THE COMMITTEE'S REPORT	1
SUGGESTIONS ON THE TEACHING OF THE VARIOUS BRANCHES OF THE CURRICULUM OF PRIMARY SCHOOLS	150
APPENDICES :—	
Appendix I.—List of Witnesses and List of Organisations and Persons who sent Memoranda, Statistics and other Data for the use of the Committee	207
Appendix II.—Memorandum on the Anatomical and Physiological Characteristics and De- velopment of Children between the ages of seven and eleven. By Mr. H. A. Harris, M.B., B.S., D.Sc., Assistant Professor of Anatomy, University College, and Assis- tant to the Medical Unit, University College Hospital, London	222
Appendix III.—Memorandum on the Mental Characteristics of Children between the ages of seven and eleven. By Professor Cyril Burt, D.Sc., Psychologist to the London County Council	254
INDEX	280

NOTE.

The estimated gross cost of the preparation of the appended Report (including the expenses of the Witnesses and Members of the Committee) is £1,553 13s. 11d., of which £400 represents the gross cost of printing and publishing this Report

NOTE ON THE NOMENCLATURE USED IN THE REPORT.

In this Report, as in our Report on the Education of the Adolescent (1926), we use "Primary" for education up to the age of eleven, and "Secondary" for education from the age of eleven till the end of school life. For the sake of convenience, "Primary School" is used both for a school taking children from five to eleven and also for a school from which children under seven are excluded as being otherwise provided for. In certain passages in the body of the Report we have for the sake of clearness used the phrase "Junior School" in contradistinction to "Infant School" to describe self-contained schools for children between the ages of seven and eleven, i.e. the upper stage of primary education. Further, throughout this Report we use the expression "Grammar School" as meaning a "Secondary School" recognised under the Board's Regulations for Secondary Schools, and the expression "Modern School" as meaning either a "Selective" or "Non-Selective Central School" (see Section 101 (pp. 99-100) of Chapter III. and Appendix II., pp. 265-268, 269, and 273-274 of our Report on the Education of the Adolescent), or a so-called "Senior School".

NAMES OF THE MEMBERS OF THE CONSULTATIVE
COMMITTEE.

SIR W. H. HADOW, C.B.E. (*Chairman*)

Mr. J. W. BISPHAM, O.B.E.

Mr. W. A. BROCKINGTON, C.B.E.

Miss E. R. CONWAY, C.B.E.

Dr. H. W. COUSINS

Mr. EVAN T. DAVIS

LADY GALWAY, C.B.E.

Miss LYNDA GRIER

Miss FREDA HAWTREY

The REV. SIR EDWYN C. HOSKYNS, Bart., M.C.

SIR PERCY R. JACKSON

Mr. R. J. McALPINE

Mr. F. B. MALIM

Dr. A. MANSBRIDGE

Mr. H. J. R. MURRAY

Miss E. M. TANNER

Dr. R. H. TAWNEY

Mr. S. TAYLOR

Mr. W. C. WATKINS

Mr. J. A. WHITE, M.B.E.

Mr. R. F. YOUNG (*Secretary.*)

The late Sir Graham Balfour was also a member of the
Consultative Committee.

TERMS OF REFERENCE.

To inquire and report as to the courses of study suitable
for children (other than children in Infants' Departments) up
to the age of 11 in Elementary Schools, with special reference
to the needs of children in rural areas.

ANALYSIS OF THE CONSULTATIVE COMMITTEE'S REPORT.

CHAPTER I.—THE HISTORY OF THE DEVELOPMENT OF THE CONCEPTION OF PRIMARY EDUCATION ABOVE THE INFANT STAGE, FROM THE BEGINNING OF THE 19TH CENTURY TO THE PRESENT TIME.

PART I.—*The development of Infant Schools and Elementary Schools up to 1870.*

SECTION	PAGE
1. The three main trains of causation which have brought about the organisation of so-called Junior Schools and Departments, constituting an upper stage of primary education. The implicit distinction between the Infant Schools and so-called Elementary Schools for children above the Infant stage is recognisable from the very beginning of the movement for providing popular elementary education on a large scale	1
2. The monitorial schools established by the British and Foreign School Society and by the National Society	2
3. The development of Infant Schools in the early part of the 19th Century, and the ideas underlying their curriculum	3
4. The views of some inspectors of the Education Department in 1846 and 1847 on the advantages of centrally situated schools for older children fed by a number of small Primary Schools	4
5. The conception of a distinct department or group for younger children beyond the infant stage was already developed in France, Prussia, and to some extent in Scotland in the first half of the 19th Century	5
6. David Stow's plan for a graded system of Elementary education	6
7. Arrangements for organising elementary schools in England and Wales down to about 1861	7
8. The ordinary books on methods of teaching and educational theory down to 1900 contain few traces of the idea of a Junior Department constituting an upper stage of primary education	7
Professor Findlay's <i>Principles of Class Teaching</i> published in 1902, and Wm. Lovett's <i>Chartism</i> , 1840	7
9. The views of the "Newcastle" Commission of 1858-1861 on Infant Schools	8
10. The views of the "Newcastle" Commission on the so-called Day or Elementary Schools	9
11. The Revised Code of 1862 and its influence on Infant Schools and Classes	9

CHAPTER I.—*continued.*

PART II.—*The period from 1870 to 1918. The gradual emergence of the idea of post-primary education after the age of 11 or 12.*

SECTION	PAGE
12. The Elementary Education Act of 1870. The scheme of organisation for Board Schools recommended to the first London School Board by Professor Huxley's Committee of 1871	10
13. Types of organisation adopted by the School Boards in the seventies. The Building Regulations of the Education Department for 1871	11
14. References to primary education above the Infant stage in the Final Report of the " Cross " Commission, 1888 ..	13
15. The efforts made between 1894 and 1900 to improve the organisation and work of the lower standards in public elementary schools	13
16. Junior " Mixed " and Senior " Mixed " Departments, and other types of School and Department for younger children	14
17. Junior Schools for pupils up to the age of about 12, organised in connection with Higher Grade Schools in the areas of certain urban School Boards	15
18. The Education Act of 1902 and its effect on the Higher Grade Schools. The new Higher Elementary Schools. The official meaning of " infants " and " older scholars " in the early years of the present Century	15
19. The provisions regarding Free Places in Secondary Schools in the Regulations for Secondary Schools for 1907 ..	16
20. The development of Central Schools from about 1911 ..	17
PART III.— <i>The development after the passing of the Education Act, 1918. The reorganisation of primary and secondary (post-primary) education on the basis of the break at the age of 11.</i>	
21. The Education Act of 1918, and its effects	18
22. The growth of Central Schools as from 1919. The Consultative Committee's <i>Report on the Education of the Adolescent</i> (1926)	18
23. The reorganisation of education for children below the age of 11, as revealed by the official statistics	19
24. General conclusion based on the historical development of primary education up to 1930	20

CHAPTER II.—THE PHYSICAL DEVELOPMENT OF CHILDREN BETWEEN THE AGES OF 7 AND 11.

SECTION	PAGE
25. The importance and significance of the available scientific evidence regarding the physical growth and general mental development of children between the ages of seven and eleven	22
26. Slowness of growth in man	22
27. The successive cycles of general (skeletal) growth in children up to the period of adolescence	24
28. The comparative incidence of certain diseases at successive periods in the child's development	26
29. The development of the muscular system	27
30. Evidence of arrested skeletal growth in children due to illness and malnutrition	28
31. Attempts to classify different physical types on the basis of variations in body build	28
32. The development of the brain and the nervous system in children up to the age of eleven	29
33. The comparative rate of skeletal growth in boys and girls respectively up to the age of eleven, and its bearing on educational questions	31

CHAPTER III.—THE MENTAL DEVELOPMENT OF CHILDREN BETWEEN THE AGES OF 7 AND 11.

34. The available psychological data : The mental characteristics of young children : The Stratification Theory : The Recapitulation Theory	33
35. The intellectual characteristics of young children	34
36. Sensory capacities ; vision ; hearing ; muscle sense ; touch ; movement	35
37. The Higher Mental Capacities : attention, fatigue, weariness, memory	37
38. Imagery and Ideas : reproductive imagination ; constructive imagination	40
39. The working contents of the young child's mind	41
40. The child's definitions of his own ideas	42
41. Reasoning ; perception of relations ; deductive reasoning ; inductive reasoning ; logical criticism ; suggestibility	42
42. The development of aesthetic appreciation in the widest sense in children between the ages of seven and eleven	44
43. Emotional Qualities of Young Children : Their normal interests	47
44. The child's interests as revealed by play	50

CHAPTER III.—*continued.*

SECTION	PAGE
45. The child's interests as shown by spontaneous drawing ..	51
46. The child's interests as revealed in spontaneous reading ..	52
47. Sex differences on the intellectual and emotional sides ..	52
48. The Influence of Environment on children : The physical, mental and emotional effects of poverty and its concomitants	54

CHAPTER IV.—THE AGE LIMITS FOR THE UPPER STAGE OF PRIMARY EDUCATION.

49. The upper age limit for primary education should be fixed at the age of eleven ; in other words, the transfer from the Primary School to the Secondary (post-primary) School should take place between the ages of eleven and twelve	58
50. Existing arrangements for the education of children up to the age of eleven	60
51. The organisation of children up to the age of eleven in separate Infant Schools and in Primary Schools : Arguments in favour of combined schools for children between the ages of five and eleven covering the whole stage of primary education	61
52. (i) The argument that any break in a young child's school life should be avoided	62
53. (ii) The argument that there is no cogent psychological evidence pointing to the desirability of a break between the infant stage and upper stage of primary education ..	64
54. (iii) The argument that past experience tends to show that separate " Junior " schools are unsatisfactory	65
55. (iv) The argument that it is desirable that the transition from the Infant Department to the Upper Department should not be too abrupt	66
56. (v) The argument that if infants and children over the age of seven be organised in separate Schools, the Infant School will often be too small	67
57. The Committee's recommendation that, in areas where it is possible, there should be separate schools for children under the age of seven, and that in all Primary Schools, including even small rural schools, there should be a well defined line of demarcation between the younger and older children	68
58. The psychological evidence bearing on the most suitable age for transferring pupils from the Infant School to the upper stage of primary education	69
59. The general aim and scope of the Primary School	70
60. Co-operation between the two departments or sections of the Primary School	71
61. Co-operation between Primary Schools and Secondary (post-primary) Schools of different types	71

CHAPTER V.—THE INTERNAL ORGANISATION OF PRIMARY SCHOOLS.

SECTION	PAGE
62. The general function of the reorganised Primary School ..	73
63. The primary stage of education between the ages of five and eleven as one continuous process	74
64. The size of classes in Primary Schools	75
65. The question of co-education at the upper stage of primary education	77
66. The internal organisation of Schools for pupils between the ages of seven and eleven	77
67. The internal organisation of Primary Schools for pupils between the ages of five and eleven	79

CHAPTER VI.—RETARDED CHILDREN IN THE PRIMARY SCHOOL.

68. Development of differences in mental capacity in young children	83
Mental Deficiency: Retardation: "more retarded" children and "less retarded" children	83
69. The main causes of educational retardation:—	
(a) innate mental causes	85
(b) physical causes	86
(c) extraneous causes	86
70. The importance of early detection of the causes of retardation	87
71. The "more retarded" children at the upper stage of primary education	88
72. The "less retarded" children in the Primary School ..	89

CHAPTER VII.—THE CURRICULUM OF THE PRIMARY SCHOOL.

73. The traditional curriculum of the Public Elementary School	91
74. The general principles on which the curriculum for the upper stage of primary education should be based; the complexity of modern industrial civilisation and its bearing on the work of Primary School	92
75. The curriculum of the Primary School must be thought of in terms of activity and experience, rather than of knowledge to be acquired and facts to be stored	93
76. Physical welfare and efficiency; physical exercises and games; physical culture in the wider sense	93

CHAPTER VII.—*continued.*

SECTION	PAGE
77. Language	95
78. Manual skill	96
79. Aesthetic subjects :—Handwork, Drawing, Music	97
80. Literature	99
81. Science ; the Study of Nature ; Elementary Mathematics	100
82. The elements of Geography and History	100
83. The traditional practice of treating the primary school curriculum in terms of “ subjects ” ; the desirability of devising new methods of approach to the various branches of the curriculum	100
84. Alternatives to the isolated treatment of school “ subjects ” ; methods based on the “ project ” idea ; the need for caution in experiments of this character	102
85. The necessity for a thorough grounding in Reading, Writing and Arithmetic at the upper stage of primary education	104
86. The teacher’s personality is a factor of fundamental importance	105

CHAPTER VIII.—STAFFING OF PRIMARY SCHOOLS AND THE TRAINING OF TEACHERS.

87. The Staffing of Primary Schools	107
88. The Training of Teachers : The type of teacher best suited for work in Primary Schools, and the provision made in Training Colleges for appropriate courses of training ..	108
89. The probationary period : The allocation of young Certificated Teachers to suitable Primary Schools	109
90. The special needs of Certificated Teachers in Rural Primary Schools	110
91. Facilities for assisting Certificated Teachers to improve their teaching proficiency	111
92. The Training of Teachers for Classes and Groups of Retarded Children	111
93. Uncertificated Teachers in Primary Schools	112
94. Facilities for Uncertificated Teachers (<i>a</i>) to take the Certificate, (<i>b</i>) to improve their teaching proficiency	113
95. Supplementary Teachers in Rural Primary Schools	114

CHAPTER IX.—PREMISES AND EQUIPMENT OF PRIMARY SCHOOLS.

96. Premises	116
97. Equipment	118
98. School and Class Libraries	119
99. Visual and auditory aids to teaching	120
100. Short visits to places of interest in the neighbourhood	121
101. Playing-fields	122

CHAPTER X.—EXAMINATIONS IN PRIMARY SCHOOLS.

SECTION	PAGE
102. The classification of entrants between the ages of seven and eight from the Infant School or Department to the upper stage of primary education	123
103. The Free Place Examination in the Primary School ..	123
104. The scope of existing Free Place Examinations	124
105. The practice of holding the Free Place Examination in one or in two stages	125
106. Subjects of the written examination	126
107. The use of group Intelligence Tests	127
108. Oral Tests	128
109. School Records	129
110. Special Aptitudes	129
111. Arrangements for stimulating the interest of parents in their children's progress in the Primary School, and in the available facilities for secondary education	130
112. General Summary	130

CHAPTER XI.—SUMMARY OF PRINCIPAL CONCLUSIONS AND RECOMMENDATIONS.

113. The Committee's principal conclusions and recommendations	133
----------------------------------------------------------------	-----
