— would cause realisation of securities and fall in their value, 50-51
— would destroy capital, or take it away from industry, 52
— would deplete companies' reserve funds, 52
— would be evaded through private concerns becoming joint stock companies, 53
— would prevent insurance companies from meeting their claims, 53
— would cause inflation, 53-54
— would cause deflation, 53, 54-56
— would reduce traders' borrowing capacity, 56
— would destroy a trading asset, 57
— would be ineffective owing to large holdings of public securities by banks, etc., 58
— is exploded by a knowledge of simple arithmetic, 58-59
— would be passed on to consumers of commodities, 59-60
— would not produce new wealth, 60
— would deprive the public of a safe investment, 60-61
— would not lead to reduced taxation, 61
— would be evaded by export of capital, 61-62
— would discourage saving, 62-63
— would give a shock to business confidence, 63, 64-65
— would increase unemployment, 63-64
— the present not a good time, 64-65
— no guarantee against repetition, 65-66
— no guarantee that income tax would be reduced, 66
— no guarantee that proceeds would be used to reduce Debt, 66
