WHEAT FUTURES PRICES AND TRADING AT LIVERPOOL SINCE 1886

Holbrook Working and Sidney Hoos

X96.

World-wide influences affecting wheat prices converge to a peculiar degree in the British market for imported wheat. Representative prices of such wheat deserve better than any others to be regarded as "world" wheat prices. The average price of all wheat imported into the United Kingdom seems the most broadly representative of the various series. Better for some purposes is the monthly average of spot prices of "good red wheat" compiled by Broomhall, or the average parcels price which we compile. For short-period comparisons, prices of Liverpool wheat futures are best of all.

Comparisons among these series show that the futures prices are in fact admirably representative of the general level of prices of British imported wheat and are useful for long-period as well as for short-period comparisons. Accompanying tables and charts give a complete record of the prices of Liverpool wheat futures monthly and weekly from 1886, for five delivery months in each year.

That Liverpool futures so well represent the general level of imported wheat prices is a result of effective adaptation to difficult conditions. The history of the Liverpool futures contract is one of progressive improvement. A prime objective in the evolution of the contract has been adaptation to the needs for hedging wheat in channels of international trade.

From the standpoint of volume of trading or volume of open contracts, the Liverpool futures market ranks far below Chicago and Winnipeg. It is pre-eminent in balanced reflection rather than in generation of price influences. A large proportion of its business originates with hedgers, and with speculators who take a long view of the price outlook. Although peculiarly vulnerable to "corners" and "squeezes," Liverpool has succeeded remarkably in avoiding such manipulation.

APPENDIX NOTES

A. ORIGINAL FUTURE DELIVERY CONTRACT FOR GRADED WHEAT

The contract forms used for recording purchases and sales of wheat for future delivery at Liverpool, since 1903 at least, have stated the terms of the contract in considerable detail. The buyer fills out one form, the seller another. There are minor differences in wording between forms used by members buying or selling in their own names, and forms used by brokers buying or selling in the names of other members. Below is given the text of a contract of *purchase* by a *broker* under the terms of the original graded wheat contract adopted April 15, 1903.¹

AMERICAN WHEAT must be Wheat grown East of
the Rocky Mountains in the United States of North
America and/or Canada except where otherwise
provided.

The definitions (on the contract forms) of the four grades of wheat established under the original graded wheat contract were supplemented by grading rules adopted at the same time, as follows:

No wheat shall be graded which, in the opinion of the Committee, has any defect which would render it unsuitable for general milling purposes.

Grade A shall be practically free from frosted, sprouted, and heated grains, and entirely free from smut.

Grade B shall be reasonably free from smut and frosted, sprouted or heated grains, but the word "rea-

sonably" shall not be construed as admitting more than occasional smutted, frosted, sprouted or heated grains.

Grade C—When the minimum weight for each description is barely exceeded, only occasional smutted, frosted, sprouted or heated grains shall be admitted, but in proportion to the improvement in weight and other requirements, a somewhat larger quantity of smutted, frosted, sprouted or heated grains may be admitted.

Grade D shall be judged on similar definitions to those of Grade C, but the causes leading to inferiority in weight shall be taken into consideration.¹

B. PRESENT FUTURE

DELIVERY CONTRACT

[Endorsement]

This Contract was made on the date specified, and within the business hours fixed by the Liverpool Corn Trade Association, Limited.

AMERICAN RED WHEAT.

SPRING WHEAT. If of the type known as Manitoba, basis of weight 60 lbs.

If of the type known as Northern (grown in the United States), basis of weight 60 lbs.

Any other type of Spring Wheat, basis of weight 60 lbs.

SOFT WINTER WHEAT, free from garlic, basis of weight 61 lbs.

HARD WINTER WHEAT, basis of weight, 60½ lbs.

ARGENTINE WHEAT.

Basis of weight 60½ lbs.

AUSTRALIAN WHEAT.

Basis of weight 60½ lbs.

No Wheat shall be graded which, in the opinion of the Grading Committee, has any defect which would render it unsuitable for general milling purposes.

Subject always to this proviso, basis Wheat may contain some heated, sprouted, frosted, and/or smutted grains, and a proportionately increased quantity may be allowed if warranted by an improvement in weight or in other respects.

No Wheat weighing more than one pound per imperial bushel under the basis weight shall be graded.

No Wheat which complies with the weight requirements shall be rejected on account of the presence of heated, sprouted, frosted and/or smutted grains or other defects if, in the opinion of the Grading Committee, it is not more than one penny per cental inferior to basis quality.

The allowances, if any, shall be in gradations of not less than one halfpenny per cental.

The basis of weight as hereinbefore provided is per imperial bushel at time of grading.

Spring Wheats must be reasonably hard of their respective types, and all descriptions of Wheat must be reasonably clean of their respective types.

American Red Wheat must be Wheat grown East of the Rocky Mountains in the United States of North America and/or Canada, except where otherwise provided.

* Averages of daily closing prices on all trading days of each month; sources as indicated for corresponding periods in Tables II, III, and IV. When regular trading in one future continued through less than a full month, as many as three missing quotations have been supplied by interpolation to obtain an average for the month (interpolation on basis of quotations for adjacent future, assuming constant spread). In the early years, there was trading in many delivery months not here represented (see p. 145).

^a Trading continued into October 1896, but this future dropped to minor importance after 1891. ^b "American Red," 1891–1903; "Graded Red" from 1903.

¹ The Liverpool future deserved technically to be called merely a "Graded" rather than a "Graded Red" wheat future from 1910, when Australian wheat was made tenderable on futures contracts. The term "red" was not dropped

from the designation, nor were tenders of Australian wheat large enough to make the older designation inappropriate in fact, until after 1914 (see text, p. 148, and note a to tabulation, p. 144).
