ANNEXURES

I.	Districtwise frequency distribution of C.D. Blocks by Literacy Rates for All Persons aged 7 years and above-1991.	46
II.	List of C.D. Blocks with less than 20 percent Literacy Rate for All Persons.	47
III.	Districtwise frequency distribution of C.D. Blocks by Literacy Rates for Females only aged 7 years and above - 1991.	48
IV.	List of C.D. Blocks with less than 10 percent Literacy Rates for Females only.	49-51
V.	Districtwise frequency distribution of C.D. Blocks by percentage of Scheduled Tribes Population - 1991.	52
VI.	Literacy Rates of tribal blocks having more than 50 percent Scheduled Tribal Population.	53
VII.	Districtwise percentage distribution of illiterate population aged 7 years and above by broad age groups for 1981.	54
VIII.	Statewise Population, Illiterates, Literates, Literacy Rates for age group 7 and above - 1991.	55

□ FOREWORD

India is one of the nine developing countries of the world which contain about half the world's population and also account for about three fourth of the adult illiterates of the world. India also has the distinction of having the largest share among these nine developing countries, viz., 31% of the adult illiterates (15 years and above) of the world. Total number of illiterates of the age-group 7 and above in the country at the time of 1991 Census including estimates for Jammu & Kashmir was 332.68 million. Of this, the seven major States, namely Bihar, Madhya Pradesh, Rajasthan, Uttar Pradesh, Andhra Pradesh, West Bengal and Maharashtra having more than 20 million illiterates each (age-group 7 and above) account for 65 percent of the population and contain 71 percent of the total illiterates of the country. Special attention is now being given to these States in the national efforts of eradicating illiteracy by the year 2000. For preparing the effective district plans, micro planning has to be done at the district and community development block levels. An effort has been made in this book to present population and literacy data upto block level in respect of Rajasthan which is one of the above seven States.

Table 1 of this book gives information regarding change in literacy situation of the age-group 7 and above population during 1981-91 at the State level. Tables II & III contain district-wise information for the 28 districts of the State which existed at the time of 1991 Census. Information in these Tables relates to the total population of all age-groups classified by sex, all areas/rural areas and scheduled castes/scheduled tribes. Tables IV to VII present districtwise literacy situation of the age-group 7 and above population and also give information on number of literates and illiterates as per 1991 Census.

Table VIII depicts block-wise information of 237 community development blocks of the State on total, scheduled castes/scheduled tribes population of all age-groups. Tables IX & X give block-wise information for age-group 7 years and above in respect of population, literates, illiterates and literacy campaign projects sanctioned for Rajasthan till October 1994. Annexures I to VI of this book are based on the classification of community development blocks by literacy rates for all persons and females, by percentage of scheduled tribes population and contain list of low literacy tribal blocks.

Annexure VII gives indices for working out estimates of illiterates by broad age-groups and Annexure VIII illiterates, literates and literacy rates for age-group 7 and above for the country based on 1991 Census for reference purposes. A brief analysis of the literacy situation in Rajasthan at State, District and Block levels is also included in this book.

Planning and preparation of this book has been done by Shri Prem Chand, fellow in the National Institute of Adult Education. Shri Swarnendu Biswas and Ms Vinita Gupta, Project Assistants have helped in compilation and processing of the data for this book.

I would like to record my deep sense of appreciation for the initiative taken and efforts put in by Shri Prem Chand. I also appreciate the work done by Shri Biswas and Ms Vinita Gupta and others in bringing out this book.

This book is in continuation of two volumes of Statistical DataBase for literacy for India and Statistical Data Base for literacy for Madhya Pradesh already brought out. I hope the data and the analysis of literacy situation in Rajasthan at State, District and Block levels contained in this book will be found useful for planning and implementation of literacy programmes and will serve the purpose of micro planning upto the community development block level.

November, 1994

A.K. BASU
DIRECTOR

STATE LEVEL

Rajasthan occupies an area of 342,239 sq km and accounts for 10.41 percent of the total Indian territory. In terms of area, Rajasthan takes the second place, next only to Madhya Pradesh. The state of Rajasthan has 28 districts having varying areas, from a low of 3770 sq km in Dungarpur to a high of 38,401 sq km in Jaisalmer district. The state of Rajasthan came into being through the enactment of States Act in 1955 and included several former princely states such as Banswara, Alwar, Bharatpur, Dungarpur, Kota, Tonk, Udaipur, Jaipur, etc. Rajasthan is known not only for its courageous people, whose martial traditions are legendary, but also for its panoramic geographical locations and aesthetically built historical monuments, scattered throughout the state. A large part of Rajasthan's vegetation is sandy and rocky and is limited to small trees, bushes and shrubs. A large part of Rajasthan is covered by desert, where very little rain and hence low vegetation takes place. Rajasthan's soil is a mixture of several types of soils—alluvial, mixed red & black, and red & yellow. The climate of Rajasthan varies from 40 to 50 degree centigrade in summer to 15 to -2.82 degree centigrade in winter. The variability in rainfall in Rajasthan is extremely high.

DEMOGRAPHY

Total population of Rajasthan, according to 1991 Census was 44,005,990 with its rural population 33,938,877 and urban population 10,067,113 respectively. The rural population accounted for 77.12 percent of the total population. Decadal growth rate of population (1981-91) in Rajasthan was high, being 28.44 percent as compared to the national average of 23.85 percent. However, it showed signs of substantial decrease from that of 32.97 percent in 1971-81. The above data indicates that Rajasthan showed a greater decline in decadal population growth over the last decade but it is still higher than that of the national level. The density of population (number of persons per sq km) of Rajasthan showed an increase from 100 in 1981 to 129 in 1991, but the state's population density is quite low as compared to national average of 230 in 1981 and 273 in 1991 respectively. We can say that Rajasthan is still a sparsely populated state as compared to the rest of India. The number of persons per 100 households in Rajasthan, in 1991 was 604, as compared to that of the national average of 551 which is indicative of family size in Rajasthan. Other demographic indicators like the sex ratio (number of females per 1000 males), birth rate, etc., also reveal that Rajasthan is lagging behind as compared to the rest of India. Sex Ratio in Rajasthan according to 1991 census was even more discouraging 910, as compared to the already dismal national average of 927. The birth rate for Rajasthan according to SRS estimates in 1991 was 34.3 as compared to 29.3 in India. The death rate in Rajasthan was equal to the national average of 9.8. The higher average birth rate accompanied by low death rate accounts for a higher decadal growth rate of population in Rajasthan. 17.29 percent of the population of Rajasthan, according to 1991 census, belongs to Scheduled Castes category and 12.44 percent to Scheduled Tribes category. While Scheduled Caste population is evenly spread

over all the districts of the State, Banaswara, dungarpur and Udaipur districts contain large tribal population.

LITERACY SITUATION FOR THE AGE GROUP 7 AND ABOVE

Literacy rates of Rajasthan according to the last census figures for the age group 7 and above was 38.55 as against the national average of 52.21. In terms of literacy rates, Rajasthan is second from the bottom, next only to Bihar with literacy rate of 38.48. The position of female literacy is still more dismal 20.44 as compared to the national average of not so encouraging 39.29. In the rural areas literacy rate according to 1991 census is 30.37 in the case of all persons and an abysmally low 11.59 in the case of females. For scheduled castes and scheduled tribes literacy rate for all persons is 26.29 and 19.44 and for females of SC and ST groups, literacy rates are 8.31 and 4.42 respectively.

Table below gives the comparative literacy situation for 1981 and 1991 by sex and rural/urban areas.

YEAR\AREA	POPULATION AGED 7 YEARS AND ABOVE			LITERATES AGED 7 YEARS AND ABOVE		
	PERSONS	MALE	FEMALE	PERSONS	MALE	FEMALE
1981						
ALL AREAS	27188	14234	12954	8186	6372	1814
RURAL AREAS	21350	11093	10257	4797	4101	696
URBAN AREAS	5838	3141	2697	3389	2271	1118
1991						
ALL AREAS	35146	18420	16726	13549	10130	3419
RURAL AREAS	26926	14031	12895	8179	6685	1494
URBAN AREAS	8220	4389	3831	5378	3445	1925
PERCENTAGE INCREASE DURING 1981-91						
ALL AREAS	29.27	29.41	29.12	65.61	58.98	88.48
RURAL AREAS	20.51	26.49	25.72	70.50	63.01	114.66
URBAN AREAS	40.80	39.73	42.05	58.45	51.70	72.18

In the All Persons category we can see that the percentage increase in the population was only 29.27 whereas the literates increased by 65.51 percentage. But on the other hand, in absolute terms, the increase in population was 7958 thousand as compared to 5363 thousand in literates, leaving a lag of 2595 illiterates. Similarly, in the rural areas too the increase in the percentage of population in the case of all persons was 20.51, whereas the increase in the literates was 70.50 percentage. So we can see that both in the case of All Areas and Rural Areas, the literates increased during 1981-91 by a much greater percentage, as compared to the population. But in absolute terms in the rural areas

too, the population increased by 5576 thousands whereas the literates increased by 3382 thousands, thereby leaving behind 2194 thousands illiterates. The illiteracy rate fell from 69.89 in 1981 to 61.45 in 1991, despite the fact that the numbers of illiterates in absolute number increased from 19002, in case of all persons in 1981 to 21599 in 1991. But as compared to the growth of literates the growth of illiterates was not much during this period. Impact of growth of the educational efforts on the literary scenario from 1971 onwards could be best illustrated with the help of the table below -

YEAR	AGE GROUP	POP.	ILL.	LIT.	LIT. RATES
1971	5 and over	21770	16856	4914	22.57
1981	5 and over	29442	21088	8354	28.37
1981	7 and over	27188	19002	8186	30.11
1991	7 and over	35146	21597	13549	38.55

From the table, it can be deciphered that for the age group 5 and over, literacy rates increased substantially during the period 1971-81. The increase in the literacy rates in 1971-81 for the age group 5 and over was 5.80 percentage point. During 1981-91, for the age group 7 and over the increase in the literacy rates was still higher by 8.44 percentage points. We can say from the above analysis that the literacy rates are not only increasing but increasing at a faster rate with each passing decade.

But unfortunately, still the literacy situation in Rajasthan is extremely discouraging with only 38.55 percent of population of the age group 7 and above being literate as per 1991 census, and the literacy situation of females is in a still more wretched condition. In fact the gender disparity in literacy situation in Rajasthan in 1991 was extremely lopsided with 54.99 percent literacy for males and only 20.44 percent literacy rate for its female population. Though the situation has improved over the years but still a lot needs to be done to bridge the yawning gap in male/female literacy.

The change in gender disparity in literacy is illustrated below by the following table -

YEAR	AGE GROUP	LITERATES		LITERACY RATES	
		MALE	FEMALE	MALE	FEMALE
1971	5 and over	3875	1039	33.87	10.06
1981	5 and over	6481	1873	42.04	13.36
1981	7 and over	6372	1814	44.76	14.00
1991	7 and over	10130	3419	54.99	20.44

Number of female literates for the age group 5 and over increased from 1039 thousand in 1971 to 1873 thousand in 1981. Number of female literates for the age group 7 and above increased from 1814 thousands in 1981 to 3419 thousands in 1991. The increase in the female literacy rate from

1971 to 1981 for the age group 5 and over was only by 3.30 percentage points whereas from 1981 to 1991, for the age group 7 and above it was 6.44 percentage points.

Notwithstanding the glaring gender disparity in Rajasthan, the gender disparity in literacy is enormous. There is an urgent need to channelise constructive educational programmes, particularly for the females so as to reduce the disparity.

DISTRICT LEVEL

Out of the 28 districts of Rajasthan 7 have more than 20 percent tribal population. These seven districts are Swai Madhopur(22.59), Sirohi(23.39), Udaipur(44.09), Chittaurgarh(20.28), Dungarpur(65.84), Banswara(73.47) and Bundi(20.25) respectively. Among them Dungarpur and Banswara have more than 50 percent of tribal population. Barmer has the lowest literacy rate of 22.98 in the case of all persons. In the case of female literacy also Barmer comes first from the bottom with only 7.68 percent literacy rate. Barmer is closely followed by Jalor with 23.76 percent for all persons and 7.75 percent for females. Ajmer is the most educationally progressive district among all the 28 districts of Rajasthan. According to 1991 census, Ajmer had a literacy rate of 52.34 for all persons and 34.50 for females. In the case of rural areas also the gap is wide with Jhunjhunun heading the list in the case of all persons with 44.65 percent literacy rate and Barmer having the lowest rural literacy rate for all persons of 18.79 percent. In the case of female literacy rates for rural areas, Barmer again has the lowest literacy rate of 4.20 percent with Jhunjhunun having the highest female literacy of 22.04 percent. In the case of female literacy for all areas, about 8 districts have more than 20 percent female literacy rates, and out of them only Ajmer district has more than 30 percent (34.50). In rural areas only 13 districts have more than abysmally low 10 percent female literacy rates, out of them only Jhunjhunun having the distinction of having more than 20 percent (22.04). Other 15 districts have to share the ignominy of having less than 10 percent literacy rate. Frequency distribution of the districts by literacy rates for all areas and rural areas are given below to show the composition of districts in various groups of literacy rates.

Range of Literacy rate (All Persons)	No. of districts falling in the range			
	All Areas	%	Rural Areas	%
0-10	-	-	-	-
10-20	-	-	1	3.57
20-30	3	10.72	15	53.57
30-40	15	53.57	11	39.29
40-50	9	32.14	1	3.57
50+	1	3.57	-	-
Total	28	100.00	28	100.00

So we can construe from the above table that the maximum districts that is 15 out of 28 fall in the category of 30-40 literacy range in the case of all areas, followed by 40-50 literacy range where about 32.14 percent of the districts lie. In the case of rural areas, 20-30 literacy range is the modal range where about 15 out of 28 districts are there, followed by 30-40 literacy range which comprises 11 out of the remaining 13 districts. Only 2 districts fall in other literacy ranges, that is 1 district in 10-20 category and 1 in 40-50 category. No district has crossed 50% literacy in the rural areas. The frequency distribution of districts by literacy rates shows that most of the districts of Rajasthan have literacy rates in the range of 30-40 percent and for rural areas, a still lower literacy range of 20-30 becomes the modal range.

Frequency distribution of districts by literacy rates of females for all areas and rural areas indicates a more discouraging scene.

Range of Literacy rate (Females only)	No. of districts falling in the range			
	All Areas	%	Rural Areas	%
0-10	-	-	15	53.57
10-20	19	67.86	12	42.86
20-30	8	28.57	1	3.57
30-40	1	3.57	-	-
40-50	-	-	-	-
50+	-	-	-	-
Total	28	100.00	28	100.00

In respect of female literacy, the modal range lies in 10-20 literacy group for all areas, where 19 out of 28 districts of Rajasthan fall. Then comes the 20-30 literacy group where 8 out of remaining 9 districts fall, with only 1 district in 30-40 category. In rural areas, the modal female literacy range is 0-10 where 15 out of 28 districts fall. Out of the remaining 13 districts 12 fall in the group of 10-20 with only Jhunjhunun being the district with more than 20 percent rural female literacy rate. The fact that 15 out of 28 districts in rural areas have less than 10 percent female literacy rates, lowest being 4.20 percent in Barmer, is ample enough proof of the depth of illiteracy, specially among the females in rural areas. From the figures it becomes crystal clear, that the educational efforts must be carried out in Rajasthan, specially in the context of females in rural areas, with sustained and even greater efforts to achieve the arduous but not impossible task of removing the evil vestiges of illiteracy in the years to come.

BLOCK LEVEL

According to the 1991 census the state of Rajasthan with 28 districts has 237 community development blocks. The distribution by literacy rate of these C.D. blocks for all persons aged 7 and

above is as follows -:

Literacy Rate (All Persons)	C.D.blocks falling in the literacy range		
	No.	Percentage	Cummulative Percentage
0-5	-	-	-
5-10	1	0.42	0.42
10-15	4	1.69	2.11
15-20	11	4.64	6.75
20-25	50	21.10	27.85
25-30	54	22.78	50.63
30-35	57	24.05	74.68
35-40	35	14.77	89.45
40-45	15	6.33	95.78
45-50	7	2.95	98.73
50+	3	1.27	100.00
Total	237	100.00	

It can be seen from the above figures that most of the blocks are clustered in the literacy range of 30-35, 25-30 and 20-25 with modal range being 30-35 where 57 out of the 237 c.d. blocks lie. It is closely followed by the literacy range of 25-30. About 54 out of the remaining 180 blocks have literacy rate of 25-30 percentage. We can say that more than twothird of the total number of blocks fall within the low literacy level of 35 percent, with only 25 blocks(about 10.55 percent) having more than 40 percent literacy rate. Moreover about 16 out of 237 c.d. blocks have less than 20 percent literacy rate for all persons.

In the case of females the frequency distribution by literacy rates aged 7 years and above for 237 c.d. blocks presents a bleaker picture.

Literacy Rate (All Persons)	C.D.blocks falling in the literacy range		
	No.	Percentage	Cummulative Percentage
5-10	1	0.42	0.42
0-5	18	7.59	7.59
5-10	86	36.29	43.88
10-15	88	37.13	81.01
15-20	30	12.66	93.67
			Contd...

Literacy Rate (All Persons)	C.D.blocks falling in the literacy range		
	No.	Percentage	Cummulative Percentage
20-25	6	2.53	26.20
25-30	8	3.38	99.58
30-35	1	0.42	100.00
35-40	-	-	-
40-45	-	-	-
45-50	-	-	-
50+	-	-	-
Total	237	100.00	

From the above illustration, we can say that 18 out of the total 237 c.d. blocks have female literacy rate of even less than 5 percent. The modal literacy range is a low 10-15 percent where 37.13 percentage of c.d. blocks or 88 blocks fall. It is closely followed by literacy range of 5-10 percent where 86 blocks fall. In short, about 192 out of 237 blocks, that is 81.01 percent of total c.d. blocks in Rajasthan have female literacy rate below 15 percent. Among them about 104 blocks (by referring Annexure III and Annexure IV) have literacy rate less than 10 percent. Only 15 blocks have more than 20 percent female literacy rate including only one block having the distinction of female literacy rate beyond 30 percent.

10. 22 blocks have more than 50 percent Scheduled Tribe population (Annexure VI). Out of these 22 blocks, none has more than 20 percent literacy rate for females and only three blocks, namely Kharaura, Sagwara and Garhi have more than 30 percent literacy rate for all persons. About 12 of these 22 blocks have less than 10 percent literacy rate for females but only one block that is Kotra has less than 10 percent literacy rate for all persons. Furthermore, about 7 blocks have less than 20 percent literacy rate for all persons which, though is distressing, is better as compared to the female literacy rates in these blocks. It becomes very clear from Annexure VI that in these tribal blocks where tribal population exceeds 50 percent of its total population, the literacy rate for all persons as well as females are much lower than the already low state average for all persons and females. The literacy rate for rural areas in Rajasthan for all persons is 30.37 percent and for females it is 11.59 percent, whereas for the tribal blocks the average literacy rate for all persons is 22.40 percent and for females a still lower 9.16 percent. This explicitly shows the dearth of education process in tribal dominated areas and rather the entire rural area of Rajasthan as compared to other areas

11. Number of illiterates of the age group 7 and above in Rajasthan in 1981 was 6.89 million and of these 6.89 million forming 36.24% were in the age group 15-35. By 1991 number of illiterates of age group 7 and above increased to 21.59 million

Estimated number of illiterates of the age group 15-35 for Rajasthan for 1991 comes to about seven and a half million. Twelve total literacy projects (Table 11) covering 12 districts of the State were sanctioned till the end of October 1994. Three Districts, namely Ajmer, Dungarpur and Bharatpur are at post literacy stage and the other districts are at the literacy stage. Target population to be covered under these literacy projects is about 5 million, ranging from age group 7-40 in Ajmer, 9-35/9-40 in Bharatpur, Alwar, Dungarpur, Sikar, Pali, Rajasmand, Udaipur etc., to 15-35/15-40 in some other districts like Tonk and Barmer. Lot of effort is still needed to extend the total literacy campaign to the remaining districts of the State and to reach the target of literacy for all by 2000.

12. Total number of illiterates of the age-group 7 and above for each community development block, district and State of Rajasthan have been given in this book. Age-group data on literacy which is brought out by the Registrar General and Census Commissioner of India in the Social and Cultural Tables is likely to be available after some time. In the meantime, for the purpose of planning literacy programme, number of illiterates in different age-groups for 1991 can be estimated with reference to the State level ratios of 1981 Census which are given below :

AGE-GROUP	NO. OF ILLITERATES OF AGE-GROUP 7 AND ABOVE IN 1981 (in 000,s)	PERCENTAGE TO TOTAL ILL AGED 7 YEARS AND ABOVE
7-8 2 Years	1721	9.06
9-14 6 Years	3121	16.42
15-34 20 Years	6887	36.24
35-44 10 Years	2179	11.47
45 + All remaining Years	5094	26.81
Total	19002	100.00

District level ratios for broad age-groups for 1991 have also been worked out and are given in Annexure -VII. These can also be used to work out estimates of 1991 at District/Block levels.

13. Annexure -VIII presents a comparative picture of literacy for the age-group 7 and above for 1991 for all States and Union Territories of India except Jammu & Kashmir, where 1991 Census was not held. This data has been given for use as reference when we compare literacy situation of Rajasthan with other States of the country or even with the national level data. □

TABLE NO. 1

DISTRIBUTION OF LITERATES AND ILLITERATES AGED 7 YEARS AND ABOVE BY SEX AND AREA DURING 1981 AND 1991 - RAJASTHAN

(in 000's)

YEAR\AREAS	LITERATES			ILLITERATES		
	PERSONS	MALES	FEMALES	PERSONS	MALES	FEMALES
1981						
ALL AREAS	8186 (30.11)	6372 (44.77)	1814 (14.00)	19002 (69.89)	7862 (55.23)	11140 (86.00)
RURAL AREAS	4797 (22.47)	4102 (36.97)	695 (6.78)	16553 (77.53)	6992 (63.03)	9561 (93.22)
