GENERAL WAGE CENSUS

Part I—Perennial Factories

FIRST REPORT

**Report on Wages, Hours of Work and Conditions
of Employment in the Engineering Industry
in the Bombay Presidency (excluding Sind)
May 1934**

Prepared by the Labour Office, Government of Bombay

Published by order of the Governor in Council

**BOMBAY
PRINTED AT THE GOVERNMENT CENTRAL PRESS
1935**

PREFATORY NOTE.—

I had intended, in this foreword, to express the thanks of the Labour Office by name to those individuals who had assisted us in the preparation of this report. But when I came to consider the matter I find that our indebtedness is so great and so widespread that to attempt any selection would be invidious. The group to which our debt is greatest is that composed of the engineering experts on the railways without whose ungrudging help in the preparation of the standard list and in many other ways this report would have remained only an idea and not a practical achievement. All of them were unsparing in their efforts to make the enquiry a success. The same assistance, too, was given by every engineer whom we approached and by the head of every firm. Particularly do we desire to thank the timekeepers and clerical staffs of the various firms and factories for the care and attention they gave to the filling up of the forms and the readiness with which they responded to our many demands upon their time and patience.

J. F. GENNINGS,
Commissioner of Labour.
