numerous and scattered all over the country, but there are not many large foundries.
- Lac factories.*—There are 36 of these in the United Provinces, all at Mirzapur. The number in Bengal is not fully stated; they are numerous, and, excepting the factory at Cossipore near Calcutta, in most cases small.
- Mineral and aerated water factories.*—There are eleven large factories, besides numerous petty factories which are scattered over every province.
- Oil mills.*—The information is incomplete. The expression of oil is largely carried on in various places though the mills in most cases are small. In many cases flour is ground in the mills where oil is expressed.
- Potteries.*—This head includes the extensive potteries at Raniganj and Jubbulpore belonging to Messrs. Burn & Co. of Calcutta, where piping, tiles, and other large articles are made in considerable quantity. The industry is widespread all over India, and is increasing. Art pottery is produced in Bombay and other places, and native works turn out at Delhi, Multan, Aligarh, and elsewhere, ornamental ware for which there is a demand, principally by Europeans, but the production is not on a large scale.
- Printing Presses.*—The reports are defective. The number of registered presses, large and small at work during 1903-04, was 2,139.
- Rice mills.*—There are 114 in Burma and many elsewhere, but the industry is unimportant, except in Burma, where large capital has been sunk in the mills.
- Rope works.*—Nineteen are entered. The works near Calcutta are owned and managed by Europeans and produce rope and cordage fit for marine and other uses. Native rope works are very common, but they are small and the rope is inferior.
- Saltpetre refineries.*—There are a great many of these worked by natives on a very small scale in Madras and Bihár, but only 15 are of any importance, namely, 5 in Bihár, 8 in the Panjab, and 2 in the United Provinces.
- Silk mills.*—There are two large mills at Bombay and one at Calcutta producing fabrics which are mainly intended for Burmese consumption. Various silk-weaving factories exist in Bengal, which to a large extent weave tasar silk. These are owned and managed by natives, and do not employ European machinery and apparatus.
- Soap factories.*—Four are reported, of which two belong to the North-Western Soap Company, which has its head-quarters at Meerut and a branch at Calcutta and makes very good toilet soaps. There are many small native soap works in Bengal and other provinces, but the soap manufactured is crude and fit only for rough work.
- Sugar factories.*—Madras has six sugar factories. Bengal has nineteen, but only two of these are important, namely, the Cossipore factory with a capital of ₹10,00,000 and the refinery erected in Bihár with the most modern machinery by the India Development Company, Limited, (nominal capital £500,000). The United Provinces have the Rosa factory at Shahjahanpur, with a capital of ₹16,00,000, and a smaller one at Cawnpore with a capital of ₹10,00,000. The remaining factory entered in the tables is at Gurdaspur in the Panjab.
- Tanneries.*—Thirty-five are reported, of which thirty-two are in Madras. Cawnpore is the centre of the leather industry, and contains besides a large Government factory the extensive Army Boot and Equipment factory of Messrs. Cooper Allen and Co., the Wense Tannery and Equipment factory, and the North-West Tannery Co. The Western India Army Boot and Equipment factory at Bombay is also important.
- Timber mills.*—There are 94 altogether, the majority of them in Burma, where the industry is of considerable importance.
- Tobacco farms and factories.*—The cigar making industry in Southern India, where there are said to be thirteen large and several smaller factories, has assumed large proportions.
- Woolen carpet weaving establishments.*—Eleven are reported from the Panjab, one from the United Provinces, and one from Rajputana, where carpets are manufactured, but there are other smaller establishments elsewhere not reported.

XXIX

JOINT-STOCK COMPANIES

[TABLES 1 TO 7, PAGES 406 TO 417]

(Compiled from the provincial reports on the working of the Indian Companies Act, VI of 1882, the annual lists of joint-stock companies furnished by the Registrars, and special returns of companies with sterling capital received from the managers or agents and the Railway Board)

Table Nos. 1 to 6 relate exclusively to joint-stock companies registered in India under the Indian Companies Act, VI of 1882. They do not include the numerous and large companies with sterling capital carrying on business in India but registered in England and having their head offices there. Those companies with sterling capital which work exclusively or almost so in India, are shown in table No. 7. All the Companies registered in India have a rupee capital with the exception of the Hongkong and Shanghai Banking Corporation which was registered in Calcutta in 1869 with a capital in Hongkong dollars of which the rupee equivalent is stated.

The total number of companies, which have been registered in India under the law from the time it was passed, amounts to 4,342. Of these, 1,550 were working at the end of 1904-05, most of the others having been either wound up or otherwise discontinued or never having commenced business, so that about 64 per cent of the companies started have been failures. The companies that have ceased to work include a number of speculative gold-mining companies formed in Bengal some years ago and a considerable number of "provident" associations formed in the last few years in the same province. Some companies have also been taken off the Indian register, to be reconstructed as companies under the English law with their head offices in London.

In 1904-05 there was a net increase of 62 in the number of companies, of ₹2,17,95,956 in the nominal capital, and of ₹1,53,57,625 in the paid-up capital. The nominal capital of 41 companies was increased by ₹93,16,669, and the paid-up capital of 470 companies by ₹1,93,73,126. The nominal capital of 4 companies was reduced by ₹15,25,250 and the paid-up capital of 83 companies by ₹17,17,498, as shown under—

	No. of Cos	CAPITAL (₹), INCREASE		No. of Cos	CAPITAL (₹), DECREASE	
		Nominal	Paid-up		Nominal	Paid-up
Eurma	9	2,12,600	13,67,667	2	...	4,642
Assam	4	...	4,645
Bengal	70	58,11,700	99,28,109	4	12,50,250	8,13,006
United Provinces	20	2,20,000	10,17,648	1	...	69,000
Ajmer-Merwara	2	...	46,766
Punjab	29	9,00,000	13,21,077
Bombay	45	...	29,74,936	6	2,75,000	4,60,618
Central Provinces and Berar	8	3,36,420	52,593
Madras	281	18,36,949	25,28,806	33	...	2,71,171
Mysore	12	...	1,81,780	87	...	69,061
TOTAL	450	93,16,669	1,93,73,126	83	15,25,250	17,17,498

141 new companies with a nominal and paid-up capital of ₹3,56,47,179 and ₹67,41,711, respectively, were registered, and 79 companies with a nominal and paid-up capital of ₹1,91,11,740 and ₹95,07,812, respectively, ceased to work during the year.

At the close of 1904-05 the companies at work had a paid-up capital of ₹40,27,24,338; this was more by ₹1,53,57,625 than that of the preceding year. There has been an increase of 38.3 per cent in the paid-up capital in the last ten years.

About 80 per cent of the capital invested in joint-stock enterprises is concentrated in companies registered in Bengal and Bombay. Bengal has ₹16,61,32,595, being 41.3 per cent, and Bombay ₹15,59,13,541, being 38.7 per cent, of the whole. Thereafter, but a long way behind, comes Madras, with a capital of ₹3,32,37,981, being 8.2 per cent of the whole.

Nearly half—about ₹19,50,00,000—of the aggregate capital is invested in mills and presses, chiefly for working or pressing cotton, jute, wool, and silk. This capital has increased 43 per cent in the last ten years. A great number of the mills and presses are registered in Bombay, that presidency representing 55.5 per cent of this sum, most of it invested in cotton mills and presses. Mills and presses (mainly jute) registered in Bengal represent but little less than half of the capital invested in mills and presses in Bombay.

Trading companies account for nearly ₹3,35,00,000, of which not much less than half (₹3,35,00,000 or 40 per cent) is invested in railways and tramways. The companies for the working of these lines are mainly the creation of the last ten years.

In tea, coffee, and other plantations, over ₹3,60,00,000 are invested, of which nearly 93 per cent is held in Bengal, most of the tea companies being registered in Calcutta. The capital invested in tea (₹3,42,00,000)

XXIX—JOINT STOCK COMPANIES—*continued*

appears to have decreased by about 3 per cent in the last decade, but the decline is only in the rupee capital and represents the transfer of head offices and share registers to London. The rupee capital is about one-fourth of the sterling capital invested in this industry.

Banking, loan, and insurance companies account for ₹4,22,00,000, of which 47 per cent is in companies registered in Bengal and 33 per cent in Madras. The capital of banking and loan companies has increased by about 9 per cent in the last ten years. It includes ₹73,93,000, being the capital of the seven joint-stock banks shown in table No. 1, and ₹1,38,28,293 for the Hongkong and Shanghai Bank in table No. 2, of Section XII—Banks, of the volume.

The capital of mining and quarrying companies is nearly ₹2,84,00,000, of which 82 per cent is invested in companies registered in Bengal, most of it representing capital invested in coal mines. The capital invested in coal companies has increased by 141 per cent in the decade.

The average capital of each company is highest in Bombay, where it amounts to ₹4,55,888, the average of Bengal being ₹3,37,255. The average of the 468 companies registered in Madras is only ₹71,021, the reason being found in the extremely large application of the Companies Act to the business of small money lenders, for no less than 356 out of the 519 "banking and loan" companies in all India are registered in Madras with a paid-up capital of ₹1,37,03,522.

It should be noted that the capital stated above represents share capital only, while several companies have issued debentures, the total value of which at the close of the half-year ending June 1905 amounted to ₹5,32,00,000, of which ₹3,21,00,000 belongs to Bengal, ₹1,43,00,000 to Bombay, and ₹5,00,000 to Madras. The value of cotton mill debentures was ₹1,93,77,251, and of jute mill debentures ₹2,18,60,674.

There were 223 companies limited by guarantee at the close of the year 1903-04. Of these, 7 ceased to work and 81 new companies were registered during the year 1904-05, giving a net total of 297 companies at work on the 31st March 1905.

The fees realised during 1904-05 were ₹54,429 and the expenditure was ₹3,971.

A new table No. 7 has been annexed, shewing the number, description, and capital of companies which are registered elsewhere than in India, but which carry on work exclusively, or nearly so, in India with sterling capital. The list has been made complete, as far as practicable, and the total number of such companies is 152 and the paid-up capital amounts to £65,028,003, besides £24,916,899 as debentures. The Railways represent £42,884,303 paid-up capital and £23,128,300 debentures. Of the rest the sterling share capital invested in the tea industry is £9,814,249, in Jute mills £2,223,894, in cotton mills £904,245, and in rice mills £824,535. The gold fields in Southern India are mostly worked by companies formed in London, the paid-up sterling capital being £2,362,452.

XXX

FOREIGN TRADE AND SHIPPING

[TABLES 1 TO 23, PAGES 418 TO 469]

(Compiled from special official returns)

These tables which include imports and exports on account of the Government exhibit, for various periods extending in many cases back to 1834-35, the progress of the foreign sea-borne trade of India generally, and of each province separately, in the principal articles of trade, and with the principal foreign countries; also the progress of shipping. They thus supplement the annual accounts of the foreign trade which exhibit the progress of the trade for only five years. The average rate of increase in the trade (merchandise and treasure) during the last forty-four years is stated below:

	Annual Average			Ratio of increase		
	Imports	Exports	Total trade	Imports	Exports	Total trade
	₹	₹	₹			
1861-62 to 1865-66	47,23,85,486	57,99,87,894	105,23,73,380	39.73	95.44	65.77
1866-67 to 1870-71	45,53,98,284	52,45,31,848	97,99,30,132	—3.6	—9.56	—6.88
1871-72 to 1875-76	41,65,29,543	59,28,41,158	100,93,70,701	—8.54	13.02	3
1876-77 to 1880-81	53,49,60,241	68,53,30,815	122,02,91,056	28.43	15.6	20.9
1881-82 to 1885-86	66,97,34,540	85,39,94,400	152,37,28,940	25.9	24.61	24.27
1886-87 to 1890-91	83,10,26,823	97,77,80,075	180,88,06,898	24.08	14.49	18.71
1891-92 to 1895-96	86,46,55,518	114,27,05,273	200,73,60,791	4.05	16.87	10.95
1896-97 to 1900-01	95,02,52,492	114,57,99,669	209,60,52,161	9.9	0.27	4.42
1901-02	109,38,18,850	136,36,61,514	245,74,80,364	15.11	19.01	17.24
1902-03	111,19,80,197	139,05,42,372	250,25,22,569	1.66	1.97	1.89
1903-04	131,11,83,795	168,55,10,410	299,67,94,205	17.91	21.22	19.75
1904-05	143,92,09,204	174,13,71,196	318,05,80,400	9.76	3.31	6.13

XXX—FOREIGN TRADE AND SHIPPING—*continued*

The second quinquennium (1866-67 to 1870-71) included some years of intense famine, and it also followed immediately on a period of extraordinary inflation in values caused by the sudden demand for cotton from India, which arose out of the stoppage of supplies from the United States during the war of secession. These circumstances account for the restriction in trade values during that quinquennium. The last quinquennial period also includes two years of intense famine which affected trade in four out of the five years, namely, 1896-97, 1897-98, 1899-1900, and 1900-01, for a famine year generally affects the second half or third quarter of one trade year and the first half or first quarter of the next. The traces of the famine were, however, effaced by the good harvests of the last four years.

A full report of the trade of each year will be found in the Reviews of the Trade of India which have been published annually for the last thirty-one years.

XXXI

FREIGHTS

[TABLE 1, PAGE 470]

(Compiled from the "Calcutta Price Current" of the Bengal Chamber of Commerce and the "Current Quotations" published by the Bombay Chamber of Commerce)

The table has been constructed for the purpose of showing the course of freight charges since the opening of the Suez Canal, for the conveyance from India to the United Kingdom by steamers (which have now practically superseded sailing vessels in the Indian trade with countries west of Suez) of the articles which comprise the great bulk of the export trade.

There have been great fluctuations in freight rates, but it is not the case that, as is frequently asserted, the descent of freights to their present level is an event of quite recent occurrence. Instances of a low range of freights appear as far back as 1873, but on the whole, for the fourteen years from the opening of the Canal in 1870 until 1884 the general level of freights was much higher than it has been since. As the facilities for trade offered by the Canal made themselves more apparent from year to year, the stimulus to shipowners to build more vessels, specially adapted for canal traffic, became more accentuated, and increased competition for cargo was followed by a reduction in rates. From 1884 onwards freights remained permanently on a lower level than in the antecedent period. The rates from 1898 (excluding freights on tea) have averaged, about 20s. a ton from Calcutta and between 4s. and 5s. less than that from Bombay.

XXXII

PORT TRUSTS

[TABLES 1 TO 3, PAGES 471 TO 473]

(Compiled from the Annual Administration Reports of the Commissioners of the Ports of Calcutta, Bombay, Madras, Karachi, Rangoon, and Chittagong)

The administration of the affairs of the larger ports is vested by law in bodies specially constituted for the purpose. They have wide powers, but their proceedings are more subject than those of municipal bodies to the control of Government. Except in Calcutta the elected members are fewer in number than the nominated members. At all the ports the Europeans on the board largely out-number others; there are no native Commissioners for Rangoon.

The income and expenditure of the six ports managed by Trusts (Aden is excluded from the tables) amounted last year to 366.52 lakhs, of which 76 per cent stands against Calcutta and Bombay, this proportion corresponding fairly to the proportion of the maritime trade which centres in those two ports. Both income and expenditure have increased in Calcutta in the ten years ending 1903-04 at a far more rapid rate than in the other ports, the increase being due partly to expansion of trade and partly to the additional expenditure entailed by the construction of the docks and the imposition of additional charges to meet that expenditure.

The capital debt of the Trusts at the end of 1903-04, was about 1,186 lakhs, of which more than nine-tenths represented the debt of Calcutta and Bombay.

XXXIII

MERCHANDISE MARKS

[TABLE 1, PAGE 474]

(Compiled from the provincial reports embodied in the Government of India Resolution on the working of the Act)

The Indian Merchandise Marks Act (IV of 1889) was passed in 1889, but its operation in the earlier years was restricted, especially in Calcutta, in consequence of the lack of adequate customs machinery for the examination of goods. In 1894, with the introduction of the present tariff, the customs staff was strengthened for the examination of goods for assessment to duty, and this increase enabled examination to be made at the same time for the purposes of the Merchandise Marks Act.

The Act was intended originally to prevent the fraudulent sale of goods bearing false trade marks or false trade descriptions (as of origin, quality, weight, or quantity). While the Act was before the Legislature a provision was added to require that all piece goods should be stamped with their length in yards. In this respect these goods are an exception, for the Act does not require that other descriptions of goods should be stamped or marked, though it requires that when goods are marked the marks must be a correct description.

The whole number of detentions under the Act was :

Five years ending 1894-95	.	.	.	5,477
" " 1899-1900	.	.	.	7,721
" " 1904-05	.	.	.	6,355

Detention is but rarely followed by confiscation, there having been no more than 110 such cases in the fifteen years. In the main detained goods are released with a fine, there having been 13,577 such cases out of the 19,553 detentions ordered in the same period. In 5,846 cases the detained goods were released without the infliction of a fine.

In this period of fifteen years 46 per cent of the detentions were on account of the application of false trade marks or false trade descriptions. In 24 per cent of the cases detention was ordered because the country of origin was either not stated or falsely stated. About 30 per cent of the detentions were ordered because the provisions of the Act for the stamping of piece goods had been infringed.

In very few cases do the Customs officials receive information leading to detentions. Thus, in 1904-05, there were only ten such cases in the 1,325 detentions made in the year; and in the preceding two years there were eight detentions made on information received, namely, five out of 1,190 cases in 1902-03, and three out of 1,009 cases in 1903-04.

XXXIV

INVENTIONS AND DESIGNS

[TABLE 1, PAGE 475]

(Compiled from the annual reports of the Patent Office and the weekly notifications published in the Gazette of India)

The laws for granting exclusive privileges to inventors and for protecting patterns and designs were amended and consolidated by the passing of the Inventions and Designs Act, V of 1888. The statistics printed in this volume summarise the working of the law for the last ten years.

The inventions for the use of which exclusive privileges have been sought or acquired during recent years relate in the main, so far as the subjects are enumerated, to bicycles and similar vehicles, the manufacture of tea, railway material, lamps and burners, the treatment of metals, electrical contrivances, spinning and weaving machines, water-lifts and pumps, sugarcane and other mills, chemical appliances and preparations, improvements in building and building materials. But the subject of nearly two-thirds of the applications is not specified in the reports on the administration of the law.

Of the 552 applications for leave to file specifications presented in 1904, 425 were granted, 32 rejected, 11 were abandoned, and 84 were pending. Of the applications 202 were made by residents in India, of whom 67 were natives and 135 Europeans or others, not natives.

The total number of applications under the present Act of 1888 has been 7,138, and as the result 5,389 specifications were filed and brought on the register up to the end of 1904. The number of patents in force at the end of 1904 was 2,215.

The applications for registering copyright in designs are relatively very small—there were not more than 32 in 1904. Of the 32 applications made, 12 were registered, all of them being from residents in India. The number of applications since the Act came into force has been 655.

XXXV

EMIGRATION

[TABLES 1 TO 4, PAGES 476 TO 479]

(Compiled from special official returns)

The figures in these tables relate solely to emigration carried on under the laws regulating emigration. They take no account of the numbers who leave India as passengers, not having been recruited by emigration agencies for service in the colonies, these being separately dealt with in Part XXXVI of this volume. The tables also take no account of persons who leave India on pilgrimage to the holy places in Arabia, of whom small but uncertain numbers settle out of India.

The number who emigrated from India during the twenty-six years 1878-79 to 1903-04, and the number of returned emigrants during the same period, amounted to—

		Number emigrated	Number returned
Five years ending 1883-83	...	81,325	30,785
" " " 1887-88	...	62,836	40,077
" " " 1892-93	...	76,710	33,127
" " " 1897-98	...	74,243	26,894
" " " 1902-03	...	104,470	45,559
For the year 1903-04	...	13,665	11,673
Total	...	413,248	183,115

The mortality amongst emigrants is high in some of the colonies, and of those who survive a substantial proportion elect to continue to work in the colony after their term of indenture expires. Many of these never return to India. In Mauritius, for instance, about 70 per cent of the population (283,971 out of a population of 376,260 estimated for 1902) are Indian settlers and their descendants; in Demerara a third of the population of the colony consists of Indians; and in Natal, Trinidad, and elsewhere, the settled Indians are increasing in numbers.

There are five places in India from which emigration may legally be carried on—Calcutta, Bombay, Madras, and the two French settlements of Pondicherry and Karikal. From Bombay emigration ceased many years ago, and general recruiting has never been resumed. That port and the port of Karachi, however, have recently been used for the shipment of male labourers destined for work on the Uganda railway, who were recruited under agreements made with or on behalf of Her Majesty's Government. Over 27,000 such labourers, mostly recruited in the Panjab, left Karachi for that purpose in the three years, 1895-99 to 1900-01. There was no emigration from Karachi in 1901-02, no Indian labour having been indentured during the year owing to the approaching completion of the construction works of the Uganda Railway. In 1902-03, a small number (172) of fitters, blacksmiths, masons, rivetters, and carpenters left Karachi for service on that Railway under agreement for two and three years. Only 25 artisans were indentured by the Uganda Railway during 1903-04. From the French settlements there has been no emigration since 1884, except in one year 1888-89. The port of Calcutta is the most convenient for the shipment of emigrants drawn from the impoverished masses of the thickly populated districts of Oudh, Bihar, and the eastern section of the United Provinces, and the main stream of emigration flows from that region down the Hooghly. Of the persons who emigrated from India in 1903-04, 9,152 (being 67 per cent) were shipped from Calcutta, the greater number of them from the United Provinces of Agra and Oudh, the Central Provinces, the Panjab, and Bihar. Their destinations were British Guiana, Trinidad, Fiji, and Natal. From Madras 4,433 were shipped during the year, recruited exclusively from the Madras Presidency, mostly from the southern (Tamil) districts. These went to Natal, Mauritius, Fiji, and Seychelles. There is a considerable flow of native labourers from Madras to Ceylon and the Straits, but this traffic is not conducted under the provisions of the Emigration Act.

XXXVI

NATIVE PASSENGER SHIPS

[TABLES 1 TO 5, PAGES 480 TO 483]

(Compiled from the provincial reports on the working of the Native Passenger Ships Act, X of 1887)

Under the Native Passenger Ships Act (X of 1887) the term "Native Passenger Ships" is applied to sailing-ships, which carry as passengers more than thirty natives of Asia or Africa, and steam-ships carrying more than sixty such natives. Local Governments have discretionary power, with the sanction of the Governor-General in Council, to alter these numbers to fifteen and thirty respectively.

XXXVI—NATIVE PASSENGER SHIPS—*continued*

The total number of persons who left Indian ports in native passenger ships, under the Act, X of 1887, that is who left as passengers being neither emigrants to the Colonies nor pilgrims to the holy places in Arabia, was :

	LONG VOYAGES		SHORT VOYAGES		TOTAL
	In India	Out of India	In India	Out of India	
In the five years ending 1899-93	92,581	128,473	5,219,696	247,290	5,988,040
" " 1897-98	83,854	145,023	5,978,401	412,560	6,619,833
" " 1902-03	106,450	220,153	6,164,468	664,671	7,155,742
" In the year 1903-04	30,745	40,002	1,441,760	127,212	1,639,719
" " 1904-05	29,186	49,790	1,546,804	178,574	1,804,954

A long voyage is defined by the law to be a voyage in which the ship will, in ordinary circumstances, be continuously out of port for one hundred and twenty hours or more; a short voyage is one in which the ship will not, in ordinary circumstances, be continuously out of port for one hundred and twenty hours. The space allotted to passengers, and some other conditions, differ in a long and a short voyage.

About 12 per cent of the passengers voyage to ports out of India, that is, approximately 196,000 have left India annually on an average in the last five years. The numbers leaving Madras for Ceylon on short voyages, chiefly for employment in the tea plantations, rose from 110,000 in 1899-1900 to 182,700 in 1900-01, an increase of 66 per cent; but owing to the enforcement of plague quarantine regulations at the Western ports and the home demand for labour caused by good crops in Southern India, the numbers averaged about 102,000 in the three following years. In 1904-05 the numbers rose to 156,000, on account of the unfavourable season on the East Coast and of better prospects held out to labourers in Ceylon. And for the same reason and better wages offered in the Straits for coolie labour, the number of passengers on long voyages who left Madras also increased by 9,254. There was a marked increase in 1901-02 and 1902-03 in the number of passengers on long voyages leaving Bombay and Sind for East African and South African ports, but in 1903-04 and 1904-05 the traffic from Bombay to South African ports was checked by the passing in January 1903 of the new Immigration Law prohibiting Indian emigrants from entering ports in Cape Colony. There was, however, a considerable increase in the number leaving Karachi for the Persian Gulf on short voyages, owing to the facilities now extended to the public by additional mail steamers running between Bombay and the Gulf and *vice versa*. Of the total passengers who went to places beyond India in 1904-05, more than three-fourths went from the Madras Presidency to Ceylon (156,056) and about one-seventh to the Straits Settlements (29,123), most of the remainder going from Bombay and Karachi to the Persian Gulf (15,147), Delagoa Bay (792), Mombasa (1,280), Aden (1,268), and Zanzibar (1,855), and from Burma to the Straits Settlements (2,659) and Amoy (4,424), and from Bengal to the Straits (8,920).

The great bulk of passengers voyage only within Indian limits, numbering 1,575,990 or nearly 87 per cent of the total in 1904-05, their migrations being confined in the main to ports within their own presidency as only 404,063 left for work in other provinces. These migrations from province to province are practically limited to voyages undertaken by coolies from Madras and Bengal to Burma for work as harvesters and in the rice-mills, and to the return voyages of these coolies at the end of the working season. The marked decrease in recent years in the number of passengers on short voyages in the Bengal Presidency is chiefly due to the diversion of passenger traffic between Calcutta and Orissa from the steamers to the Bengal-Nagpur railway. The decrease in 1902-03 in the number of passengers leaving Madras ports for Burma was attributed partly to the continued good harvest in some of the Southern districts, and partly to the closing, in South Canara, of fairs, on account of plague, but in 1903-04 and 1904-05 the number increased considerably on account of larger demand for labour and better wages in Burma.

XXXVII

WRECKS

[TABLE 1, PAGE 484]

(Figures supplied by the Port Officer and Registrar of Wrecks)

This table exhibits the number of British, British Indian, and native vessels which were totally lost in Indian waters (from Suez to Penang), the total tonnage of vessels wrecked, and the number of lives lost in the past twenty-nine years.

XXXVII--WRECKS--*continued*

The average number and tonnage of each class of vessels annually lost in the last ten years, and the proportion in the same period which the number and tonnage bear to the number of vessels that cleared from Indian ports, are approximately—

	No.	Tonnage	Proportion of no.	Proportion of tonnage
<i>British :</i>				
Steam ...	3	3,757	0·16 per cent	0·1 per cent
Sailing ...	1	868	1·54 „	0·59 „
<i>British Indian :</i>				
Sailing ...	35	2,027	5·17 „	2·29 „
<i>Native craft</i> ...	11	554	1·03 „	0·87 „

56 vessels were totally lost in 1904, of which 4 were British, 33 were British Indian, and 16 native craft.

Exceptional loss of life in certain years is recorded in the table. The causes are stated below—

1878. 400 pilgrims perished in the <i>Hydari</i> , bound from Calcutta to Jeddah.	1887. The <i>Sir John Lawrence</i> foundered (760 lives lost) at the mouth of the Hooghly in a cyclone.
1879. Continuous bad weather, and a cyclone, on the west coast of India in May.	1888. The <i>Faitama</i> (800 lives lost), wrecked off the Káthiawár coast in a cyclone.
1886. The <i>Speke Hall</i> foundered (58 lives lost) in the Gulf of Aden; and three vessels wrecked (239 lives lost) during a cyclone in the Bay of Bengal and on the east coast of Arabia.	1891. Four vessels wrecked in a cyclone in the Bay of Bengal.
	1892. The <i>Deccan</i> foundered (214 lives lost) in the Indian Ocean.
	1896. The <i>Luna</i> wrecked (75 lives lost) in the Gulf of Aden.
	1902. The <i>Camorta</i> wrecked (781 lives lost) on the Burma coast.

(a) After the Census of 1901 was taken, part of the territory of the Panjab was organised as a separate province (North-West Frontier Province), the population of the separated area being 2,125,480, namely, 1,159,306 males and 966,174 females

(b) The figures of the Baluchistan Census of 1891 are entirely imperfect, representing only a rough enumeration of certain selected areas. They do not admit of comparison with the figures of 1901

(c) Revised figures, on account of 16,010 persons enumerated at the Ajudhia fair

* These are the adjusted population on the present area. The figures, etc., enumerated in 1881 and in 1891 are noted in Tables Nos. 4, 5, and 6

NOTE.—This table states the quantity of salt actually consumed in each province, and the duty thereon, calculated at the rate in operation in each province, except that the figures under Bombay include salt exported to the United Provinces of Agra and Oudh, Central India, the Central Provinces, Mysore and the Nizam's Territories. From the 18th March 1903 the general rate of duty was reduced from Rs 2½ to Rs 2 per maund and in the case of salt manufactured in certain Kohat mines, the duty was altered from Rs 2 per Lahori maund to Rs 1½ per Indian maund. Further reduction in the general rate from Rs 2 to Rs 1½ per maund took effect from the 22nd March 1905. In Burma the rate remains unaltered, Rs 1 per maund.

(a) The sums entered under Duty include duty on excised as well as on imported salt. The quantity of the former is not entered in figures under Quantity, only rough estimates being available.

(b) Figures for Burma and Sind for years previous to 1871-72 are not available.

(MISCELLANEOUS RECEIPTS excluded), in each official year from 1868-69 to 1904-05

(a) Export salt exported to places in Bengal and the Madras Presidency
 (b) The Panjab became a British province in March 1849, and in the following October the excise system was introduced
 (c) The Internal Branch was organised under Act XXI of 1861, but the figures for 1861-62 to 1866-66 are not available
 (d) Figures are not available for years previous to 1871-72. From 1871-72 the quantity of imported salt only is given. The quantity locally manufactured salt cannot be given, rough estimates only being available
 (e) The Inland Customs Department (now the Northern India Salt Revenue Department) took charge from the Native States of

INDIA.—NET REVENUE (in rupees) from SALT in each PROVINCE, in each year from 1851-52 to 1903-04

Notes.—The figures of imports in columns 2 to 10 do not agree with those in the accounts of the sea-borne trade of the Bengal Presidency, the former representing the net landings of salt from vessels while the latter represent the gross amount of the import passes taken out, whether the salt is landed or not.

(a) The figures in the final column for years previous to 1863-64 include Government salt. Those for 1871-72 to 1874-75 and 1885-86 and 1896-97 are slightly in excess of the details owing to the inclusion of figures that do not find place in the details (for instance, salt from upward for bond in private golahs and salt found in excess in the golahs)

(b) Includes Government salt

(c) Government salt

No. 9

BENGAL.—QUANTITY (in maunds of 82½^{lb}) of GOVERNMENT and PRIVATE SALT SOLD for HOME and INLAND CONSUMPTION, REVENUE REALISED, AVERAGE WHOLESALE SELLING PRICE of LIVERPOOL SALT, and RATE OF DUTY, in each year from 1841-42 to 1903-04

NOTE.—The figures from 1841-42 to 1864-65 have been taken from Mr. Plowden's salt report; those from 1855-56 to 1864-65, from the Salt administration report for 1864-65; and the next three years' figures from the administration report for 1867-68

(a) The excise system was discontinued in 1840 and resumed in 1847

(b) The true average for years previous to 1880-81 is probably about ₹2 lower than the stated average

OPIUM

(76)

No. 17

NUMBER of CHESTS of INDIAN OPIUM imported into SIAM from 1869 to 1904

1869	403	1881	785	1893	791
1870	316	1882	831	1894	1,126
1871	652	1883	704	1895	1,001
1872	653	1884	669	1896	1,327
1873	580	1885	771	1897	720
1874	693	1886	664	1898	1,528
1875	657	1887	968	1899	1,304
1876	788	1888	993	1900	1,567
1877	649	1889	1,085	1901	1,473
1878	675	1890	1,440	1902	1,781
1879	822	1891	1,200	1903	1,875
1880	799	1892	500	1904	2,389

Note.—There is much smuggling, and a somewhat smaller quantity than is actually imported is entered in this statement.
All the opium imported into Siam is believed to be Benares opium, brought chiefly from Singapore

NOTE.—In the Financial Accounts the duty collected on Salt is entered under "Salt," not under "Customs." In this volume it is included in the table of the Indian salt revenue, see Section III

The figures in tables Nos. 1 and 2 represent the total for each year of the revenue credited month by month in the Customs Houses. They differ slightly from those given in the Finance and Revenue Accounts which show the result of final adjustments

V.
CUSTOMS REVENUE

(112)

No. 2

GROSS AMOUNT (in rupees) of CUSTOMS DUTY collected in BRITISH INDIA, on EXPORTED MERCHANDISE subject to duty, in each official year from 1887-88 to 1904-05

Hops ...			10 "	10 "	7½ "	1 "

Act XVII of 1867 agreed in rates with Act XXV of 1865 with the following exceptions:—Champagnes, sparkling wines, and liqueurs paid ₹1-8 per gallon or six quart bottles, and other wines ₹1 per gallon or six quart bottles; the duty on hops and on a great number of unenumerated articles was remitted; the remainder were specified, but the general rate of duty on them, i.e., 7½ per cent, was not altered.

(a) Duty rateably increased with an increase in strength beyond London proof

(b) Reduced to 5 per cent by Notification dated 29th April 1861

(c) In Act XXIII of 1862 and in each of the later Acts it was provided that 10 per cent *ad valorem* should be charged on all spirits used exclusively in arts and manufactures, or in chemistry

<p><i>Exception I.</i>—Articles falling under the 5th, 6th, 8th, 9th, or 10th head of the above list, when they appertain to a firearm falling under the 1st or 3rd head, and are fitted into the same case with such firearm, are free.</p> <p><i>Exception II.</i>—Arms forming part of the regular equipment of an officer entitled to wear diplomatic, military or police uniform, and a revolver or a pair of pistols accompanying a military officer, are free.</p> <p><i>Proviso 1.</i>—No duty in excess of ten per cent <i>ad valorem</i> shall be levied upon any of the articles mentioned in the above list when they are imported in reasonable quantity, for his own private use, by any person lawfully entitled to possess the same.</p> <p><i>Proviso 2.</i>—When any articles which have been otherwise imported, and upon which duty has been levied or is leviable under this number, are purchased retail from the importer by a person lawfully entitled as aforesaid, in reasonable quantity, for his own private use, the importer may apply to the Customs Collector for a refund or remission (as the case may be) of so much of the duty thereon as is in excess of ten per cent <i>ad valorem</i>; and if such Collector is satisfied as to the identity of the articles, and that such importer is in other respects entitled to such refund or remission, he shall grant the same accordingly.</p>						
Gunpowder	7½ per cent	7½ per cent	7½ per cent	7½ per cent	10 per cent	10 per cent
All other sorts of arms, ammunition, and military stores						

(a) The following articles under this head were exempted from duty:

- Swords imported for presentation as prizes No. 1423, dated 31st May 1882
- Bird-shot Home Dept. Order No. 1814, dated 19th December 1883
- Arms of an obsolete description imported as articles of curiosity, which are practically useless for offensive or defensive purposes No. 40, dated 3rd March 1884
- Arms which, having paid duty at Aden on import into that Settlement, are subsequently imported into any Customs port of British India No. 1504, dated 13th June 1884
- Morris tubes and patent ammunition, when imported by officers commanding British and Native regiments and volunteer corps for the instruction of their men No. 3958, dated 14th October 1884, and No. 178., dated 21st January 1886
- A sword, a revolver, or a pair of pistols when accompanying a commissioned officer of a volunteer corps, or certified by the Commandant of the corps to be imported by the officer for the purposes of his equipment No. 296, dated 20th November 1885
- Gun-wads, wire-cartridges, and bullets No. 66, dated 6th March 1886

(b) These rates were fixed by the Indian Arms Act, XI of 1872

(c) For each cartridge they will carry

All other sorts	7½ per cent	7½ per cent	7½ per cent	7½ per cent	5 "		

(a) Freed by Notification No. 48, dated 18th March 1878

(b) For Petroleum, see page 132

(c) Opium imported from any port in British India and protected by the certificate of an officer empowered in that behalf chargeable with only the amount, if any, by which the duty leviable thereon exceeded the duty shown by such certificate to have been already paid.—(Act X of 1882, section 7)

(d) Freed by Notification No. 190, dated 18th January 1876

(e) Under the Act duty was leviable only on imports into the Bombay Presidency, excluding Sind. The duty was extended to imports into Sind by Notification No. 174, dated 28th December 1877. Under Notification No. 2346, dated 5th August 1875, as amended by Notification No. 15, dated 25th January 1878, duty was levied on imports from British Indian ports in the following cases only:

(1) When the import was unprotected by a certificate to the effect that duty had been paid on the salt used in curing the fish

(2) When the import was from Burma

By Notification No. 3659, dated 18th November 1880, salted fish imported into any port in the Bombay Presidency or Sind was freed

(f) For dry salt-fish and wet salt-fish (ngap), see page 134

- (a) The following articles under this head were exempted from duty
- Arms which, having paid duty at Aden on import into that Settlement, are subsequently within three years imported into any Customs port of British India
 - Bows and arrows
 - Bullets, bird-shot, gun-wads, and wire cartridges (b)
 - Bullet-moulds
 - Morris tubes and patent ammunition when imported by officers commanding British and Native regiments or volunteer corps for the instruction of their men
 - Ornamental arms possessing antiquarian value, provided the chief Customs authority is satisfied in each case that the arms are practically unserviceable, and that weapons intended for offensive or defensive purposes are not imported under cover of the exemption
 - Swords imported for presentation as army or volunteer prizes
 - A sword, a revolver, or a pair of pistols when accompanying an officer of Her Majesty's Regular Forces or a commissioned officer of a volunteer corps or certified by the commandant of the corps to which such officer belongs, or, in the case of an officer not attached to any corps, by the officer commanding the station or district in which such officer is serving, to be imported by the officer for the purposes of his equipment
 - Dynamite, tonite, and detonators (c) ...
 - Swords imported as part of the equipment of Native commissioned officers of Her Majesty's Army
 - Swords and revolvers imported into British India, which are certified by an Inspector-General of Police to be part of the ordinary equipment of members of the Police Force under his charge
 - Arms, ammunition, and military stores imported with the sanction of the Government of India for Imperial Service Troops of Native States
- Notification No. 1864, dated 12th April 1889
- Notification No. 1864, dated 12th April 1889, as amended by Notification No. 1908, dated 8th May 1891
- Notification No. 2139, dated 30th April 1889
- Notification No. 302, dated 2nd December 1890
- Notification No. 3521, dated 19th August 1891
- Notification No. 3028, dated 21st July 1892
- (b) Bullets, bird-shot, gun-wads, and wire cartridges were again subjected to duty by Act VIII of 1894
- (c) Dynamite, tonite, and detonators were again subjected to duty by Act VIII of 1894 and classed as "Explosives" under Chemical Products and Preparations
- (d) These rates were fixed by the Indian Arms Act, XI of 1878
- (e) The following articles exempted from duty in excess of 10 per cent *ad valorem* by Notification No. 3838, dated 26th June 1893 :
- | | | |
|---------------------------------|---------------------------|-----------------------------|
| Aim reflectors | Reflectors | Sliding bars for sights |
| Barrel cleaners or pull-through | Recoil pads or heel pads | Turn screws |
| " coolers | Sight covers | Ventometers or wind gauges |
| Brushes, jags, mops | Sights for guns or rifles | Verniers or sight elevators |
| Cleaning rods | | |

No. 5—continued

RATES of CUSTOMS DUTY imposed on IMPORTS into BRITISH INDIA under various ACTS (as modified by EXECUTIVE ORDERS) from 1887 to March 1905—continued

NAMES OF ARTICLES	ACT II OF 14TH JANUARY 1887	ACT II OF 10TH FEBRU- ARY 1888	ACT XII OF 21ST MARCH 1890	ACT IX OF 10TH AUGUST 1893	ACT VIII OF 10TH MARCH 1894	ACT XVI OF 27TH DECEM- BER 1894	ACT III OF 22D FEBRUARY 1895
ARMS, AMMUNITION, AND MILITARY STORES —continued							
<i>Exception I.</i> —Articles falling under the 5th, 6th, 8th, 9th or 10th head of the foregoing list, when they appertain to a firearm falling under the 1st or 3rd head, and are fitted into the same case with such firearm, are free.							
<i>Exception II.</i> —The following are also free, namely:							
(a) Arms forming part of the regular equipment of an officer entitled to wear diplomatic, military, naval or police uniform;							
(b) A sword, a revolver, or a pair of pistols, when accompanying an officer of Her Majesty's Regular Forces, or a commissioned officer of a volunteer corps, or certified by the commandant of the corps to which such officer belongs, or, in the case of an officer not attached to any corps, by the officer commanding the station or district in which such officer is serving, to be imported by the officer for the purposes of his equipment;							
(c) Swords and revolvers which are certified by an Inspector-General of Police to be part of the ordinary equipment of members of the Police force under his charge;							
(d) Swords forming part of the equipment of native commissioned officers of Her Majesty's Army;							
(e) Swords for presentation as army or volunteer prizes;							
(f) Arms, ammunition, and military stores imported with the sanction of the Government of India for the use of any portion of the military forces of a Native State in India which may be maintained and organised for Imperial Service;							
(g) Morris tubes and patent ammunition when imported by officers commanding British and Native regiments or volunteer corps, for the instruction of their men.							
<i>Proviso 1.</i> —No duty in excess of ten per cent <i>ad valorem</i> shall be levied upon any of the articles mentioned in the foregoing list when they are imported in reasonable quantity, for his own private use, by any person lawfully entitled to possess the same.							
<i>Proviso 2.</i> —When any articles which have been otherwise imported, and upon which duty has been levied or is leviable under numbers 1 to 10, are purchased retail from the importer by a person lawfully entitled as aforesaid, in reasonable quantity, for his own private use, the importer may apply to the Customs-Collector for a refund or remission (as the case may be) of so much of the duty thereon as is in excess of ten per cent <i>ad valorem</i> ; and if such Collector is satisfied as to the identity of the articles, and that such importer is in other respects entitled to such refund or remission, he shall grant the same accordingly.							
Gunpowder					10 per cent	10 per cent	10 per cent
All other sorts of arms, ammunition, and military stores

No. 6

I.—RATES of COUNTERVAILING DUTIES levied on imported BOUNTY-FED SUGAR under ACTS XIV of 1899, VIII of 1903, XII of 1903, and XI of 1904

Countervailing duties on sugar produced in, and exported from, the countries named below which grant bounties on export, are charge under Sec. 8-A of the Indian Tariff Act, 1894, (added by Act XIV of 1899, and amended by Act XII of 1903), at the rates (being equivalents to the bounties) noted against each, in addition to the general import duty of 5 per cent

Countries	Kinds of sugar	Bounties bestowed	Duties to be levied in addition to the general import duty of 5 per cent
			Per cwt
			R a. p.
Denmark . . .	Refined sugar	1.12 crowns per 100 kilograms	0 8 0 (a)
Chile	Raw sugar	2 centavos per kilogram	0 9 2 (b)
Argentine Republic	All kinds	Rs. 10-15-8 per cwt.	10 15 8 (c)

BANKS OF DEPOSIT, EXCHANGE, AND DISCOUNT

BANKING CAPITAL in INDIA in each year from 1870 to 1904

No. 1

The figures in this table are for the three Presidency Banks (Bengal, Bombay, and Madras) and for the undermentioned joint-stock Banks, their head offices being located in India—

Allahabad Bank from 1870	Commercial Bank of India from 1886
Bank of Upper India " 1870	Deccan Bank (now defunct) " 1891 to 1900
Alliance Bank of Simla " 1874	Panjab Banking Co. " 1891
Oudh Commercial Bank " 1881	Bank of Calcutta " 1895

Figures are stated for the three Presidency banks for the whole period, and for the other banks from the years stated against their names. The compilation was first made in 1900, and hence several other banks existing in 1870 or subsequently started, which had passed out of existence, were omitted, as particulars regarding their deposits and cash balances were not procurable. A list of the principal banks thus excluded is given in the explanatory memorandum.

**XII
BANKS**

(236)

No. 2

The figures in this table are for the joint-stock Banks known as Exchange Banks whose head offices are located elsewhere than in India, namely—

Chartered Bank of India, Australia, and China	... from 1870	Mercantile Bank of India from 1888
Delhi and London Bank 1870	Yokohama Specie Bank 1894
Hongkong and Shanghai Banking Corporation 1870	Deutsch-Asiatische Bank 1897
National Bank of India 1877	International Banking Corporation 1908
Comptoir National D'Escompte de Paris 1889	Russo-Chinese Bank 1903

As in table No. 1, figures are stated for each bank from the date mentioned against it. A list of the banks, which do not appear owing to the having ceased to exist before the compilation of the table in 1900, will be found in the explanatory memorandum

NOTE.—The figures in table No. 5 state the gross circulation, less the notes of the several circles in the Bengal Presidency cashed in other circles in the same Presidency. Where the notes in circulation belonging to a circle in the interior are less than its silver coin reserve, the difference arises from the notes cashed at the head office.

The figures in this table are the average for the year of the circulation on the last day of each month

*Average for eight-months

† For the years 1900-01 to 1904-05, see table No. 5—B

PAPER CURRENCY

No. 5—continued

B.—VALUE (in rupees) of NOTES in CIRCULATION and of the SILVER COIN RESERVE, on the last day of each month in the CIRCLES of the BENGAL PRESIDENCY, from April 1900 to March 1905

Table with columns for Year, Month, and Circulation/Reserve (Calcutta, Allahabad, Lahore, Total). Rows include months from April 1900 to March 1905, plus average rows for each year.

NOTE.—The averages for the year are struck from the circulation on the last day of each month *For the years 1864-65 to 1899-1900, see table No. 5—A

NOTE.—The figures in table No. 6 state the gross circulation, less the notes of the several circles in the Bombay Presidency cashed in other circles in the same Presidency. From March 1862 to August 1864 there was but one (the Bombay) circle in the Bombay Presidency. The Nagpur Circle was attached to the Bengal Presidency until July 1867, and its circulation up to that month is included in the totals for the Bengal Presidency, although for convenience of arrangement the circulation of the Nagpur Circle is shown from September 1864 in this table.

The figures in this table are the average for the year of the circulation on the last day of each month
* Including figures for the offices at Nagpur and Akola during the period of their existence
† For the years 1900-01 to 1904-05, see table No. 6—B

No. 6—continued

D.—VALUE (in rupees) of NOTES in CIRCULATION and of the SILVER COIN RESERVE, on the last day of each month in the CIRCLES of the BOMBAY PRESIDENCY, from April 1900 to March 1905

NOTE.—The figures in table No. 7 state the gross circulation, less the notes of the several circles in the Madras Presidency cashed in other circles in the same Presidency

The figures in this table are the average for the year of the circulation on the last day of each month

*Including figures for the offices at Trichinopoly, Vizagapatam, and Cocanada during the period of their existence

†For the years 1900-01 to 1904-05, see table No. 7—B

No. 7—continued

B.—VALUE (in rupees) of NOTES in CIRCULATION and of the SILVER COIN RESERVE, on the last day of each month in the CIRCLES of the MADRAS PRESIDENCY, from April 1900 to March 1905

MINT AND COINAGE

No. 2

VALUE (in rupees) of SILVER IMPORTED into and EXPORTED from BRITISH INDIA from and to FOREIGN PORTS of the SILVER received into the MINTS; and of the SILVER COINAGE in the MINTS; in each official year from 1855-56 to 1904-05

Table with columns: FROM AND TO FOREIGN PORTS (Imported, Exported, Net imports), RECEIVED INTO THE MINTS (From Individuals, From Government, TOTAL), VALUE OF THE SILVER COINAGE (Rupees, Half, quarter, and one-eighth rupees, TOTAL). Rows list years from 1855-56 to 1904-05 with corresponding values.

NOTE.—From the 26th June 1893, when the mints were closed to the unrestricted coinage of silver, the receipts from individuals represent coins of Native States tendered for recoinage, particulars of which appear in table No. 5-A. From the same date silver belonging to the Government has been valued at its cost price instead of at the fixed rate of Rs per tola of standard silver, but old rupees received for recoinage, as entered in table No. 5, are still taken at their nominal value. The silver received into the mints for coinage into British dollars intended for circulation in the Far East and into the new dollar adopted as the currency of the Straits Settlements is excluded from this table. Particulars of the coinage of these British and Straits dollars will be found in table No. 15

NOTE.—The quantities in the column "net imports" for both gold and silver, for the years 1873-74 to 1886-87, are estimates only, deduced from the declared values of the trade for those years by the following process:

For Gold, the rupee value of the monthly net imports was converted into sterling at the average rate of exchange in each month, and this sterling value was then divided by the English mint price of gold (£3 17s. 10½d.). For Silver, the average price of Rs107 per 100 tolas, or Rs285.33 per 100 ounces, was taken as the basis of the value of the annual imports.

XV
MINT AND COINAGE

No. 4

VALUE (in rupees) of SMALL SILVER COIN, and TOTAL VALUE (in rupees) of the GOLD, SILVER, and COPPER COINAGE at the MINTS, in each official year from 1835-36 to 1904-05

	Half rupees	Quarter rupees	One-eighth rupees	TOTAL	TOTAL VALUE OF THE COINAGE

NOTE.—This table includes Alwar and Bikaner rupees received for recoinage under Act IX of 1876 into coins of those States, namely, Alwar coins R2,06,265 in 1877-78, R1,96,223 in 1879-80, R2,06,323 in 1882-83, R1,22,427 in 1890-91, and R37,357 in 1900-01 at the Calcutta Mint, and Bikaner coins R1,02,030 in 1892-93, R4,93,836 in 1893-94, and R1,11,208 in 1897-98 at the Bombay mint. After the closure of the mints such coins were received at their nominal value.

Arrangements were made in 1897 with Bhopal and Kashmir, and subsequently with other States, for the conversion of the local currencies by substituting Government of India rupees for the State coinage then in circulation. The details of such coins received into the mints, of which the totals appear in table No. 5-A, are noted below:

COINS	1897-98	1898-99	1900-01	1901-02	1902-03	1903-04	1904-05
Kashmir coins	14,15,938	20,23,331
Bhopal "	55,32,624	1,92,506
Baroda—	3,61,71,543
Babashahi rupees

* Gold received by the mint on behalf of the Paper Currency Department is omitted from this table

MINT AND COINAGE

No. 10

VALUE (in rupees) of SILVER IMPORTED into and EXPORTED from the BENGAL PRESIDENCY (including BURMA) from and to FOREIGN PORTS, of the SILVER received into the CALCUTTA MINT, and of the SILVER COINAGE in that MINT, in each official year from 1835-36 to 1904-05

Table with columns: FROM AND TO FOREIGN PORTS (Imported, Exported, Net imports), RECEIVED INTO THE MINT (From Individuals, From Government, TOTAL), VALUE OF SILVER COINAGE (Rupees, Half, quarter, and one-eighth rupees, Total). Rows represent years from 1835-36 to 1904-05.

NOTE.—For a description of the silver received into the mint after the 23rd Jun 1893 and the method of valuation, see notes to tables Nos. 2 and 5-A

(a) For details of each denomination, see table No. 11

(b) Includes Rs.18,37,780 Gwalior and Chandori rupees received on account of the Gwalior loan

MINT AND COINAGE

No. 11

VALUE (in rupees) of the several denominations of SMALL SILVER COINS and COPPER COINS struck, and TOTAL VALUE (in rupees) of GOLD, SILVER, and COPPER COINAGE at the CALCUTTA MINT, in each official year from 1835-36 to 1904-05

* Gold received by the mint on behalf of the Paper Currency Department is omitted from this table

MINT AND COINAGE

No. 13

VALUE (in rupees) of SILVER IMPORTED into and EXPORTED from the BOMBAY PRESIDENCY (including SIND) from and to FOREIGN PORTS, of the SILVER received into the BOMBAY MINT, and of the SILVER COINAGE in that MINT, in each official year from 1835-36 to 1904-05

Table with columns: FROM AND TO FOREIGN PORTS (Imported, Exported, Net imports), RECEIVED INTO THE MINT (From Individuals, From Government, Total), VALUE OF SILVER COINAGE (Rupees, Half quarter, and one-eighth rupees(a), Total). Rows represent years from 1835-36 to 1904-05.

NOTE—For a description of the silver received into the mint after the 23th June 1893 and the methods of valuation, see notes to tables Nos. 2 and 5-A

(a) For details of each denomination, see table No. 14

MINT AND COINAGE

No. 14

VALUE (in rupees) of the several denominations of SMALL SILVER COINS and COPPER COINS struck, and TOTAL VALUE (in rupees) of GOLD, SILVER, and COPPER COINAGE at the BOMBAY MINT, in each official year from 1835-36 to 1904-05

	SMALL SILVER COINS				COPPER COINAGE		TOTAL VALUE OF COINAGE

MINT AND COINAGE

No. 17

OUTTURN in the INDIAN MINTS of SILVER BULLION IMPORTED from ENGLAND

Note.—This table states approximately the sterling cost of a rupee coined during the period when the mints were still open to the receipt of silver from the public for coinage. The cost was determined by the sterling price of silver and the cost of sending it from London to India, to which were added the mint seignorage and other charges. The calculations used in the preparation of this table are as follows:

Column A.—To the cost of an ounce troy of standard silver in London, 1 per cent is added for freight and charges for remitting, and to the total cost $\frac{1}{2}$ per cent is added as interest for the time taken by a bullion remittance in excess of the time occupied by a remittance by bill. This sum is divided by the mint outturn of an ounce of fine silver bullion received into the mint after cutting, as given below, and the quotient, shewing the cost of a Government rupee in India in pence, is entered in column A:

One ounce troy of English standard silver	=	2.6909
Mint duty and melting charge at Rs. 21 per mille	=	.0665
		2.6344
	NET VALUE	2.6344
Mint loss in melting at .25 per mille	=	.0007
		2.6337
	MINT NET OUTTURN	2.6337

Column B.—The rates in this column are based on the same data as in A, except that $\frac{1}{2}$ per cent is added as interest.

Column C.—The rates in this column are based on the transit charges being $1\frac{1}{4}$ per cent, namely, freight $\frac{1}{2}$ per cent, insurance $\frac{1}{2}$ per cent, boxes, packing, etc., $\frac{1}{4}$ per cent, and brokerage $\frac{1}{4}$ per cent, interest at $\frac{1}{2}$ per cent. The mint outturn of an ounce of fine silver bullion is Rs. 2.6337.

Column D.—The rates in this column are based on the same data as in C, except that interest is taken at $\frac{1}{4}$ per cent instead of $\frac{1}{2}$ per cent.

The following are the data used in calculating the results stated in these columns:

English standard silver	=	$2\frac{3}{4}$ the fine
Indian " "	=	$1\frac{1}{4}$ the fine
1 ounce troy	=	2 $\frac{1}{4}$ tolas

Charges in England: Freight, insurance, boxes, packing, brokerage, etc. = 1 to $1\frac{1}{4}$ per cent

Interest = 8% per annum on the time of transit of a silver shipment in excess of the transit of a bill. The excess is taken to be 7 and 28 days, and the interest for the time, one-eighth and one-half per cent, respectively.

Charges in India: Mint duty (seignorage)	=	$\frac{2}{100}$
Melting charge	=	$\frac{1}{100}$
Loss in melting inferior silver	=	$0.25\frac{1}{100}$

(a) No information

(b) This decrease in the holdings by Europeans and the corresponding increase in the holdings by natives are due to the rectification of a loose and erroneous classification in the Public Debt office where, until 1897-98, notes presented for payment of interest by the Banks were treated as held by Europeans, though the owners were often natives

No. 2

DETAILED STATEMENT.—REGISTERED DEBT in INDIA and in ENGLAND at the end of each year from 1820-21 to 1903-04, also the annual amount of INTEREST payable thereon

(a) Includes Paper Currency Reserve

(b) No information

(c) This decrease in the holdings by Europeans and the corresponding increase in the holdings by natives are due to the rectification of a loose and erroneous classification in the Public Debt Office where, until 1897-98, notes presented for payment of interest by the Banks were treated as held by the Europeans, though the owners were often natives

prepared on the basis of the INTEREST paid on each LOAN at all the TREASURIES throughout INDIA during the
the 31st December

* Fractions below ½ have been omitted
† No India average rate inserted, as prior to August 1836 bills on Bengal, Bombay, and Madras were drawn in different local current rupees
‡ Prior to the 1st February 1862, the Home Treasury was open at all times for the sale of bills on India at rates altered from time to time raised to a prohibitory rate. On resumption of drawings in February 1862, bills were periodically allotted by tenders received at the Bank of England, and this system with some modifications still obtains

No. 3—continued

AMOUNT of COUNCIL BILLS DRAWN on CALCUTTA, BOMBAY, and MADRAS, with the drawing rates; the PAYMENT of RAILWAY CAPITAL into the HOME TREASURY, less WITHDRAWALS in ENGLAND; and the SUMS BORROWED in ENGLAND; in each year from 1834-35 to 1904-05—continued

Table with columns: Year, Calcutta, Bombay, Madras, Exchange per Rupee (in Pence) for Calcutta, Bombay, Madras, India Average, Total Amount, Payment of Railway Capital into the Home Treasury, less withdrawals in England, Borrowed in England.

* Fractions below 1/2 have been omitted
† Exclusive of Transfer Fees and Miscellaneous Refunds
‡ Includes £1,370,000 on account of the sale-proceeds of India four per cent stock, and £2,000,000 advanced from H. M.'s Treasury under the "Indian Advance Act, 1879"
§ Includes £1,939,093, £263,000, £2,200,000, and £700,396 drawn against the Gold Reserve Fund in 1901-02, 1902-03, 1903-04, and 1904-05, respectively

NOTE—This table, with the exception of the column "amount of bills drawn in England on the Government of India," is a reproduction of a table published annually by Messrs. Pixley and Abell

SILVER per Ounce in each MONTH from January 1833 to December 1904

December	Yearly average	Silver coined in England	Amount of bills drawn in England on the Government of India *	Export of silver from England to the East †	Import of silver into England	Average bank rate of discount	REMARKS
d.	d.	£	£	£	£		
59½	59½	145	55,510½	1,895,023			
59½—59¾	59½	432,775	398,253	2,146,465			Continuance of East India Company. Slavery abolished; compensation to owners £20,000,000. Renewal of Bank Charter. Bank notes a legal tender. Great importation of gold into New York; substitution of metallic currency for paper in United States.
59¾	59½	146,665	782,803	2,096,167			Extinction of United States National Debt; Bank of United States wound up, owing to refusal of Congress to recharter it.
59¾—60	60	497,719	2,045,253	2,610,101			Banking and commercial embarrassment in United States. Spanish civil war.
59¾	59½	75,385	2,042,232	3,010,190			Commencement of panic in London. Discounts refused. Many houses trading with United States stop payment. Accession of Queen Victoria. Rebellion in Canada.
60—60½	59½	174,042	1,706,185	1,945,264			Resumption of specie payments in United States. Famine in various parts of British India. Afghan war.
60½	60¾	390,654	2,346,591	1,786,253			Banks in United States suspend payments in specie. War with China.
60½—60¾	60¾	207,900	1,429,525	1,841,335			Misunderstanding with France. Treaty of London for settlement of Eastern Question.
59¾	60½	89,641	1,174,450	3,143,292			Great depression in every branch of manufacturing industry.
59¾—59½	59½	192,852	2,589,283	4,794,678			Peace with China. Income Tax Act passed.
59½	59½	239,580	1,197,438	3,752,472			Treaty of commerce opens China to all nations.
59½	59½	610,632	2,801,731	2,496,959			Bank Charter Act passed. Consols 101½. Prior to September this year the Bank never reduced the rate below 4 per cent.
59½—59½	59½	647,658	2,516,951	2,939,922			Railway mania. Sikh war.
60½	59½	559,548	3,065,709	1,973,391			Commercial and railway panic. Repeal of Corn Laws.
59½	59½	125,730	3,097,041	4,204,503			Year of panic. £10,000,000 granted on relief of famine in Ireland. Gold discovered in California.
59½	59½	35,442	1,541,804	3,396,807			Sikh war.
59½—59½	59½	119,592	1,889,195	3,811,809			First importation of Californian gold into England. Annexation of the Panjab. Average of consols 96½.
61½	60½	129,096	2,935,118	5,052,059			
60½	61	87,868	3,236,458	1,715,100			Discovery of gold in Australia.
61½—61½	60½	189,596	2,777,523	2,447,450			Consols touched 102, and averaged 99½.
61½—61½	61½	701,544	3,319,066	3,117,980			Australian mint established.
61½	61½	140,580	3,850,565	3,095,490			Russian war began.
61½	61½	195,510	3,670,028	6,431,733			Loan of 16 millions. Fall of Sebastopol.
61½—61½	61½	462,528	1,484,040	12,113,991			Russian war ends.
62—62½	61½	373,230	2,819,710	16,731,915			Panic. Suspension of Bank Act. Indian Mutiny. Loan of £1,000,000 to East India Company.
61½—61½	61½	445,896	628,599	4,753,933	6,700,000		End of Indian Mutiny.
62	62½	647,064	25,573	14,628,521	14,772,460		Loan of £5,216,528 to East India Company.
61½—61½	61½	218,403	4,694	8,478,739	10,394,000		Commercial Treaty with France.
61—61½	60½	209,434	797	6,824,307	6,590,000		Financial depression in India. American civil war begins.
61½—61½	61½	148,518	1,193,728	10,091,460	11,753,000		Great distress in cotton manufacturing districts. Panic.
61½—61½	61½	161,172	6,641,576	8,263,011	10,888,130		Large exports of gold to the Continent to pay for silver.
61½	61½	535,194	8,979,521	6,254,004	10,827,300		£13,000,000 silver exported from France.
61½—61½	61½	501,732	6,789,473	3,598,058	6,980,000		Close of American war.
60½—60½	61½	493,416	6,966,116	2,365,626	10,778,000		Commercial and Joint Stock Companies' Panic. Bank declined to sell bar gold.
60½—60½	60½	193,842	5,067,589	642,912	8,020,000		Great decline in export of silver, only £2,500,000 sent from France.
60½—60½	60½	301,356	4,137,285	1,635,842	7,716,420		Abyssinian expedition.
60½—60½	60½	76,428	3,705,741	2,362,943	6,730,000		Distress in Lancashire.

* For the year ended the 30th April from 1833 to 1866 and the 31st March from 1867 and onwards

† The figures from 1833 to 1850 include exports from England as well as other countries; from 1851 to 1875 from Southampton only; from 1876 shipments *via* Southampton, Venice, and Marseilles

‡ Including bills on China for this year only (The East India Company had the monopoly of the trade with China until 1833)

(a) Estimated

(b) The values are taken at the rate of Rs 15 a ton assigned at Bombay on export after a lead of over 500 miles

(c) Estimated at the declared export value

(d) These figures represent exports in each official year. The production is not fully reported and complete figures for the internal consumption of mica are not available

(e) These figures represent the output of the Burma Ruby Mines Ltd. They do not include the stones raised by native miners.

Woollen carpet weaving establishments, not classed as mills ...	19	19	17	13	6,456	6,522	5,079	3,161
Miscellaneous (not enumerated above) ...	44	42	53	66	4,007	4,510	6,116	8,067
TOTAL ...	2,822	2,587	2,784	2,914	147,149	382,850	402,645	478,980

* Reference may also be made to table XV of the Census of 1901, showing population of India according to occupation

† The figures for earlier years will be found in the tenth issue, but they have not been reproduced as owing to a change in the definition of "large" industries, which is explained in the introductory note, they are not comparable with the figures for the last four years

FOREIGN TRADE

No. 1

ABSTRACT TABLE.—VALUE (in rupees) of the TRADE of BRITISH INDIA, distinguishing IMPORTS and EXPORTS MERCHANDISE and TREASURY, from 1834-35 to 1904-05

Table with columns for Year, Imports (Merchandise, Treasury, Total), and Exports (Merchandise, Treasury, Total). Rows range from 1834-35 to 1904-05, including annual averages.

Note (1) -

until 1865-66 the official year commenced on 1st May and ended on 30th April; since 1866-67 it begins on 1st April and ends on 31st March

(2) - Throughout this series, with the exception of tables Nos. 13 and 16, the figures for merchandise and treasury include the imports and exports on account of Government.

No. 2.

Value of the Trade of each Province of British India.

1905	1 — —	1 — —	1 2 6	1 2 6	1 16 3	— 15 —	— 15 6

Note.—The figures represent the minimum rates in March of each year. The rates under Calcutta are quoted from the "Calcutta Price Current" of the Bengal Chamber of Commerce, and those under Bombay from the "Current Quotations" of the Bombay Chamber of Commerce for 1892 to 1905, and for earlier years from a statement received from the Secretary to the Chamber. The rates for seeds from Bombay for the years 1872 to 1881 represent the lowest freight to Liverpool *via* the Cape, rates by Canal not being available. The following are the rates charged *via* Canal by P. and O. Company's steamers in those years for cotton and seeds:

	£ s. d.		£ s. d.		£ s. d.
1871	3 — —	1875	2 15 —	1879	1 15 —
1872	4 5 —	1876	3 — —	1880	2 12 6
1873	3 5 —	1877	2 7 6	1881	1 15 —
1874	3 — —	1878	2 5 —		

PORT TRUSTS
