WAGES AND HOURS OF LABOR IN THE LUMBER INDUSTRY IN THE UNITED STATES, 1925

INTRODUCTION AND SUMMARY

This report presents the results of a study of wages and hours in sawmills and logging camps in 1925.¹ The information compiled covers 61,193 wage earners (including 38 females) employed in 299 sawmills in 23 States and 9,133 wage earners in 72 logging camps in 10 of the same States. Every logging camp from which data were secured was operated in connection with a sawmill furnishing wage figures. Wages and hours for logging camps are shown after the general sawmill tables.

The average hourly earnings of all the employees in the sawmills mentioned above were \$0.357, the average full-time hours per week were 58.1, and the average full-time earnings per week were \$20.74.

Changes in wage rates and hours in the industry as a whole are shown by the following table of index numbers for the years indicated from 1910 to 1925, on the basis of 1913 as 100. These figures do not include logging data, being based solely on sawmill wages and hours.

TABLE 1.—INDEX NUMBERS OF FULL-TIME HOURS PER WEEK, EARNINGS PER HOUR, AND FULL-TIME EARNINGS PER WEEK IN THE LUMBER MANUFACTURING INDUSTRY IN SPECIFIED YEARS, 1910 TO 1925

[1913=100]

Year	Index numbers of—		
	Full-time hours per week	Earnings per hour	Full-time earnings per week
1910.....	100	97	98
1911.....	100	95	98
1912.....	101	98	97
1913.....	100	100	100
1915.....	100	91	91
1919.....	92	104	170
1921.....	94	166	156
1923.....	94	180	170
1925.....	94	178	168

From 1910 to 1915 the customary hours of work changed very little, but by 1919 the hours had been reduced by 8 per cent, as shown by the index 92. From 1919 to 1921 the hours increased to an index of 94, or 6 per cent less than in 1913, at which point they have remained.

¹ Earlier reports of the bureau relating to wages and hours in the lumber industry may be found in the Nineteenth Annual Report and in Bulletins Nos. 69, 95, 71, 77, 129, 153, 225, 266, 317, and 363.

The earnings per hour fluctuated somewhat from 1910 to 1915, the index reaching its lowest point of 91 in 1915. By 1919 the rate had jumped to 194, or 94 per cent above the 1913 rate. War conditions were responsible for this great change. By 1921 the rate had dropped back to 166, but by 1923 it had gone to 180, with a very slight recession in 1925 to 178.

Full-time earnings per week showed somewhat smaller increases than earnings per hour, owing to the reduction in the customary hours worked.

The agents of the bureau obtained from the pay rolls the figures for one pay period, varying in length in the different mills from one week to one month.

Of the 299 sawmills scheduled, 121 were for a one-week pay period, 126 were for a two-week or half-month pay period, and 52 were for a one-month pay period. Data from May pay rolls were used for 108 schedules; June, 96 schedules; April, 73 schedules; March, 20 schedules; and February, 2 schedules.

CHANGES IN WAGES AND HOURS

Wage changes since June 1, 1923, as reported by the different establishments, show wage increases by 26 establishments and decreases by 74 establishments. No wage changes were made by 199 establishments. Of the 26 mills reporting increases, 1 reported 22 per cent, 1 reported 20 per cent, 1 reported 16 $\frac{3}{8}$ per cent, 2 reported 15 per cent, 11 reported 10 per cent, 1 reported 9 per cent, 2 reported 7 per cent, 1 reported 5 per cent, 2 reported 4 per cent, 1 reported 1 per cent, and 3 reported 25 cents per day.

Of the 74 mills reporting decreases, 2 reported 25 per cent, 5 reported 20 per cent, 1 reported 16 $\frac{3}{8}$ per cent, 14 reported 10 per cent, 1 reported 6 per cent, 1 reported 3 per cent, 14 reported 50 cents per day, 7 reported 40 cents per day, 2 reported 30 cents per day, 13 reported 25 cents per day, 1 reported 14 cents per hour, 11 reported 5 cents per hour, and 2 reported 2 $\frac{1}{2}$ cents per hour. Thirteen mills reported various increases to employees in certain occupations and 2 reported decreases in certain occupations.

The net result of these changes was a slight reduction in wages of between 1 and 2 per cent.

BONUSES AND PAY FOR OVERTIME AND SUNDAY

Changes in hours were made by only 7 mills, one of which changed from 60 to 72 hours per week and 2 increased 1 hour per day, 1 decreased 5 hours per week, 1 decreased 2 hours per week, 1 decreased one-half hour per week, and 1 changed from 6 to 5 days per week. Only 17 mills reported having paid an extra rate for overtime and Sunday work. Four mills paid 25 per cent and 13 mills paid 50 per cent extra for such work. Bonuses were paid by only 3 mills.

ESTABLISHMENTS, WAGE EARNERS, HOURS AND EARNINGS

Earnings per hour, hours per week, and full-time earnings per week in the industry in the United States are presented for 1925. Comparative summary figures are shown for each year from 1907 to 1925, inclusive, except for the following years in which no surveys were made, 1914, 1916, 1917, 1918, 1920, 1922, and 1924.

ESTABLISHMENTS, WAGE EARNERS, HOURS AND EARNINGS 3

Table 2 shows by States the average number of employees in the industry as reported by the United States Census of Manufactures, May to October, inclusive, 1919; the number of establishments from which the bureau obtained data in 1923 and 1925; the number of wage earners in these establishments for both years; and in addition, the average full-time hours per week, earnings per hour, full-time earnings per week for all wage earners reported in each State taken as a collective group, all occupations combined, for 1923 and 1925.

TABLE 2.—NUMBER OF ESTABLISHMENTS AND OF WAGE EARNERS REPORTED AND AVERAGE HOURS AND EARNINGS IN SAWMILLS IN 1923 AND 1925, BY STATE

Full-time hours per week are the regular customary hours during which under normal conditions the employees in an occupation are on duty. The full-time earnings per week are the earnings of employees working full time or the earnings on broken or short time reduced to equivalent earnings for a full week.

According to the 1919 census figures over 91 per cent of the total number of wage earners in the industry are found in the States in which the establishments furnishing data to the Bureau of Labor Statistics are located. The number of employees for whom the bureau obtained 1923 data is nearly 15 per cent of the total number in the industry and the number in 1925 is over 20 per cent of the total.

The total number of employees in sawmills scheduled in 1925 was 61,193. Of this number 38 were women who worked in common-labor occupations and are not shown in the tables which follow. These women were reported from 5 different establishments in 4 different States. The number of mills scheduled is 299, divided as follows: 49 in the Far West, 50 in the Northern States, and 200 in the Southern States.

Some employees were found working at more than one occupation during the pay period taken and were tabulated under each occupation, thus causing a few duplications.

EARNINGS, HOURS, AND INDEX NUMBERS, 1907 TO 1925

Table 3, which follows, shows averages for full-time hours per week, earnings per hour, and full-time earnings per week for the employees in 11 separate selected occupations. All of the remaining employees are grouped under "other employees." Paralleling these averages are shown index numbers for each occupation except "saw tailers, head saw" and "other employees" for whom no separate data were obtained for 1913, which is the base year, equaling 100. Comparative figures are shown for each designated year from 1907 to 1925 wherever the data were available. No data were collected in the missing years.

The index numbers for 1925 when compared with 1923 show an increase in full-time hours of from 1 to 3 points in each of 7 occupations and a decrease of 3 points in 1 occupation. In 2 occupations no change occurs.

In comparing the index numbers for earnings per hour for the years 1923 and 1925, a decrease of from 1 to 10 points is shown in 8 occupations, no change in 1 occupation, and an increase of 19 points in 1 occupation. Full-time earnings per week show decreases ranging from 1 to 8 points in 6 occupations, increases of from 1 to 2 points in 3 occupations, and no change in 1 occupation.

These points in the index numbers must not be read as percentages of change as between years. If percentage of change between years is desired, compute by dividing the index of the later by that of the earlier year.

In the occupation of saw tailers, for which no index numbers are shown, hours increased and earnings decreased slightly in 1925 as compared with 1923. In the group of other employees hours and earnings both increased between 1923 and 1925.

ESTABLISHMENTS, WAGE EARNERS, HOURS AND EARNINGS

TABLE 3.—AVERAGE FULL-TIME HOURS PER WEEK, EARNINGS PER HOUR, AND FULL-TIME EARNINGS PER WEEK, WITH INDEX NUMBERS, 1907 TO 1925, BY OCCUPATION AND YEAR

LUMBER PRODUCTION IN THE UNITED STATES

Some idea of the importance and extent of the lumber industry in the United States may be gained from the facts presented in Tables 4 and 5. These figures are taken from the reports of the United States Bureau of the Census.

Table 4 shows the number of active sawmills in the United States reporting to the Census Bureau for the year 1922, together with their product in thousands of board feet classified by kinds of lumber produced in the various States. The total number of board feet produced was 31,568,888,000, divided as follows: 26,644,334,000 feet of softwood and 4,924,554,000 feet of hardwood. More than one-third of the total product was yellow pine.

TABLE 4.—ACTIVE SAWMILLS REPORTING AND REPORTED PRODUCTION OF EACH KIND OF LUMBER, BY STATE, 1922

1 Including Nevada.

LUMBER PRODUCTION IN THE UNITED STATES

Table 5 shows the census figures for the number of establishments, number of wage earners, total wages paid, total value of the product, and total value added by manufacture in lumber and timber products in the United States in 1914, 1919, and 1921. The figures for 1921 are also shown by States. Averages per wage earner have been computed for wages, value of product, and value added by manufacture. Value of manufactures is equal to the value of the product less the cost of material.

TABLE 5.—LUMBER AND TIMBER PRODUCTS AS REPORTED BY THE UNITED STATES CENSUS BUREAU FOR THE YEARS 1914, 1919, AND 1921

[The figures for 1914 and 1919 include all establishments reporting products valued at \$500 or more. The figures for 1921 do not include 7,719 establishments, employing 11,322 wage earners, producing \$17,589,888, these establishments having products valued at less than \$5,000 each]

State	Number of establishments	Average number of wage earners	Total wages	Total value of product	Total value added by manufacture	Average per wage earner of—

DAILY AND WEEKLY FULL-TIME HOURS

Table 6 is a classification of the 299 mills by States according to the full-time or customary hours worked per day from Monday to Friday, on Saturday, and per week. The classification begins with the lowest and ends with the highest number of hours per week. Forty-one mills worked 48 hours or less per week, 31 worked over 48 hours and less than 60 hours per week, 206 worked 60 hours per week, and 21 worked over 60 hours per week. Two mills ran only 5 days per week. One mill ran 5 days per week and every fourth Saturday.

The hours of the table refer to day work. If there were night shifts and the hours were the same as for day shifts, no note is made. If there were night shifts and the hours were different, notes show the night-shift hours.

DAYS OF OPERATION AND OF IDLENESS

Table 7 shows by States the average number of days the sawmills operated and the average number of days the mills were idle classified by causes of idleness. The Texas mills show the highest average days run in the year ending March 31, 1925, having operated 302 days. Maine averaged the lowest, 189 days. Maine's low average was caused largely by seasonal shutdowns. No mills were operated on Sunday. The average days operated by 297 mills was 273. Two mills did not begin operating until after April 1, 1924, so are not included in the table. An average of 4 days was lost in holidays and vacations, 5 days because of no market, 14 days for repairs, 7 days because of lack of supply of logs, 1 day for bad weather, 7 days for seasonal shutdown, and 2 days for various other causes.

TABLE 7.—AVERAGE NUMBER OF DAYS OF OPERATION AND OF DAYS IDLE BY SPECIFIED CAUSES, APRIL 1, 1924, TO MARCH 31, 1925, BY STATE

State	Number of establishments	Average number of days mills operated	Average number of week days idle on account of—

1 Less than 1 day.

1 Not including 1 mill that began operations after Apr. 1, 1924.

1 Not including 2 mills that began operations after Apr. 1, 1924.

HEAD SAWS, NUMBER OF, AND OF DAYS OF OPERATION

The head saw is the large saw which first receives the log in the process of lumber manufacture. It usually saws the log into boards or timbers of final thickness, but may be employed only to cut the log down to one solid piece, flat on two opposite sides, called a cant, a resaw or gang saw being used in a later operation to further reduce the size of the lumber.

Table 8 shows by States the number of mills, number of head saws, average number of head saws per mill, average number of days mills operated, average number of shifts each head saw was operated during day, night, and third shifts, and the number of mills operating each, specified number of head saws. Of the 299 mills reporting, 138 operated 1 head saw each, 127 operated 2 head saws each, 25 operated 3 head saws each, 4 operated 4 head saws each, 4 operated 5 head saws each, and 1 mill operated 7 head saws. A total of 510 head saws were operated by the 299 mills or an average of 1.7 head saws per mill. The head saws reported averaged 271 day shifts, 64 night shifts, and 0.5 of a third shift, a total of 335 shifts during the year.

TABLE 8.—NUMBER OF HEAD SAWS AND OF DAYS OF OPERATION FOR THE YEAR ENDING MARCH 31, 1925, BY STATE

¹ Not including 1 mill that began operations after Apr. 1, 1924.

² Not including 2 mills that began operations after Apr. 1, 1924.

Table 9 shows the number of head saws, the average number of days of operation during the year ending March 31, 1925, by States. The head saws are classified by the number of days operated. The table is divided into two groups, one group showing day shifts and one night shifts. In addition to these groups two mills operated three shifts per day of 24 hours.

On the day shift 507 saws averaged 271 shifts; on the night shift 162 saws averaged 200 shifts; and on the third shift 3 saws averaged 71 shifts. Two mills with 3 head saws are not included in the table as they had not commenced operating at the beginning of the year covered.

EARNINGS AND HOURS—1923 AND 1925 COMPARED

Table 10 shows the average earnings per hour for 8 typical occupations in 1923 and 1925. It also shows a classification of employees as to earnings per hour both by number and per cent at each specified rate. Earnings of doggers and of trimmer operators were not classified in 1923, so the figures are not shown for that year.

TABLE 10.—AVERAGE AND CLASSIFIED EARNINGS PER HOUR FOR EMPLOYEES IN 8 TYPICAL OCCUPATIONS IN 1923 AND 1925

¹ Less than 1 per cent.

GENERAL TABLES

In addition to the summary tables shown in the text six general tables are presented as follows:

TABLE A.—Average earnings per hour, full-time earnings per week, and average and classified full-time hours per week, 1925, by occupation and State.

TABLE B.—Average and classified earnings per hour in 8 typical occupations, 1925, by State.

TABLE C.—Average actual and classified hours worked per pay period in 8 typical occupations, 1925, by State. This table is divided into three sections representing three pay periods—one-week period, two-week or half-month period, and one-month period.

TABLE D.—Average actual and classified earnings per pay period in 8 typical occupations, 1925, by State. This table has the same divisions as Table C.

TABLE E.—Average and specified number of days on which employees worked, 1925, by occupation. This table also is shown in three sections.

TABLE F.—Average number of days on which employees worked, average full-time hours and hours actually worked, and average full-time and actual earnings, 1925, by occupation, pay period, and State.

The purpose of Table F is to afford a comparison of average full-time hours and average hours actually worked in the pay period and a comparison of average full-time earnings with average actual earnings. The difference is shown quite clearly by the percentage column, the actual difference being shown by the difference between 100 per cent or full-time and the per cent in the table which shows actual time worked.

TABLE A.—AVERAGE EARNINGS PER HOUR, FULL-TIME EARNINGS PER WEEK, AND AVERAGE AND CLASSIFIED FULL-TIME HOURS PER WEEK, 1925, BY OCCUPATION AND STATE

WAGES AND HOURS IN LOGGING CAMPS

In addition to the statistics shown for sawmills, the following figures are submitted for wages and hours of labor in the logging camps obtained from 72 establishments in 10 States.

The total number of employees scheduled was 9,133.

The following States were selected in which to obtain data representing this branch of the industry:

State	Establishments	Employees
Arkansas.....	6	392
California.....	8	1,041
Idaho.....	4	407
Louisiana.....	15	1,861
Mississippi.....	8	1,691
Montana.....	4	372
North Carolina.....	7	1,093
Oregon.....	7	1,024
Washington.....	10	917
West Virginia.....	4	275
Total.....	72	9,133

In Table G are shown for each State from which data for logging camps were obtained, the number of employees, full-time hours per week, the wage rates, and the equivalent rates per hour, by occupation.

On account of the many differences in organization, nomenclature, and conditions, no attempt has been made to summarize these figures.

The occupations are arranged alphabetically for each State. Different occupation names may occur in the same State which may indicate the same or similar work, but it has been thought best to use the terms in vogue in the locality and in the establishment from which the data were obtained.

In some occupations, such as those in the cookhouse, employees are given board in addition to their wages. Where this occurs a note to that effect is shown. All full-time hours per week are for 6 days unless shown otherwise by note.

TABLE G.—NUMBER OF EMPLOYEES, FULL-TIME HOURS PER WEEK, AND RATES OF WAGES IN LOGGING CAMPS, 1935, BY STATE AND OCCUPATION

[h=hour, d=day, w=week, m=month]

SERIES OF BULLETINS PUBLISHED BY THE BUREAU OF LABOR STATISTICS

*The publication of the annual and special reports and of the bimonthly bulletin was discontinued in July, 1912, and since that time a bulletin has been published at irregular intervals. Each number contains matter devoted to one of a series of general subjects. These bulletins are numbered consecutively, beginning with No. 101, and up to No. 236 they also carry consecutive numbers under each series. Beginning with No. 237 the serial numbering has been discontinued. A list of the series is given below. Under each is grouped all the bulletins which contain material relating to the subject matter of that series. A list of the reports and bulletins of the bureau issued prior to July 1, 1912, will be furnished on application. The bulletins marked thus * are out of print.*

Wholesale Prices.

- *Bul. 114. Wholesale prices, 1890 to 1912
- Bul. 149. Wholesale prices, 1890 to 1913.
- *Bul. 173. Index numbers of wholesale prices in the United States and foreign countries.
- *Bul. 181. Wholesale prices, 1890 to 1914.
- *Bul. 200. Wholesale prices, 1890 to 1915.
- *Bul. 226. Wholesale prices, 1890 to 1916.
- Bul. 269. Wholesale prices, 1890 to 1919.
- Bul. 284. Index numbers of wholesale prices in the United States and foreign countries. [Revision of Bulletin No. 173.]
- Bul. 296. Wholesale prices, 1890 to 1920.
- Bul. 320. Wholesale prices, 1890 to 1921.
- Bul. 335. Wholesale prices, 1890 to 1922.
- Bul. 367. Wholesale prices, 1890 to 1923.
- Bul. 390. Wholesale prices, 1890 to 1924.

Retail Prices and Cost of Living.

- *Bul. 105. Retail prices, 1890 to 1911: Part I.
Retail prices, 1890 to 1911: Part II—General tables.
- *Bul. 106. Retail prices, 1890 to June, 1912: Part I.
Retail prices, 1890 to June, 1912: Part II—General tables.
- Bul. 108. Retail prices, 1890 to August, 1912.
- *Bul. 110. Retail prices, 1890 to October, 1912.
- Bul. 113. Retail prices, 1890 to December, 1912.
- Bul. 115. Retail prices, 1890 to February, 1913.
- *Bul. 121. Sugar prices, from refiner to consumer.
- Bul. 125. Retail prices, 1890 to April, 1913.
- *Bul. 130. Wheat and flour prices, from farmer to consumer.
- Bul. 132. Retail prices, 1890 to June, 1913.
- Bul. 136. Retail prices, 1890 to August, 1913.
- *Bul. 138. Retail prices, 1890 to October, 1913.
- *Bul. 140. Retail prices, 1890 to December, 1913.
- Bul. 156. Retail prices, 1907 to December, 1914.
- *Bul. 164. Butter prices, from producer to consumer.
- Bul. 170. Foreign food prices as affected by the war.
- *Bul. 184. Retail prices, 1907 to June, 1915.
- Bul. 197. Retail prices, 1907 to December, 1915.
- Bul. 228. Retail prices, 1907 to December, 1916.
- Bul. 270. Retail prices, 1913 to December, 1919.
- Bul. 300. Retail prices, 1913 to December, 1920.
- Bul. 315. Retail prices, 1913 to 1921.
- Bul. 334. Retail prices, 1913 to 1922.
- Bul. 357. Cost of living in the United States.
- Bul. 366. Retail prices, 1913 to December, 1923.
- Bul. 369. The use of cost-of-living figures in wage adjustments.
- Bul. 396. Retail prices, 1890 to 1924.

* Supply exhausted.

Wages and Hours of Labor.

- Bul. 116. Hours, earnings, and duration of employment of wage-earning women in selected industries in the District of Columbia.
- *Bul. 118. Ten-hour maximum working-day for women and young persons.
- *Bul. 119. Working hours of women in the pea canneries of Wisconsin.
- *Bul. 122. Wages and hours of labor in the cotton, woolen, and silk industries, 1896 to 1912.
- *Bul. 129. Wages and hours of labor in the lumber, millwork, and furniture industries, 1890 to 1912.
- *Bul. 131. Union scale of wages and hours of labor, 1907 to 1912.
- *Bul. 134. Wages and hours of labor in the boot and shoe and hosiery and knit goods industries, 1891 to 1912.
- *Bul. 135. Wages and hours of labor in the cigar and clothing industries, 1911 and 1912.
- Bul. 137. Wages and hours of labor in the building and repairing of steam railroad cars, 1890 to 1912.
- Bul. 143. Union scale of wages and hours of labor, May 15, 1913.
- *Bul. 145. Wages and regularity of employment and standardization of piece rates in the dress and waist industry of New York City.
- *Bul. 147. Wages and regularity of employment in the cloak, suit, and skirt industry.
- *Bul. 150. Wages and hours of labor in the cotton, woolen, and silk industries, 1907 to 1913.
- *Bul. 151. Wages and hours of labor in the iron and steel industry in the United States, 1907 to 1912.
- Bul. 153. Wages and hours of labor in the lumber, millwork, and furniture industries, 1907 to 1913.
- *Bul. 164. Wages and hours of labor in the boot and shoe and hosiery and underwear industries, 1907 to 1913.
- Bul. 180. Hours, earnings, and conditions of labor of women in Indiana mercantile establishments and garment factories.
- Bul. 161. Wages and hours of labor in the clothing and cigar industries, 1911 to 1913.
- Bul. 103. Wages and hours of labor in the building and repairing of steam railroad cars, 1907 to 1914.
- Bul. 168. Wages and hours of labor in the iron and steel industry, 1907 to 1913.
- *Bul. 171. Union scale of wages and hours of labor, May 1, 1914.
- *Bul. 177. Wages and hours of labor in the hosiery and underwear industry, 1907 to 1914.
- Bul. 178. Wages and hours of labor in the boot and shoe industry, 1907 to 1914.
- *Bul. 187. Wages and hours of labor in the men's clothing industry, 1911 to 1914.
- *Bul. 190. Wages and hours of labor in the cotton, woolen, and silk industries, 1907 to 1914.
- *Bul. 194. Union scale of wages and hours of labor, May 1, 1915.
- Bul. 204. Street railway employment in the United States.
- Bul. 214. Union scale of wages and hours of labor, May 15, 1916.
- Bul. 218. Wages and hours of labor in the iron and steel industry, 1907 to 1915.
- Bul. 221. Hours, fatigue, and health in British munition factories.
- Bul. 225. Wages and hours of labor in the lumber, millwork, and furniture industries, 1915.
- Bul. 232. Wages and hours of labor in the boot and shoe industry, 1907 to 1916.
- Bul. 238. Wages and hours of labor in woolen and worsted goods manufacturing, 1916.
- Bul. 239. Wages and hours of labor in cotton-goods manufacturing and finishing, 1916.
- Bul. 245. Union scale of wages and hours of labor, May 15, 1917.
- Bul. 252. Wages and hours of labor in the slaughtering and meat-packing industry, 1917.
- Bul. 259. Union scale of wages and hours of labor, May 15, 1918.
