other ways. I am indebted to the Agents General in London for New South Wales, Victoria, South Australia, Queensland, Tasmania, Western Australia and New Zealand for much help and valuable information. My special thanks are also due to Mr. J. G. Colmer, C.M.G., Secretary to the Office of the High Commissioner of Canada; to Mr. Just, Librarian in the same Office; to Mr. W. T. R. Preston, Inspector of Emigration Agencies for Canada; to Mr. Spencer Brydges Todd, C.M.G., Secretary to the Department of the Agent General for the Cape of Good Hope in London; to Dr. ThosMuir, F.R.S., Superintendent General of Education at the Cape of Good Hope; to Mr. R. Russell, junr., Secretary to the for Agent General for Natal in London; to Dr. Morris, C.M.G., Imperial Commissioner of Agriculture for the West Indies; to Mr. E. B. Sargant, formerly of the Civil Service Commission; to Mr. C. P. Lucas, C.B., Mr. H. W. Just, C.M.G., and Mr. E. im Thurn, C.B., C.M.G., of the Colonial Office; and to my colleagues Mr. A. E. Twentyman, Mr. R. Balfour, Miss Beard, Miss Green and Miss Matheson.

I have the honour to be, Sir, Your obedient servant,

MICHAEL E. SADLER,

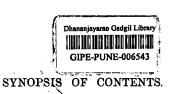

Director of Special Inquiries and Reports.

December, 1900.

As the work has proceeded, those engaged in the preparation of the reports have been increasingly impressed by the varied interest of the subject and by its growing importance. The most striking features of the reports, taken as a whole, may be summarised as follows:—

- (i.) During the last two or three years there has been an evident growth of interest in educational questions in nearly every part of the Empire. Within the last twelve months there have been remarkable and significant changes in the educational systems of some of the Colonies.
- (ii.) The chief characteristic of education throughout the British Colonies is the freedom with which it has been allowed to adjust itself to the different needs experienced by different parts of the Empire. There has been no centralised control over educational policy, though literary and other traditions have naturally had a strong influence on the scope and methods of instruction. The educational systems described in these volumes are marked by the utmost variety of legislative enactment.
- (iii.) But, at the same time, it is impossible not to be struck by indications of an increasing sense of the importance of united effort in such branches of education as bear on the economic welfare or collective interests of the Empire as a whole. This shows itself in an evidently growing desire to compare notes on educational matters and to benefit by the educational experience of other parts of the Empire where similar difficulties have been encountered.
- (iv.) There are many signs of uneasiness as to the possible dangers which may result from a tendency to bookishness in elementary education, and from a divorce between school studies and the practical interests of daily life.
- (v.) As a corrective of what is hurtful in such a tendency, and in 6rder to secure what is in itself a valuable and generally attractive element in education, there is a vigorous movement in favour of the introduction of various kinds of manual training and of simple forms of technical education into primary schools.
- (vi.) There are indications of difficulty in regard to the aim, scope and subject-matter of the education of native races, and some signs of disappointment at the ethical and social results of purely literary forms of primary instruction.
- (vii.) Speaking generally, there is comparative weakness in the provision of higher education, and especially of that type of secondary education which in this country is given at the great public schools. As a rule, secondary education has hitherto been left in the main to denominational and private effort.

I desire Take this opportunity of acknowledging the courtesy Colonial Authorities in furnishing reports for saistance in many

A.—AFRICA.
