## PREFACE.

This book is published on the initiative and the authority of the Delegations which were established in 1934 by the respective Governments for the promotion of economic co-operation between the Northern Countries. The members nominated to these Delegations are representatives of different branches of economic life. Conferences between them have been held in the Northern Capitals in turn.

A great number of economic problems have been discussed at these conferences, and on the basis of the decisions arrived at steps have been taken for their realisation in practice. On many occasions the lack of a general survey of the position of the Northern Countries in World Economy was felt. Subsequently, the Delegations established an Editorial Committee to prepare such a survey, and as a result of their work this book is now published.

The present publication deals not only with the common economic problems of the Countries of the North and with co-operation between them; it is also in itself a manifestation of the spirit of co-operation among the Northern Nations.
