The present issue of the Statistical Abstract (New Series, No. 11) incorporates in a single Volume the latest available data under the important heads of economic and social development. In addition to national aggregates for a period of five to ten years generally, information in respect of individual States of the Indian Union is given for the latest available year. Every year the Abstract introduces new material and eliminates relatively less useful data. The alterations made have been listed in tabular statements on pages v-ix.

2. The publication would serve not only as a convenient source of reference but also as a key to other statistical publications of Central Government agencies. The primary sources are indicated at the foot of each table; the relevant publications of the Departments mentioned will furnish more detailed information. The various sections of the Abstract are preceded by brief explanatory notes which are intended to be read in conjunction with the tables.

3. The continuing co-operation and suggestions for the improvement of the Abstract received from the various Ministries of the Government of India, the State Governments and the public are acknowledged with gratitude.

4. Figures have been presented throughout in metric units of weights and measures. The co-efficients used for conversion of old units into metric units are given below —
