

AGRICULTURAL STATISTICS

OF

INDIA

FOR THE YEARS

1907-08 TO 1911-12

VOLUME I—BRITISH INDIA

Prefatory Note

In 1866 a set of tables, proposed by a specially appointed Statistical Committee, was prescribed by the Government of India for general adoption as appendices to the annual reports on general administration. .

In 1881, at the instance of the Secretary of State for India, some of these forms, relating to agriculture, land, and tenures were re-considered and modified after examination and discussion by a conference of officers of the Agricultural Departments. The modified tables, eight in number, were compiled for the first time for 1884-85, and published under the title of 'Returns of Agricultural Statistics of British India.' These tables were prepared and published annually until 1887-88, when a re-arrangement was made of the headings of four statements dealing with area, irrigation, crops, and agricultural stock, though no modification was made in substance.

In 1891, the tables were again revised and, to some extent, re-cast. The revised series of 1891 has, with a few unimportant alterations, been maintained to the present time, with the exception that two tables (wholesale prices and varieties of tenure) have been discontinued, other arrangements having been made to secure a record of prices.

The following schedule compares the three series of 1866, 1884, and 1891 :—

1866	1884	1891
IA. 1.—Area cultivated and uncultivated.	A.—Area cultivated and un- cultivated.	A.—Total acreage, classifica- tion of areas (including irrigation), area under crops, and stock.
IIID. 1.—Crops cultivated.	Irrigation.	
IIID. 2.—Agricultural stock.	B.—Crops cultivated.	
IIIE. 1.—Prices of produce.	IIID. 2.—Agricultural stock.	B.—Prices of produce. (Dis- continued from 1894- 95.)
	IIIE. 1.—Prices of produce.	
IE. 2.—Surveyed and assessed area.	C.—Surveyed and assessed area.	C.—Incidence of the land revenue on area and population.
IE. 3.—Varieties of tenure held direct from Government.	IE. 3.—Varieties of tenure held direct from Government.	D.—Varieties of tenure held direct from Govern- ment. (Discontinued from 1901-02.)
IE. 4.—Varieties of tenure not held direct from Govern- ment.	(Discontinued)	(Discontinued)
IE. 5.—Register of trans- fers.	IE. 5.—Register of transfers.	E.—Register of transfers of landed property.
IIID. 3.—Rates of rent and produce.	(Discontinued)	(Discontinued)

The tables of the series of 1891 as published in this volume consist of six separate tables numbered, 1 (area), 2 (classification of area), 3 (area under crops), 4 (live-stock, etc.), 5 (land revenue), and 6 (transfers of land). Each table gives the figures for each province for five years, with a total for British India, and is followed by subsidiary statements numbered 1-A, 1-B, 1-C, etc., giving similar figures for each district in each province. Besides these there is an Appendix consisting of two statements of a special nature, which deal with A—average yield per acre of principal crops, and B—changes in district, divisional, and provincial boundaries. Statement B is explanatory of the variations in the areas shown in table No. 1:

The general scope of the figures given in these tables may be explained as follows:—

The total area of India is 1,131,425,571 acres, or 1,767,852 square miles, with a population of 315 millions according to the census of 1911. This may be divided as follows:—

	Acres	Population
(1) British Provinces (including Native States under the control of Local Governments) .	748,557,916	268,542,790
(2) Native States under the control of the Government of India	316,509,895	44,743,557
(3) Specially administered territories in Burma (i.e., Shan States) not included under (1) .	86,497,920	1,359,154
(4) British Baluchistan (including administered areas)	29,859,840	414,412

The area of British Baluchistan is excluded entirely from the Agricultural Statistics of India. The area of British Provinces only is dealt with in this volume—tables 1—6 and Appendix B. In Appendix A figures relating to the State of Mysore are included. Volume II deals only with Native States.

The total area of the British Provinces dealt with in this volume—748,557,916 acres, or 1,169,620 square miles—includes 129,951,978 acres, with a population of some 25 millions, belonging to Feudatory and Tributary States which are under the political control of Local Governments. These include in Burma, the Mông Mit State, the Hkamti Long State and the Upper Chindwin States; in Assam, Manipur, the Khási and Jaintiá Hill States, in Bengal, Cooch Bihar and Hill Tippera; in Bihar and Orissa the Tributary States of Orissa and Chota Nagpur; in the United Provinces, Rampur, Tehri, and Benares; in the Punjab, the Phulkian States, Bahawalpur, the Delhi and the Jallandhar Division States, and the Simla Hill States; in the North-West Frontier Province, the Phulera and the Upper Tanawal States; in Sind, the Khairpur State; in Bombay, the Gujarat States (excluding Baroda), the Konkan States, the Satara Jagirs, and the Southern Maratha States; in the Central Provinces, the Chhattisgarh States; in Madras, the States of Travancore, Cochin, Pudukkottai, Banganapalle, and Sandur. Of these States Agricultural Statistics are prepared for most of the States in the Punjab, and all the States in Madras; but they are dealt with in Volume II along with the States under the control of the Government of India. Thus by deducting 129,951,978 acres belonging to Feudatory and Tributary States from the total area of 748,557,916 acres included in British Provinces, a balance of 618,605,938 acres is left, as shown in table No. 1, which represents the area of British territory according to professional survey. The agricultural statistics are, however, prepared in a number of provinces or parts of provinces from

village papers; and the area given in the village papers of the United Provinces, the Central Provinces, Madras, the Punjab, and the North-West Frontier Province differs to some extent from the area ascertained by professional survey. The actual area, therefore, for which statistics are given in this volume is 616,120,924 acres, or 962,689 square miles.

About two-thirds of this area is available for cultivation as shown in table No. 2; 80,851,369 acres are under forests; and land absolutely barren or unculturable or covered by buildings, water, and roads, or otherwise appropriated to uses other than agriculture, amounts to 149,605,179 acres. The balance 385,664,376 acres represents the area available for cultivation, of which 215,981,682 acres were actually cropped during the year. The remainder is divided between current fallows (54,982,324 acres) and land available for cultivation but not cultivated and not classed as current fallows (114,700,370 acres).

Table No. 3 shows the number of acres cultivated with each kind of crop in each year. In the case of land from which more than one crop is taken, the area actually cultivated with each crop is shown under each crop-heading, but the total number of acres from which more than one crop was taken in the year is also recorded. Thus, in 1911-12, the total area cultivated with different crops was 249,001,750 acres. But 33,020,068 acres were cropped more than once. The net area cropped according to the available statistics is therefore 215,981,682 acres.

The proportion which this area bears to the whole area of India may be seen from the following summary :—

	Acres
Total area of India	1,131,425,571
<i>Deduct.</i> —Area not dealt with in this Volume—	
1. British Baluchistan	29,859,840
2. Shan States	36,497,920
3. Native States under the Government of India (partly dealt with in Volume II)	316,509,898
Balance dealt with in this Volume (table I and Appendix B)	748,557,916
<i>Deduct.</i> —Tributary and Fendatory States under Local Governments (partly dealt with in Volume II)	129,951,978
Balance (British territory) for which Agricultural Statistics are given in this volume	618,605,938
Corresponding area in village papers	616,120,924
<i>Deduct.</i> —Area not available for cultivation—	
1. Forests	80,851,369
2. Others	149,605,179
Balance available for cultivation—	
1. Uncultivated	114,700,370
2. Fallow	54,982,324
3. Actually cropped	215,981,682

The population of each district is shown in columns 6 and 11 of Table 5. This Table relates to the Incidence of Land Revenue Assessment; but the population statistics there given may be brought into comparison with those exhibited in other Tables relating to the several classes of land, to the diverse descriptions of crop, and to irrigation, etc.

The notes prefixed to each table explain the changes which have been made since 1866 in the tables now published. The general instructions for compilation are given in the General Notes, and local peculiarities or methods of compilation are mentioned in the Provincial Notes.

Such statistics as have been supplied for the permanently-settled tracts of Bengal, Bihar and Orissa have been included in the tables since 1892-93, but, with the exception of the North Bihar and Orissa districts in Bihar and Orissa and Chittagong, Backerganj and Faridpur in Bengal, which have recently been surveyed, they are not based upon accurate surveys or village papers, and must therefore for the most part be regarded as estimates.

The Native States from which agricultural statistics are received are Mysore, from 1886-87 ; Jaipur, from 1892-93 ; Gwalior, from 1896-97 ; Bikaner, Marwar and Tonk, from 1898-99 ; Alwar, Bharatpur, Kishangarh, Jhalawar and Kotah, from 1900-01 ; Indore, Rajgarh, Narsingarh, Nagod, Patiala, Nabha, Jhind, and Bahawalpur from 1907-08 ; Faridkot, Kalsia, Pataudi, Loharu Dujana, Sirmur, Kapurthala, Malerkotla, Simla Hill States, Bhopal, Barwani, Travancore, Cochin, Sundur, Banganapalle, and Puddukottai from 1908-09 ; Kashmir from 1910-11. The statistics relating to all these States, which in some cases are very imperfect, are separately printed as Volume II.

The year to which the returns relate ends on different dates in different provinces :

Year ending 31st March	.	.	.	in Bengal, Bihar and Orissa, Assam, Coorg and Manpur ;
„ „ 31st May	.	.	.	in the Central Provinces and Berar ;
„ „ 15th June	.	.	.	in the North-West Frontier Province ;
„ „ 30th June	.	.	.	in Madras, the United Provinces, Burma, and Ajmer-Merwara ;
„ „ 31st July	.	.	.	in Bombay ;
„ „ 30th September	.	.	.	in the Punjab.

The crop statistics, however, in every province refer to the year closing with the harvesting of the *rabi* or spring crop.

A glossary is attached to this note giving the meaning of vernacular words used in the explanatory notes which are prefixed to the tables in this volume.

Vernacular terms used in the Explanatory Notes.

- Bané** (Coorg).—Forest land granted for the service of the holding of rice-fields to which it is allotted, to be held free of revenue for grazing, leaf manure, firewood, and for timber required for the farm.
- Bhagdari**.—See *Narvadari*.
- Gorait** (United Provinces).—Village watchman.
- Inám** (Madras).—Whole *inám* villages are *entire* villages held on such tenure; *minor ináms* are portions of villages, generally a number of fields held on *inám* tenure.
- Istamrári** (Punjab, Ajmer-Merwara).—A tenure which, though the revenue is assigned, is charged with a permanently fixed quit-rent.
- Izáfai** (Bombay).—A form of service tenure.
- Izára** (Berar).—Land leased under the waste-land rules on stipulated terms.
- Jagír** (Berar).—Alienated villages or lands granted as rewards for service either rent-free or on payment of a quit-rent; such lands are hereditary.
- (Ajmer-Merwara).—Land granted revenue-free on condition of military service or as a charitable endowment.
- (Bombay).—Estates held hereditarily or for one or more generations on political considerations, no condition of service being attached to them.
- (Coorg).—Lands granted rent-free (1) to individuals on account of services rendered to the State by themselves or their ancestors, and (2) to some religious institutions.
- Jamma** (Coorg).—A tenure under which lands are held on half the ordinary assessment on condition that the holders should perform certain services to Government, if required, such as escorting Government treasure and rendering assistance to revenue officers on tour. These lands are inalienable without special sanction.
- Jodi** (Madras).—Portion of the assessment reserved or left unalienated when lands were originally granted on favourable assessment. It is distinguished from quit-rent, which represents an additional charge (generally a certain proportion—one-eighth, one-fourth, one-half, or five-eighths—of the full assessment, *minus* the *jodi*) imposed when the tenures were enfranchised or converted into free-holds.
- Khálsa** (Bombay).—Government occupancy or *raiyatwari* tenure.
- (Central Provinces).—Areas settled on *malguzari* or *thekadari* tenure, in contradistinction to *zamindari*.
- (Berar, Ajmer-Merwara).—Land paying full revenue to Government.
- Khatedar** (Berar).—A registered occupant whose name is entered by authority in the Government records as holding unalienated land.
- Khiraj** (Assam).—Land assessed to full revenue.
- Khoti** (Bombay).—A form of tenure, found chiefly in the Konkan, the holder of which is, in return for certain semi-proprietary rights, held responsible for payment of assessment on the area held.
- Kwin** (Burma).—An area averaging about one square mile selected as a survey unit on account of some natural features or administrative boundaries.
- Lakhiraj** (Assam).—Revenue-free land.
- Mahalkari** (Bombay).—A revenue and police officer in charge of a sub-division of a taluk.
- Malguzari** (Central Provinces).—A form of tenure, the holder of which is responsible for the payment of the revenue assessed on a village.
- Malikmakbuza** (Central Provinces).—A person owning one or more plots of land separately assessed to revenue in a village, who is not a *malguzar*, inferior proprietor, or a member of the proprietary body of that village.
- Mamiatdar** (Bombay).—The chief revenue and police officer (native) in charge of a taluk.
- Mehwasi** (Bombay).—A proprietary tenure assessable to revenue at a lump sum.
- Milankhasra** (Bombay and Central Provinces).—An abstract record in which the village area is classified.
- Mittas, Palayams** (Madras).—Certain classes of permanently-settled estates differing in their origin from *zamindaris*. *Mittas* were artificial estates created under Madras Regulation XXV of 1802, while *palayams* are the estates of *poligars* or old chieftains. Most of the latter have been granted title-deeds of permanent settlement under the Regulation mentioned, but a few have not been settled, though in practice their revenue is treated as fixed.
- Muafi** (Manpur).—Any kind of land held revenue-free either for a fixed period or in perpetuity, but the term does not ordinarily apply to *jagirs*.
- Munsarim** (Berar).—A head native revenue officer.

Narvadari, Bhagdari (Bombay).—Forms of proprietary tenure involving joint responsibility for the assessment: the revenue in the former case being fixed in the lump, and in the latter distributed by rates over fields.

Nazûl (United Provinces).—Property escheated or lapsed to the State.

Nisfkhiraj (Assam).—Land liable to pay half the revenue which is ordinarily payable for the term of settlement.

Palampat (Berar).—Land held on payment of a quit-rent, but not necessarily hereditary.

Parpatigar (Coorg).—A revenue officer in charge of a sub-division of a taluk.

Patel (Coorg).—Village headman appointed by Government.

Perikkash (Madras).—The fixed land revenue payable to Government on all permanently-settled estates.

Poramboke (Madras).—Lands reserved for public or village communal purposes.

Pôt imâms (Bombay).—Lands sub-alienated in alienated villages.

Pôt kharâb (Berar).—The unculturable area included in a survey number.

Shanbôg (Coorg).—A village accountant appointed by Government.

Shrotriem (Madras).—Village held on grant (originally to Brahmins), wholly or partially revenue-free.

Talukdari (Bombay).—A form of proprietary right in force in the northern districts of Bombay.

Thathameda (Upper Burma).—Household tax.

Thekadar (Central Provinces).—A farmer, a leaseholder, a middleman; one who receives the rents from the cultivators and pays a stipulated sum to the proprietor.

Thugyi (Burma).—A village headman.

Udhaâ-jamabandi (Bombay).—A proprietary tenure subject to fixed assessment.

Umbli (Coorg).—Lands granted on reduced rates to individuals on account of services rendered to the State by themselves or their ancestors.

Zamindar (Central Provinces).—A chief of minor importance who, while usually holding a large and compact estate on privileged tenure, has been restricted to the rank of an ordinary subject.

Summary of the Agricultural Statistics of British India

SUMMARY OF THE AGRICULTURAL

Area in acres :	1902-03	1903-04	1904-05	1905-06	1906-07
1. By professional survey (a) .	554,052,949	554,234,736	555,974,330	556,599,298	583,739,245
2. Under forest	67,562,698	67,102,322	68,560,296	67,976,325	81,748,198
3. Not available for cultivation .	136,767,571	138,107,665	136,206,779	135,329,173	137,164,249
4. Culturable waste	108,062,430	104,202,472	104,600,518	104,646,615	106,696,580
5. Fallow land	37,252,452	36,729,599	39,488,114	41,601,052	39,935,421
6. Net area cropped	205,239,350	208,273,095	207,720,904	207,683,741	214,025,596
7. Irrigated	32,912,410	34,243,710	31,026,687	35,345,538	36,653,779
8. Under—Rice	71,633,546	69,596,654	73,525,388	73,400,528	73,541,118
Wheat	19,615,382	23,612,730	23,509,802	22,402,307	25,137,416
Barley	6,549,877	7,479,987	7,494,609	7,326,755	7,700,199
Jawar	23,125,019	21,048,067	23,080,900	20,742,047	20,781,623
Bajra	13,666,034	14,137,482	10,369,765	11,530,710	15,033,738
Ragi	3,636,792	3,372,223	3,351,350	3,415,634	3,567,712
Maize	6,331,816	6,135,511	5,961,487	5,790,543	6,171,715
Gram	10,491,802	11,621,492	10,905,058	11,024,170	13,411,948
Other grains and pulse	28,662,996	29,874,321	27,254,683	28,022,722	29,771,837
Total food-grains .	183,713,264	180,878,467	185,453,042	183,655,446	195,117,216
9. Under—Sugar	2,491,172	2,416,909	2,569,020	2,414,860	2,623,873
Coffee	109,709	104,239	99,326	99,160	96,050
Tea	505,932	506,287	505,025	507,920	505,417
10. Under other food-crops (in- cluding gardens and orchards, spices and condiments)	6,314,611	6,582,921	6,776,719	7,012,988	7,274,315
11. Under—Linseed	2,335,603	3,234,213	3,057,743	2,232,523	2,514,884
Sesamum (til or jinjili)	4,462,473	4,652,765	4,023,847	3,914,737	3,908,328
Rape and mustard .	3,113,879	3,430,525	3,240,107	3,503,060	4,231,554
Other oilseeds	3,183,610	3,228,463	3,197,071	2,850,933	3,310,599

TABLE No. 1—AREA

In this table is entered the total area of each district, the areas for which statistics are and are not available being separately entered.

The corresponding tables of the earlier series are I A—1 of 1866, A of 1884, and A—1 of 1891. The headings differ as set out below :—

	1866 I A—1	1884 A	1891 A—1
Total area in square miles	Area according to Survey Department in acres.		Area according to professional survey in acres.
	Deduct—		Deduct—
	(a) Feudatory and Tributary States.		(a) Feudatory and Tributary States.
	(b) Area for which returns are otherwise not available.		(b) Area for which no returns exist.
	Net area dealt with in this return.		Net area by professional survey. Corresponding area in village papers.

GENERAL NOTES.

Column 2 (pages 13—15).—The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in the Southern Presidencies. The provincial areas in this column exclude Native States in direct political relations with the Government of India, but include Feudatory or Tributary States politically controlled by Local Governments, with the exception of the Shan States in Burma.

Column 3.—In this column is entered the area of any Feudatory or Tributary States included in column 2.

Column 4.—In this column is deducted the entire area (exclusive of Native States) for which the statistics required for tables Nos. 2 and 3 are not forthcoming in whole or in part. This area comprises chiefly estates held in permanent settlement or on privileged tenure, which have not been cadastrally surveyed and which possess at present no agency for the annual collection of agricultural statistics. As surveys extend and the organisation of village statistical establishments develops, or other arrangements are made for the preparation of statistics (see "provincial notes" below), the area in this column is reduced, and that entered in the next columns (5 and 6) and dealt with in tables Nos. 2 and 3 correspondingly increased.

Columns 5 and 6.—Column 5 is a check on the accuracy of column 6. In the latter "village papers" means "the papers prepared by the village accountants." They do not in several provinces relate to the whole area included in column 5; for instance, the village returns often do not include the forest areas. In such cases, column 6 must be taken to be the total area for which statistics are available, corrected by the village papers in respect of the areas for which such papers exist. The areas of provinces and districts which are calculated from village papers are necessarily somewhat different from those given by the Survey Department, (a) because, while the survey area of a district or province is calculated in block, the area by village papers represents the added total of field and village areas; and (b) because the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railroads, is not uniform in the two sets of returns.

In provinces where no village papers exist, the figures in column 5 have been repeated in column 6. In that case they represent the area of which the details are stated in columns 2 to 6 of table No. 2.

PROVINCIAL NOTES.

Column 2 (pages 16—19).—Where there has been no professional survey of the district estimates framed in the best manner possible are accepted, subject to revision from time to time as surveys extend. Approximate figures for the Chin Hills and for the Kachin Hills (in the Bhamo, Myitkyina and Katha Districts) have been included from 1906-07 and for the Pakokku Hill Tracts from 1907-08. Of the total area (53,804,895 acres) entered in columns 5 and 6 for 1911-12 for Upper Burma, 16,617,113 are based on actual survey and 37,187,782 on estimates; and of the total area (54,994,247 acres) for Lower Burma, 17,498,974 are based on actual survey and 37,495,273 on estimates.

Columns 4 to 6 (pages 20 and 21).—Previous to 1906-07 column 4 included all the hill districts, all permanently settled and *lakhiraj* estates, and areas not cadastrally surveyed in Cachar and Sylhet, except—(1) reserved forest areas, and areas under tea; (2) estimated cultivated areas in the permanently settled estates in Sylhet and Goalpara and certain cultivated areas in the Khasi and Jaintia Hills; and (3) the plains portion of the Garo Hills district

(30,257,376 acres) entered for Sind, 30,132,468 are based on actual returns and 124,908 on estimates.

Columns 5 and 6 (pages 40 and 41).—For the unsurveyed areas of zamindari* estates and waste land grants for which accurate statistics are not available, the figures are based on estimates.

The area for which accurate statistics are available is steadily increasing, and until the survey is complete and resettlement finished, there will always be changes which render comparison difficult.

Column 2 (page 42) states the area as ascertained by the local survey and settlement department.

Column 2 (pages 43—45) states the area as ascertained by the provincial survey department supplemented, for tracts which have not come under the operations of that department, by areas obtained with the computing scale from the Survey of India atlas sheets of the localities concerned.

Column 4.—Up to 1906-07 this column included chiefly areas of zamindaris or large proprietary estates permanently settled, which have not been cadastrally surveyed and possess no adequate agency for the collection of statistics, except some of the estates under the Court of Wards and private European managers which furnished returns. It also included certain raiyatwari and whole inam villages for which no returns were forthcoming. From 1907-08, however, estimates have been prepared for all these areas, and they have therefore been excluded from this column and included in columns 5 and 6.

Columns 5 and 6.—Up to 1906-07 these columns excluded the major portion of the zamindari estates and certain raiyatwari and whole inam villages for which statistics were not available, but from 1907-08 estimates for these estates have been prepared and included. It should, however, be borne in mind that these estimates are not comparable for accuracy with the figures which are collected by adequate agency employed for the purpose. Of the total area (39,072,612 acres) entered in column 6 for 1911-12, 66,467,958 are based on actual returns and 22,604,654 on estimates.

* In the Central Provinces the zamindars are chiefs of minor importance (or their successors) who, while holding large and compact estates on privileged tenure, have been restricted to the rank of ordinary subjects.

In 1906-07 returns based mainly on estimates were, for the first time, prepared for the unsurveyed areas in Cachar, the permanently settled and *lakhiraj* estates in Goalpara, and the hill tracts of the Garo Hills district; in 1907-08 such returns were also prepared for the Naga and the Lushai Hills and for the remaining unsurveyed tracts of Sylhet; and in 1908-09 for the remaining area of the Khasi and Jaintia Hills district. These areas have therefore been excluded from column 4 and included in columns 5 and 6.

The figures shown under Bengal (for all the five years) relate to the 26 districts comprising the Presidency of Bengal as reconstituted on the 1st April 1912.

The area cadastrally surveyed comprises 9,850,849 acres or about 25 per cent of the total area of the province (exclusive of Native States).

Columns 2 and 3 (pages 22-24).—Cooch Bihar and Hill Tippera are classed under a separate head as Feudatory States.

Column 4.—Prior to 1907-08 the whole area of the Chittagong Hill Tracts district used to be shown in this column; but in that year, the forest area of the district and an estimate of the cultivated area were excluded from this column and included in columns 5 and 6; and from 1908-09 estimates for the whole area of the district have been prepared and shown in the proper columns.

The area cadastrally surveyed is limited to 41,769,177 acres, which is about 78·5 per cent of the area of the province (exclusive of Native States).

Columns 2 and 3 (pages 25-27).—The Tributary States in Orissa and Chota Nagpur, are classed under a separate head as Feudatory States.

Columns 5 and 6 (pages 28-32).—In 1910-11 the area of the Family Domains of the Maharaja of Benares situated in the Mirzapur district was constituted as the State of Benares. This area has therefore been excluded from columns 5 and 6 from that year and included in column 3 with the areas of Feudatory and Tributary States not included in the area of any British District. The portion of the Maharaja's domains situated in the Benares district remains British Territory.

For tracts which possess no agency for collecting statistics, the figures are based on estimates. Of the total area (52,799,610 acres) entered in column 6 for 1911-12 for the Province of Agra, 45,408,610 are based on actual returns and 7,391,000 on estimates.

Column 2 (page 33) states the area as given in the settlement records.

Column 4.—Up to 1907-08 this column included areas of certain khalsa-muafi, jagir, and istimrar villages for which no returns were available. From 1908-09 details for all these areas have been ascertained, and they have therefore been excluded from this column and included in columns 5 and 6.

Column 2 (page 14).—There is no record of area according to professional survey. The area stated is that of the whole pargana including jagir and inám villages as given in the settlement records.

Column 6 (pages 34-36).—Figures for areas in river beds not accounted for in the revenue papers and for high mountainous tracts in Simla and Kangra are based more or less on estimates.

Column 3 (page 33) represents the area of the Phulera and the Upper Tanawal States in the Hazara district, which was formerly shown in column 4 as area for which no returns exist.

Column 2 (pages 37-39) states the area as returned by the provincial revenue survey and settlement department, supplemented in the case of Native States by the returns of the topographical survey. The revenue survey being incomplete in Sind, the exact area of that province is not known: the column states the area of surveyed tracts *plus* the estimated area of unsurveyed tracts.

Column 4.—Up to 1906-07 this column included areas of all unsurveyed villages for which no returns were available. From 1907-08 estimates have been prepared for all these areas, and they have therefore been excluded from this column and included in columns 5 and 6.

Column 6.—The figures of column 5 are repeated because the areas in village papers are derived from the revenue survey records.

Of the total area (48,629,353 acres) entered in columns 5 and 6 for 1911-12 for Bombay, 44,412,842 are based on actual returns and 4,186,511 on estimates; and of the total area

 (a) Constituted in 1909-10 out of Madura and Tinnevely
 (b) Travancore and Cochin

(c) Excludes a gross area of 3,194,931 acres in North Arcot, South Arcot, Salem, and Madura, for which details for succeeding Tables are not available

TABLE No. 2—CLASSIFICATION OF AREA

The first part of this table deals with the classification of the area entered in column 6 of table No. 1, and gives the proportions (columns 2 and 3) withdrawn from cultivation by inclusion under forests or for some other reason, (column 4) cultivable land available but not yet taken up, (column 5) land occupied but not under crop during the year of report, (column 6) the net area under crop, that is, after deduction of the area cropped more than once in the year. The second part (columns 8 to 13) gives the area irrigated from various sources, and (columns 14 to 18) the distribution of the irrigated area under specified crops.

The headings altered since 1866 are noted below:

1866 I A—1	1884 A	1891 A—2
Cultivated . . .	{ Actually cropped . . .	Net area cropped.
	{ Current fallows . . .	Current fallows.
Culturable . . .	Available for cultivation . . .	Culturable waste other than fallow.
Unculturable . . .	Not available for cultivation	Not available for cultivation.
Unappropriated cultivable waste	(Omitted) . . .	(Omitted.)
Communications . . .	(Omitted) . . .	(Omitted.)

GENERAL NOTES

Column 2 (pages 50 and 52).—“Forests” means “any land classed or administered as forest under any legal enactment dealing with forests.” Any cultivated areas existing within such forests may be excluded and entered in column 6 (net area cropped), an explanation being given in a note.

The forest areas do not agree in most cases with those stated in the reports on the administration of the Forest Department for various reasons, explained in the “Provincial Notes” below, the chief amongst which are these: (1) because the forest administration reports and the statements of agricultural statistics relate in many cases to different periods, (2) because the administration reports relate exclusively to forests worked by the Forest Department, while the tables of agricultural statistics exhibit in addition forest areas administered by district officers, and (3) because, on the other hand, certain village lands worked and returned by the Forest Department are not treated as forests in the returns of agricultural statistics and are therefore excluded from this column.

Column 3 includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to uses other than agriculture.

Column 4 includes groves not classed in the cropped area. Areas under bamboos and thatching grass, when not forming parts of forest areas, are included in this column.

Columns 8 to 13 (pages 50—53) state the area actually irrigated during the year, areas cropped more than once being counted once only.

Columns 14 to 18 (pages 51 and 53) state the gross area of irrigated crops, areas cropped more than once being counted as separate areas for each crop.

The excess in some cases of the total area of crops irrigated (column 18) over the total area irrigated (column 13) is thus due to the inclusion in column 18 of the area irrigated at both harvests.

The variations in the areas shown in different years under the same item in the same district do not necessarily represent an actual increase or decrease on the area in question. In many cases a revised classification or the correction of a faulty estimate is responsible for the change.

The following diagram shows what portions of the total area (excluding forests and area not available for cultivation) are represented by net area cropped, by current fallows, and by culturable waste other than fallow:

A.—TOTAL AREA (EXCLUDING “FORESTS” AND “NOT AVAILABLE FOR CULTIVATION”) SHOWING PROPORTION OF—1, NET AREA CROPPED; 2, CURRENT FALLOW AND 3, CULTURABLE WASTE OTHER THAN FALLOW IN CYCLES OF FIVE YEARS ENDING 1905-06 AND 1910-11, AND IN SINGLE YEAR 1911-12.

1911-12			

N.B.—Diagram B is on a larger scale than A.

PROVINCIAL NOTES

For tracts outside the surveyed area the figures are based on estimates framed in the best manner possible.

Column 2 (pages 54—60).—The area entered in this column is that given in the forest administration report, and includes reserved forests and fuel reserves. From 1906-07 estimates of the forest areas in certain hill tracts have also been included.

Column 3.—In settled tracts the unculturable area is taken from settlement registers, but in unsettled tracts it is obtained from the best source available.

Column 4 includes land thrown out of cultivation and abandoned. Groves, not classed in the cropped area, and bamboos, when not grown in forest areas, are also included in this column.

Column 5 includes only such land left uncultivated as is actually in possession of cultivators. In Lower Burma (excluding the Thayetmyo district) such lands are assessed at privileged rates, but in Upper Burma and in Thayetmyo no assessment is levied on land left uncultivated.

Column 6.—Of the total net cropped area (4,620,129 acres) entered in this column for Upper Burma, 4,299,410 are based on actual returns and 320,719 on estimates; 8,719,789 acres entered for Lower Burma, 8,208,375 are based on actual returns and 511,414 on estimates.

Columns 14 to 18 include only crops actually irrigated; for instance, where an uncropped crop of sesamum is taken off land which is afterwards irrigated and planted with another area grown with sesamum is not included in this column.

Column 2 (page 62).—The figures represent reserved forests, but from 1909-10 the areas of villages within the reserves have been excluded from this column and entered under appropriate heads of this table.

Columns 3 and 4.—The figures for unsurveyed tracts in Cachar and for permanently settled areas in Sylhet are based on estimates. In the Assam Valley unsurveyed waste is classed as culturable and unculturable on the assumption that their proportion in the area holds good.

Column 5 includes generally all lands which are thrown out of cultivation or not yet brought into cultivation but remain in the occupation of leaseholders. Estimated figures for the Naga and Jaintia Hills have been included from 1907-08.

Figures are obtained from the district crop statement for districts which have been surveyed.

Columns 8 to 18.—No figures are available of areas irrigated except for Kamrup, Darrang, and the Lushai Hills. For the latter two districts however the estimates are somewhat complete.

Column 2 (pages 64—68).—The figures represent Government forests and estimates of other areas furnished by district officers.

Columns 8 to 18 (pages 64—69).—Areas irrigated from all sources are estimates only, except in the case of certain cadastrally surveyed tracts in Rungpur and Rajshahi and areas irrigated from Government canals.

Column 2 (pages 70—74).—The figures represent Government forests and estimates of other forest areas furnished by district officers.

Columns 8 to 18.—Since 1908-09 the areas and crops irrigated from Government canals are stated; estimates of areas irrigated from all sources have been given for each district from the year 1908-09.

From 1906-07 estimates have been prepared and included for Almora, Garhwal, the hill portion of Naini Tal and of pargana Kera Mangraur in Mirzapur, for which complete figures were not available before.

From 1910-11 the estimated area of the hill portion of pargana Kera Mangraur in Mirzapur has been omitted owing to its inclusion in the Benares State.

Column 2 (pages 76—84) includes forest areas administered by the district officers of some districts. Hence the figures do not agree with those in the forest administration report which exclude these areas. This column also includes the Siwalik Range in the Dehra Dun district.

Column 5.—The maximum period for which land left untilled is reckoned as fallow is three years.

Column 6.—Of the total net cropped area (26,390,618 acres) entered in this column for 1911-12 for the Province of Agra, 25,786,618 acres are based on actual returns and 604,000 on estimates.

Columns 8 to 13.—Government canals include private canals except in Naini Tal, for which district separate figures for private canals have been obtained since 1895-96. From 1903-04, however, the areas irrigated from certain private canals in Budaun and Basti, from 1907-08 such areas in Gorakhpur, and from 1911-12 those in Dehra Dun, which were formerly included under "other sources", have been shown under the proper head "private canals." There are very few private canals in the United Provinces.

Of the total area irrigated in the Province of Agra in 1911-12 (6,323,630 acres), 6,287,730 acres are based on actual returns and 35,900 on estimates.

Column 2 (page 86).—The forest area relates to khalsa, jagir, and minor istamrār villages, but excludes village lands managed by the Forest Department which do not technically constitute Government forests.

Column 2 (page 50).—The forest area relates to Government forests including those in jagir lands.

Column 6 includes the area cropped in khalsa (Government) as well as in jagir villages.

Column 2 (pages 88—94) includes all lands specially allotted to forest growth under the control of Government or any Local Board or Municipality.

Column 3.—This column includes 23,680 acres of river beds in Gurgaon, 15,360 acres of mountain tracts in Simla, 3,896,960 acres of mountain tracts in Kangra, and 24,998 acres of the "Pabbi" forest area in Gujrat. These areas are not accounted for in the village papers, and the figures are based more or less on estimates.

Column 4 includes large areas of Government waste not allotted for cultivation.

Column 5.—The maximum period for which land is reckoned as fallow is two years; but, as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years for the prescribed period. In certain districts in the south-west of the province, however, classification is amended annually. Previous to 1901-02 this column also included lands on which the crops wholly failed, as well as a fraction of those on which they failed proportionate to the degree of the deficiency.

Column 6.—Previous to 1901-02 the figures in this column represented the area the crops harvested would have been grown in a year of normal productiveness. In 1901-02, say, each of the returns of the actual areas from which crops were taken was multiplied by a fraction representing the relation of the crop harvested to a normal crop, and the result was added to the fallow area. From 1901-02, however, the area sown has been reported without reference to the area harvested or the condition of the crops.

Columns 8 to 18 state the gross area irrigated, that is, land irrigated in both seasons is counted twice. As regards columns 8 to 13, prior to 1906-07, areas which bore two crops under irrigation in a single harvest were also counted twice; but from 1906-07, they are only counted once. As regards columns 14 to 18, prior to 1906-07, the figures shown are those of harvested areas reduced to a standard of normal productiveness (see note 6 above); but from that year areas actually sown have been entered.

Column 2 (page 96) includes all lands specially allotted to forest growth under the control of Government or any Local Board or Municipality, and protected village Hazara administered by the district officer and other waste lands in Peshawar.

Column 4 includes large areas of Government waste not allotted for cultivation.

Column 5.—The maximum period for which land is reckoned as fallow is two years; but, as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer for the prescribed period. In Dera Ismail Khan classification is amended according to the class of soil actually cultivated each year.

Columns 8 to 18 (pages 96—97) state the gross area irrigated, that is, land irrigated in both seasons is counted twice. As regards columns 8 to 13, prior to 1907-08, areas which bore two crops under irrigation in a single season were also counted twice, but from that year such areas are only counted once. As regards columns 14 to 18, prior to 1906-07, the figures shown in them were those of harvested areas, that is, excluding areas on which the crops failed, but from that year areas actually sown have been entered.

Column 2 (page 98).—The figures do not agree with those in the forest administration report, because the revenue records do not state the most recent alterations of area due to erosion by the Indus which the forest report does, and because, on the other hand, the forest report does not always exhibit the most recent alteration of area effected by the revision survey, which the revenue records do.

Column 6.—Of the total net cropped area (2,940,938 acres) entered in this column for 1911-12, 2,940,927 acres are based on actual returns and 11 acres on estimates.

From 1907-08 estimates have been prepared and included for all unsurveyed villages for which no figures were available before.

Column 2 (pages 100—102) includes formally declared forest under an Act reports, because in certain localities areas are still returned by the Forest table; also because the revenue records do not always state the most recent revisions.

Column 3 includes all land recorded at the survey and settlement as unculturable, though at times a very small quantity of this land is cultivated.

Column 5.—The maximum period for which land thrown out of cultivation is reckoned as fallow is ten years.

Column 6.—Of the total net cropped area (22,906,127 acres) entered in this column for 1911-12, 21,527,378 acres are based on actual returns, and 1,378,749 on estimates.

Columns 8 to 13.—The figures given for private canals, tanks, wells, and other sources are rough estimates.

Column 16.—By "miscellaneous food crops" are understood the crops entered in table No. 3, as sugar, orchards and garden produce, and miscellaneous food crops.

Column 2 (pages 104—106) shows the areas administered by the Forest Department; but the figures differ from those in the forest administration report because the actual area of the forests is not known owing to incomplete survey, also because excisions made have not yet been taken note of in the forest registers, and because in many cases raiyatwari villages settled, thekadari villages surveyed, clearance lease villages earned in proprietary rights, and village purchased under the waste-land sale rules, have not as yet been finally disforested and struck off the forest registers. In the case of the Chanda, Drug, Raipur, and Bilaspur districts, this column also includes from 1906-07 all areas in the zamindars' estates which fall outside the surveyed villages of those estates. These areas are almost wholly under forest and include only a negligible proportion of sparse and shifting cultivation.

Column 3 states areas covered with water, hill, or rock, and land occupied by buildings and roads.

Column 4 states (1) the waste area within holdings (including fallows of more than three years), (2) land under tree forest which is not administered under any Act dealing with forests, (3) land under scrub jungle or grass, and (4) groves not included in holdings.

Column 5.—Land which has been fallow for not more than three years is reckoned as current fallow.

Column 2 (page 108) includes the forest area administered by the Forest Department, but excludes a large area of cultivated land in the Melghat taluk in Amraoti shown as forest in the forest report.

Column 3 includes village sites, tanks, and land taken up for public purposes or devoted to uses other than agriculture; it also includes unculturable portions of culturable fields.

Column 4 includes land available for cultivation but not given out.

Column 5 includes occupied culturable land left fallow for private reasons, such as grazing, rotation, etc.

Column 2 (pages 110—112) includes from 1895-96 the area cultivated within forests, and excludes the area of forests in the Native State of Sandur, in Bellary, not included in the village papers. As this is included in the forest administration report, it accounts partly for the disagreement of its figures with those in this table.

Column 4 includes from 1911-12 areas occupied by *babul* and *casuarina* trees when they do not form parts of forest areas. Prior to 1911-12, such areas were classed under "Miscellaneous non-food crops" in table 3.

Column 5 includes all occupied waste, that is to say, waste portions of land for which revenue is paid.

Column 6.—Of the total net cropped area for 1911-12 (33,068,409 acres) stated in this column, 27,107,314 acres are based on actual returns, and 5,961,095 on estimates.

Column 10.—The term "tanks" refers to a particular kind of dammed reservoirs.

Column 13.—Of the total area irrigated in 1911-12 (9,586,878 acres), 7,368,818 acres are based on actual returns, and 2,218,060 on estimates.

Column 2 (page 52) includes reserved and protected forests only. The management of the latter having been transferred to the revenue authorities, the figures shown in the forest administration report represent the area of reserved forests, which slightly differ from those adopted for this table because the periods embraced are different.

Column 3 includes unculturable Government waste and unculturable *banés*.

Column 4 states the estimated area of culturable Government waste.

Column 5 shows (1) the estimated area of culturable *banés*, and (2) the difference between the net area cropped and the gross area of the actual holdings (exclusive of *banés*). It thus includes the unculturable lands within the actual holdings, the area of which cannot be ascertained.

Columns 8 to 13.—Figures for land partly irrigated from springs and mountain streams are not available.

Province	Forests	Not available for cultivation	Culturable waste other than fallow	Current fallow	Net area cropped	Total	Area	
							Government canals	Private canals

* See explanation given in the Explanatory Notes (page 46)

(a) Includes 1,750 acres in Rajshahi for which details are not available

(b) Includes 1,700 acres in Rajshahi for which details are not available

(c) Includes 35,900 acres in Naini-Tal, Almora, and Garhwal for which details are not available

(d) Includes 32,900 acres in Almora and Garhwal for which details are not available

(e) Includes 26,777 acres in Purnea for which details are not available

(a) No irrigation works

(b) Statistics of irrigation are not collected

TABLE No. 3—AREA UNDER CROPS

This table states the gross cultivated area under each crop, including double-cropped areas and irrigated areas. Column 41 shows the total area cropped more than once. The area is that stated in column 6 of table No. 2.

The headings which have been modified since 1866 are—

1866 III D-1	1884 B	1891 A-3
Other food-grains	Other food-grains, including pulses	{ Barley { Cholam or jawar { Cambu or bajra { Ragi or marua { Maize { Gram { Other food-grains, including pulses { Linseed { Til or jinjili { Others { Sugarcane { Others { Cotton { Jute { Others { (Omitted) { Opium { Cinchona
Oilseeds	Oilseeds	
Sugar	Sugarcane	
Fibres	{ Cotton { Jute { Others	{ Cotton { Jute { Others
Vegetables	(Omitted)	(Omitted)
Opium	"	Opium
	Cinchona	Cinchona

The following items were added in 1891 :—

Condiments and spices
Other dyes
Indian hemp

Other drugs and narcotics
Fodder crops
Orchards and garden produce

Since 1899-1900 "rape and mustard" have been separated from the head "Other oilseeds."

GENERAL NOTES

In 1896 the Government of India decided that in this table should be entered the areas actually sown, whether the crop comes to maturity or not, except in cases when fields, owing to the failure of the first sowings, have been devoted to other crops: in such cases the area first sown should be omitted. Previous to this decision there was no uniformity of practice as explained in the earlier issues.

In cases where two or more crops are grown together, an estimate is made of the area covered by each, and the areas so estimated are separately returned. The estimate is made by the village accountant, or is subsequently determined on formulæ prescribed by the provincial authorities.

Columns 10, 15, 19, 22, 27, 34, 38, and 39 (pages 120--127).—The selection of crops for inclusion in these columns was hitherto left to the provincial authorities; but definite instructions have been issued specifying the crops to be included under each head.

Columns 29 and 30 (pages 124 and 126).—In certain cases, notably in Madras, the areas stated under "Coffee" and "Tea" differ from those given in the special reports on tea and coffee* production published separately. The principal reason is that the special reports are prepared from returns received from managers and owners of estates; and these returns, especially in Southern India, are inaccurate and defective. Minor discrepancies in the case of tea are also due to the fact that the figures in this table deal with the agricultural year; while those in the special report deal with the calendar year.

The variations in the areas shown in different years under the same crop in the same district do not in all cases represent an actual increase or decrease in the area under that crop. In certain cases a revised classification or the correction of a faulty estimate is responsible for the change.

The following diagrams analyse the gross cropped area in several ways:—

C—TOTAL AREA CROPPED SHOWING PROPORTION OF—1, FOOD CROPS AND 2, NON-FOOD CROPS IN CYCLES OF FIVE YEARS ENDING 1905-06 AND 1910-11, AND IN SINGLE YEAR 1911-12.

N. B.—Diagram F is on a larger scale than others.

PROVINCIAL NOTES

The table states the actual area sown, including the area on which crops have been *Upper and Lower* destroyed, but excluding fallow. Land on which more than one crop has been grown is *Burma* entered as a separate crop area.

For tracts outside the surveyed area the figures are based on estimates framed in the best manner possible.

In Cachar accurate statistics of the area under crops other than tea are available only for *Assam* the cadastrally surveyed tracts, in Sylhet only for the Jaintia Parganas and Partabgarh, and in Goalpara only for the temporarily settled tracts. The figures for the permanently settled tracts in Sylhet and Goalpara and for the unsurveyed areas in Cachar are based on estimates. The figures for the five upper districts of the Assam valley represent the whole cropped area in these districts with the exception of a small area cultivated by tribes paying house or poll-tax in Lakhimpur, Sibsagar, and Kamrup. In the Garo Hills district the areas under different crops are available for the plains tracts only. Estimated figures for the Lushai Hills have been included from 1908-09. Detailed statistics of the areas under different crops are not available for the Naga Hills.

Column 37 (page 147).—The area under orchards and garden produce includes village sites.

Statistics are not prepared by village or circle officers. The figures entered in this table *Bengal* are estimates.

No statistics are at present prepared by village or circle officers, except in the Sambalpur *Bihar and* district. The figures for all other districts entered in this table are therefore merely estimates, *Orissa* except those for Sâran, Champâran, Muzaffarpur, Darbhauga, Monghyr, Bhagalpur, Purnea, Puri, Cuttack (exclusive of small permanently settled areas), Balasore, Angul, the Santhal Parganas, and Ranchi, in which the estimates are based on the figures collected during the cadastral survey.

The area sown with unimportant mixed crops, for which no separate heading is provided *United* in the provincial crop statements, is assigned to the principal crop by the village accountant. *Provinces* The areas of important mixed crops, namely, wheat and barley, wheat and gram, barley and gram, jawar and arhar, bajra and arhar, and cotton and arhar, for which separate headings are provided in the crop statements, are distributed in accordance with prescribed formulæ and entered under the crops of which they are composed.

There is no agency for the collection of statistics in Almora, Garhwal, and the hill tracts of Naini Tal and Mirzapur; but from 1906-07 estimates have been framed for Garhwal and the hill tracts of Mirzapur. From 1910-11 estimates for the hill tracts of Mirzapur have been omitted owing to their inclusion in the Benares State.

Columns 3, 4, 9, and 11 (pages 172—194).—The whole of the area of the land planted with food-grains (wheat, barley, gram, etc.) mixed with oilseeds is shown under food-grains in this table. The area shown under food-grains which was really planted with oilseeds (as a mixed crop) is roughly estimated to have been 4,419,000 acres in the whole of the United Provinces of Agra and Oudh in 1911-12.

Columns 12, 13, 14, and 16 (pages 173—195).—The figures shown in these columns represent areas under "pure" oilseeds, *i.e.*, oilseeds sown unmixed with any other crop. Besides these, the oilseeds are thinly sown in combination with wheat, barley, gram, and other crops. If the areas occupied by the scattered plants were added up, it is estimated very roughly that they would amount in 1911-12 (for the whole of the United Provinces of Agra and Oudh) to 747,000 acres of linseed, 800,000 acres of sesamum, and 2,872,000 acres of rapeseed.

The areas stated are actual areas sown or placed under crop in Government and jagir villages.

From 1907-08 estimates have been framed and included for all unsurveyed villages for which no figures were available before.

Column 37 (pages 241 and 243) includes groves situated within the home farm of the landlord or the holding of a plot proprietor or tenant.

Column 36 (pages 255—257) states the areas sown with grass and crops solely for fodder. Lands left waste for grazing and on which grass grows spontaneously are not included in this column.

TABLE No. 3.

Area under crop and specification of crops.

* See explanation given in the Explanatory Notes (page 117)

(a) Includes areas under miscellaneous non-food crop

(b) Includes 222,800 acres in the Naga and Lushai Hills for which details of crops are not available

(c) Includes 128,000 acres in the Naga Hills for which details are not available

(d) " 140,910 " " " and Garo Hills for which details are not available

No. 3—D

AREA (in acres) under CROP, and SPECIFICATION of CROPS, in each DISTRICT in BENGAL

(a) Includes 75 acres for which details are not available

TABLE No. 4—LIVE-STOCK, PLOUGHS, AND CARTS

This table deals with agricultural stock. The headings of the form now in use differ from those of 1866 and 1884 in the following respects :—

1866 III D—2	1884 III D—2	1891 A—4
Cows and bullocks	Cows and bullocks	{ Bulls and bullocks Cows
.....	Buffaloes	{ Male buffaloes Cow buffaloes
.....		Young stock (calves and buffalo calves)
Horses }	Horses and ponies	Horses and ponies
Ponies }		
Donkeys	Mules and donkeys	Mules and donkeys
Sheep and goats	Sheep and goats	{ Sheep Goats
.....		Cainels

Mules have been enumerated separately from donkeys since 1899-1900.

GENERAL NOTES

In some provinces the figures include, and in others exclude, animals in towns, cities, and cantonments. The Government of India decided in 1896 that live-stock in cities and cantonments should be included wherever it is possible to secure their enumeration, and that oxen and buffaloes not old enough for work or to produce young should be treated as "young stock."

The figures in some cases are greatly lacking in accuracy.

The following diagram shows the proportions of the different classes of live-stock.

G.—TOTAL LIVE-STOCK SHOWING PROPORTION OF—1, BOVINE; 2, OVINE; AND 3, OTHERS, IN CYCLES OF FIVE YEARS ENDING 1905-06 AND 1910-11 AND IN SINGLE YEAR 1911-12.

PROVINCIAL NOTES

Annual returns of agricultural stock are prepared by village headmen, revenue surveyors and *taikthuggis*, the enumeration taking place from end of February to middle of March in each year.

The figures include all animals in towns and also those employed in each district by Government departments, such as transport, military, police, and by municipalities.

The statistics are based on a cattle census taken every five years. The census is, however, not taken simultaneously in the different districts.

In the Assam Valley districts (excluding the permanently-settled tracts of Goalpara) and in Sylhet (Jaintia parganas only) the last census was taken in 1910. In Cachar it was taken in 1912, and in the Garo Hills (plains portion only) in 1909.

No statistics are available for the permanently settled tracts in Goalpara, for tracts other than Jaintia parganas in Sylhet, and for the hill tracts.

Statistics of live-stock are collected only in tracts where surveys are being made or a record-of-rights prepared. The figures are not collected each year, but for each tract when the tract is under survey. For the districts of the Presidency and Burdwan Divisions and Darjeeling, however, complete estimates of the number of live-stock in each district were made from 1908-09 to 1910-11. In the present table (No. 4-D) these estimated figures for the districts of the Presidency and Burdwan Divisions and Darjeeling have been shown, together with the figures, collected at the time of survey, for the three districts of Backerganj, Chittagong, and Faridpur, of which the whole area has been cadastrally surveyed.

Statistics of live-stock are collected only in tracts where surveys are being made or a record of rights prepared. The figures, however, are not collected each year, but for each tract when the tract is under survey. From 1908-09 complete estimates of the number of live-stock in each district have been made and included in the table.

The table is prepared quinquennially on a census in each district taken every five years. The last census was taken in 1908-09 in all the districts, except Almora and Garhwal, under the

supervision of the supervisor kanungoes and such members of the district and tahsil staff as could be spared. For Almora and Garhwal the figures collected in the previous census of 1898-99 were retained.

The table is prepared quinquennially, and the figures were last collected in 1908-09.

Ajmer-Merwara

An annual census is taken on the 15th March.

Manpur

A census for the whole province is taken every fifth year in the first week of February. *Punjab*
The last census was taken in 1909.

All cattle in cantonments and municipalities as also those belonging to Government are included.

A census for the whole province is taken every fifth year in the first week of February. *N.-W. Frontier*
The last census was taken in 1909. All cattle belonging to Government are included.

The figures are collected once in five years. The last quinquennial census was taken in *Bombay* 1909-10.

All animals belonging to a family are entered against the name of the head of the family even though the animals are temporarily absent from the village. Animals belonging to other villages are excluded, and those belonging to a roving grazier who has no permanent residence are noted, but are not included in the village resources. The figures are regularly tested by circle inspectors (kanungoes).

Stock statistics for the city of Bombay were collected for the first time in 1909-10.

The figures are collected once in five years as in Bombay. The last quinquennial census *Sind* was taken in 1909-10.

The figures are collected annually, between the 1st January and the 15th March, by the *Central* patwaris for each village of the areas in their charge. The total figure is recorded in *Provinces* the tahsil by the kanungo in a village register. The patwari takes into account all animals, including those temporarily sent elsewhere (e.g., for grazing), which belong to residents of the village, and excludes animals which are temporarily in the village for grazing or other purposes, but do not belong to residents. Stock in cities, large towns, and cantonments has been included from 1896-97 and that in forest villages from 1907-08.

A census is made annually by the village officers.

All cattle belonging to one owner are entered against his name, even though the *Berar* animals are temporarily absent from the village. When an owner cultivates land in more than one village, the actual number in each particular village on the night of enumeration is entered in the statement for that village. Cattle belonging to other villages, but temporarily in the village for grazing, are not entered in the statement for that village.

A census is taken every five years in Government (raiayatwari) villages. The last quinquennial census was taken in 1909-10. In *Madras* inam villages, there is no suitable agency for the work, and Collectors obtain information for these villages as best they can: it is not known to what extent any census is made in them. Previous to 1903-10, no information was available regarding live-stock in permanently settled (zamindari) estates and in towns and cantonments which did not form part of any revenue village; but from that year estimates for all these tracts have been prepared and included.

The table is prepared quinquennially on a census taken every five years.

The last census was taken in March 1910 by the circle shanbogs, and the particulars *Coorg* entered in a register maintained under Rule 73 of the Rules framed under the Coorg Land and Revenue Regulation, 1899.

Animals in municipal towns are included.

(a) Including 10,831 bulls. (b) Incomplete.

Figures are given for the eleven districts of the Presidency and Bardwan divisions and for Darjeeling, for which estimates were made for certain years stated above, and also for the three districts of Backerganj, Faridpur, and Chittagong of which the whole area has been cadastrally surveyed and the information was collected gradually during survey operations extending over several years. These 15 districts have a population of 23,341,876 being 52 per cent of the provincial total, and contain 45 per cent of the cropped area of Bengal. See also explanation given in the explanatory Notes (page 256).

See explanation given in the Explanatory Notes (page 261)

(a) Constituted in 1909-10 out of Madura and Tinnevely

TABLE No. 5—LAND REVENUE

This table is intended to indicate the relation between area, population, and land revenue, or, in other words, to exhibit the mean burden of the State assessment on the land assessed to it and on the community at large. It was prescribed in 1884, and revised in 1893. Similar information previous to 1884 is contained in Tables I D, I E—2, and I E—6, appended to the General Administration Reports.

The two main classes of tenure, (1) raiyatwari and (2) zamindari and village communities, specified in 1884, were not exhaustive, and the provincial administrations were allowed to make additions in accordance with local requirements. The table now states all tenures under one or other of the three heads, namely, (1) raiyatwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled).

The present form differs from that prescribed in 1884 in the following respects :—

1884	1893
I.—(1) Raiyatwari (2) Zamindari and village communities	(1) Raiyatwari (2) Zamindari and village communities (temporarily settled) (3) Zamindari (permanently settled)
II.—Deduct area not fully assessed, including estates assessed at privileged rates.	Deduct { (a) Area not fully assessed (b) Area for which the returns required for this table are not available
III.—Balance of area fully assessed.	{ Balance, that is, fully assessed area for which returns are available (a) Total (b) Cultivated

GENERAL NOTES

In July 1893 the following rules were prescribed for filling in this table :—

Entry 1 in general table No. 5 (pages 290—295), column 2 in provincial tables Nos. 5 (A to O) (pages 302—330)

The varieties of tenure entered should be included, as far as possible, under one or other of the following heads, namely, (1) raiyatwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled)

Entry 2 (a) in general table (pages 290—295), column 5 (a) in provincial tables (pages 302—330)

Areas held revenue-free or at privileged rates should be deducted, but the deduction need not be made where such areas are in any case less than an entire village, and where there is any difficulty in estimating the corresponding deduction to be made in the population head 10 (column 11). In Madras, Bombay, and Berar all land on which a full assessment has not been leviable during the year (for instance, assessed unoccupied land) should be classed for the purposes of this column as “area not fully assessed.” Areas should not be entered in this column merely because the assessment due from them has been suspended or remitted on account of short crops, or for other special reasons.

Entry 3 in general table (pages 290—295), column 4 in provincial tables (pages 302—332).

This column should be subdivided into (a) total fully assessed area for which returns are available, and (b) area cultivated out of the area given in head (a). The latter head should be equal to the former after deducting current fallows and fully assessed waste, and should be either equal to or less than the net cropped area as shown in column 6 of table No. 2.

Entry 4 in general table (pages 290—295), column 5 in provincial tables (pages 302—330)

Where the land revenue includes the zamindar's share, the net demand should be entered, and the table should state the payments due by the zamindars to Government, not those due by raiyats to the zamindars. The actual realisable demand for the year should be entered, after excluding arrears for past years. Sums remitted on account of unoccupied lands, short crops, etc., should be excluded. In 1904 it was decided by the Government of India that this column should include all the heads classed as “Land Revenue” in the Civil Accounts.

Entry 7 in general table (pages 296—301), column 8 in provincial tables (pages 303—331)

As in entry 4 (column 5), but only ordinary land revenue on fully assessed areas is to be entered.

Entry 8 in general table (pages 296—301), column 9 in provincial tables (pages 303—331)

To be entry 7 (column 8), divided by entry 3 (a) [column 4 (a)].

Entry 9 in general table (pages 296—301), column 10 in provincial tables (pages 303—331)

To be entry 7 (column 8), divided by entry 3 (b) [column 4 (b)].

Areas under forest are included in entry 1 (column 2), under the prevailing tenure of the province.

The population in entry 5, (column 6) is that of the last general census.

PROVINCIAL NOTES

For tracts outside the surveyed area the figures are mostly based on estimates framed in the best manner possible.

Column 1 (page 302).—No areas are classed as zamindari, as no system of communal assessment prevails.

Column 3 (a) shows grants under Appendices I and II of the Rules under the Upper Burma Land and Revenue Regulation.

Column 3 (b) includes non-State lands in districts where no land revenue rates are yet imposed and where the *thathameda* rates have not yet been adjusted.

Column 4 (a) contains figures of State and non-State lands assessed to land revenue, including current fallows which are not assessed to land revenue. This column also includes the areas of waste land grants of which the rates have been fixed in perpetuity.

Column 5 states ordinary land revenue, *thathameda*, water rate, rents of fisheries, and items under "Miscellaneous Land Revenue," appearing in the Civil Accounts.

Column 8 (page 303) states the ordinary land revenue, as defined in the Civil Accounts, on areas fully assessed.

Column 11.—The population of villages and kwins is considered as belonging to fully or not fully assessed area accordingly as the greater portion of the village or kwin lands are or are not fully assessed.

For tracts outside the surveyed area the figures are mostly based on estimates framed in the best manner possible.

Column 1 (page 304).—No areas are now classed as zamindari, as no system of communal assessment prevails.

Column 3 (a) includes special grants which are not yet fully assessed.

Column 3 (b) includes old grants exempt from the payment of revenue under special terms.

Column 4 (a) states the areas of occupied lands, cultivated or left fallow; it also includes the areas of waste land grants of which the rates have been fixed in perpetuity.

Column 4 (b) excludes current fallows.

Column 5 shows ordinary land revenue, rents of fisheries, and the items under "Miscellaneous Land Revenue," appearing in the Civil Accounts.

Column 8 (page 305) states the ordinary land revenue, as defined in the Civil Accounts, on areas fully assessed; revenue on fallow areas which are treated as fully assessed is also included.

Column 1 (page 306).—*Raiyatwari* includes, besides raiyatwari tenures, all unsettled Government waste and forest lands and areas in which house-tax or poll-tax is levied; it also includes certain temporarily settled estates in Sylhet which were formerly (before 1902-03) included under Zamindari (temporarily settled). *Zamindari (temporarily settled)* includes, besides temporarily settled Zamindari estates, fee-simple grants, wholly or partially revenue-free tenures, and grants under progressive assessment.

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts.

Column 10 (page 307).—Since 1893-94 the incidence has been calculated on the cultivated portion of the fully assessed area. Information has not been available for the cultivated portion of the fully assessed area in Sylhet from 1903-04, in Kamrup from 1905-06, and in Nowgong from 1906-07.

Column 11.—The figures of population of fully assessed areas are estimates based upon village census registers.

The table is prepared quinquennially, and the figures were last collected in the districts of the Presidency and Burdwan divisions and the district of Darjeeling in 1906-07 and in the remaining districts in 1907-08. The next revision of the table for the whole province will be made in 1912-13.

Column 1 (page 308).—Since 1896-97 the following classification of estates has been adopted:—

(1) *Zamindari (permanently settled)* including estates managed for proprietors by Government.

(2) *Zamindari (temporarily settled)* comprising (a) all temporarily settled estates, namely, those settled for periods with proprietors, and estates leased to farmers for periods; and (b) all estates owned by Government as proprietor.

Column 4 (b) includes in certain cases fully assessed current fallows.

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts.

The table is prepared quinquennially, and the figures were last collected in 1911-12.

Column 1 (pages 312—314).—Since 1896-97 the following classification of estates has been adopted:—

(1) *Zamindari (permanently settled)* including estates managed for proprietors by Government.

(2) *Zamindari (temporarily settled)* comprising (a) all temporarily settled estates, namely, those settled for periods with proprietors, and estates leased to farmers for periods; and (b) all estates owned by Government as proprietor.

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts.

The table is prepared quinquennially, and the figures were last collected in 1911-12.

Columns 3 (a) and 3 (b) (pages 316—318) exclude small revenue-free plots, for which details are not forthcoming.

Column 4 (b) states the net cropped area of the year corresponding with that in column 12 of table No. 3 (area under crops) but limited to the fully assessed area for which returns are available of column 4 (a).

Column 5 states—(1) "ordinary revenue," comprising (a) fixed collections, (b) fluctuating collections (including collections from estates under direct management), (c) surplus collections and (d) collections from Government estates; (2) sale-proceeds of Government estates; (3) sale-proceeds of waste lands and redemption of land tax, comprising (a) capitalised value of abatement of land revenue, etc., and (b) other receipts; (4) "miscellaneous," comprising (a) malikana revenue, (b) fines and forfeitures of revenue courts, (c) recoveries in India of law charges in England on account of appeals from India, (d) rent of railway class C lands and rents of buildings situated on such lands, (e) recoveries on account of law charges in civil suits, (f) recoveries of cost of erecting boundary pillars, (g) contribution on account of establishment for attached estates, (h) miscellaneous receipts, (i) mutation fee, (j) mutation fines, (k) sale of waste paper, (l) land revenue on resumed gorait jagirs in Basti, (m) receipts from quarries and minor mineral products in forests and land not under the management of the forest department, (n) recoveries of building advance to patwaris, (o) water mill rent, (p) voluntary contributions for the maintenance of special patwari circles, and (q) patwari miscellaneous receipts (including receipts for sale of waste patwari records).

Column 6.—The total population of the provinces includes the population of the Benares State.

Column 11 (pages 317—319) includes population of revenue-free lands when the area of such lands is less than an entire village. The inclusion does not materially affect the incidence entered in column 12.

No figures have been entered in columns 8 to 12 opposite "Lucknow, permanently settled," as no portion of the permanently settled area has been fully assessed to land revenue.

Columns 13 and 14.—The figures are taken from the census reports of 1901 and 1911 as shown in the footnote.

The table is prepared quinquennially, and the figures were last collected in 1910-11.

Column 1 (page 318).—The khalsa area has been classed as "zamindari and village communities (temporarily settled)" and the jagir and istamrari areas as "zamindari (permanently settled)."

Column 4 includes in the case of the khalsa villages the assessed cultivated area, including assessed fallows.

Column 5 states ordinary and miscellaneous land revenue appearing in the Civil Accounts.

Column 10 (page 319).—The cultivated area is, in the case of "zamindari (temporarily settled)," the cropped portion of the fully assessed area.

Column 11 excludes population of jagir villages.

Entry 5 (page 293) includes the population of jagir villages.

Columns 3 (a) and 3 (b) (page 320) include villages receiving frontier remissions, tracts Punjab which are entirely unassessed (such as the Kulu mountains), and istamrari tenures.

Column 5 shows all the items falling under the head "Land Revenue" in the Civil Accounts, including assigned revenue.

Column 10 (page 321).—The cultivated area taken for calculating the incidence is exclusive of current fallows.

Columns 3 (a) and 3 (b) (page 322) include villages receiving frontier remissions and istamrari tenures.

Column 4 (b) includes fully assessed current fallows which bore any crop in the preceding year.

Column 5 shows all the items falling under the head "Land Revenue" in the Civil Accounts, including assigned revenue.

Column 10 (page 323).—The incidence is calculated on the cultivated area excluding current fallows.

Column 3 (a) (page 322) includes fallows and fully assessed unoccupied area.

Column 4 excludes fallows and fully assessed unoccupied area [see note to column 3 (a)]. Fallows are assessed once in five years.

Column 5 states ordinary and miscellaneous land revenue appearing in the Civil Accounts.

Column 10 (page 323).—The incidence is calculated from the cultivated area (excluding fallows) and the assessment on that area.

Column 1 (page 324).—Lands held under special tenures, such as talukdari, meh-wasi, udhad-jamabandi, narvadari, and bhagdari in Gujarat, and khoti and izafat in the Konkan, are classed as "zamindari and village communities (temporarily settled)."

Column 3 (a) includes alienated area and the area held free of revenue or the revenue of which has been reduced by special agreement, and also the fully assessed unoccupied area since 1893-94.

Column 3 (b) includes land not available for cultivation or unassessed.

Column 4 includes land under temporary cultivation; also pôt inâms paying full assessment.

Column 5 states ordinary and miscellaneous land revenue appearing in the Civil Accounts.

Column 10 (page 325).—The incidence is calculated from the occupied area, which, in the Presidency proper, is treated as the cultivated area for the purposes of this table, and the assessment on that area.

Column 11 includes population of pôt inâms and the like scattered areas which cannot be distinguished from the population of the fully assessed area.

Column 12.—The incidence is based on the figures given in column 11 and those in column 8, plus the amount of full assessment on privileged lands held in fully assessed villages at less than that assessment.

Column 1 (page 326).—Zamindari (temporarily settled) includes malguzari and thekadari.

Column 2 states the area by village papers (column 6 of table No. 1).

Column 3 (a).—Zamindari estates properly so-called (that is, excluding malguzari) are classed as not fully assessed.

Column 4 (b) excludes fallows since 1894-95.

Column 5.—The figures represent different items of land revenue for different districts, no uniform practice having been followed throughout the province.

Column 10 (page 327).—The cultivated area referred to in this column is the fully assessed portion of the net cropped area.

Column 3 (a) (page 328).—This column states jagir, izâra, and palampat villages, all unassessed land, forest areas, village sites, roads, rivers, etc.

Column 4 (a).—Pôt kharâb lands are excluded from this column, which includes only occupied lands available for cultivation.

Column 4 (b) states the cultivated area in khalsa villages only.

Column 5.—The figures include the revenue derived from jagir, palampat, and izâra villages. As regards the items of land revenue included, the practice has not been uniform, different districts having entered different items.

Column 8 (page 329) shows assessment on occupied lands only, as stated in column 4 (a).

Column 10.—The incidence since 1896-97 has been calculated on the area entered in column 4 (b), that is, the cultivated area in khalsa villages only.

Column 11 excludes population of jagir and izâra villages.

The table is prepared quinquennially. The figures were last collected in 1908-09.

Column 3 (a) (page 330).—In the case of raiyatwari tracts this column states the area of unoccupied assessed lands, of all unassessed poramboke, of minor inám lands in Government villages held rent-free or subject to quit-rent, and of forest lands, excluding portions of the first mentioned two classes occupied under "miscellaneous;" and in the case of zamindari tracts the areas of hills, porambokes, and minor ináms are entered. The entire area of whole inám villages is deducted in this column. *Madras (contd)*

Column 3 (b)—Raiyatwari; includes the area of certain Agency tracts in Ganjam, Vizagapatam, and Godavari, and also the difference between the area by professional survey and the area according to village papers.

Column 4 (a)—Raiyatwari; states the total occupied area as stated in village papers.

Column 4 (b)—For certain districts areas actually cultivated and for certain others estimates, or actuals supplemented by estimates, are shown in this column.

Column 5 stated until 1903-04, only "ordinary revenue," but from 1903-04 it includes all the items falling under the head "Land Revenue" in the Civil Accounts.

Column 8 (page 331).—From 1903-04 this column shows only the "ordinary revenue," as defined in the Civil Accounts, on area fully assessed.

Column 10.—The cultivated area is, in the case of raiyatwari and zamindari lands, the net cropped area out of the area given in column 4 (a).

Column 11 states the entire population of raiyatwari and zamindari villages, respectively.

The table is prepared quinquennially, and the figures were last collected in 1907-08.

Entry 2 (page 295) includes bané and cardamom lands.

Entry 4 shows ordinary revenue, sale-proceeds of waste lands, and miscellaneous land revenue.

TABLE No. 6—TRANSFERS OF LAND

This table is intended to exhibit the number of voluntary and compulsory transfers of ownership of land or tenant-right, and the area so transferred. Voluntary transfers mean transfers made by actual contract or gift, transfers by inheritance not being taken into account; compulsory transfers mean transfers effected through the medium of a court, civil or revenue. Transfers of land under the Land Acquisition Act are outside the scope of the table.

The table now in use was prescribed in 1891; it differs from the tables formerly in use in the following respects:—

1866 I E—5	1884 I E—5	1891 E
<i>Nature of tenure</i>	<i>Nature of tenure</i>	<i>Nature of tenure</i>
Great zamindaris, complete.	Proprietors { Revenue-paying. Revenue-free.	Revenue-paying.
Shares in such zamindaris, complete.		Wholly or partially revenue-free.
Large zamindaris.		
Shares in such zamindaris.		(No alteration)
Small zamindaris.		
Shares in such zamindaris.		
Villages owned by cultivating communities.		
Shares in villages owned by cultivating communities.		
Holdings of proprietary cultivators.		
Intermediate holdings of a transferable character.		
Holdings of raiyats at fixed rates.	Tenants who have statutory (or otherwise recognised) powers of transfer.	(No alteration)
Holdings of raiyats with right of occupancy.		
Revenue-free tenures.		
<i>Number of transfers recorded</i>	<i>Number of transfers</i>	
(a) By voluntary sale or gift.	(a) By private contract or gift.	(No alteration)
(b) By compulsory sale.	(b) By order of court.	
(c) By inheritance.	(Omitted)	
<i>Average area in acres of each holding transferred</i>	<i>Total area transferred</i>	
(a) By voluntary sale.	(a) By private contract or gift.	
(b) By compulsory sale.	(b) By order of court.	
(c) By inheritance.	(Omitted)	

GENERAL NOTES

It is optional with local Governments to enter or omit transfers of lands held by tenants.

Instructions were issued in 1891 to the authorities of the Punjab and the Central Provinces to the effect that the entries under "by order of court" should state not merely the transfers occasioned by debt, but all forms of transfer effected through the medium of a court.

In August 1896 the following rules were prescribed:—

- (1) Changes of entry due to succession, partitions, or simple mortgages, are not really transfers, and should be excluded from the table, as also should redemptions of mortgage;
- (2) All temporary transfers such as leases should also be excluded, but mortgage with possession should be treated as a transfer and entered in the table;
- (3) All transfers made by order of a court should also be included in the table;
- (4) The word "court" in the entry "by order of court" should be held to include a revenue court.

PROVINCIAL NOTES

Transfers of property in land are not as yet regularly registered in Upper Burma; the information is collected by revenue officers. The statement includes cases in which land has been permanently transferred by gift, sale, or other transaction, for valuable consideration. The term "court" includes a revenue office as well as a civil court.

Since 1896-97 transfers by order of a revenue court have been included; and transfers by inheritance and non-permanent transfers, such as leases or usufructuary mortgages, which were formerly included in the table, have been excluded. The information is collected from the mutation registers of Revenue Officers supplemented by statistics obtained from the district registers and the Judge's Courts.

Columns 12 to 21 (page 337) exclude the areas transferred in the Sylhet and Goalpara districts, the information not being available.

No information is available for the districts of the Rajshahi, Dacca, and Chittagong Divisions. Certain figures were collected from 1908-09 to 1910-11 for the districts of the Presidency and Burdwan Divisions and the district of Darjeeling (shown in table No. 6—D) but as they were very incomplete, the table has been discontinued from 1911-12. *Bengal*

The table has been prepared since 1908-09. It is however still incomplete as the transfers shown under the head "By order of court" relate to transfers under orders of revenue officers only. Figures for transfers under orders of civil courts are not yet available. *Bihar and Orissa*

Transfers by inheritance or non-permanent transfers, such as leases or usufructuary mortgages for short periods, are excluded, but mortgages with possession are included, as also all transfers made under order of a court. *United Provinces*

Transfers of *malikana* rights, that is, rights to receive a portion of the profits of an estate, not amounting to proprietary rights, which were formerly included in the table, have been excluded since 1905-06.

Statistics of transfers of tenant-right are not given. Transfers by gift have been included since 1896-97.

The figures exclude all changes due to successions, partitions, simple mortgages, redemptions of mortgages, and temporary transfers, such as leases; but mortgages with possession are included. The column "by order of court" includes transfers occasioned by debt incurred by judgment-debtors, as also all other transfers effected by order of courts, civil and revenue. *Ajmer-Merwara.*

Transfers of property in land are not permitted in Manpur, except by sale and that only under special conditions. *Manpur*

From 1895-96 the table includes only transfers by mortgage and sale.

Punjab

Transfers by mortgage and sale only are included.

N.-W. Frontier

The table has been prepared since 1901-02.

Bombay and Sind

Transfers of tenant-right have been included since 1892-93. The figures against "proprietors" are filled up from returns compiled on the basis of mutation proceedings. Those against "tenants" are based on statements furnished by patwaris in which all transfers are entered, including transfers by mortgage with possession as well as transfers by sale but excluding transfers by inheritance. The statement does not include leases or mortgages without possession. *Central Provinces*

The information is obtained from the Registration Department.

Berar

The table includes all transfers effected by sale of fields under decree of a court (including a revenue court) either in execution of the decree or for recovery of arrears of land revenue. Private sales or recognised divisions of fields necessitating a change in the name of the registered occupant are entered under "by private contract or gift," as also are mortgages with possession. Transfers due to succession, by inheritance, simple mortgages, and leases are omitted.

Only permanent transfers, as by sale or gift, are included, when the parties concerned apply for and obtain transfers of revenue registry. These are entered under "private contract or gift." Cases in which lands are sold for arrears of revenue due to Government are also included if the lands are purchased by private parties, but excluded if the lands are purchased by Government. *Madras*

Transfers of tenant-right are not entered, the information not being available.

The entry under the head "revenue-paying" includes raiyatwari holdings paying full assessment, and permanently-settled estates paying *peshkash*; and the entry under the head "wholly or partially revenue-free" relates to minor ináms and whole inám villages.

The statement includes all legal transfers of property (a) by voluntary action of the owners and (b) by virtue of decrees of civil and orders of revenue courts. *Coorg*

Transfers ordered by courts in cases of disputed succession, and those occasioned by debt incurred by the judgment-debtors, are included under the heading "by order of court." This heading also includes transfers ordered by civil courts from registered holders to decree-holders, of lands sold by civil courts in satisfaction of decrees, and of holdings sold by the revenue authorities for arrears of revenue.

APPENDIX.

APPENDIX A—AVERAGE YIELD OF CROPS.

This statement shows the average yield in pounds per acre of the principal cultivated crops, revised with reference to the results of experiments made up to the year 1911-12.

GENERAL NOTES.

A provisional return of the yield of the principal crops cultivated in India was first compiled in 1892, from various statistical publications, such as, agricultural and settlement reports, crop forecasts, gazetteers, replies to the enquiries of the Famine Commission, etc., and to provide for the periodical revision of the estimates a system of experimental crop cuttings was prescribed by the Government of India, the results of which were to be reported in quinquennial returns.

The instructions for the preparation of these returns are that the estimate given should be that of the average outturn on average soil in a year of average character as deduced from a consideration of the information obtained or experiments made during the years under review ; so that when multiplied by the average area cropped, it may give as near an approximation as possible to the outturn of the crop in an average year. The Agricultural Department of each Province has at its disposal a provisional estimate of the average yield of land of average quality (under the two major heads of irrigated and unirrigated land) for the several crops in each district. The object of the experiments annually made is to test the accuracy of these estimates, and to enable the head of the Agricultural Department in each province to revise his provincial estimates when necessary. Should it happen that the period has been one of unfavourable conditions which have affected the experiments reported, this would not necessarily involve the reduction of the standard estimates for the district or for the province, unless there were other reasons for thinking that, as estimates of yield in average years, they had been pitched too high.

As a result of the experiments made during the preceding quinquennium (1901-02 to 1906-07), considerable modification of the standard averages for several of the crops was made in all provinces except Bombay and Bengal. Some three or four provinces have made a few revisions of this character on the results of the experiments conducted in the quinquennium 1907-08 to 1911-12 ; but, on the whole, the distrust in the results of the experiments as conducted by the district staff, to which expression was given by Bombay and Bengal on the last occasion, is growing. In the Bombay Presidency a system of more scientifically conducted experiments by officers of the Agricultural Department has been substituted for the system of experiments conducted by the district staff. In the Punjab and Sind the estimates framed by settlement officers at the time of revenue settlement have been preferred where these are available, while in certain other provinces the figures of the settlement officers have been freely referred to in checking the averages. In Bengal and Bihar and Orissa, though no change has been made in the system, the results of experiments made during the last twenty years have not been considered sufficiently reliable to justify any material change in the provisional estimates framed in 1892. In Burma the system has been condemned ; but the provincial authorities do not consider any change feasible for the present. The question of improving these returns and employing the agency of the Agricultural Department for the investigation of average crop outturns is under the consideration of the Government of India.

PROVINCIAL NOTES.

The number of experiments made in the quinquennium ending 1911-12 was on the whole larger than in the previous quinquennium, and, as in the past, the majority of the experiments were conducted by sub-divisional and township officers. The Provincial Director of Agriculture remarks that this arrangement is far from satisfactory, that the improvement of the system was considered, but that no change appears to be feasible for the present. In order to show the main product only, the following deductions have been made from the gross outturn of the crops, namely, for rice and jawar 33 per cent, and for cotton 70 per cent. The estimates of average outturn of rice, wheat, jawar, and gram have been lowered, while those of cotton and sesamum have been raised. The figures for the pea crop now discriminate between *Pegyi* (*Dolichos lablab*) and *Pegya* (*Phaseolus lunatus*) which are the most important varieties exported.

In the previous quinquennium figures for Assam were not shown separately, but they were combined with those for the districts of Eastern Bengal to give the average for the province of Eastern Bengal and Assam. The present return has been prepared for the province of Assam as reconstituted on 1st April 1912. Detailed figures for each district are not available except for winter rice, rape and mustard, sugarcane, and cotton ; these show a general increase over the previous estimates. In the case of cotton a deduction varying between 50

and 60 per cent has been made to obtain the yield of cleaned cotton. In almost all districts the number of experiments conducted during the period under review fell short of that made in any of the previous periods. The results, however, are stated to have been generally reliable and to have tallied for the most part with the estimates made by settlement officers in some of the districts where important settlement operations were in progress.

Owing to the administrative changes of 1912, by which Bihar and Orissa have been formed into a separate province, certain crops which are important in that area but hardly grown at all in Bengal as now constituted, have been omitted from the present report. The results of the experiments made in the quinquennium under review do not warrant any general conclusions as to the average yields of the various crops, nor do they, except in the cases of rice, sugarcane, and jute, afford grounds for modifying the provisional estimates hitherto adopted by the Agricultural Department (which are practically a reproduction of the estimates of 1892). The average yield of winter rice has been reduced from 1,234 lbs. to 983 lbs.; on the other hand, the yield of sugarcane has been raised from 2,460 to 2,905 lbs. and that of jute from 1,200 lbs. (8 bales) to 1,271 lbs. (8.1 bales). In the consolidated tables for British India, the provisional estimates therefore continue to appear with these modifications in the statement of provincial averages, but in the detailed table the average outturn based upon the experiments of the quinquennial period under review are shown for each district.

The present return relates to the province of Bihar and Orissa as constituted in 1912. Owing to carelessness in the selection of representative fields and to various other defects in the conduct of the experiments made in the quinquennium under review, the results arrived at do not afford any reliable information or justify any modification of the provisional estimates previously adopted by the Agricultural Department of the old province of Bengal on the basis of the estimates of 1892. In the consolidated tables for British India, these unrevised provisional estimates have therefore been retained in the statement of provincial averages, but in the detailed statement of district figures the average outturn based upon the experiments conducted during the quinquennium under review have been shown for each district, irrigated and unirrigated crops being classified separately.

The experiments made during the quinquennium under review have not necessitated any change in the provincial averages except for rice and maize. The yield of rice has been raised from 850 to 900 lbs. and that of maize from 1,050 to 1,100 lbs.

The figures reported appear to be merely averages of the results of the experiments conducted during the five years of the period without any consideration as to whether any of those years was of an average character or not. The yield of barley, maize, and cotton has been raised and that of jawar lowered, the most important change being the reduction of the yield of jawar from 424 lbs. to 137 lbs. A reduction of 70 per cent has been made, as before, to obtain the yield of cleaned cotton.

The revisions of 1902 and 1907 were made on the basis of very unscientifically selected and inadequately supervised experiments carried out by the district staff without reference to the very careful estimates framed by the settlement officers at the time of revenue settlement. The present revision has been made in consultation with settlement officers in the case of districts of which the settlement is in the early stages, while in other cases the average yield has been worked out mainly from the areas and yields given in the assessment reports, and where the results differed materially from the yields fixed in 1907 without any change in agricultural conditions having taken place, the settlement officers' estimates have been preferred. There is no doubt that the yields now fixed, based as they are on the over-cautious estimates of Settlement Officers, are too low, but they are at any rate placed on a uniform basis. The result of the revision is a reduction of the yields of all the crops except rapeseed, sugarcane, and cotton the averages for which have been raised. The most important changes are the reduction of the yield of bajra from 462 to 379 lbs. and of that of gram from 701 to 549 lbs., and the increase of the yield of rapeseed from 254 to 396 lbs. and of that of cotton from 74 to 118 lbs.

In the five years under review experiments were made by the district staff in only two districts and the figures for those districts have been checked and modified where necessary on the basis of those experiments. For the other districts the averages previously adopted on the basis of estimates framed by settlement officers have been repeated. The Provincial averages have been raised slightly for all the crops except maize for which the figure has been reduced from 1,342 to 1,292 lbs.

In many cases figures taken from the previous report have been repeated, while in several instances figures have been taken from the settlement reports. Of the experiments selected as giving results typical of an average crop during the present quinquennium three

were on wheat, one on jawar, two on bajra, one on gram, and one on cotton. As a result, the provincial average has been raised in the case of wheat, jawar, bajra, gram, rapeseed and cotton, while it has been reduced in the case of sesamum; the most important changes being the increase of the average yield of cotton from 303 to 380 lbs. and that of bajra from 776 to 971 lbs.

The estimates of 1897 were prepared with great care and the results of the experiments made in the two quinquennia ending 1901-02 and 1906-07 were not considered sufficiently reliable to justify any revision. With the sanction of the Government of India, the system of crop cutting experiments conducted by the district staff was abolished in the quinquennium under review, and a system of more scientifically conducted experiments on Government farms by the officers of the Agricultural Department was substituted. But the results as yet obtained from the experiments on Government farms are too meagre to justify a general revision of the estimates. A few changes considered to be necessary by the Provincial Director have, however, been made with great caution in the figures for certain districts.

Experiments have been selected with greater care in the present quinquennium than in the past, and due attention has been given to seasonal peculiarities and to classes of soil. The average yield has been raised in the case of rice, jawar, gram, linseed and sugarcane, and lowered in the case of sesamum and cotton. In order to show the yield of the main product a deduction of 38 per cent has been made in the case of rice and of 70 per cent in the case of cotton.

The experiments accepted as unobjectionable during the quinquennium were 3,385 in number as against 3,348 in the previous quinquennium. The average assessment of the plots of land selected for experiment is in excess of the average assessment of the province; in many cases, therefore, the land selected is apparently superior to average class of land. The yield of the majority of crops has been raised especially in the case of cotton and irrigated jawar: the yield of irrigated cotton has been raised from 66 to 87 lbs. of unirrigated cotton from 44 to 55 lbs., and of irrigated jawar from 1,118 to 1,379 lbs. The only decreases relate to sesamum and unirrigated rice. The reported yield of paddy (unhusked rice) has been reduced by 38 per cent to obtain the yield of rice (husked).

The only experiments made have as usual been on rice. The average yield has been lowered from 1,507 to 1,483 lbs., which is still very high in comparison with the reported yield of other provinces, but is ascribed partly to increased attention being paid to rice cultivation since the decline of the coffee industry and partly to the rice lands of Coorg being watered by hill streams which contain much manurial matter.

The rainfall in the quinquennium under review is stated to have been generally erratic. The average yield of rice has been reduced from 879 to 841 lbs., of sesamum from 215 to 199 lbs., of sugarcane from 3,279 to 3,138 lbs. and of cotton from 89 to 79 lbs., while that of ragi has been raised from 562 to 581 lbs. and of horse gram from 229 to 257 lbs.

Average for British India		1,008	814	877	904	566
Mysore	{ Irrigated	841	...	...	...	...
	{ Unirrigated	...	...	...	...	...

NOTE.—The average yield of both irrigated and unirrigated land is ascertained by multiplying the yield of irrigated land by the irrigated area cropped, adding the yield of unirrigated land multiplied by the unirrigated area cropped, and dividing the sum of these products by the total area cropped.

* The estimates for Bihar and Orissa are the standards, adopted provisionally by the Agricultural Department of the province, which are partly based on the information collected in 1892. The results of the experiments for the period ending 1911-12, as recorded in Appendix A—IV are not considered sufficiently reliable to justify a revision of the provisional estimates.
