FOREWORD

In older countries where industrial conditions tend to be static, books on industry may not make any practical difference even two or three years after publication. But in a country like Japan where changes are almost dynamic, such books are often apt to become quickly out of date. Since the Manchurian Affair of 1931, Japan has made enormous strides in commerce and industry. Many books have since appeared on the subject—both in English and Japanese. But actual progress in Japan is fast making these books into mere records of the past.

In the autumn of 1936, I returned Home from England where I had served as Acting Consul-General for Japan in London, and concurrently as Commercial Secretary of the Japanese Embassy. My own surprise at the development of Japanese industry achieved during my absence from Japan made me feel as if I had been an Urashima Tarō* myself. Now I am fortunate enough to witness personally from within the changes which are taking shape under the strenuous conditions imposed by the present China Affair.

The present book is intended as a rough sketch of the main changes that took place in Japanese trade and industry during the period 1930–1939, with special emphasis on the conditions brought about by the present China Affair. I have tried to present to the Western reader, in a condensed, yet comprehensive form, such of the latest facts and figures as are otherwise accessible only to those who can read the Japanese language. Care has also been taken to furnish the Western reader with data that will likely be helpful to him in finding an answer to the question: Can

^{*} Urashima Tarō, a legendary Japanese counter-part of Rip van Winkle.

Japan reconstruct China without foreign assistance? He will therefore find in the present book an abundance of facts and figures from which he may draw his own conclusion as to the economic future of Japan. My estimates of the national wealth of Japan are published for the first time in this book. In all cases the sources are indicated either in foot-notes or separate notes. A short bibliography is appended for the convenience of those who would pursue further study of the subjects discussed in the present book. The figures contained in this book are corrected so far as possible by the materials which had been made available by the early part of March, 1939.

The present book has further been supplemented, where it was found necessary, by the results of personal observations made during a 1,500 mile tour in the countryside of Japan undertaken in March, 1939. I visited a number of fishing hamlets and agricultural villages in the prefectures of Iwate, Nagano, Niigata, Toyama, Ishikawa, Fukui, Aichi and Kanagawa and saw there many factories, urban and rural. I met village headmen, policemen, postmasters, farmers, fishermen and small industrialists and discussed their problems with them.

I wish to acknowledge here my indebtedness to each and every one who helped me in the preparation and publication of this book. Especially, I wish to express my gratitude to Marquis Daté of the Department of Finance, and Mr. K. Hattori of the Mitsubishi Bureau of Economic Research, for assisting me in the collection of many valuable data; to Mr. Katsumi Niirō and Dr. Thomas Baty, Barrister-at-Law, both of the Foreign Office, for their helpful criticism of the manuscripts; and to Mr. Shikao Matsushima, Director of the Bureau of Commercial Affairs in the Foreign Office, for placing at my disposal various books and official publications, and also for writing in Japanese characters the title of the book that appears on the back

of its cover. These gentlemen have, however, nothing to do with the views expressed in this book. Those views are entirely mine, and I alone am responsible for them.

My acknowledgements are also due to the publisher of this book. He went out of his usual way to gratify my wishes in many respects. An instance may be placed on record here. I asked him if he could produce a presentable book without using imported binding-cloth and printing paper. He went further than my request. He negotiated with a paper-mill and succeeded in having specially manufactured for this book a class of paper made for the first time in the history of the Japanese paper-making industry entirely from home-produced materials. Hitherto the Japanese paper-mills did not make that class of paper, on which this book is printed, without using some imported ingredients. The binding-cloth for this book was spun, woven and dyed in Japan. Thus, without any thought of emulation, I may well have a modest pride in the fact that this book marks, in respect of the paper on which it is printed, a turning-point in the publishing business of Japan.

Isoshi Asahi.

Eifuku-Chō, Tōkyō. March 22, 1939. X.42.N3 51359

Quantity: Acreage of rice-field and dry-field as on the 1st of January of each year from the 62nd Annual Report of the Department of Finance, p. 182.

Actual acreage of agricultural land which has completed a pro-Quality: gramme of improvement under government subsidy, taken from the 13th Annual Statistical Report of the Dept. of Agriculture and Forestry, p. 5.

294 THE ECONOMIC STRENGTH OF JAPAN

3. MINES

6,499,651 (5.9% in 1930)

	Indices of Output	Wholesale Price Indices	1930 Value of Yen	National Wealth
1930	106(100)	÷100	100	6,499,651
1931	97(91)	÷ 84	108	5,914,682
1932	96(90)	÷ 80	112	5,849,685
1933	107(101)	÷ 99	102	6,564,647
1934	115(108)	÷ 98	110	7,019,623
1935	124(117)	÷102	114	8,059,567
1936	138(128)	÷109	117	8,969,500
1937	151(142)	÷131	108	9,814,473

Output indices are from the Statistical Year-Book of the League of Nations 1937-8, p. 182. As the original indices are said to be based on value, the multiplier was reduced to the basis of 1930 by means of wholesale price indices.

4. HARBOURS & CANALS

343,143 (0.3% in 1930)

	State Expenditure on Improvement of Harbours	Adjusted to 1930 Value of Yea	National Wealth
1930	10,549,134 Yen	Yen	343,143
1931	9,605,876	11,434,000	354,577
1932	16,257,594	20,321,250	374,898
1933	16,391,853	16,556,000	391,454
1934	11,706,783	11,944,000	403,398
1935	11,520,812	11,294,000	414,692
1936	13,447,985	12,336,000	427,028
1937	13,291,634	10,145,000	437,173

State expenditure is the total of three different items concerning the improvement of harbours taken from the 62ml Annual Report of the Dept. of Finance, p. 120. Allowance for depreciation is made by disregarding expenditure by local governments.

5. BRIDGES 483,000 (0.3% in 1930)

[&]quot;Iron bridges (1%)" means the proportion in value of iron bridges in 1930 Census of National Wealth, and so forth. Values for 1930 are from the 1930 census. Number of each class of bridges is from the 19th Statistical Annual of the Japanese Empire. Figures in brackets, i.e., (101) etc. are indices with 1930 as 100. Figures for 1936 and 1937 were assumed as having been the same as for 1935.

296 THE ECONOMIC STRENGTH OF JAPAN

6. Trees

6,706,815 (6.1% in 1930)

	Forest Hectares	Indices	National Wealth
1930	19,879,240	100	6,706,815
1931 -	20,111,464	101	6,773,883
1932	20,343,688	102	6,840,095
1933	20,575,913	103	6,975,087
1934	20,808,137	105	7,109,223
1935	21,040,361	107	7,243,359
1936	21,272,585	107	7,243,359
1937	21,504,809	109	7,377,495

Forest acreage for 1930 & 1935 from the 13th Statistical Report of the Dept. of Agriculture and Forestry, p. 151. In the other years, it was assumed that acreage annually increased by 696,673 hectares, which is the average annual increase from 1930 to 1935 inclusive.

7. Domestic Animals & Fowls

346,356 (0.3% in 1930)

	No. of Bovine Animals	No. of Horses	Total No.	Indices	National Wealth
1930	1,498,260	1,489,979	2,988,239	100	346,356
1931	1,512,352	1,477,271	2,989,623	100	346,356
1932	1,529,309	1,541,086	3,070,395	102	353,382
1933	1,559,833	1,501,177	3,061,010	102	353,382
1934	1,614,798	1,464,289	3,079,087	103	356,845
1935	1,684,461	1,448,481	3,132,942	104	360,308
1936	1,770,938	1,431,920	3,202,852	107	370,600
1937	_	_	3,202,852	107	370,600

In 1930, cows, oxen and horses represented 84% of the value under this heading. Sources: The 12th Statistical Report of the Dept. of Agriculture and Forsity, p. 103 & 108. For 1937, it was assumed that the volume remained unchanged from 1936.

8. BUILDINGS

22,843,300 (20.7% in 1930)

	. 'National Income Indices	Annual Incresse	National Wealth
1930	100	(thousand yen)	22,843,300
1931	ros	290,591	25,133,891
1932	r18	326,569	23,460,460
1933	T14	315,499	23,775,959
1934	126	348,709	24,124,668
1935	136	376,386	24,501,054
1936	142	392,990	24,894,044
1937	134	370,850	25,264,894

Dept. of Commerce and Industry figure for new buildings in 22 cities of Japan for 1937 was 485,814,554 yen. As similar figures for the other years are unavailable, the 1937 figure was first reduced to the 1930 value of money, which is 370,850,000 yen. The national income index being 134 for 1937 and 142 for 1936 the figure for 1936 was obtained by dividing 370,850,000 yen by 134 and multiplying the result by 142, and so on.

The population of the 22 cities was 16% of the entire population of Japan Proper (1930 Census). Depreciation allowance is made by disregarding building activities for the rest of Japan, the extent of which is not statistically available.

10. RAILWAYS

3,598,138 (3.3% in 1930)

	Kilometres		National
•	Worked	Indices	Wealth
1930	21,593	100	3,598,138
1931	22,206	103	3,706,106
1932	22,614	105	3,778,054
1933	23,029	107	3,850,001
1934	23,623	109	3,921,978
1935	24,235	112	4,029,914
1936	24,544	114	5,037,387
1937	24,544	114	5,037,387

Kilometres worked include both State-owned and private railways. Sources: Financial Statistics prepared by the Dept. of Finance, 1937, p. 446. For 1937, it was assumed that the kilometres worked remained the same as in 1936.

 MACHINERY & IMPLEMENTS FOR INDUSTRY 1,809,381 (1.7% in 1930)

		Quantity Indices			Quality Indices			
		Horse-power		Horse-power	Volume of		Less 1% for Depreciation	National Wealth
	În Use	Idie	Total	in Use	Output	Balance

1933	507,118	585,085	1,092,203	121	122	6,658,108
1934	535,317	661,809	1,197,126	132	134	7,313,004
1935	682,709	\$37,809	1,220,518	135	132	7,203,855
1936	803,664	539,635	1,343,299	148	135	7,367,579
1937	884,030	722,408	1,606,438	177	135	7,367,579

The gross value of products of all industries in Japan in 1930 was 11,193,178,000 yen, according to the Census of National Income for 1930.

Goods stocked at factories (employing 5 or more workers) from Factory Statistics for 1935, 1936, 1937.

Goods stored at warehouses from The Japan Economic Statistics for 1937 (Bank of Japan) as reported by the Japan Warehouses Association, p. 114. (End of year) In 1930 Census of National income, goods stored at these two sources represented 19.1% of the total.

18. Coins and Gold Bullion

916,643 (0.8% in 1930)

	Sub sidiary Coins	Gold Bullion	Total	Indices	National Wealth
1930	81,269	825,998 (100)	907,267 (99%)	100	916,643
1931	83,132	469,549	552,681	61	552,681
1932	82,824	425,068	507,892	55	507,892
1933	86,942	425,069	512,011	56	512,011
1934	88,937	466,338	555,275	61	555,275
1935	91,695	504,065	595,760	65	595,760
1936	94,347	548,342	642,689	71	642,689
1937	100,873	309,725	410,598	45	410,598

The nominal value of subsidiary coins was obtained from the 62nd Annual Report of the Dept. of Finance, pp. 348-9. The real value of the subsidiary coins was 20% of the nominal value in 1930 which figure was used in the compilation of the amount of national wealth in 1930. The same percentage was used to convert the nominal values for each year into the corresponding real value.

Gold for 1937 valued at 801,001,000 yen was converted into the 1930 valuation of gold at the rate of 750 milligrammes per yen. The new rate is 290 milligrammes.

- For 1937, it was assumed that the conditions remained unchanged from those of 1936.

APPENDIX B

(Supplementary to page 96)

GOVERNMENT STATEMENT REGARDING EXPANSION OF PRODUCTIVE CAPACITY

On March 8, 1939, the President of the Board of Planning disclosed, at the House of Representatives, the goal aimed at by the Programme of Industrial Expansion. The President gave the following percentages as the definite objectives which the Government seeks to attain by the end of 1941 (the year 1938 taken as 100):—

т.	Iron and steel	160 to 250
2.		130
	Light metals	1,000
	Other non-ferrous metals	1,000
4.		180
	Copper Lead	
	Zinc	190
	Zinc Tin	170
		200
5.	Petroleum and substitutes thereof	
	Volatile oil, natural	130
	" artificial	3,000
	Heavy oil, natural	400
	" artificial	900
	Alcohol	1,300
6.	Soda ashes	120
	Caustic soda	140
	Industrial salts	650
7.	Sulphate of ammonia	140
8.	Pulp for paper making	120
	" " rayon	320
9.	Gold	200
10.	Machine-tools	260
II.	Rolling stock	
	Locomotives	130
	Freight vans	150
	Passenger cars	170
12.	Motor-cars	500
13.	Sheep's wool	340

305

he President added further that, when the Programme of Indusl Expansion was realized throughout Japan, Manchoukuo and rth China, Japan would become self-supplied with the following icles:—

Iron and steel,
Coal,
Light metals,
Sods,
Sods,
Sulphate of ammonis,
Pulp,
Railway vehicles,
Motor-cars,
Vessels.
