

AGRICULTURAL STATISTICS

OF

BRITISH INDIA

FOR THE YEARS

1894-95 TO 1898-99.

Explanatory Memorandum.

In 1866 tables, in certain forms proposed by a specially appointed Statistical Committee, were prescribed by the Government of India for general adoption as appendices to the annual reports on general administration.

In 1884, at the instance of the Secretary of State for India, some of these forms, relating to agriculture, land, and tenures, were reconsidered and modified, after examination and discussion by a conference of officers of the Agricultural Departments. The modified returns comprised eight tables, which were compiled for the first time for the year 1884-85 and published under the title of 'Returns of Agricultural Statistics of British India.' These tables were prepared and published annually until 1887-88, when a re-arrangement was made of the headings of four statements dealing with area, irrigation, crops, and agricultural stock, though no modification was made in substance.

In 1891 the tables were again revised and, to some extent, recast. The revised series of 1891 has, with a few unimportant alterations, been maintained to the present time, with the exception that one table (wholesale prices) has been discontinued, other arrangements having been made to secure a record of prices.

The following schedule compares the three series of 1866, 1884, and 1891 :—

| 1866. | 1884. | 1891. |
|--|---|--|
| IA. 1.—Area cultivated and uncultivated. | A.—Area cultivated and un- cultivated. | } A.—Total acreage, classifi- cation of areas, irriga- tion, current fallows, area under crops, and stock. |
| | Irrigation. | |
| IIID. 1.—Crops cultivated. | B.—Crops cultivated. | } B.—Prices of produce. |
| IIID. 2.—Agricultural stock. | IIID. 2.—Agricultural stock. | |
| IIIE. 1.—Prices of produce. | IIIE. 1.—Prices of produce. | } C.—Incidence of the land revenue on area and population. |
| IE. 2.—Surveyed and assessed area. | C.—Surveyed and assessed area. | |
| IE. 3.—Varieties of tenure held direct from Government. | IE. 3.—Varieties of tenure held direct from Government. | } D.—Varieties of tenure held direct from Govern- ment. (Discontinued.) |
| IE. 4.—Varieties of tenure not held direct from Govern- ment. | (Discontinued.) | |
| IE. 5.—Register of trans- fers. | IE. 5.—Register of transfers. | } E.—Register of transfers of landed property. (Discontinued.) |
| IIID. 3.—Rates of rent and produce. | (Discontinued.) | |

The notes on each table in the following pages explain the changes which have been made since 1866 in the tables now published. The general

instructions for the compilation of the existing series are given in the General Notes, and any peculiarities in the method adopted in each province in filling up the forms are mentioned in the Provincial Notes. Any explanations that seem required in respect of figures of particular districts are given at foot of the tables.

The Native States from which agricultural statistics are received are Mysore, from 1886-87; Jaipur, from 1892-93; Gwalior, from 1896-97; and Bikaner, Marwar, and Tonk, from 1898-99. The figures for Jaipur, Bikaner, Marwar, Tonk, and Gwalior are, however, imperfect and they are also incomplete, relating in the cases of Jaipur, Bikaner, and Marwar to the khalsa area only, which is about one-third of the State in Jaipur and Bikaner and one-ninth in Marwar. The statistics for Gwalior relate to about seven-eighths of the State, the remaining eighth comprising jagir and other unsurveyed areas. The statistics relating to these States are for the present separately printed as Part II of the volume.

Such statistics as have been supplied for the permanently-settled province of Bengal have been included in the volume since 1892-93, but they are not based upon accurate surveys or village papers, and must therefore for the most part be regarded as estimates.

TABLE No. 1 (pages 4—34).

This table gives the total area of each district, the areas for which statistics are and are not available being distinguished.

The corresponding tables of the earlier series are I A—1 of 1866, A of 1884, and A—1 of 1891. The headings differ as set out below:—

| | 1866 I A—1 | 1884 A | 1891 A—1 |
|----------------------------|---------------|--|---|
| Total area in square miles | { | Area according to Survey Department in acres. | Area according to professional survey in acres. |
| | | Deduct— | Deduct— |
| | | (a) Feudatory and Tributary States. (b) Area for which returns are otherwise not available. | (a) Feudatory and Tributary States. (b) Area for which no returns exist. |
| | | Net area dealt with in this return. | { Net area by professional survey. Corresponding area in village papers. |

GENERAL NOTES.

Column 2 (pages 4 and 5).—The professional survey is that carried out by the Survey of India Department in Northern India, and by the corresponding Departments in the Southern Presidencies. The provincial areas in this column exclude Native States in direct political relations with the Government of India in the Foreign Department, but in most instances include Feudatory or Tributary States politically controlled by Local Governments.

In column 3 is entered the area of any Feudatory or Tributary States included in column 2. *Column 4*—In this column is deducted the entire area (exclusive of Native States) for which the statistics required for tables Nos. 2 and 3 are not forthcoming in whole or in part. This area comprises chiefly estates held in permanent settlement or on privileged tenure, which have not been cadastrally surveyed and which possess at present no agency for the annual collection of agricultural statistics. As surveys extend and the organisation of village statistical

establishments developes, the area in this column is reduced, and that dealt with in tables Nos. 2 and 3 correspondingly increased.

Column 5 and 6.—Column 5 is a check on the accuracy of column 6. In the latter "village papers" means "the papers prepared by the village accountants." They do not in several provinces relate to the whole area included in column 5; for instance, the village returns often do not include the forest areas. In such cases, column 6 must be taken to be the total area for which statistics are available, corrected by the village papers in respect of the areas for which such papers exist. The areas of provinces and districts which are calculated from village papers are necessarily somewhat different from those given by the Survey Department, (a) because, while the survey area of a district or province is calculated in block, the area by village papers represents the added total of field and village areas, and (b) because the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railroads, is not uniform in the two sets of returns.

In provinces (as in Bengal) where no village papers exist, the figures in column 5 have been repeated in column 6. In that case they represent the area of which the details are stated in columns 2 to 6 of table No. 2.

The year to which the provincial statements relate ends on different dates in different provinces:

| | | | | |
|-------------------|---|---|---|--|
| ending 31st March | . | . | . | in Bengal, Assam, Berar, Coorg, Manipur, and Bikaner. |
| " 12th April | . | . | . | in Gwalior. |
| " 31st May | . | . | . | in the Central Provinces. |
| " 30th June | . | . | . | in Madras, North-Western Provinces and Oudh, Upper and Lower Burma, Ajmer, Mysore, and Jaipur. |
| " 14th July | . | . | . | in Mārwar. |
| " 31st July | . | . | . | in Bombay. |
| " 31st August | . | . | . | in Tonk. |
| " 30th September | . | . | . | in the Panjab. |

PROVINCIAL NOTES.

Column 2 (pages 6—9).—Where there has been no professional survey of the district, *Upper and Lower Burma*, the best information available is accepted, subject to revision from time to time as surveys extend.

Columns 4 to 6 (page 10).—Until 1897-98 the figures in column 4 represented chiefly the *Assam* area of wild hill tracts and of tracts permanently settled, where there is no agency for the collection of statistics. Since that year, the area under crops in the permanently settled tracts has been estimated and included in columns 5 and 6.

The area cadastrally surveyed amounts only to 15,800,000 acres.

Columns 2 and 3 (pages 11—15).—From 1894-95, Hill Tippera, Sikkim, Kuch Behar, the *Bengal* tributary states of Orissa, and the tributary states of Chota Nagpur have been classed under a separate head as feudatory states.

Column 2 (pages 16—19) includes the area of native states within the provinces, and thus differs from the Administration Report which excludes that area. *N.-W. Provinces.*

Column 4 includes the area of hill districts and some portions of Jhansi, Mirzapur, and Ballia which possess no agency for collecting statistics.

Column 2 (page 21) states the area as given in the settlement records. *Ajmer-Merwar*

Column 2 (page 4).—There is no record of area according to professional survey. The *Manipur* area stated is that of the whole pargana including jagir and inam villages as given in the settlement records.

Column 4 (pages 22—24) represents chiefly the area of unsurveyed tracts and the *Panjab* waste areas (other than forests) not included in village boundaries.

Column 2 (pages 25—27) states the area as returned by the Provincial Revenue Survey *Bombay and Sind* and Settlement Department, supplemented in the case of native states by the returns of the Topographical Survey. The Revenue Survey being incomplete in Sind, the exact area of that province is not known. The column states the area of surveyed tracts plus the estimated area of unsurveyed tracts.

Column 4.—Statistics are not available for villages which have not come under the operations of the Revenue Survey, and therefore the areas of all unsurveyed villages are excluded by deduction in this column.

Column 6.—The figures of column 5 are repeated because the areas in village papers are derived from the Revenue Survey records.

Column 4 (pages 28 and 29) includes the unsurveyed areas of zamindari * estates and waste land grants.

Column 6.—The area for which accurate statistics are available is in these provinces steadily increasing, and until the survey is complete and re-settlement finished, there will always be changes which render comparison difficult.

Column 2 (page 30) states the area as ascertained by the local Survey and Settlement Department.

Column 2 (pages 31—33) states the area as ascertained by the Provincial Survey and Settlement Department, supplemented, for tracts which have not come under the operations of that Department, by areas calculated from the returns of the Topographical Survey.

Column 4 includes chiefly areas of zamindaris, or large proprietary estates permanently settled, which have not been cadastrally surveyed and possess no adequate agency for the collection of statistics. The area of these estates comprises roughly one-third of the total area of the British districts of the Presidency. This column also includes (1) the area of the agency tracts in the districts of Ganjam and Vizagapatam, excluding a small subdivision (Chokkapad Kondam) in the former district, and the portion under the control of the Forest Department in the latter; (2) the area of some or all of the wholly inam villages in the districts of Ganjam, Vizagapatam, Salem, and Trichinopoly (excluding the cultivated portion); and (3) the area of Madras town and district in which cultivation accounts are not maintained.

Column 6.—Since 1898-91 the area of unsurveyed lands in all districts has been roughly estimated and included. The agency tracts in Godavari are also included.

Column 2 (page 34) states the area ascertained by the Revenue Survey Department.

Column 4 exhibits the areas of jodi, kayamgutta, and sarvamanyam villages and jagirs, for which the statistics required for the other tables are not available at present.

Column 6.—The figures in column 5 are repeated.

Column 2 (page 421) states only the khalsa area, forming about one-third of the whole area of the State.

Column 2 (pages 431—433) states the whole area of the State.

Column 3 states the estimated areas of jagir, muafi, ubari, tanka, istamrar, and such other villages as are still unsurveyed.

Item 1 (page 451) states only the khalsa area, forming about one-third of the whole area of the State.

Item 2 states the areas which formerly were parts of jagir villages, but which, after the completion of the settlement operations, either lapsed to or were resumed by the State.

Column 2 (page 455) states only the khalsa area, forming about one-ninth of the area of the State.

Column 3 states the area of those khalsa villages which have not yet been regularly assessed. They are chiefly the latest acquisition to khalsa under the law of escheat.

Columns 4 and 5.—The area by village papers does not differ from the area by survey, for, although differences occur under the different classes of soil, the total area of each village is the same in both cases.

Item 1 (page 465) states the whole area of the State.

TABLE No. 2 (pages 35—97).

The first part of this table deals with the classification of the area entered in column 6 of table No. 1, and gives the proportions (columns 2 and 3)

* In the Central Provinces the zamindars are chiefs of minor importance (or their successors) who, while holding large and compact estates on privileged tenure, have been restricted to the rank of ordinary subjects.

withdrawn from cultivation by inclusion under forests or for some other reason, (4) cultivable land available but not yet taken up, (5) land occupied but not under crop during the year of report, (6) the net area under crop, that is, after deduction of the area cropped more than once in the year. The second part (columns 8 to 13) gives the area irrigated from various sources, to which is added a statement (columns 14 to 18) of the distribution of the irrigated area under specified crops.

The headings altered since 1866 are noted below :—

| 1866 | 1884 | 1891 |
|----------------------------------|-------------------------------------|-------------------------------------|
| A—1 | A | A—2 |
| Cultivated | { Actually cropped | Net area cropped. |
| | { Current fallows | Current fallows. |
| Culturable | Available for cultivation | Culturable waste other than fallow. |
| Unculturable | Not available for cultivation. | Not available for cultivation. |
| Unappropriated cultivable waste. | (Omitted) | (Omitted.) |
| Communications | (Omitted) | (Omitted.) |

GENERAL NOTES.

Column 2 (pages 36—39).—“ Forests ” means in the statements of 1891 “ any land classed or administered as forest under any legal enactment dealing with forests,” and in those of 1884 all Government forests and forests administered under any Forest Act. Any cultivated areas existing within such forests may be excluded and entered in column 6 (net area cropped), an explanation being given in a note.

The forest areas do not agree with those stated in the reports on the administration of the Forest Department for various reasons, amongst which are these: (1) because the forest administration reports and the statements of agricultural statistics relate in many cases to different periods, (2) because the administration reports relate exclusively to forests worked by the Forest Department, while the tables of agricultural statistics exhibit in addition forest areas administered by district officers, and (3) because, on the other hand, certain forest areas worked and returned by the Forest Department are not included in the areas for which village papers exist, and are therefore excluded from these tables.

Column 3 includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to uses other than agriculture.

Column 4 includes groves not classed in the cropped area.

Columns 8 to 13 state the area actually irrigated during the year, areas cropped more than once being counted once only.

Columns 14 to 18 state the gross area of irrigated crops, areas cropped more than once being counted as separate areas for each crop.

PROVINCIAL NOTES.

Column 2 (pages 40—47).—The area entered in this column is that given in the forest administration report, and includes reserved forests. The figures for Upper and Lower Burma taken separately differ somewhat from those in the forest administration reports because of the difference in the manner of partition of the Thayetmyo district between the two divisions of the province.

Column 3.—In settled tracts the unculturable area is taken from settlement registers, but in unsettled tracts it is obtained from the best source available.

Column 4 includes land thrown out of cultivation and abandoned.

Column 5 includes only such land left uncultivated as is actually in possession of cultivators. In Lower Burma such lands are assessed at privileged rates, but in Upper Burma no assessment is levied on land left uncultivated.

Columns 14 to 18 include only crops actually irrigated; for instance, where an un-irrigated crop of sesamum is taken off land which is afterwards irrigated and planted with paddy, the area grown with sesamum is not included in this column. In Lower Burma there is no irrigated area in which more than one crop is grown.

Column 2 (page 48).—“ Forests ” formerly included protected and reserved forests. Since 1893-94 reserved forests only have been entered. The figures differ slightly from those in the forest administration report because of the difference in the period embraced in the two statements.

Column 5 includes generally all lands which are thrown out of cultivation or not cultivated, but remain in the occupation of leaseholders. For the hill districts no figures can be given except for tea estates in the Khási and Jaintiá hills and for the plains portion of the Garo Hills district. In the Surma valley, which is mostly permanently settled, figures are available only for the uncultivated portion of tea estates and of settled estates in the area cadastrally surveyed.

Columns 8 to 18.—There is practically no artificial irrigation. The small area irrigated from hill streams has never been distinguished from other cultivation.

Bengal. *Column 2 (pages 49—59).*—Since 1893-94 the figures represent Government forests only. There is a difference between these and the corresponding areas in the forest administration report, owing to the exclusion from the former of unclassified state forest areas in the Chittagong hill tracts.

Columns 3 and 4 include private forests and unclassified state forests.

Columns 8 to 18.—In the tables for 1898-99, the areas and crops irrigated from Government canals are stated. No figures are available of the areas irrigated from other sources except for cadastrally surveyed tracts.

N.-W. Provinces. *Column 2 (pages 60—67)* includes areas administered by the district officers of some districts. Hence the figures do not agree with those in the forest administration report.

Column 5.—The maximum period for which land left untilled is reckoned as fallow is three years.

Columns 8 to 13.—Government canals include private canals except in Naini Tal, for which district separate figures for private canals have been obtained since 1895-96. There are very few private canals in the North-Western Provinces.

Ajmer-Merwara. *Column 2 (page 70).*—The forest area relates to khalsa, jagir, and minor istamrari villages, but excludes village lands managed by the Forest Department which do not technically constitute Government forests.

Manpur. *Column 2 (page 36).*—The forest area relates to Government forests including jagir lands. *Column 6* includes the area cropped in khalsa (Government) as well as in jagir villages.

Punjab. *Column 2 (pages 72—79).*—Includes all lands specially allotted to forest growth under the control of Government or any local Board or Municipality and protected village waste in Hazara administered by the district officer and other waste lands in Peshawar. Forest areas in certain native states not entered in the village papers, and other lands not regarded as forests, are excluded.

Column 4 includes large areas of Government waste not allotted for cultivation.

Column 5.—The maximum period for which land is reckoned as fallow is two years; but as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In certain districts in the south-west of the province, however, the classification is amended annually.

Column 6.—The figures represent the actual area of standing crops.

Columns 8 to 18 state gross area irrigated, that is, land irrigated in both seasons is counted twice.

Sind. *Column 2 (page 80).*—The figures do not agree with those in the forest administration report, because the revenue records do not state the most recent alterations of area due to erosion by the Indus which the forest report does, and because, on the other hand, the forest report does not always exhibit the most recent alteration of area effected by the revision survey, which the Revenue Department does.

Bombay. *Column 2 (pages 82—85)* includes land administered by the Forest Department whether formally declared forest under an Act or not, and differs from the area stated in the forest reports, because in certain localities, where the forest settlement is incomplete, the original areas are still returned by the Forest Department, while revised areas are returned in this table; also because the revenue records do not always state the most recent revisions.

Column 3 includes all land recorded at the Survey and Settlement as unculturable, though at times parts of this land are cultivated.

Column 5.—The maximum period for which land thrown out of cultivation is reckoned as fallow is ten years.

Columns 8 to 13.—The figures given for private canals, tanks, wells, and other sources are rough estimates.

Column 16.—By "miscellaneous food crops" are understood the crops entered in table No. 3, as sugar, orchards, garden produce, and miscellaneous food crops.

Central Provinces. *Column 2 (pages 86—89)* differs from the figures in the forest administration reports, because the actual area of the forests is not known owing to incomplete survey, also because excisions made have not yet been taken note of in the forest registers, and because in many cases raiya wari villages settled, thekadari villages surveyed, clearance lease villages earned in proprietary rights, and villages purchased under the waste-land sale rules, have not as yet been finally disforested and struck off the forest registers.

Column 3 states areas covered with water, hill, or rock, and land occupied by buildings and roads.

Column 4 states (1) the area and waste within holdings (including fallows of more than three years), (2) land under tree forest which is not administered under any Act dealing with forests, (3) land under scrub jungle or grass, and (4) groves not included in holdings.

Column 5.—Land which has been fallow for not more than three years is reckoned as current fallow.

Column 2 (page 90) includes the forest area administered by the Forest Department, but excludes a large area of cultivated land in the Melghat taluk shewn as forest in the forest report.

Column 3 includes village sites and land taken up for public purposes or devoted to uses other than agriculture; it also includes unculturable portions of culturable fields.

Column 4 includes land available for cultivation but not given out.

Column 5 includes occupied culturable land left fallow for private reasons, such as grazing, rotation, etc.

Column 2 (pages 92—95) includes from 1895-96 the area cultivated within forests, and excludes the area of forests in the native state of Sandur, in Bellary, not included in the village papers. As this is included in the forest administration report, it accounts partly for the disagreement of its figures with those in this table. *Madras.*

Column 5 includes all occupied waste, that is to say, waste portions of land for which revenue is paid.

Column 10.—The term "tanks" refers to a particular kind of dammed reservoirs.

Columns 14 to 18 (crops irrigated) have been discontinued since 1898-99.

Column 2 (page 38) includes reserved and protected forests only. The figures differ slightly from those in the forest administration report, because the periods embraced are different. *Coorg.*

Columns 8 to 13 (pages 38 and 39).—Figures for land partly irrigated from springs and mountain streams are not available.

Column 2 (page 96) states the areas of state and district forests and of plantations. *Mysore.*

Column 3 includes not only lands absolutely unfit for cultivation, but also lands reserved for pasture, and plantations intended for public use and therefore left unassessed. A large portion of the pasture lands is fit for cultivation, and is given out for cultivation from time to time under special orders, such lands when given out for cultivation being transferred from column 3 to 5 or 6 as the case may be.

Column 4 states unoccupied assessed waste.

Column 5.—There is no system of fallows, that is, lands are not systematically left uncultivated for the purpose of giving them rest. Individuals occupy large areas and pay full assessment thereon, leaving portions uncultivated, generally for the use of their cattle. For purposes of account the difference between the areas of the lands occupied by individuals and of those actually cultivated by them is taken as fallow. The lands occupied and assessed are sometimes unfit for cultivation, having been taken up on full assessment merely for use as pasture; but the exact area of all such lands cannot be ascertained, though it cannot be large.

TABLE No. 3 (pages 98—233).

This table states the gross cultivated area under each crop, irrespective of irrigation and double-cropping, the area under the latter being included in the statement, but subtracted in column 40. The area is that stated in column 6 of table No. 2.

The headings which have been modified since 1866 are—

| 1866 III D—1 | 1884 B | 1891 A—3 |
|-----------------------------|--------------------------------------|---|
| Other food-grains | Other food-grains, including pulses | Barley. Cholam or jawar. Cambu or bajra. Ragi or marua. Maize. Gram. Other food-grains, including pulses. |
| Oilseeds | Oilseeds | Linseed. Til or jinjili. Others. |
| Sugar | Sugarcane | Sugarcane. Others. |
| Fibres | { Jute Others | Jute. Others. |
| Vegetables | (Omitted) | (Omitted). |
| Opium | " | Opium. |
| | Chinchona | Chinchona. |

The following items were added in 1891 :—

| | |
|------------------------|------------------------------|
| Condiments and spices. | Other drugs and narcotics. |
| Other trees. | Fodder crops. |
| Indian hemp. | Orchards and garden produce. |

GENERAL NOTES.

In cases where two or more crops are grown together, an estimate is made of the area covered by each, and the areas so estimated are separately returned. The estimate is made by the village accountant, or is subsequently determined on formulae prescribed by the provincial authorities.

Columns 10, 14, 18, 21, 26, 33, 37, and 38 (pages 98—105).—The selection of crops for inclusion in these columns is left to the provincial authorities.

Column 41 (pages 103 and 105).—In 1896 the Government of India decided that in this column should be entered the areas actually sown, whether the crop comes to maturity or not, except in cases when fields, owing to the failure of the first sowings, have been devoted to other crops: in such cases the area first sown should be omitted.

Previous to this decision there was no uniformity of practice. The figures in the tables represented: for Madras, Ajmer-Merwara, and Pargana Manpur the area sown or placed under crop; for Bombay the area sown, but any area on which the crop failed was treated as unsown; for the North-Western Provinces and Oudh the total cultivated area exclusive of the double cropped area and the area on which *khari* sowings failed; for Bengal, the Panjab, Berar, and Mysore, the area sown or placed under crop was stated for some districts, while for others the figures represented the area from which crops were actually taken. In Coorg neither the area sown nor the area actually cropped was stated; but all wet land paying assessment as cropped was entered.

Columns 28, 29, and 31 (pages 102 and 104).—The areas under coffee, tea, and chinchona differ in many instances from those in the special detailed statements (tables Nos. 8—13), the reason being that the two statements do not cover the same period; the special statements also include estimates of areas for which accurate statistics are not available, and which, therefore, are excluded from this table.

PROVINCIAL NOTES.

Upper and Lower
Burma.

The table states the actual area cropped, including the area on which crops have been destroyed, but excluding fallow. Land on which more than one crop has been obtained is entered as a separate crop area.

Assam.

The table states, for the Khási and Jaintiá hills district, only the area under tea cultivation. In Cachar and Sylhet accurate statistics of the area under crops other than tea is available only for the cadastrally surveyed tracts. The cropped areas stated for the five upper districts of the Assam valley before 1895-96 relate only to tracts cadastrally surveyed, and to *khiraj* lands and tea estates not cadastrally surveyed. (Since 1895-96 the whole cropped area in these districts has been stated.) The figures for 1893-99 include an estimate of the area under crops in the permanently settled tracts of Sylhet and Goalpara. In the Garo hills district the areas under different crops are available for the plains tracts only.

Column 36 (page 125) includes the area occupied by village sites.

Bengal.

As no statistics are at present prepared by village or circle officers, the figures entered in this table are merely estimates, except those for Chittagong, Champaran, Mazaffarpur, Cuttack, Balasore (exclusive of small permanently settled areas in these two districts), Angul and Khondmabals.

N.-W. Provs.
and Oudh.

The area sown with unimportant mixed crops, for which no separate heading is provided in the provincial crop statements, is assigned to the principal crop by the village accountant. The areas of important mixed crops, namely, wheat and barley, wheat and gram, barley and gram, jawar and arhar, bajra and arhar, and cotton and arhar, for which separate headings are provided in the crop statements, were included until 1895-94 with "other food-grains including pulses." Since 1894-95 they have been distributed in accordance with prescribed formula and entered under the crops of which they are composed. In the Almora and Garhwal districts no statistics of crops other than tea are available since 1895-96.

Manpur.

The areas stated are actual areas sown or placed under crop in Government and jagir villages.

Panjab.

Column 41 (pages 167—193).—Since 1895-97 the figures represent the area of standing crops and also the area on which crops were sown and failed. The figures exceed the sum of the figures in columns 2 to 33, the details of failure in respect of each separate crop not

being available for entry ; nor do the figures in this column agree with those in column 6 of table No. 2, since the latter do not include areas on which the crop failed.

Column 36 (pages 203 and 205) includes green fodder for cattle.

Bombay.

Column 36 (pages 211 and 213) includes groves situated within the home farm of the landlord or the holding of a tenant.

Central Provinces.

Column 10 (pages 218—222) includes all miscellaneous food crops which in other provinces are entered in column 37.

Madras.

Column 31 (pages 224—228).—The figures differ considerably from those in the special detailed statement of chinchona cultivation (tables Nos. 12 and 13), the reason being that many planters do not furnish information required for the special statement.

Column 35 (pages 225—229) states the areas sown with grass and crops solely for fodder. Lands left waste for grazing, and on which grass grows spontaneously, are not included in this column.

Column 31 (page 104).—There are no separate chinchona plantations in Coorg, the plant being grown with the coffee in coffee estates. The figures are an estimate of the area actually occupied by chinchona.

Coorg.

TABLE No. 4 (pages 234—259).

This table deals with agricultural stock. The headings of the form now in use differ from those of 1866 and 1884 in the following respects :—

| 1866 | 1884 | 1891 |
|-----------------------------|-----------------------------|---|
| III D—2 | III D—2 | A—4 |
| Cows and bullocks | Cows and bullocks | { Bulls and bullocks. } { Cows. } { Male buffaloes. } { Cow buffaloes. } Young stock (calves and buffalo calves). |
| | Buffaloes | |
| | | |
| Horses } | Horses and ponies | Horses and ponies. |
| Ponies } | | |
| Donkeys | Mules and donkeys | Mules and donkeys. |
| Sheep and goats | Sheep and goats | { Sheep. } { Goats. } Camels. |
| | | |

In future enumerations mules are to be separated from donkeys.

GENERAL NOTES.

The figures in this table are probably less accurate than those in the other tables in the volume.

The figures exclude Sind, for which province no statistics of live-stock have yet been collected, though endeavours are being made to obtain satisfactory information.

In some provinces they include, and in others they exclude, animals in towns, cities, and cantonments. The Government of India decided in 1896 that live-stock in cities and cantonments should be included wherever it is possible to secure their enumeration, and that oxen and buffaloes not old enough for work or to produce young should be treated as "young stock."

PROVINCIAL NOTES.

The figures of live-stock in Lower and Upper Burma were collected until 1897-98 by thugyis or headmen when preparing the capitation tax rolls, or when required for the statement. Cattle were not counted on any particular day.

Upper and Lower Burma.

Since 1898 annual statements of cattle and agricultural implements have been prepared, during the field season, by circle thugyis and revenue surveyors.

The figures include all animals in towns and also those employed in each district by Government departments, such as transport, military, police, and by municipalities.

It was decided in 1898-99 to take a cattle census every five years, and the first census was taken in that year in all the plains districts except Cachar and the permanently settled tracts of Sylhet and Goalpara.

Bengal. The table relates only to tracts where surveys are being made or a record of rights prepared. The figures are not collected each year, but for each tract when the tract is under survey.

N.-W. Provs. and Cudd. Until 1897-98 the figures of live-stock were obtained by an annual census made by the patwari when he made his round for the record of the spring crops. A rough record of the detail for each tenant was made by the patwari and tested from time to time by the kanungo. The resultant totals were preserved in the patwari papers. The table is now to be prepared quinquennially on a census in each district taken every five years. The first census was taken in 1898-99 under the supervision of the superior kanungos and such members of the district and tahsil staff as could be spared. The figures obtained are believed to be more accurate than the earlier figures.

Ajmer-Merwara. The table is prepared quinquennially, and the figures were last collected in 1896-97. There is no general system for the enumeration; in some villages a census is taken, but there is no fixed date for it; in others the figures are collected from the registers of mortality maintained from information supplied by *lambardars* and *patels* and checked by the police.

Manpur. An annual census is taken on the 15th March.

Panjab. Until 1897-98 the table was based on figures furnished by patwaris who made an enumeration of the cattle in a village every fourth year, when a detailed *jamabandi* was prepared. The enumeration was not made on a particular day, but whenever the patwari found time for it between April and August. The result was that in a fourth of the province an enumeration was made every year, and the fresh figures for that fourth part were incorporated in the annual statement by subtracting from the preceding year's figures the old statistics and adding the new figures. This system has been replaced by a census for the whole province to be taken every fifth year in the first week of February. The first census was taken in February 1899, and the figures have been entered in the table for 1898-99.

Until 1896-97 stock in cantonments was excluded except in Pesháwar and Lahore. Since 1896-97, cattle in cantonments and municipalities have been included; and since 1897-98 all cattle belonging to Government have been included.

Bombay. The figures are collected annually by village officers at a house-to-house enquiry in June. All animals belonging to a family are entered against the name of the head of the family even though the animals are temporarily absent from the village. Animals belonging to other villages are excluded, and those belonging to a roving grazier who has no permanent residence are noted, but are not included in the village resources. The figures are regularly tested by circle inspectors (*kanungos*). Stock statistics are not collected in the city of Bombay.

Central Provinces. The figures are collected annually, between the 1st January and the 15th March, by the patwaris for the areas in their charge. The total figure is recorded in the tahsil by the kanungo in a village register. The patwari includes all animals which belong to residents of the village, but are temporarily absent (*e.g.*, for grazing), and excludes animals which are temporarily in the village for grazing or other purposes, but do not belong to residents. Since 1896-97 stock in cities, large towns, and cantonments is included.

Berar. A census in each district was taken annually until 1897-98, though not on any particular date, by the village officials, and the figures were checked by *munsarims* and *tahsildars*. Since 1898-99 an enumeration is made, once every five years, on the night of the 15th March, by *patels* and *patwaris* and by municipalities and town committees.

All cattle belonging to one owner are entered against his name, even though the animals are temporarily absent from the village. When an owner cultivates land in more than one village, the actual number in each particular village on the night of enumeration is entered in the statement for that village. Cattle belonging to other villages, but temporarily in the village for grazing, are not entered in the statement for that village.

Madras. Previous to 1884 a census was taken every five years. From that year until 1898-99 a census of cattle in Government villages was taken annually, but it was then decided to revert to the former practice and take a census every five years. The first census was taken in October 1899 throughout the Presidency, and the next quinquennial statement will be prepared for 1899-1900. In *inám* villages, however, there is no suitable agency for the work, and Collectors obtain information for these villages as best they can: it is not known to what extent any census is made in them. No information exists regarding live-stock in permanently settled estates.

The table includes stock statistics of all towns and cantonments except those in *zamin-daris*, and those which do not form part of any revenue village and where the statistics are not collected because there is no agency for the purpose.

The table is prepared quinquennially.

A census was last taken in the last week of March 1898 by the parpattigars, and the particulars entered in a register. European planters were called on to furnish a statement of cattle in their estates.

Animals in municipal towns are included.

Coorg.

Until 1898-99, statistics were collected every year by the shanbog and patel of each village by enquiry or inspection. It has now been decided to take a quinquennial census, and the results of the first, taken in June 1899 as nearly as possible simultaneously throughout the state, are included in the table for 1898-99. Stock in municipalities is included since 1896-97.

Mysore.

TABLE No. 5 (pages 260—297).

This table indicates the relation between area, population, and land revenue; in other words, it exhibits the mean burden of the State assessment on the land assessed to it and on the community at large. It was prescribed in 1884, and revised in 1893. Similar information previous to 1884 is contained in Tables ID, IE—2, and IE—6, appended to the General Administration Reports.

The two main classes of tenure, (1) raiyatwari and (2) zamindari and village communities, specified in 1884, were not exhaustive, and the provincial administrations were allowed to make additions in accordance with local requirements. The table now states all tenures under one or other of three heads, namely (1) raiyatwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled).

The present form differs from that prescribed in 1884 in the following respects :—

| 1884 | 1893 |
|--|---|
| 1.—(1) Raiyatwari (2) Zamindari and village communities | { (1) Raiyatwari. (2) Zamindari and village communities (temporarily settled). (3) Zamindari (permanently settled). |
| 3.—Deduct area not fully assessed, including estates assessed at privileged rates. | { Deduct { (a) Area not fully assessed. (b) Area for which the returns required for this table are not available. |
| 4.—Balance of area fully assessed | { Balance, that is, fully assessed area for which returns are available. (a) Total. (b) Cultivated. |

GENERAL NOTES.

In July 1893 the following rules were prescribed for filling in this table :—

Entry 1 in general table No. 5 (pages 260—265), column 2 in provincial tables Nos. 5 (A to L) (pages 272—296).

The varieties of tenure entered should be included, as far as possible, under one or other of the following, namely (1) raiyatwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled).

Entry 2 (a) in general table (pages 260—265), column 3 (a) in provincial tables (pages 272—296).

Areas held revenue-free or at privileged rates should be deducted, but the deduction need not be made where such areas are in any case less than an entire village, and where there is any difficulty in estimating the corresponding deduction to be made in the population head 10 (column 11). In the Madras, Bombay, and Berar tables all land on which a full assessment has not been leviable during the year (for instance, assessed unoccupied land) should be classed for the purposes of this column as "area not fully assessed." Areas should not be entered in this column merely because the assessment due from them has been suspended or remitted on account of short crops, or for other special reasons.

Entry 3 in general table (pages 260—265), column 4 in provincial tables (pages 272—296).

This column should be subdivided into (a) total fully assessed area for which returns are available, and (b) area cultivated out of the area given in head (a). The latter head should be equal to the former after deducting current fallows and fully assessed waste.

Entry 4 in general table (pages 260—265), column 5 in provincial tables (pages 272—296).

Where the land revenue includes the zamindar's share, the net demand should be entered, and the table should state the payments due by the zamindars to Government, not those due by raiyats to the zamindars. The actual realisable demand for the year should be entered, after excluding arrears for past years. Sums remitted on account of unoccupied lands, short crops, etc., should be excluded. Land revenue in this column includes miscellaneous land revenue.

Entry 7 in general table (pages 266—271), column 8 in provincial tables (pages 273—297).

As in entry 4 (column 5), but miscellaneous land revenue and land revenue on areas not fully assessed to be excluded.

Entry 8 in general table (pages 266—271), column 9 in provincial tables (pages 273—297).

To be entry 7 (column 8), divided by entry 3(a) (column 4(a).)

Entry 9 in general table (pages 266—271), column 10 in provincial tables (pages 273—297).

To be entry 7 (column 8), divided by entry 3(b) (column 4(b).)

Areas under forest are included in entry 1 (column 2), under the prevailing tenure of the province.

The population in entry 5 (column 6) is that of the last general census.

PROVINCIAL NOTES.

Upper Burma.

Column 3 (a) (page 272).—The only areas in Upper Burma classed as zamindari are special grants made on the terms given in Appendix I of the Rules under the Upper Burma Land and Revenue Regulation.

Column 3 (b) includes non-state lands which are at present assessed in the form of thathameda (household tax).

Column 4 (a) contains figures of state lands including current fallows.

Column 4 (b) contains figures of state lands excluding current fallows.

Column 5 includes thathameda (household tax), water-rate, revenue from state land, and miscellaneous land revenue, but excludes remissions under these heads.

Column 8 (page 273) states only the land revenue demand realised on the fully assessed area entered in column 4.

Column 11.—The population of villages and kwins is considered as belonging to fully or not fully assessed area accordingly as the greater portion of the village or kwin lands are or are not fully assessed.

Lower Burma.

Column 1 (page 274).—Before 1893-94 all grants made under the waste land rules were classed as zamindari (temporarily settled); since that year grants under the waste land rules of Arakan (1839-41), and Pegu (1865), are classed as zamindari (temporarily settled), while grants under Lord Canning's rules (1863) are classed as zamindari (permanently settled). All other land is classed as raiyatwari.

Column 3 (a) includes the areas (described in the note to column 1) assessed at privileged rates.

Column 3 (b) includes all areas other than those assessed either fully or not fully.

Column 4 (a) includes current fallows.

Column 4 (b) excludes current fallows.

Column 5 states the actual demand on the land assessed, including miscellaneous land revenue, but excludes remissions granted.

Column 8 (page 275) states the actual demand on the land assessed, excluding miscellaneous land revenue and remissions granted.

Assam.

Column 1 (page 276).—Since 1892-93 waste land grants held on progressive assessment have been included under the head "zamindari (temporarily settled)." Since 1893-94 forest area has been included under raiyatwari tenure.

Column 6 includes the population of the feudatory states in the Khási and Jaintia hills.

Column 10 (page 277).—Since 1893-94 the incidence has been calculated on the cultivated portion of the fully assessed area. The cultivated area in the zamindari permanently settled estates in Sylhet and Goalpara not being known, the incidence could not be ascertained for these estates until 1898-99. In that year the cultivated area in these estates was estimated, and the incidence has been entered in the table.

Bengal.

The table is prepared quinquennially, and the figures for 1892-93 were reproduced until 1896-97 when the table was prepared anew.

Column 1 (pages 278—282).—Since 1896-97 the following classification of estates has been adopted:—

(1) *Zamindari (permanently settled)* includes estates managed for proprietors by Government.

(2) *Zamindari (temporarily settled)* includes (a) all temporarily settled estates, namely, those settled for periods with proprietors, and private estates leased to farmers for periods; and (b) all estates owned by Government as proprietor.

Column 2 states until 1895-96 the area of estates borne on the revenue roll of the district, whether entirely situated within the district boundaries or not, and does not include lands of estates partly situated within the district boundaries but borne on the revenue roll of another

district. This accounts for the discrepancy between the district areas stated in this column and those entered in table No. 1.

Since 1896-97 the area in this column agrees with the area entered in table No. 1. It represents the total area by survey less the area of feudatory states.

The table is prepared quinquennially, and the figures were last collected in 1896-97.

Column 1 (page 284).—There is no raiyatwari tenure in the North-Western Provinces and Oudh.

Columns 3 (a) and 3 (b) exclude small revenue-free plots, for which details are not forthcoming.

Column 4 (b) states the net cropped area of the year corresponding with that in column 41 of table No. 3 (area under crops), but limited to the fully assessed area for which returns are available of column 4(a).

Column 6.—The total population of the provinces excludes the population of the family domains of the Maharaja of Benares in the Benares and Mirzapur districts.

Column 10 (page 285).—The cultivated area is the cropped portion of the fully assessed area.

Column 11 includes population of revenue-free lands when the area of such lands is less than an entire village. The inclusion does not materially affect the incidence entered in column 12.

No figures have been entered in columns 8 to 13 opposite "Lucknow, permanently settled," as no portion of the permanently settled area has been fully assessed to land revenue.

Columns 13 and 14.—The figures are taken from the latest census report.

Entry 5 (page 263) includes since 1893-94 the population of jagir villages which was previously omitted.

Entry 10 (page 269) excludes population of jagir villages.

Columns 3 (a) and 3 (b) (page 286) include villages receiving frontier remissions, tracts which are entirely unassessed (such as the Kulu mountains), and istamrari tenures.

Column 5 includes assigned revenue.

Column 10 (page 287).—The cultivated area taken for calculating the incidence is, since 1893-94, exclusive of current fallows.

Column 1 (page 288).—Lands held under special tenures, such as talukdari, meh-wasi, uddad-jamabandi, narvadari, and bhagdari in Gujrat, and khoti and izafat in the Konkan, are classed as "zamindari and village communities (temporarily settled)".

Column 3 (a) includes alienated area and the area held free of revenue or the revenue of which has been reduced by special agreement, and the fully assessed unoccupied area since 1893-94.

Column 3 (b) includes land not available for cultivation or unassessed.

Column 4 includes land under temporary cultivation; also pôt inâms paying full assessment.

Column 5 states net receipts on account of the land, including quit-rent and miscellaneous land revenue.

Column 10 (page 289).—The incidence is calculated from the occupied area, which, in the Presidency proper, is treated as the cultivated area for the purposes of this table, and the assessment on that area.

Column 11 includes population of pôt inâms and the like scattered areas which cannot be distinguished from the population of the fully assessed area.

Column 12.—The incidence is based on the figures given in column 11 and those in column 3, plus the amount of full assessment on privileged lands held in fully assessed villages at less than that assessment.

Column 3 (a) (page 288) includes fallows and fully assessed unoccupied area.

Column 4 excludes fallows and the fully assessed unoccupied area [see note to column 3(a)]. Fallows are assessed once in five years.

Column 5 includes revenue from alienated area and consolidated land and water assessment levied on lands irrigated from canals.

Column 10 (page 289).—The incidence is calculated from the cultivated area, excluding fallows, and the assessment on that area.

Column 1 (page 290).—Zamindari (temporarily settled) includes malguzari and thekadari.

Column 2 states the area by village papers (column 6 of table No. 1) plus the area for which no accounts exist (column 4 of the same table).

Column 3 (a).—Zamindari estates properly so-called (that is, excluding malguzari) are classed as not fully assessed.

Column 10 (page 291).—The cultivated area referred to in this column includes fallows. Since 1894-95 the net cropped fully assessed area has been taken in calculating the incidence.

The figures for 1898-99 were collected only for those districts in which a new assessment was introduced in the year; for other districts the figures for 1897-98 have been repeated.

*N.-W. Procs.
and Oudh.*

Manpur.

Panjab.

Bombay.

Sind.

*Central
Provinces.*

Berar.

Column 3 (a) (page 292).—This column states jagir, izára, and palampat villages, all unassessed land, forest areas, village sites, roads, rivers, etc.

Column 4 (a).—*Pól kharáb* lands are excluded from this column which includes only occupied lands available for cultivation.

Column 4 (b) states the cultivated area in khalsa villages only.

Column 5.—The figures are those of the total land revenue of the district inclusive of jagir, palampat, and leased villages. The method of calculation is the same in all districts.

Column 6.—The population is that of the last general census.

Column 8 (page 295) includes assessment on occupied lands only, and is that of the area stated in column 4 (a).

Column 10.—The incidence since 1896-97 has been calculated on the area entered in column 4 (b), the cultivated area in khalsa villages only.

Column 11 excludes population of jagir and izára villages.

The table is prepared quinquennially, and the figures were last collected in 1897-98.

Column 1 (page 292).—Since 1893-94 the khalsa area has been classed as "zamindari and village communities (temporarily settled)" and the jagir and istamarári areas as "zamindari (permanently settled)."

Column 4 includes in the case of the khalsa villages the assessed cultivated area, including assessed fallows.

Column 10 (page 293).—The cultivated area is, in the case of "zamindari (temporarily settled)," the cropped portion of the fully assessed area.

Column 11 excludes population of jagir villages.

The table is prepared quinquennially. The figures were last collected in 1898-99.

Column 3 (a) (page 294).—In the case of raiyatwari tracts this column states the area of unoccupied assessed lands, of minor inám lands in Government villages held rent-free or subject to quit-rent, and of all unassessed poramboke and forest lands, excluding portions of the first mentioned two classes occupied under "miscellaneous;" and in the case of zamindari tracts the areas of hills, porambokes, and minor ináms are entered. The entire area of whole inám villages is deducted in this column.

Column 3 (b).—Raiyatwari; includes the area of Agency tracts, except in Godavari, for which district particulars for such tracts are reported by the Collector.

Column 4 (a).—Raiyatwari; states the total occupied area.

Column 5.—Raiyatwari; states the net land revenue demand, excluding remissions and deductions, but including quit-rent on minor ináms and miscellaneous revenue pertaining to land, and also water-tax.

In the case of zamindari and whole inám villages, this column states the *peskkash* or quit-rent payable to Government, and the water-rate on lands included in such tracts, as also jodi or quit-rent on minor ináms situated therein.

Column 8 (page 295).—Raiyatwari; states the net land revenue demand, excluding remissions and deductions and revenue from minor ináms (quit-rent and water-tax). In the case of zamindari this column states the *peskkash* or quit-rent payable to Government, excluding the jodi or quit-rent and water-rate on minor ináms.

Where the fully assessed unoccupied area is large, or the miscellaneous revenue included in column 5 is small, the revenue in column 8 is generally in excess of that in column 6.

Column 10.—The cultivated area is, in the case of raiyatwari lands, the total area cropped out of the area given in column 4(a). No corresponding information is available for the zamindari area.

Column 11 states the entire population of raiyatwari and zamindari villages, respectively, except of raiyatwari Agency tracts in Ganjam and Vizagapatam.

Coorg. The table is prepared quinquennially, and the figures were last collected in 1897-98.
Entry 2 (page 265) includes bané and cardamom lands.

Mysore. *Column 3 (a) (page 296)* states the area entered in column 4 of table No. 1 and in column 4 of table No. 2.

Column 5 (b) states the areas entered in columns 2 and 3 of table No. 2.

Column 4 (a) states Government occupied lands including minor ináms in Government villages (columns 5 and 6 of table No. 2).

Column 4 (b) states the area actually cropped (column 6 of table No. 2).

Column 5 states the total realisable land revenue, including miscellaneous land revenue.

Column 8 (page 297) states the total raiyatwari demand, plus the quit-rent due on minor ináms in Government villages.

Jaipur. The khalsa areas are classed as "raiayatwari."

Column 6 (page 429).—The differences between the figures, wherever they occur, are attributable to the fact that people often move from one district to another, or to villages

other than khalsa in search of employment; the population of villages other than khalsa is not taken into account in the tables.

Column 11 (page 445)—The differences between the figures, wherever they occur, are due to the fact that the pahikasht cultivators who come into the khalsa villages from villages other than khalsa are reckoned as a part of the population of fully assessed areas of the khalsa villages, and included therein.

Column 4 (b) (page 463) states not only the area actually under crops, but also fallow *Marwar* lands, as revenue rates are assessed on the total cultivated area, including fallows. Hence the area stated in this column exceeds the total area in table No. 3.

The whole area stated in this table is khalsa.

Bikaner.

Item 2 (b) (page 468) states the same area as in item 2 of table No. 1.

Tonk.

TABLE No. 6 (pages 298—327).

This table states the principal varieties of tenure held direct from Government. Owing to the great diversity of tenures the form is not perfectly adapted to the conditions existing in every province, but it was thought desirable to prescribe a form for general adoption in order to admit of the compilation of an abstract for the whole of India to complete the series of consolidated tables embodied in the Agricultural Statistics. The classification finally selected in 1891 was therefore of the most general description possible, but the difficulties experienced in some provinces in moulding their statistics to the prescribed classification have not yet been entirely surmounted, and so far it has not been possible to compile a consolidated return for all India.

For the years previous to 1884-85, in which year a compilation of Agricultural Statistics for British India was first published, information regarding the varieties of tenure held direct from Government is to be found in table I-E—3 appended to the General Administration Reports. The form was suggested by the Statistical Committee of 1866, and the modifications introduced since then are noted below:—

| 1866 I-E—3 Column 1 | 284 I-E— Column 1. | 1891 D Column 1 |
|---|---|--|
| <p>1. Great zamindaris paying more than R50,000 revenue.</p> <p>Held by individuals under law of primogeniture.</p> <p>Held by individuals and families under ordinary law.</p> | <p>1. (No alteration).</p> | <p>1. Revenue payers paying more than R50,000 revenue.</p> <p>(a) Individuals under law of primogeniture.</p> <p>(b) Individuals and families under ordinary law.</p> <p>(c) Village communities.</p> |
| <p>2. Large zamindaris paying more than R5,000 revenue.</p> <p>Under law of primogeniture.</p> <p>Under ordinary law.</p> | <p>2. Large zamindaris paying from R50,000 to R5,000 revenue.</p> <p>Under law of primogeniture.</p> <p>Under ordinary law.</p> | <p>2. Revenue payers paying from R50,000 to R5,000 revenue.</p> <p>(a) Individuals under law of primogeniture.</p> <p>(b) Individuals and families under ordinary law.</p> <p>(c) Village communities.</p> |
| <p>3. Small zamindaris other than those of cultivating communities.</p> | <p>3. Zamindaris paying from R5,000 to R100 revenue.</p> | <p>3. Revenue payers paying from R5,000 to R100 revenue.</p> <p>(a) Individuals under law of primogeniture.</p> <p>(b) Individuals and families under ordinary law.</p> <p>(c) Village communities.</p> |
| <p>Proprietary cultivating communities paying in common.</p> | <p>4. Small zamindaris other than those of cultivating communities paying less than R100 revenue.</p> | <p>4. Revenue payers paying less than R100 revenue.</p> <p>(a) Individuals under law of primogeniture.</p> <p>(b) Individuals and families under ordinary law.</p> <p>(c) Village communities.</p> |

| 1886 I-E-3 Column 1 | 1894 I-E-3 Column 1 | 1891 D Column 1 |
|--|---|---|
| 5. Proprietary cultivators paying separately, including all small estates paying less than ₹100. | 5. Peasant proprietors paying separately. | 5. Peasant proprietors paying separately. [Changed in 1898 to "5. Small holdings held separate and direct from Government (raiyyatwari tenure)."] |
| 6. Holders of revenue-free tenures. { In perpetuity. For life. | 6. Holders of wholly or partly revenue-free tenures. { In perpetuity. For life or lives. | 6. Holders of wholly or partly revenue-free tenures. { In perpetuity. For life or lives. |
| Column 8. Revenue rate per acre. Column 9. Supposed net profit per acre. | Column 8. Revenue rate per acre. Column 9. (Omitted). | Column 8. (Omitted). Column 9. (Omitted). |

In 1892 the words "other than those of cultivating communities" were omitted from the fourth class of tenure (revenue payers paying less than ₹100 revenue) in the form prescribed in 1891, in order to admit of such communities being classed under the heading "village communities" in this class.

GENERAL NOTES.

Class V, column 14 (pages 299—327) [Formerly "peasant proprietors paying separately," now changed to "small holdings held separate and direct from Government (raiyyatwari tenure)."]—The intention was to distinguish the occupant under a raiyyatwari tenure, who pays the revenue upon his holding direct to Government and has no concern with the holdings of others, from the owner under a zamindari tenure, who is jointly responsible with the other owners of the mahal, for the whole revenue of the whole mahal though his own holding forms only a portion of the mahal. It was found that this intention was not sufficiently clearly indicated by the words used in the column, and the Government of India in January 1898 directed their replacement by the words here noted.

Class VI, columns 15 and 16 (Holders of wholly or partly revenue-free tenures) include ināmdars and jagirdars. The local Governments are at liberty to subdivide the minor head "in perpetuity" of this class so as to distinguish between grants (a) absolutely and (b) conditionally held in perpetuity.

[NOTE.—This classification of tenure was not adopted by the Bombay Presidency until 1895-96.]

Side head 1 (pages 298—327) (number of estates).—The number of estates entered in this column represents the number of separate estates recorded on the land revenue registers.

Side head 2 (number of villages).—A village is often entered more than once in this column when it contains or consists of parts of two or more estates separately assessed.

Side head 3 (number of holders or shareholders).—One proprietor holding land in two or more villages is entered twice or oftener, according to the number of settlements made with him.

PROVINCIAL NOTES.

Upper Burma.

Class V, columns 14 (a) and 14 (b) (page 299).—Holders of state land are classed as "small holdings held separate and direct from Government (raiyyatwari tenure)." Previous to 1895-96 holders of non-state land were classed as "holders of wholly or partially revenue-free tenures," the ordinary non-state land tenure being included under the sub-head "in perpetuity." In 1895-96 all tenures were classed as "small holdings held separate and direct from Government (raiyyatwari tenure)," under (a) state land, (b) non-state land.

Class IX, column 19 (others).—For the present, only the special grants in the Sagaing and Kyaukse districts are entered.

Lower Burma.

With the following exceptions all tenures in Lower Burma are classed as "small holdings held separate and direct from Government (raiyyatwari tenure)":—

(a) Grants under the old waste land rules of Pegu and Arakan, which are classed as "holders of wholly or partially revenue-free tenures."

(b) Grants under Lord Canning's rules, which are classed as "purchasers of waste lands."

Assam.

Classes I to IV, columns 2 to 13 (pages 302 and 303) refer to permanently-settled estates only. All entries under these classes come under the sub-head "individuals and families under the ordinary law," as there are, as at present ascertained, no individuals holding under the law of primogeniture, and no village communities, properly so called, in the province.

Class VI, columns 15 and 16 (holders of wholly or partly revenue-free tenures) includes holders of *lakhiraj* and *nishkhiraj* estates, special tenures, and revenue-free estates.

Class VII, column 17 (landowners who have redeemed the revenue) includes holders of commuted estates and fee-simple grants compelled to redeem.

Side head 2 (number of villages) states collectively the number of villages taken from the last census report, as the number comprised in each class is not at present known.

Side head 3 (number of holders or shareholders) cannot be filled up, as the number of shareholders in an estate is not usually known. It is not the custom in any part of Assam (except, perhaps, in Cachar) for all the shareholders to register their names.

This table is prepared triennially, as there are but slight variations in the entries from *Bengal* year to year. The figures were last collected in 1897-98.

Class IX, column 19 (page 306) (others) includes Government estates under direct management, and estates of recusant proprietors under the management of Government. Since 1897-98, tea estates and resumed estates are also included.

Side head 2 (number of villages) states in one sum the number of villages as returned by the Revenue Survey.

Side head 3 (number of holders or shareholders).—This number is, for the purposes of classes I to IV, VI, VII, and VIII, taken as equivalent to "proprietors registered in the Collectorate."

The table is prepared quinquennially, and the figures were last collected in 1897-98.

The word "estate" means a property separately assessed to land revenue.

Until 1894-95 forest land, state properties, Government grants, nazul, petty grantees, areas of civil lines and cantonments, and Government appropriations, were entered against class IX (others); they have since been excluded from the table.

Class V, column 14 (pages 307-309) [small holdings held separate and direct from Government (raiayatwari tenure)].—There are no raiayatwari lands.

Side head 1 (number of estates).—An estate paying a certain amount of revenue, but situated in three parganas of the district and entered in the land revenue registers as three separate estates, each under that amount of revenue, is treated as one estate and not three estates.

Side head 2 (number of villages).—The number of villages is not necessarily the actual number of mauzas in the district held from Government. Thus a village containing part of two or more mahals paying different sums as revenue is entered twice or thrice as necessary.

Side head 6 (average assessment of each estate).—The figures are obtained by dividing the gross revenue by the number of estates. The gross revenue is the gross land revenue for each description of tenure. In the case of revenue-free tenures, or where the revenue is not ascertainable, the estimated revenue obtained for the purpose of assessing the 10 per cent cess is taken.

Class V, column 14 (page 311) [small holdings held separate and direct from Government (raiayatwari tenure)] includes all raiayatwari holdings.

The figures are obtained quadrennially. They are not revised at a particular period, but gradually, village by village, throughout the four years.

Class IX, column 19, (page 316) (others) states the leases from Government without right of ownership.

Side head 1 (pages 314 and 316) (number of estates).—About 90 per cent of the villages come into the third class of tenure.

Sides heads 1 (number of estates), *2* (number of villages), *5* (average area of each estate), and *6* (average assessment of each estate).—In the case of class VI (holders of wholly or partially revenue-free tenures) these heads cannot be filled up unless only whole estates which are partially or entirely assigned or released are entered as revenue-free holdings, and all smaller holdings are omitted. The figures for this class are necessarily included in the total for classes I to IV so long as class VI is not made to consist exclusively of entire estates, for classes I to IV and IX now include every estate in the province.

Side head 3 (number of holders or shareholders).—The number of holders entered against class VI is the number of revenue assignees.

The classification in this table was not adopted in Bombay until 1895-96. The figures according to the former classification for the years previous to 1895-96, were printed in the 12th issue of the volume.

Class IX, column 19 (page 317) (others) includes unsurveyed Government villages of which statistics are not available and which are not included in any of the specified tenures.

Side head 1 (pages 316 and 317) (number of estates).—As regards peasant proprietors (class I in the Bombay form) the word "estate" means (as in Madras) the "holding." So with respect to pôt inâms in khalsa villages, each alienated holding is classed as an estate. But in the case of entirely alienated villages the entire village is classed as one estate.

Side head 4 (gross area).—As regards raiayatwari area the total is for occupied land only. The area of other estates is given in the gross, and includes unculturable and unoccupied land.

Class V, column 14 (page 319).—Previous to 1897-98 the head "small holdings held separate and direct from Government (raiayatwari tenure)" included *mâlikmakbuza* holdings. Since that year, the head represents purely raiayatwari tenure, and *mâlikmakbuza* holdings.

have been included in the malguzari estates of which they form part, and been classed under the sub-heads "individuals and families under ordinary law," and "village communities."

Class IX (others) includes lands excluded from Government forests and held on lease.

Bihar.

The figures for 1898-99 were collected only for those districts in which a new assessment was introduced in the year.

In the Wun district *izáta* and *palampat* villages are entered under classes III and IV sub-head 'village communities,' while in the Basim district *palampatdars* are entered under class VII (landholders who have redeemed the revenue) and *izárdars* under class VIII (purchasers of waste lands).

Class V, column 14 (page 321) [small holdings held separate and direct from Government (*raiyatwari* tenure)] states the occupants of survey numbers.

Side head 1 (number of estates).—The number of estates in the Akola district is the number of survey numbers, each number being considered a separate estate; while in the Wun district each *khatadar's* holding is entered as an estate.

Side head 4 (gross area) states the occupied area.

Madras.

The table is prepared quinquennially, the variations in the entries from year to year being immaterial.

Zamindaris, mittas, palayams, etc., are included in the first four classes of tenure; all *raiyatwari* holdings are included in class V [small holdings held separate and direct from Government (*raiyatwari* tenure)]; *ináms, shrotriems, etc.*, are included in class VI (holders of wholly or partially revenue-free tenure); *ináms* as well as *raiyatwari* lands on which the quit-rent or assessment has been redeemed are included in class VII (landowners who have redeemed the revenue); renters of estates in the Vizagapatam, Godavari, Chingleput, and Salem districts are included in class IX (others).

Side head 4 (pages 322 and 323) (gross area) includes waste and *poramboke* lands in the case of *zamindaris, mittas*, and whole *ináms* villages, and represents the total area included in the *patta* in the case of *raiyatwari*.

Side head 6 (average assessment of each estate) states, in the case of *zamindaris,ináms*, and *shrotriems*, the average *peshkash* or quit-rent and water-tax payable to Government, and in the case of *raiyatwari* the average assessment on the *raiyat's* holding, including water-tax and charge for second crop. The assessment represents the gross demand, inclusive of remissions and deductions.

Coorg.

The table is prepared quinquennially, and the figures were last collected in 1897-98.

Class VI, columns 15 and 16 (page 325) (holders of wholly or partially revenue-free tenures) include the *jamma, umbli, jodi*, and *jagir* holdings.

Class VIII, column 18 (purchasers of waste lands) includes coffee estates paying assessment.

Side head 2 (number of villages) states the number of villages collectively, not detailed under each class of estate.

Side head 4 (gross area) excludes *bané, fallow*, and *cardamom* lands.

U. P. & Mysore.

Side head 2 (pages 326 and 327) (number of villages)—Class V represents the total number of Government primary villages (whether populated or unpopulated), that is, the areas constituted as villages by the Revenue Survey and Settlement Department. Class VI (holders of wholly or partially revenue-free tenures) represents the number of *jodi, kayamgutta, sarvamanyam*, and *jagir* villages, and of Government villages in which minor *ináms* are counted.

Side head 6 (average assessment of each estate) represents the average assessment calculated, in the case of class V, on the full survey assessment including water rate, and in the case of class VI (holders of wholly or partially revenue-free tenures), on the combined quit-rent and water rate, if any, due to Government, in both cases without deducting remissions or making other deductions.

Assam.

TABLE No. 7 (pages 328—361).

This table is intended to exhibit the number of voluntary and compulsory transfers of ownership of land or tenant-right, and the area so transferred. Voluntary transfers mean transfers made by actual contract or gift, transfers by inheritance not being taken into account.

The table now in use was prescribed in 1891 ; it differs from the tables formerly in use in the following respects :—

| 1886 I E—5 | 1884 I E—5 | 1891 E | |
|---|---|---|-----------------------------------|
| <i>Nature of tenure.</i> | <i>Nature of tenure.</i> | <i>Nature of tenure.</i> | |
| Great zamindaris, complete. | Proprietors. { Revenue-paying. Revenue-free. | Revenue-paying. | |
| Shares in such zamindaris, complete. | | Tenants who have statutory (or otherwise recognised) powers of transfers. | Wholly or partially revenue-free. |
| Large zamindaris. | | | (No alteration). |
| Shares in such zamindaris. | | | |
| Small zamindaris. | | | |
| Shares in such zamindaris. | | | |
| Villages owned by cultivating communities. | | | |
| Shares in villages owned by cultivating communities. | | | |
| Holdings of proprietary cultivators. | | | |
| Intermediate holdings of a transferable character. | | | |
| Holdings of raiyats at fixed rates. | | | |
| Holdings of raiyats with right of occupancy. | | | |
| Revenue-free tenures. | | | |
| <i>Number of transfers recorded.</i> | <i>Number of transfers.</i> | (No alteration). | |
| (a) By voluntary sale or gift. | (a) By private contract or gift. | | |
| (b) By compulsory sale. | (b) By order of court. | | |
| (c) By inheritance. | (Omitted). | | |
| <i>Average area in acres of each holding transferred.</i> | <i>Total area transferred.</i> | (No alteration). | |
| (a) By voluntary sale. | (a) By private contract or gift. | | |
| (b) By compulsory sale. | (b) By order of court. | | |
| (c) By inheritance. | (Omitted). | | |

GENERAL NOTES.

It is optional with local Governments to enter or omit transfers of lands held by tenants.

Instructions were issued in 1891 to the authorities of the Panjab and Central Provinces to the effect that the entries under "by order of court" should state not merely the transfers occasioned by debt, but all forms of transfer effected through the medium of a court.

In August 1896 the following rules were prescribed :—

- (1) Changes of entry due to succession, partitions, or simple mortgages, are not really transfers, and should be excluded from the table, as also should redemptions of mortgage ;
- (2) All temporary transfers such as leases should also be excluded, but mortgage with possession should be treated as a transfer and entered in the table ;
- (3) All transfers made by order of a court should also be included in the table.
- (4) The word "court" in the entry "by order of court" should be held to include a revenue court.

PROVINCIAL NOTES.

Transfers of property in land are not as yet registered in Upper Burma ; the information is collected by revenue officers. The statement includes cases in which land has been permanently transferred by succession, partition, gift, sale, or other transaction, for valuable consideration. *Upper and Lower Burma.*

Columns 12 to 21 (page 331) exclude the areas transferred in the Sylhet and Goalpara districts, the information not being available. Previous to 1896-97, in most districts all kinds of transfers, including transfers by inheritance and non-permanent transfers, such as leases, or usufructuary mortgages, were entered. Since 1896-97 transfers by order of a revenue court have been included ; transfers by inheritance and non-permanent transfers have been excluded. *Assam.*

Bengal. The table is not prepared, the information not being available.

*N.-W Provs.
and Oudh.*

Transfers by inheritance or non-permanent transfers, such as leases or usufructuary mortgages for short periods, are excluded, but mortgages with possession have been included, as also all transfers made under order of a court.

Statistics of transfers of tenant-right are not given. Transfers by gift have been included since 1896-97.

Ajmer-Merwara.

The figures include all kinds of transfers, including those by inheritance, and temporary transfers, such as leases or usufructuary mortgages. The column "by order of court" includes transfers occasioned by debt incurred by judgment-debtors, and all kinds of transfers effected by order of court. It also includes transfers by order of a revenue court and of a civil court.

Manpur.

Transfers of property in land are not permitted in Manpur.

Panjab.

Before 1895-96, the statistics of the different kinds of tenure were presented collectively, separate figures for each kind not having been available, and the figures include all kinds of transfers relating to the tenant-rights of proprietors and occupancy tenants, but exclude transfers by inheritance. The transfers included are, (1) partitions, (2) gifts and exchanges, (3) mortgages with possession, (4) redemption of mortgages, (5) sales and permanent transfers for value, (6) other transfers, which last include cases of a miscellaneous nature, such as enhancement of rent or corrections of errors. The few cases of transfers for arrears of revenue which occur are included under "by order of court." In Rohtak, Montgomery, and Gurdaspur such transfers are at present excluded.

From 1895-96 the table includes only transfers by mortgage and sale.

Bombay.

A plan has been proposed by the Government of India for the preparation and maintenance of a record of rights and interests in land based on possession, and information regarding such a record has been collected from certain selected villages in several districts, with the object of ascertaining how far the introduction of the plan would be feasible.

*Central
Provinces.*

Transfers of tenant-right have been included since 1892-93. The figures against "proprietors" are filled up from returns compiled on the basis of mutation proceedings. Those against "tenants" are based on statements furnished by patwaris in which all transfers are entered, including transfers by mortgage with possession as well as transfers by sale, but excluding transfers by inheritance. The statement does not include leases or mortgages without possession.

Berar.

In Akola, Ellichpur, and Basim the table does not include transfers by inheritance: in Basim such transfers are placed under "by private contract or gift." In Akola transfers of registered occupancy of fields, made under settlement rule IX, are included. In Ellichpur non-permanent transfers, such as leases, are included, while in Akola and Basim they are excluded.

In Ellichpur, Basim, and Wun "by order of court" includes all kinds of transfers effected by a court; in Akola, Buldána, and Amráoti it does not; transfers occasioned by debt incurred by the judgment-debtor are included in all districts except Amráoti.

In Buldána, Amráoti, and Ellichpur "by order of court" includes "by order of a revenue court," for instance, for arrears of revenue, while in Akola and Wun they do not.

Madras.

Only permanent transfers, as by sale or gift, are included, when the parties concerned apply for and obtain transfers of revenue registry. These are entered under "private contract or gift." Cases in which lands are sold for arrears of revenue due to Government are also included if the lands are purchased by private parties, but excluded if the lands are purchased by Government.

Transfers of tenant-right are not entered, the information not being available.

The entry under the head "revenue-paying" includes raiyatwari holdings paying full assessment, and permanently settled estates paying *peskash*; and the entry under the head "wholly or partially revenue-free" relates to minor ináms and whole inám villages.

The statement includes all legal transfers of property (a) by voluntary action of the owners, *Coorg.* and (b) by virtue of decrees of civil and orders of revenue courts.

Transfers ordered by courts in cases of disputed succession, and those occasioned by debt incurred by the judgment-debtors, are included under the heading 'by order of court.' This heading also includes transfers ordered by civil courts from registered holders to decree-holders of lands sold by civil courts in satisfaction of decrees, and of holdings sold by the revenue authorities for arrears of revenue.

The only transfers included are permanent transfers, as by sale or gift, in which the parties concerned apply for and obtain transfers of revenue registry in the village accounts *Mysore.* from which the table is compiled. Thus, changes of registry under orders of civil and revenue courts, as well as those effected in consequence of the sale of land for arrears of Government revenue, are included.

TABLES Nos. 8 and 9 (pages 362—364).

These tables are intended to exhibit, in greater detail than in the preceding tables, the progress of the production of tea. The statistics, which are for the calendar year, are obtained from owners and managers of tea estates.

GENERAL NOTES.

Until 1888 the statistics were published in the volume entitled "Statistical tables relating to British India." In that year the publication of the figures in that volume was discontinued, though the collection of the figures was not suspended, and they have since 1892 been published in the volume of Agricultural Statistics.

The figures of area differ in many instances from those in table No. 3, because the two statements do not cover the same period, the figures in table No. 3 being for the official or the agricultural year ending the 31st March or the 30th June, while those in these tables are for the calendar year; and also because in these tables are included areas for which accurate statistics are not available and which therefore are excluded from table No. 3.

The area is divided so as to indicate the acreage (a) under mature plants, that is, plants over three years old; (b) under immature plants, that is, plants less than three years old and unfit for plucking; and (c) land taken up by planters but not planted. The latter is excluded from the total when reckoning the area under cultivation.

The number of persons employed on the estates has been stated since 1892, but it was found that definite instructions were desirable in regard to the manner in which the figures should be rendered, and it was prescribed in 1894 that they should indicate (a) the actual number of persons permanently employed throughout the year, and (b) the average daily number temporarily entertained in the year, the average being obtained by multiplying the number employed temporarily on each estate by the number of days in the period, and dividing the totals thus arrived at by 365.

PROVINCIAL NOTE.

In this province manufactured leaf weighs more than uncured leaf, because the leaf is *Burma.* made into *letpet* (pickled tea) which is eaten by the Burmans.

TABLES Nos. 10 and 11 (pages 365—367).

These tables are intended to exhibit for the production of coffee what the two preceding tables exhibit for tea. The statistics, as in that case, are for the calendar year, and are obtained in the way in which the figures for tables Nos. 8 and 9 are obtained.

GENERAL NOTES.

The early history of these tables is the same as that relating to the tables of tea production and the differences in area between the figures and those in table No. 3 are due to the same causes.

The figures relating to the number of persons employed have been subject to the same change, and have since 1894 been rendered in the same manner.

TABLES Nos. 12 and 13 (pages 362—369).

These tables exhibit in some detail the progress of the production of chin-chona. The figures for Government plantations are furnished by the officers in charge; those for private plantations are obtained each year from owners and managers of estates.

GENERAL NOTES.

The early history of the tables is the same as that of the tables relating to tea and coffee.

The figures of area differ in some instances from those in table No. 3, because areas for which accurate statistics are not available are excluded from that table and are included in these, and because the statement for Mysore is prepared for the year ending the 30th June.

TABLE No. 14 (pages 370—379).

This table is a compressed reproduction of the final estimates of certain important crops annually received from the local authorities. In all cases, the figures of both area and production are estimates, more or less approximate, though on the whole reasonably accurate. But there are exceptions in the figures for Native States which are in most cases defective by the omission of States, or by errors, and they must be accepted with reserve.

GENERAL NOTES.

The estimates state the area actually sown, whether the crop comes to maturity or not, but fields, which have been sown with other crops owing to the failure of the first sowings, are not entered.

The areas covered by the several crops in a mixed field are estimated in various ways in the different provinces and the estimates are based on formulæ presented by the provincial authorities.

Generally, three estimates of each crop are made in the course of the season; preliminary, intermediate, and final. The figures in the table are reproduced from the final reports.

In some cases estimates are made only for tracts where the crop is extensively grown, while in Madras as yet no attempt has been made to secure information touching the crops in zamindari estates which comprise about a third of the whole presidency. It should be understood therefore that the figures in the table are by no means complete.

The yield of rice is given in terms of clean rice. That of cotton is in every case expressed in terms of 'cleaned' cotton, that is, cotton with the seeds extracted.

PROVINCIAL NOTES.

Burma.
(Rice) The information is obtained from township officers and thugyis and is verified, on an inspection of the character of the crop, by district officers in consultation with the Superintendents of Land Records. It is compared by the Director of Land Records and Agriculture

with a standard representing the average which was fixed after an extensive series of experimental crop cuttings by settlement officers. The standard is 32 baskets (of 48 lb each) = 1,536 lb to the acre.

Estimates are made for the fourteen chief rice-producing districts of Lower Burma, namely, Akyab, Kyaukpyu, Hauthawaddy, Pegu, Tharawadi, Prome, Thongwa, Bassein, Henzada, Myaungmya, Amherst, Tavoy, Toungoo, and Thaton.

The only estimate received is for mustard. The information is obtained from district officers. The season's figures are compared by the Director with a standard (500 lb to the acre) which is the result of 1,417 crop cuttings in about 492 acres in the nine years ending 1889-90 over the whole Brahmaputra valley. Assam. (Oilseeds)

Estimates are made for rice, wheat, cotton, oilseeds, jute, indigo, and sugarcane. The figures are based mainly on rough approximate estimates made by district officers, and are more or less conjectural. The system of making crop cuttings, as in other provinces, over a series of areas and seasons for the ascertainment of standards of yield has been in force in Bengal for the last five years, but sufficiently trustworthy figures of yield have not yet been obtained from these cuttings to enable Government to accept them as standards. Bengal.

The rice crop includes the *bhadoi* or *aus* (sown in May and mostly reaped by the middle of September), the winter rice (sown in May and June, transplanted in August and September, and reaped in November and December), and the *boro* or summer rice (sown towards the close of the cold weather and reaped in April to June). The yield is calculated as follows: the area cultivated with winter rice is multiplied by 15 maunds to the acre, and the area with autumn rice by 10 maunds (the maund in each case being equal to 82½ lb). These rates have been assumed to represent the average yield in cleaned rice. (Rice)

Wheat is grown in all the districts of Bengal, Bihar, and Orissa, excepting Khulna, Dinajpur, Bogra, Dacca, Backerganj, Tippera, Noakhali, and Puri. Of the total area grown with the crop the districts of the Patna division contain about one-half and those of the Bhagalpur division about one-third. The average yield has been fixed provisionally at 12 maunds, or 984 lb per acre for the Bihar districts, 10½ maunds or 861 lb per acre for the Bengal districts, and 45 lb per acre for the districts of Chota Nagpur. (Wheat)

For cotton there are two reports, one on the early and the other on the late crop. The early crop, which is sown during the monsoon rains and harvested in winter, is grown in Midnapur, Jalpaiguri, the Chittagong hill tracts, Moughyr, Bhagalpur, the Santal Parganas, and the Chota Nagpur and Orissa divisions. The late crop, which is usually sown at the close of the rainy season and harvested in May and June, is grown in Bankura, Midnapur, Manbhum, Singbhum, and the Patna, Bhagalpur, and Orissa divisions, excepting the districts of Gaya, Srirahabad, Purnea, Malda, and the Santal Parganas. (Cotton)

The oilseeds are principally linseed, rape and mustard, and sesamum. The first three are grown in all districts, excepting Jalpaiguri, Darjeeling, Rangpur, Ranchi, and Manbhum in the case of linseed; and are sown generally in October and reaped early in winter. The average yield is assumed to be 6 maunds per acre. (Oilseeds)

Sesamum is grown in all districts excepting Hooghly, Darbhanga, Purnea, Angul, and Khondmahals; it is sown generally in October and reaped early in winter. A late variety is sown in the cold weather and reaped in May. The average yield is assumed to be 4½ maunds per acre.

The estimate of the jute crop covers twenty-six districts in which jute is grown, namely, Bardwan, Midnapur, Hooghly, all the districts of the Presidency, Rajshahi, and Dacca divisions, Tippera, Noakhali, Bhagalpur, Purnea, Malda, Cuttack, and Balasore. A general rate of 1,200 lb, or three bales, is assumed to represent the average production per acre for every jute-growing district in the province. (Jute)

The report on indigo relates to twenty-two districts in the Bardwan, Presidency, Rajshahi, Dacca, Patna, Bhagalpur, and Orissa divisions. The average yield is assumed to be 12 lb an acre in Bengal and 20 lb an acre in Bihar. These rates serve as multipliers of the acreage under cultivation in each district. (Indigo)

The report on sugarcane, which is sown during the winter season and harvested after a year, relates to the Bardwan, Rajshahi, Dacca, Patna, Bhagalpur, and Chota Nagpur divisions, where the crop is mainly grown. (Sugarcane)

Estimates are made for wheat, cotton, linseed, rapeseed, sesamum, indigo, and sugarcane. N.-W. Provs. and Oudh.

For the ascertainment of a standard rate of yield in the case of wheat, cotton, oilseeds, and indigo these provinces were divided into belts, each comprising districts resembling one another in soil, climate, and artificial conditions of cultivation. For each belt a standard rate of average full yield was fixed after consultation with zamindars, settlement officers, and managers of estates under the Court of Wards. These reported the rate of yield after weighing the actual yield of fields which were regarded as growing a crop in fully average condition. For other crops actual weighments were made at the Government farm at Cawnpore.

The condition of crops is reported to the Director of Land Records and Agriculture by some five hundred zamindars, each for his own circle, which usually embraces a tahsil or part of a tahsil. From these figures the Director works out the average condition of the crop for each district, and calculates the yield by applying to the area of the crop in

each district the standard of full yield fixed for the belt in which the district lies, modifying the yield according to the reported condition of the crop.

(Cotton) For cotton (cleaned) the standard rates of yield vary from 100 to 130lb the acre, in places where the crop is raised unmixed with other crops, and from 50 to 30lb where mixed with other crops.

(Oilseeds) The only districts in which til (sesamum), unmixed with any other crop, is cultivated to any considerable extent are Banda, Hamirpur, Jhansi, Jalaun, Mirzapur, Gorakhpur, Sitapur, Gonda, and Bahraich. The standard of full yield is taken at 200lb the acre.

(Indigo) In estimating the yield of indigo (dye), it is assumed that one-tenth of the total area is annually set aside for seed, and that one-fourth of a factory maund of dye represents the full average outturn in an average year.

Panjab. Estimates are prepared for wheat, cotton, rapeseed, sesamum, indigo, and sugarcane.

The estimates of the standard yield are based principally on data derived from a large number of tests made during the progress of settlement operations in which crops were cut and weighed. They were framed for each assessment circle which is the unit of area, and separately for lands irrigated by canals, by wells, for alluvial (*sailab*) lands, and for lands entirely dependent on rain. The standards are applied to the estimates received from the district officers.

(Wheat) The estimates of the wheat crop include all the districts of the province.

(Cotton) The estimates of the cotton crop relate to all the districts except Simla.

(Oilseeds) In the estimate for rapeseed twenty out of thirty-one districts are reported on: Hissar, Delhi, Karnal, Ambala, Hoshiarpur, Ludhiana, Ferozpur, Lahore, Amritsar, Sialkot, Gujrat, Gujranwala, Shahpur, Jhelum, Rawalpindi, Hazara, Peshawar, Dera Ismael Khan, Dera Ghazi Khan, and Muzaffargarh.

The estimate for sesamum relates to sixteen districts: Hissar, Gurgaon, Karnal, Ferozpur, Kangra, Multan, Montgomery, Lahore, Amritsar, Gurdaspur, Sialkot, Gujrat, Gujranwala, Peshawar, Dera Ismael Khan, and Muzaffargarh.

(Indigo) The estimates of the indigo crop relate to seven districts: Hissar, Rohtak, Gurgaon, Karnal, Multan, Dera Ghazi Khan, and Muzaffargarh; in two of these (Hissar and Rohtak) the crop is grown only for seed, and in the remaining five partly for seed and partly for dye.

(Sugarcane) The crop is sown in March and April. The report relates to sixteen selected districts.

Bombay and Sind. Estimates are framed for wheat, cotton, linseed, rapeseed, sesamum, and groundnut.

No standard of yield has been adopted. Local estimates are converted to quantitative figures by a formula based partly on actual ascertainment of yield by crop cuttings and partly on returns of estimated yield and local enquiry. The ascertainment of actual yield is being systematically continued in each district under the direction of the provincial Agricultural Department, and the results are tabulated and compared in order to form a basis for the revision of the formula. The unit of area in the formula is the taluk; and dry and irrigated crops are separately dealt with.

Each year's estimate is prepared by the mamlatdars (or mahalkaris where the taluk is subdivided) from notes which they make and from reports from village accountants and circle inspectors. The estimate is sent direct to the Director of Land Records and Agriculture who, in the light of the general prospects of the season, makes the quantitative calculations. A copy of the estimate is at the same time sent to the Collector through the Subdivisional officer, who sends his remarks, if any, to the Collector, forwarding a copy of the same to the Director. The Collector on receipt of these remarks forwards to the Director his opinion as regards the general condition of the whole district.

Except for Gujarat, the formula is framed on a system by which allowance is made in the quantitative yield for the ascertained tendency of the raiyat to under-estimate good yields and to over-estimate poor yields.

For Sind there are no formulae, and all the necessary information is obtained by the district collectors in the form of estimates on the basis of twelve, together with quantitative equivalents gathered from general experience.

For the Native States estimates are obtained, and the formula for adjoining British districts is applied.

(Wheat) The estimates for wheat include the British districts, and Native States in Gujrat, Deccan, Karnatak, and Sind.

(Cotton) The figures for cotton relate to the whole area under that crop in Bombay Presidency and Sind, and include both the early crop of the Deccan sown in July to August and harvested in December, and the late crop of Gujrat, Karnatak, and Sind sown in September to October and reaped in February to March.

(Oilseeds) The estimates for linseed include the British districts and the Native States in Gujrat, Deccan, and Karnatak.

Those for rapeseed include the British districts and the Native States in Gujrat and Sind.

The estimates for sesamum include the British districts and the Native States in Gujrat, Deccan, Karnatak, Konkan, and Sind.

The estimates for ground-nut include the British districts and Native States in the Deccan, (Ground-nut) and the Belgaum district in Karnatak.

Estimates are framed for wheat, linseed, sesamum, and cotton.

Standards were framed for each crop from the results of the cutting of crops on selected *Central Provinces.* fields under the supervision of responsible and selected officials during the years 1884-85 to 1887-88. For wheat the standard was framed separately for first and second class lands, and the proportion in which the area of each class was cropped was taken into account; irrigation also was taken into account, but in a less degree as it is of importance only in the case of the rice crop. The standards were revised in 1891 on a review of crop cuttings made during the four years, 1888-89 to 1891-92. They were again revised in 1898 on a revision of crop cuttings made during the four years 1892-93 to 1895-96. The yield expressed by the people in terms of annas in the rupee is converted into percentages, 13·3 annas, or a normal crop, being taken to be equal to 100. A full crop or 16 annas is denoted by 120, and a bumper crop or 20 annas by 150. All deductions based on the standards are made by the Director of Land Records and Agriculture from the year's figures furnished by district officers who are supposed to bear in mind the standards when estimating the yield of the season.

Until 1897-98 the figures of area did not take into account the zamindari areas in Raipur, Bilaspur, and Sambalpur, for which no statistics were available, the survey being in progress. Since that year, the surveyed portions of these zamindari areas have been included.

The area sown with wheat as a mixed crop with gram is reduced for the purpose of excluding gram by 20 per cent in Hoshangabad and 15 per cent in other districts. (Wheat)

The area on which cotton is grown mixed with other crops is reduced by 14 per cent. (Cotton)

In the case of linseed the area sown with gram is reduced by 20 per cent for the purpose of excluding gram. (Oilseeds)

Estimates are framed for wheat, linseed, sesamum, and cotton. No standard yield has *Berar.* been fixed and there is no specific system for estimating the yield of the harvests for the purposes of the forecasts.

Estimates are framed for rice, cotton, sesamum, ground-nut, indigo, and sugarcane. The *Madras.* figures of area include only raiyatwari villages; the estimates where prepared, relate to the whole area from which agricultural statistics are obtained. The estimates of the rate of yield are those reported by tahsildars, which are tabulated in the office of the Board of Revenue.

For rice the standard rates are based on the grain values of soils taken for settlement purposes, and worked out for each settled district as the standard for these districts. For districts not yet settled, and for Tinnevely, the average of all settled districts is taken. (Rice)

For cotton the standard has been determined on a full consideration of all available data *(Cotton)* at 50lb per acre for Coconadas, 40lb for Northern and Westerns, 55lb for Salems, and 70lb for Tinnevellies. The sowings of cotton continue from July to October in the central and Deccan districts, and in the southern districts until the end of November. The harvesting of the crop begins in February and continues until July or August.

For sesamum the standard of yield was fixed in 1888 on the results of numerous crop cuttings in all taluks. (Oilseeds)

The crop is chiefly grown in North Arcot, Chingleput, South Arcot, Tanjore, and Trichinopoly, more than half being grown in South Arcot. The crop is also very largely grown in the zamindari area from which no statistical information is at present obtainable. (Ground-nut)

The estimates for indigo comprise the districts in which it is mainly grown: Kistna, Nellore, Karnul, Anantapur, Cuddapah, Chingleput, and North and South Arcot. The standard of yield was taken, on the best information on record, at 25lb of dye to the acre. (Indigo)

The reports refer to the raiyatwari tracts forming about two-thirds of the presidency. *(Sugarcane)* The crop is grown chiefly in South Arcot, Trichinopoly, Ganjam, Godavari, Bellary, Anantapur, Coimbatore, Cuddapah, and South Arcot.

Estimates are framed for wheat and cotton. They are generally incomplete in consequence of the absence of figures from some of the Native States. *Rajputana and Central India.*

Estimates are framed for wheat, cotton, and oilseeds. *Hyderabad.*

Estimates are framed for wheat only. *Mysore.*

TABLE No. 15 (pages 380—413).

The tables exhibit the average yield per acre of the principal cultivated crops, deduced from experiments made during the five years ending 1896-97.

GENERAL NOTES.

A statement of the yield of the principal crops grown in each province was compiled in 1892 from agricultural and settlement reports, crop estimates and gazetteers, and also from the answers given to the questions put by the Famine Commission of 1880. It was decided to revise and correct the figures thus brought together by means of experimental crop cuttings, the results of which were to be reported quinquennially. The figures deduced from the experiments made during the five years ending with 1896-97 have been embodied in this table, but the operations in some provinces were so indefinite and untrustworthy that for those provinces the estimates prepared in 1892 have been reproduced without revision, side by side with the later estimates, where such exist.

The instructions of the Government of India in regard to the crop cuttings were that an estimate should be given of the average yield on average soil in a year of average character, as deduced from a consideration of the information obtained or experiments made during the five years; so that the estimate of average yield, multiplied by the average area from which crops were taken, might give an approximation to the total yield of each crop in an average year. The object of these experimental crop cuttings was to obtain tests of the accuracy of the estimates of 1892 and to enable the head of the Agricultural Department in each province to revise them, for the districts and for the province generally, when necessary. If, as may happen, the period during which the experiments are made is one of exceptionally poor harvests and they indicate an exceptionally poor yield, the results should not be held to prove that the standard of yield, as obtained from estimates of 1892, should be reduced, unless it is considered that the standard, regarded as a standard of yield in average years, is too high. These quinquennial returns of experimental crop cuttings are not intended to indicate the yield per acre during the particular period in which the experiments were made, which may have been a period of exceptionally good or exceptionally bad harvests, but what may be reasonably considered the ordinary yield in an average year.

The principles stated by the Government of India, as here recited, appear to have been consistently followed in framing the estimates for Bombay, the Panjab, and the Central Provinces. In the North-Western Provinces and Oudh, however, the precise object of the experiments was not realised, for it would appear that the average of those experiments which were thought to be trustworthy was stated as the yield of the quinquennial period. Similarly the yield of the period of experiment seems to have been stated for Assam. The other provinces have made allowances for exceptional conditions of the season, but the precise manner of framing the estimates has not been stated.

The instructions that the yield stated should be that of the main product of the crop have not always been observed, and some provinces have returned yields of unhusked rice or paddy and of uncleaned cotton. In these cases the yields have been reduced to the required denomination in the abstract statement of provincial averages, but in the detailed statements the original figures have been retained. The reduction for unhusked rice has been taken at 38 per cent, the rate adopted by Assam and practically the mean between 35 per cent estimated by Coorg and 40 per cent suggested by the Central Provinces. For uncleaned cotton the reduction to allow for the removal of the seed has been taken at 70 per cent.

PROVINCIAL NOTES.

The statistics relating to the districts in Upper Burma which have not been settled, that is, all districts except Mandalay and Kyaukse, are stated to be of little value, as the experiments were left in great measure to the township officers, who cannot always be trusted to have fields accurately measured, and district officers hardly possess sufficient knowledge of the relative fertility of the various parts of their districts to be able to select correctly fields representing the principal soil divisions. The seasons were very unfavourable for experimenting on unirrigated crops; and as the areas under the different crops are only very imperfectly known, it was not possible to estimate the provincial yield. In Lower Burma experiments were made with rice only. The estimates, which are based on selected experiments, are believed to be fairly correct. The yield for the five years ending 1896-97 under district heads is stated in unhusked rice; but in the experiments made since that year in husked rice. In the abstract statement of provincial averages the estimate of 1,700lb for unhusked rice for the period ending 1896-97 has been reduced to 1,054lb for husked rice.

Assam. Numerous and carefully conducted experiments were made during five years, and the results arrived at are reported to represent approximately the average yield on average soil in a year of average character. The method of calculating the average yield was to divide the figure representing the total yield obtained through experimental cuttings during the quinquennial period by the figure representing the aggregate area from which the cuttings were taken. This calculation gives the average yield of the selected fields during the quinquennial period, and the result can only be taken to represent the yield in a year of average character on the assumption that each of the years gave a normal crop on the fields selected, and that those fields were representative of the land of the province.

The estimates are, with slight modifications, practically the same as were framed in 1892. *Bengal.* Crop cutting experiments have been conducted for five years, but the results are not considered sufficiently definite and trustworthy to form a basis for the revision of the estimates of 1892. The only crop of which a fairly large number of cuttings was made is winter rice, but even of this crop the number of cuttings was not sufficiently large in any district to afford a trustworthy average of yield. The information furnished is so incomplete that a provincial average cannot be estimated.

The yields returned are the average of the four years of experiment, not one of which was *North-Western* of an average character; they are stated to be moderately representative of the yield of *Provinces and* unfavourable seasons and qualified neither to supersede nor to correct the estimates of 1892, *Oudh.* which were based on a mass of valuable and trustworthy statistics.

The number of experiments was small. The yields of 858lb and 958lb of clean *Ajmer-Merwara.* cotton to the acre are impossible, and even if they are taken to represent uncleaned cotton, the provincial average of 908lb reduced by 70 per cent gives the excessive yield of 272lb of clean cotton to the acre. The yields of irrigated barley and maize are also excessively high.

The figures record in part the results of experiments conducted during the quinquennial *Panjab.* period, corrected where considered necessary by the Director of Land Records, and are in part a reproduction of the estimates made in 1892. In compiling the statement of district averages the latter set of figures has been separated from those obtained by experiments. The provincial averages which were based on the two sets of figures have, however, been retained.

Very few experiments were made, and the statistics returned are either a reproduction *Sind.* of the estimates of 1892, or are based partly on experiments and partly on data found in Settlement Reports.

The averages differ considerably from the statement prepared in 1892. For dry crops *Bombay.* the yield is considerably below the previous estimates, but a higher rate of yield is stated for irrigated crops. The yield based on the crop experiments was carefully revised by personal observation and experience, and allowance made for the low yields of poor soils. It is stated that the tendency was to greatly underestimate the production of cereals under well water, and the yield on irrigated land of wheat, jawar, ragi, and gram as now returned is very much higher than are estimated by the other provinces. The yield of unirrigated rice is also higher than for any province except Coorg, where the crop experimented on was partly irrigated. The average yield of *gur* from sugarcane appears large, compared with other provinces, but the head of the Provincial Department claims that experiments and the results on the Poona farm have furnished accurate knowledge of the yield of this crop.

Experimental crop cuttings were started in 1884-85, and a trustworthy estimate was *Central* framed in 1894 from experiments conducted down to 1891-92. Further experiments were made *Provinces.* for the four years ending 1895-96, and the accepted estimates were examined in the light of these subsequent experiments, the standards being changed only where there was a strong statistical basis to proceed upon. The yield given is that of unhusked rice and uncleaned cotton. In the abstract statement of provincial averages the yield of the former has been reduced from 1,080lb to 670lb for husked rice and of the latter from 250lb to 75lb for clean cotton.

Experiments were made only in five talukas, representative of the country above the *Berar.* Ghats and the richer and poorer soils of the Berar valley, and the average yields of these areas were taken as representative of the whole in striking the provincial averages. The corrected results are greatly in excess of the estimates of 1892, which were evidently too low. The yield is given of unginning cotton, and consequently in the abstract statement of provincial averages the figure has been reduced from 457lb to 137lb for clean cotton.

The number of experiments was small, 291 in all, and the results were stated *Madras.* without district averages. The yields of the various crops, as indicated by these experiments, exhibit such extraordinary discrepancies in the same district or in equally fertile tracts, that it would be misleading to strike an average of the results; and, consequently, the estimates for 1892 have alone been tabulated. The Board of Revenue remarks in regard to the experiments: "Any calculations based upon results so divergent as these cannot fail to be misleading; and until further experiments conducted in a uniform manner by a trained

trustworthy establishment, which can devote its whole attention to the work, have demonstrated more clearly the true outturn of each variety of soil, the Board would prefer to adhere to the figures already recorded by the Settlement Department, below the mark as they are believed to be in many cases ;” and again : “ The Board has abstained from framing any district average outturns based on such wholly inadequate data, and would deprecate any deduction being drawn from the figures it now furnishes.”

Coorg.

The experiments were limited to rice. The estimated yield of 1,364lb an acre for unirrigated land is higher than for any other province, but some of the fields experimented on were watered by channels from small mountain streams and were thus virtually irrigated.

Mysore.

Experiments were made only during 1896-97, which was a year of scanty rainfall. No experiments were made in *til* (sesamum). The yield given is of unhusked rice, and consequently in the abstract statement of provincial averages the figure 1,516lb has been reduced to 940lb for husked rice.

TABLE No. 16 (pages 414—417).

In this table are entered such changes as are made from time to time in district, divisional, and provincial boundaries.

Vernacular terms used in the Explanatory Memorandum.

- Bané** (Coorg).—Forest land granted for the service of the holding of rice-fields to which it is allotted, to be held free of revenue for grazing, leaf manure, firewood, and for timber required for the farm.
- Bhagdari**—See *Narvadari*.
- Bobabaing** (Upper Burma).—Non-state land.
- Inám** (Mysore).—Wholly or partially revenue-free tenure; *minor ináms* are inám lands situated in a village, whether Government or inám.
(Madras).—Whole inám villages are entire villages held on such tenure; *minor ináms* are portions of villages, generally a number of fields held on inám tenure.
- Istamrári** (Panjab, Ajmer-Merwara, and Gwalior).—A tenure which, though the revenue is assigned, is charged with a permanently fixed quit-rent.
- Izáfai** (Bombay).—A form of service tenure.
- Izdra** (Berar).—Land leased under the waste-land rules on stipulated terms.
- Jagir** (Berar).—Alienated villages or lands granted as rewards for service either rent-free or on payment of a quit-rent; such lands are hereditary.
(Ajmer-Merwara and Gwalior).—Land granted revenue-free on condition of military service or as a charitable endowment.
(Bombay).—Estates held hereditarily or for one or more generations on political considerations, no condition of service being attached to them.
(Coorg).—Lands granted rent-free (1) to individuals on account of services rendered to the State by themselves or their ancestors, and (2) to some religious institutions.
- Jamma** (Coorg).—A military tenure under which certain Coorgs hold lands on half the ordinary assessment, and in return are liable to be called on to perform certain services, such as escorting treasure and military service if required. These lands cannot be alienated by the holders.
- Jodi** (Madras).—Portion of the assessment reserved or left unalienated when lands were originally granted on favourable assessment. It is distinguished from quit-rent, which represents an additional charge (generally a certain proportion—one-eighth, one-fourth, one-half, or five-eighths—of the full assessment, minus the jodi) imposed when the tenures were enfranchised or converted into free-holds.
(Mysore).—A whole inám village paying quit-rent to Government.
- Kayamgutta** (Mysore).—A whole village granted by the State on fixed money rent.
- Khalsa** (Bombay).—Government occupancy or raiyatwari tenure.
(Central Provinces).—Areas settled on malguzari or thekadari tenure, in contradistinction to zamindari as defined in the note on page iv.
(Berar).—Government land paying full revenue to Government.
(Ajmer-Merwara).—Land paying full revenue to Government.
(Jaipur).—Land paying full revenue to the State.
- Khatedar** (Berar).—A registered occupant whose name is entered by authority in the Government records as holding unalienated land.
- Khiraj** (Assam).—Land assessed to full revenue.
- Khohi** (Bombay).—A form of tenure, found chiefly in the Konkan, the holder of which is, in return for certain semi-proprietary rights, held responsible for payment of assessment on the area held.
- Kwin** (Burma).—A tract of land separated from other tracts by some well defined boundaries, such as creeks or belts of forest.
- Lakkiraj** (Assam).—Revenue-free land.
- Malguzari** (Central Provinces).—A form of tenure, the holder of which is responsible for the payment of the revenue assessed on a village.
- Malikmakbuza** (Central Provinces).—A person owning one or more plots of land separately assessed to revenue in a village, who is not a malguzar, inferior proprietor, or a member of the proprietary body of that village.
- Mehwasí** (Bombay).—A proprietary tenure assessable to revenue at a lump sum.
- Milankhasra** (Bombay and Central Provinces).—An abstract record in which the village area is classified.
- Mittas, Palayams** (Madras).—Certain classes of permanently-settled estates differing in their origin from zamindaris. Mittas were artificial estates created under Madras Regulation XXV of 1802, while Palayams are the estates of Poligars or old chieftains. Most of the latter have been granted title-deeds of permanent settlement under the Regulation mentioned, but a few have not been settled, though in practice their revenue is treated as fixed.
- Muchí** (Manpur).—Any kind of land held revenue-free either for a fixed period or in perpetuity, but the term does not ordinarily apply to jagirs.
(Gwalior).—Land granted free of revenue.
- Narvadari, Bhagdari** (Bombay).—Forms of proprietary tenure involving joint responsibility for the assessment: the revenue in the former case being fixed in the lump, and in the latter distributed by rates over fields.
- Nazri** (North-Western Provinces).—Property escheated or lapsed to the State.

- Nisfkhiraj* (Assam).—Land liable to pay half the revenue which is ordinarily payable for the term of settlement.
- Pahikashl* (Jaipur).—A non-resident cultivator; one who cultivates lands in a village in which he is not a settled or permanent resident.
- Palanpat* (Berar).—Land held on payment of a quit-rent, but not necessarily hereditary.
- Paspattigar* (Coorg).—A revenue officer in charge of a subdivision of a talak.
- Patei* (Mysore).—Village headman appointed by Government.
- Peshkash* (Madras).—The fixed land revenue payable to Government on all permanently-settled estates.
- Poramboke* (Madras).—Lands reserved for public or village communal purposes.
- Pôt indms* (Bombay).—Lands sub-alienated in alienated villages.
- Pôt kharab* (Berar).—The unculturable area included in a survey number.
- Saramanyam* (Mysore).—An inâm village, wholly revenue-free.
- Shanbôg* (Mysore).—A village accountant appointed by Government.
- Shrotrien* (Madras).—Village held on grant (originally to Brahmias), wholly or partially revenue-free.
- Talukdari* (Bombay).—A form of proprietary right in force in the northern districts of Bombay.
- Tanka* (Gwalior).—Estates held by certain families who were in power when the country was annexed and who were left in possession of their estates on payment of a fixed annual tribute, or *tanka*, bearing but a small proportion to the annual assets.
- Thathameda* (Upper Burma).—Household tax.
- Thekadari* (Central Provinces).—A farmer, a leaseholder, a middleman; one who receives the rents from the cultivators and pays a stipulated sum to the proprietor.
- Ubari* (Gwalior).—Land held at an abatement of the full land revenue.
- Udhad-jamabandi* (Bombay).—A proprietary tenure subject to fixed assessment.
- Umblî* (Coorg).—Lands granted on reduced rates to individuals on account of services rendered to the State by themselves or their ancestors.

NOTE.—The excess in some cases of the total area of crops irrigated (column 18) over the total area irrigated (column 13) is due to the inclusion in column 18 of the area irrigated at both harvests.

(a) There is but little irrigation in Assam.

(b) Figures not available, except for columns 2 to 7.

CLASSIFICATION OF AREA 88

(ALL PROVINCES)

No. 2—continued.

CLASSIFICATION of the AREA (in acres) of each PROVINCE in BRITISH INDIA and of MYSORE—continued

| PROVINCE | Forests. | Not available for cultivation. | Culturable waste other than fallow. | Current fallows. | Net area cropped. | Total. | AREA | |
|--------------------------|------------|--------------------------------|-------------------------------------|------------------|-------------------|-------------|--------------------|-----------------|
| | | | | | | | Government canals. | Private canals. |

NOTE.—The excess in some cases of the total area of crops irrigated (column 18) over the total area irrigated (column 13) is due to the inclusion in column 16 of the area irrigated at both harvests.

No. 2—E—continued.

CLASSIFICATION of the AREA (in acres) of each DISTRICT in the NORTH-WESTERN PROVINCES—continued.

| DISTRICT | Forests. | Not available for cultivation. | Culturable waste other than fallow. | Current fallows. | Net area cropped. | Total. | AREA | |
|---------------------|----------|--------------------------------|-------------------------------------|------------------|-------------------|-----------|--------------------|-----------------|
| | | | | | | | Government canals. | Private canals. |

(1) The sum of the area in col. 4 (3) plus the cultivated portion of the area not fully assessed agrees with that entered under head 41 of Table No. 3. except in the case of Garhwál in which the fully assessed area according to the revised settlement is stated.
(2) The tenure in Oudh is all zamindari, and includes village communities in the case of temporarily settled areas.
