

Department of Agriculture
Maharashtra State

Season and Crop Report of the
Bombay State

For the Year 1956-57

No. SCR/S-7723 of 1959.

Poona 1, 28th November 1959.

From

SHRI S. P. MOHITE, I.A.S.,
Director of Agriculture,
Bombay State.

To

THE SECRETARY TO GOVERNMENT,
AGRICULTURE AND FORESTS DEPARTMENT,
Old Secretariat, Bombay-1.

Sir,

I am to submit herewith the Annual Season and Crop Report of the Bombay State for the year ending 31st July 1957.

I give below very briefly my remarks on the general agricultural conditions.

1. The Monsoon rains were generally adequate, but were characterised by uneven distribution. The rains proved to be excessive in the early part of the season, necessitating re-sowing of certain crops and were also untimely at the grain formation stage, thus proving detrimental to their healthy development. Again the rains received towards the close of the season caused damage, to some extent, to, matured kharif crops and adversely affected the germination of rabi crops.

2. Crop pests and plant diseases were reported from all over the State; prompt remedial and preventive measures were taken in the affected areas.

3. The mileage of Government canals was 2,961 and that of private canals was 4,349.

The total irrigated area during the year under report was 4,089,500 acres showing an increase of 4.1 per cent. over the corresponding figure of 3,929,900 acres during 1955-56.

4. The increase in the area under food crops was noticed in all parts of the State, except the Saurashtra and Kutch division while there was an increase in the area under non-food crops in the Saurashtra and Kutch, the Gujarat and Konkan divisions only.

The area under food crops was 45,908,700 acres as against 45,753,300 acres in 1955-56, showing slight increase of 0.3 per cent. The area under non-food crops was 24,452,800 acres as against 23,771,600 acres in 1955-56, showing an increase of 2.9 per cent.

5. The average yield per acre of crops, at the State level, for which surveys were carried out, was higher than what it was in the preceding year except in the case of wheat, tur and gram for which the yields were lower.

6. In spite of increased production of certain crops at the State level, the prices ruled high during the year. There was slight increase in the wages of skilled and unskilled labour.

7. There was an increase in the number of cattle and buffaloes. The number of breeding bulls, however, went down by 37·0 per cent. The number of goats and sheep has increased. The number of horses, ponies and mules went down. The poultry showed an increase of 47·1 per cent.

8. The number of tractors, oil engines, electric pumps and ghanies showed an increase of 175·2, 55·0, 73·8 and 15·3 per cent., respectively. The number of sugarcane crushers declined by 12·9 per cent. (compared with 1951 census figures).

Yours faithfully,

S. P. MOHITE,
Director of Agriculture,
Bombay State.

SEASON AND CROP REPORT OF THE STATE OF BOMBAY FOR THE YEAR 1956-57

SEASON AND CROP REPORT OF THE STATE OF BOMBAY FOR THE YEAR 1956-57.

CHAPTER I—SEASON.

The agricultural season of 1956-57 was characterised by uneven distribution of rains which proved to be excessive in the early part of the season, necessitating resowing of certain kharif crops and also at the grain formation stage proving detrimental to the healthy development of crops in parts of the State. The rains towards close of the season damaged in many districts matured kharif crops affecting both quality and quantity of produce and of fodder to some extent. The rains also affected adversely the germination and even stand of rabi crops in parts of the State. Thus, both the kharif and the rabi seasons under report were unfavourable to certain crops in parts of the State, as compared with their performance in the preceding year, which itself was unfavourable. Scattered ante-monsoon showers facilitated preparatory tillage operations of kharif crops. The monsoon set in at the proper time and good showers were recorded in June all over the State. There were excessive showers in the last week of the month impeding sowing operations in parts of the Vidarbha, while it was inadequate in parts of East Khandesh and Sholapur districts in the Maharashtra, where sowing of kharif crops was delayed.

The rainfall in July was heavy in parts of the Saurashtra and Kutch where kharif sowings were completed by the end of the month, except for cotton which was required to be resown as the first sown crop was washed away due to continuous rains. The July showers also proved to be excessive in the Gujarat, on account of which sowing operations were hampered and the germination of crops was adversely affected to some extent. Resowing of bajri was done at places in the division. Rains were excessive in Thana district and light in Ratnagiri and Kolaba districts. Although, agricultural operations were held up in parts of Thana district transplanting of paddy was generally in progress during the month and standing crops throve well. In the Maharashtra generally the rainfall was adequate except in Ahmednagar, Poona and North Satara districts, where it proved to be excessive and consequently agricultural operations were hampered in these districts. Elsewhere in the division, sowing of kharif crops, transplanting of paddy and nagli and interculturing and weeding operations were in progress. It was excessive in parts of the Marathwada, where cotton, kharif jowar and mug crops were adversely affected. The rainfall in the Vidarbha was punctuated by favourable breaks which facilitated completion of kharif sowings, helped germination and accelerated further development of these crops.

The rains during August were continuous and had an adverse effect on the standing crops in parts of the Saurashtra. They were excessive in parts of the Gujarat where bajri, cotton and kharif jowar crops were damaged to some extent. Paddy and *bawto* crops were also adversely affected in parts of Kaira district, while resowing of cotton was done in parts of Baroda district. On account of heavy and continuous rain during the month in parts of the Konkan, the Maharashtra, the Marathwada and the Vidarbha divisions, field operations were impeded and growth of the standing crops was stunted. Due to floods, crops in the low lying areas on the river banks were damaged to some extent in parts of Thana, Kolaba and Kolhapur Districts.

In the second fortnight of September, and the first fortnight of October, the precipitation was heavy and continuous in parts of the Saurashtra and Kutch, the Gujarat, the Konkan and the Maharashtra and this proved harmful to the standing kharif crops and impeded sowing of rabi crops in parts of these divisions. On the other hand, favourable weather conditions prevailed in the Marathwada and the Vidarbha divisions, right through September to middle of October. However, there were heavy rains in both these divisions in the second fortnight of October which had an adverse effect on the standing kharif crops. It also affected germination of rabi crops at places. The rains in the first week of November aggravated the situation by causing further damage to the standing kharif crops in the Marathwada and the Vidarbha divisions. The rains in November also proved to be untimely and damaged standing crops to some extent in parts of the Maharashtra division. The situation, however, improved to some extent subsequently, due to prevalence of fair weather conditions. During November, rainfall was light elsewhere in the State. Interculturing operations in respect of cotton, harvesting and threshing operations of paddy and bajri, harvesting of groundnut and sowing of rabi crops were in progress in parts of the State.

In December, there was practically no rain in the State except in Banaskantha, Dangs and West Khandesh districts and in the Vidarbha division where there were sporadic showers accompanied by hailstorms, particularly in Wardha, Nagpur and Chanda districts causing damage to crops to a varying extent. During the month, harvesting of kharif crops, planting and crushing of sugarcane, picking of cotton and preparation of lands for the Rabi crops was in progress. In the second fortnight of January, rabi crops and long staple cotton were adversely affected to some extent by frost in parts of the Saurashtra. In the same month, there were hailstorms in parts of Nagpur district and caused damage to orange orchards and also to rabi crops. Elsewhere in the State, there were practically no rains during January and February, except hailstorms in parts of Buldana district, where rabi crops were damaged to some extent and stray showers in parts of the Gujarat in January and in Bhandara and Chanda districts in February. In March also, there were hailstorms in parts of Bhandara district where damage to a varying extent was caused to standing rabi crops and orchards. During the same month, there were thunderstorms in parts of Sholapur district. Harvesting of rabi crops, picking of cotton, crushing and planting of sugarcane, were in progress till the end of the month in parts of the State. Preparatory tillage for the succeeding kharif crops was generally in progress. The weather conditions experienced during the year were conducive to the development of insects, pests and plant diseases which caused damage to the crops. Control as well as preventive measures were advocated and taken in the affected areas. This saved the unsatisfactory situation to a large extent.

2. *Distribution of rainfall.*—Table I (Pages 42—51) compares the rainfall during the year under report with the normal rainfall at each district headquarter station in the State. The figures of normal rainfall for each station were obtained from the India Meteorological Department. The following observations are made from a study of this table:—

Pre-monsoon rains.—The pre-monsoon rains were above the normal at Amreli in the Saurashtra and Kutch, at Himatnagar (Sabarkantha), Godhra (Panch Mahals), Baroda, Broach and Surat in the Gujarat, at all the stations in the Konkan, the Maharashtra and the Marathwada and at Buldana, Akola, Amraoti, Yeotmal, Wardha and Nagpur in the Vidarbha. They were below the normal at Rajkot

(Madhya Saurashtra) and Bhavnagar (Gohilwad) in the Saurashtra and Kutch, at Ahmedabad in the Gujarat and at Bhandara and Chanda in the Vidarbha. At other district headquarters stations in the State, there were no pre-monsoon rains.

Monsoon rains.—The monsoon rains were above the normal at all the district headquarters stations except Bhavnagar (Gohilwad) in the Saurashtra and Kutch, at all the district headquarters stations in the Gujarat and in the Konkan, at all the district headquarters stations except Nasik and Sangli (South Satara) in the Maharashtra. Similarly, they were above the normal at all the district headquarters stations except Bhir in the Marathwada and at Amraoti, Wardha and Bhandara in the Vidarbha. These rains were, however, below the normal at all the other district headquarters stations in the State.

Post-monsoon rains.—The post-monsoon rains exceeded the normal at all the district headquarters stations in the State with the exception of Aurangabad in the Marathwada and Bhandara in the Vidarbha where they were below the normal.

Winter rains.—The winter rains exceeded the normal at Palanpur (Banaskantha) in the Gujarat, at Kolhapur in the Maharashtra, at Parbhani in the Marathwada and at all the district headquarters stations in the Vidarbha. They were below the normal at Jamnagar (Halar), Rajkot (Madhya Saurashtra) and Bhuj (Kutch) in the Saurashtra and Kutch, at Mehsana, Himatnagar (Sabarkantha), Ahmedabad and Baroda, at Dhulia (West Khandesh), Ahwa (Dangs), Nasik and Ahmednagar in the Maharashtra and at Aurangabad, Nanded, Bhir and Osmanabad in the Marathwada. At other district headquarters stations in the State, there were no winter rains.

Total rainfall for the season 1956-57.—Except for Nasik in the Maharashtra and Wardha in the Vidarbha where it was below the normal; the total rainfall for the season 1956-57 exceeded the normal at all the district headquarters stations in the State.

3. *Saurashtra and Kutch.*—Light pre-monsoon showers received in the division facilitated preparatory tillage for the kharif cultivation. In June, adequate and well distributed rainfall was received and the total precipitation was generally above the normal. Kharif sowings were completed by the end of July. Only cotton crop was required to be sown repeatedly due to damage caused to the seedlings by continuous rains in July and August. Standing kharif jowar and bajri crops were also affected to some extent by these rains. Rains in the last fortnight of September and early part of October proved harmful to the standing crops, pollens of bajri crop were washed away and sesamum and groundnut crops were also affected by these rains in parts of Kutch and Amreli districts. In November, except for a few showers in Madhya Saurashtra and Amreli districts there was practically no rain in the division. Preparatory tillage operations for rabi cultivation, interculturing of cotton, harvesting and threshing of paddy, bajri and harvesting of groundnut and sowing of rabi crops were in progress at places. Further, in the second fortnight of January, rabi crops were adversely affected to some extent due to frost as also long staple cotton at places in Amreli district. Harvesting of rabi crops and picking of cotton were in progress in parts of the division till the end of March. There was no rainfall in the months of February and March.

As regards crop pests and plant diseases, cotton crop was affected by aphids, leaf-rollers and boll-worms in parts of Zalawad, Gohilwad, Sorath and Kutch districts. Groundnut crop was affected by caterpillars in parts of Zalawad district. There

was severe attack of grasshoppers on wheat crop in Zalawad district and also of rust in many parts of the division. Remedial measures were resorted to in the affected areas. Rinderpest on cattle was reported in March from parts of Amreli district.

Gujarat.—Light pre-monsoon showers were received in large parts of the Gujarat. Fair to good rainfall was recorded in June and excessive rainfall in July. Preparatory tillage operations for and sowings of kharif crops were in progress. Due to heavy showers in July, sowing was hampered at places and standing crops were adversely affected in Banaskantha, Mehsana, Kaira and Baroda districts. There was resowing of bajri at places. There was excessive rainfall during the months of August and September in parts of the division. Consequently, bajri, cotton and jowar crops were damaged to some extent in Sabarkantha, Ahmedabad and Surat districts. Cotton had to be resown in some parts of Baroda district. Paddy and *Barto* crops were affected in Kaira district. In October, preparatory tillage operations for and sowings of rabi crops were in progress in parts of the division. Excessive rainfall was recorded in all parts of the division. Maize, Paddy and bajri crops were damaged to some extent in Sabarkantha district and standing crops were adversely affected in Kaira district. Rabi sowings were held up at places. There was practically no rainfall in November except for a few showers in parts of Broach and Surat districts. Preparatory tillage operations for rabi cultivation, interculturing of cotton, harvesting and threshing of paddy and bajri, harvesting of groundnut and sowing of rabi crops were in progress. Few showers were received in December in the districts of Mehsana, Panch Mahals, Baroda and Broach, while rainfall was absent throughout the division in January, 1957. Harvesting of rabi crops, picking of cotton, crushing and planting of sugarcane were in progress in parts of the division till the end of March, 1957. No rainfall was received in the months of February and March, 1957.

As regards crop pests and plant diseases, menace of locusts on jowar was reported from Mehsana district and Sanand taluka of Ahmedabad district. *Pyrrilla* on sugarcane was observed in Bardoli taluka of Surat district. Attacks of blue-beetle on bajri in Banaskantha, *Katra* trouble on paddy in Sabarkantha district and leaf-rollers, jassids, woolly-mites, boll-worms and black-arm on cotton were reported from different parts of the division. Grasshoppers on paddy were reported from Surat district. Powdery mildew and wilt on cumin were reported from Mehsana district. Rust on wheat was reported from all the districts in the division. Preventive and control measures were resorted to in the affected areas.

Konkan.—Substantial pre-monsoon showers were received in all parts of the division. The monsoon set in on time in June. During that month, fairly good rainfall was recorded throughout the division. Sowing of *nagli* and *varai* and transplanting of paddy commenced. Excessive rainfall was received in July in Thana district and it was substantial in Ratnagiri and Kolaba districts of the division. Agricultural operations were held up in Thana district. Transplanting of paddy was in progress. Condition of standing crops was reported to be satisfactory. Adequate rainfall was recorded in the division in August. Weeding and interculturing operations were in progress. Substantial rainfall was received in September all over the division. Harvesting of early paddy commenced while weeding and interculturing operations in respect of late paddy crop were in progress at places. Especially in the first fortnight of October, the rainfall was excessive in Kolaba and Ratnagiri districts. In Kolaba district, paddy crop was lodged due to continuous rains of October. Harvesting of paddy was generally in progress in the division. In November, the rainfall was light. Harvesting of paddy still continued and threshing had also commenced. Practically there were no rains in December 1956

and January 1957. Harvesting and threshing of late paddy and nagli crops were nearing completion. Sowing of waingan paddy (hot weather) was in progress in Ratnagiri district. No rains were received in the months of February and March 1957. Preparatory tillage operations for hot weather vegetable crops were in progress till the end of March and harvesting of waingan paddy commenced in the last week of March.

Grasshoppers on paddy seedlings were reported from Kolaba district and seedlings raised in some parts were damaged. Blue-beetle and bacterial blight on paddy were reported from all the districts in the division. Army-worms on paddy were observed in Sawantwadi taluka of Ratnagiri district. Koleroga on arecanut was reported from Ratnagiri district. Foot and mouth disease on cattle was reported from Poladpur, Sudhagad and Murud Mahals of Kolaba district. Control and preventive measures were taken in the affected areas.

Maharashtra.—There were scattered pre-monsoon showers in the division and these showers facilitated tillage operations of kharif crops. Water and fodder scarcity was experienced in Dangs district in the summer season. In June, there was good rainfall in East Khandesh district and light showers in all the other districts of the division. Preparatory tillage operations were in progress and sowing of kharif crops had commenced in a few places in the division. In July, excessive rainfall was received in the Dangs, Ahmednagar, Poona, Sholapur and North Satara districts, while in the remaining districts, it was adequate. Sowing of kharif crops and transplanting of paddy and nagli were in progress. Interculturing and weeding operations were also in progress at places. Agricultural operations were, however, hampered in Ahmednagar, Poona and North Satara districts due to excessive rains. In August, except in West Khandesh, East Khandesh and Sholapur districts the rains were excessive in all the districts of the division. Growth of groundnut crop was stunted due to heavy rains and crops on river banks were damaged to some extent by floods in Kolhapur district. Cotton and bajri crops were damaged to some extent in Ahmednagar and nagli in Dangs district. In September, Sholapur district recorded rainfall in excess of the normal. Weeding, interculturing and transplanting operations in respect of chillies and tobacco were in progress in parts of the division. Harvesting of pulses and early kharif crops commenced. The rainfall during October was excessive in Dangs, Ahmednagar, Sholapur and South Satara districts and it was sufficient in other districts of the division. There was lodging of paddy in Dangs district while agricultural operations were held up in Ahmednagar and Sholapur districts due to untimely rains. Bajri crop was also affected in North Satara district and tobacco crops was damaged to some extent in South Satara district. Preparatory tillage operations, sowing of rabi crops and harvesting of groundnut, bajri and potatoes were in progress. With the exception of East Khandesh and Nasik districts where the rainfall was light, other districts received excessive rainfall in November. These rains proved to be untimely and standing crops were damaged to some extent in Ahmednagar, Poona, Sholapur and North Satara districts. The situation, however, improved due to favourable break in rains and fair weather conditions that prevailed subsequently. Practically there were no rains except for a few showers in the first fortnight of December 1956 as also during the month of January 1957 in West Khandesh, East Khandesh, Dangs, Nasik and South Satara districts. Harvesting of kharif crops, planting and crushing of sugarcane, picking of cotton and preparation of lands for the next season were in progress. There were no rains in February in the division and harvesting of early rabi crops started. Barring

showers followed by thunder storms received in parts of Sholapur district in March, rainfall was absent elsewhere in the division. Standing crops thrived well. Harvesting of rabi jowar, wheat and gram and picking of cotton were nearing completion by the end of March. Preparatory tillage operations for the next season were in progress at places.

Attacks of stem-borers on nagli in Dangs district, Aphids on groundnut in East and West Khandesh districts and North Satara district, Grasshoppers on paddy in Nasik and Kolhapur districts and army-worms on paddy and bajri in Poona district were reported. Aphids on tobacco in Kolhapur district and ergot on bajri in parts of South Satara district were observed. Leaf-curl on chillies was reported from East and West Khandesh districts and Nasik district. Ring-rot and wilt on potatoes on large scale and attacks of blast on paddy were observed in parts of North Satara district. Cotton crop was affected by cater-pillars, black-arm, boll-worms, anthracnose, thrips, jassids and aphids in parts of the division. Sugarcane crop was affected by pyrilla in Nasik district and by top-shoot-borer and stem-borer in Sholapur district. Blister-beetle, semi-loopers and cater-pillars on bajri were reported from Ahmednagar district, while blister-beetle on paddy and bajri and wingless grass-hopper on millets were reported from Sholapur district. Sugary disease on jowar was reported from Nasik, Ahmednagar and Sholapur districts. Army-worms on wheat were reported from Dindori taluka of Nasik district. Wheat crop was affected by the attack of rust in parts of the division. *Furrah* attacks on cattle were reported from Nasik and North Satara districts. Remedial and preventive measures were taken in the affected areas.

Marathwada.—There were light and scattered ante-monsoon showers in parts of the division, facilitating preparatory tillage operations for kharif cultivation. Monsoon set in time giving a good start for germination of kharif crops. However, heavy rainfall received in July and August affected adversely cotton, kharif jowar and mung crops to some extent in parts of the division. This situation improved subsequently due to favourable weather conditions, which prevailed till the middle of October. There were, again, heavy rains in the second fortnight of October which caused damage to the standing kharif crops such as cotton, kharif jowar, groundnut and tur to a varying extent and both the quality and quantity of produce suffered. The rains in November further affected adversely the kharif crop which were ready for harvest in parts of the division. Rabi crops were also affected to some extent due to these heavy rains in parts of Osmanabad district. There were practically no rains from December to March. Rabi crops were sown in time and the germination was satisfactory, however, their stand and further development were not satisfactory due to unfavourable seasonal conditions and prevalence of pests and diseases.

Tur crop was affected by wilt and pod borer in parts of Parbhani and Nanded districts. Semi-loopers, cater-pillars and boll-worms on cotton crop were reported from parts of Aurangabad and semi-loopers on cotton were observed in parts of Parbhani and Nanded districts. Wheat crop was affected by rust in parts of the division. Rabi jowar was affected by sugary disease in parts of Aurangabad district. Control and preventive measures were taken in the affected areas.

Vidarbha.—Ante-monsoon showers were received in parts of the division and as such preparatory tillage operations for kharif cultivation were facilitated. The monsoon commenced in the second week of June and kharif sowings started in the third week. The heavy rains received in the last week retarded sowing

operations and adversely affected the germination to some extent in the areas already sown. The break in rains in July was favourable and facilitated completion of kharif sowings. Germination and stand of the crops were also satisfactory. Incessant rainfall during the months of August and September came in the way of interculturing operations thus adversely affecting the standing kharif crops. The rainfall in the third and fourth weeks of October was heavy in parts of the division. This affected the cotton crop adversely resulting in shedding of buds and immature bolls. Kharif jowar and groundnut crops were also adversely affected. The heavy rains in the first week of November aggravated the situation causing further damage to the standing kharif crops. The sowing of rabi crops commenced under favourable seasonal conditions, but the incessant rains in the last week of October and in the first week of November impeded agricultural operations and necessitated resowing in parts of the division. There were heavy showers accompanied by hailstorms during the last week of December 1956, in parts of Wardha and Chanda districts, in January, 1957 in parts of Nagpur district, in February in parts of Buldana district and in March in parts of Bhandara district which caused damage to rabi crops and orange orchards to a varying extent.

As regards incidence of pests and diseases, cotton was affected by boll-worms in parts of Akola district, by jassids, black-arm and boll-worms in parts of Amraoti district and leaf-rollers and boll-worms in parts of Nagpur district. Cotton mildew was reported from parts of Buldana district. Groundnut was affected by aphids in parts of Buldana and Amraoti districts. Root-rot on jowar in parts of Nagpur district was observed. Crops like gram, lakh and lakhori were attacked by caterpillars in parts of Bhandara district. Rust on wheat was reported from all parts of the division. Remedial and preventive measures were resorted to in the affected areas of the division.

CHAPTER II—AREA CULTIVATED AND UNCULTIVATED.

(Table II—Pages 52-59).

(Summary Table A—Page 29).

4. *Number of Villages.*—In 1956, the area of the Bombay State increased considerably due to the reorganisation of States. The reorganised State of Bombay comprises of 43 districts, of which 24 are the districts of the former Bombay State, 6 districts are from the old Saurashtra and Kutch States, 5 from the Ex-Hyderabad State and 8 from the old Madhya Pradesh State. During the year under review, the number of villages in the State was 58,000.

5. *Total area—Reporting and non-reporting areas.*—The total area i.e. the geographical area of the new Bombay State was almost stationary being 120,875,700 acres during the year under report as against 120,256,700 acres during the previous year, thus showing a small increase of 0.5 per cent. This increase in the geographical area was attributed to the more accurate information supplied in some of the districts from the added areas. Of the total area of the State, the reporting area was 109,620,500 acres and the non-reporting area i.e. the area for which no returns exist was 11,255,200 acres. In Dangs district, although the details for the total area of 423,000 acres are available, details for the reported area of 149,500 acres are not separately available.

6. *Cropped areas.*—The gross cropped area in the State showed a slight increase of 836,600 acres having risen from 69,524,900 acres in 1955-56 to 70,361,500 acres in 1956-57, or of 1·2 per cent. The net cropped area also showed an increase of 0·8 per cent., it being 67,225,100 acres during 1956-57 as against 66,695,700 acres during the previous year. The area under forests remained almost stationary, it being 15,486,200 acres during the year under report as against 15,464,400 acres during 1955-56. During the year under report, the acreage under Barren and unculturable land, Permanent pastures and other grazing land, and Current fallows showed an increase over the corresponding figures of the preceding year by 0·8, 5·3 and 2·3 per cent. respectively. On the other hand, the acreage under Land put to non-agricultural uses, Culturable waste, Land under miscellaneous tree crops and groves not included in area sown, recorded a decrease of 15·6, 0·8 and 0·9 per cent. respectively as compared with the corresponding figures of the previous year. The area under Other fallows, however, remained practically stationary, it being 4,158,700 acres during the year under report as against 4,162,200 acres during the preceding year, thus recording a slight decrease of 0·1 per cent.

CHAPTER III—IRRIGATED AREAS.

(Tables III-A and III-B—Pages 60-119).

(Summary Tables B and C—Pages 29-32).

7. *Sources of water supply.*—As the corresponding number of sources of water supply for 1955-56 for the State as a whole was not available, it was not possible to make a comparison of the corresponding numbers with that of 1956-57.

During the year under report the number of Government canals was 757. This apparent reduction in the number of Government canals is explained as due to wrong reporting of distributaries as canals and subsequent correction in its classification in North Satara, Nagpur, Bhandara and Chanda districts. The mileage of the canals was 2,961. The number of private canals was 7,546 and the mileage was 4,349. The number of Government and private tube wells reported was 352 and 473 respectively. The number of Government wells used for irrigation purposes only under masonry and non-masonry construction was 5,818 and 3,967 respectively, while that of private wells used for irrigation purposes only was 536,232 and 294,460 under masonry and non-masonry types respectively. The total number of wells (other than tube wells) in use for irrigation purposes only, thus works out to 840,477. The number of wells used for domestic purposes only and the number of wells not in use were 343,510 and 136,182 respectively. The number of wells having independent ayacuts and the number of wells supplementing recognised sources of irrigation was 255,498 and 33,453 respectively. The number of reservoirs was 1,436. The number of tanks with ayacuts 100 acres or more and the number of tanks with ayacuts less than 100 acres was 2,352 and 45,288 respectively. The number of oil engines was 50,034.

8. *Irrigated areas.*—The total irrigated area in the State during the year under report was 4,089,500 acres as against 3,929,900 acres during the year 1955-56, thus recording an increase of 4·1 per cent.

During the year under report, the percentage of net area irrigated to the net cropped area was 5·4 per cent. as against 5·2 per cent. during the previous year. The percentage of the total irrigated area to the gross cropped area was 5·8 per cent. during 1956-57 against 5·7 per cent. during the year 1955-56.

9. *Area irrigated under different sources of irrigation.*—The area irrigated by Government canals, private canals, tanks, wells and other sources went up by 6·3, 6·0, 18·6, 1·3 and 10·4 per cent. respectively, as compared with the corresponding figures of the previous year.

10. *Irrigated areas under food and non-food crops.*—The total area irrigated by all sources during the year 1956-57 was 4,089,500 acres as against 3,929,900 acres during the previous year, thus recording an increase of 4·1 per cent. The area irrigated under food crops was 3,444,000 acres as against 3,391,700 acres during the previous year, thus recording a slight increase of 1·5 per cent. The area irrigated under non-food crops which was 538,200 acres during the previous year, went up to 645,500 acres during the year 1956-57, thus recording an increase of 19·9 per cent.

CHAPTER IV—CROPPED AREAS.

(Tables IV-A, IV-B and IV-C—Pages 120-151).

(Summary Table D—Pages 32-35).

11. *Total area under crops.*—During the year under report, the gross cropped area of 70,361,500 acres showed a slight increase of 836,600 acres or by 1·2 per cent. over the corresponding area of 69,524,900 acres during the year 1955-56. Of the gross cropped area, 10,262,300 acres were in the Saurashtra and Kutch division, 13,666,100 acres in the Gujarat, 2,228,500 acres in the Konkan, 19,903,900 acres in the Maharashtra, 12,334,100 acres in the Marathwada and 11,966,600 acres in the Vidarbha division, the percentage increase in area in each division being 3·4, 1·4, 2·8, 0·4, 1·1 and 0·3 respectively. For the State as a whole, food crops occupied 45,908,700 acres or 65·2 per cent., while the non-food crops occupied 24,452,800 acres or 34·8 per cent. of the total area sown. The area under food and non-food crops during the year under report showed an increase of 0·3 and 2·9 per cent. or by 155,400 and 681,200 acres respectively, as compared with those in the previous year.

The table below gives the acreage under food and non-food crops in the six divisions of the State during the years 1955-56 and 1956-57 :—

(Figures in hundreds).

Division.	Food crops.			Non-food crops.		
	1955-56.	1956-57.	Percentage increase or decrease.	1955-56.	1956-57.	Percentage increase or decrease.
Saurashtra and Kutch	59,072	53,592	-9·3	40,219	49,031	+21·9
Gujarat	78,355	79,560	+1·5	56,366	57,101	+1·3
Konkan	16,157	16,207	+0·3	5,517	6,078	+10·2
Maharashtra	148,133	149,716	+1·1	50,092	49,323	-1·5
Marathwada	81,511	84,751	+4·0	40,535	38,590	-4·8
Vidarbha	74,305	75,261	+1·3	44,987	44,405	-1·3
State	457,533	459,087	+0·3	237,716	244,528	+2·9

It will be seen from the above table that under food crops there was an increase of 120,500 acres or 1·5 per cent. in the Gujarat, 5,000 acres or 0·3 per cent. in the Konkan, 158,300 acres or 1·1 per cent. in the Maharashtra, 324,000 acres or 4·0 per cent. in the Marathwada, 95,600 acres or 1·3 per cent. in the Vidarbha. In the Saurashtra and Kutch, however, there was a decrease of 548,000 acres or 9·3 per cent. On the contrary, the area under non-food crops showed an increase of 881,200 acres or 21·9 per cent. in the Saurashtra and Kutch. The increase was also noticed in the Konkan and the Gujarat divisions too being of the order of 10·2 and 1·3 per cent. or 56,100 and 73,500 acres respectively. In the divisions of Maharashtra, the Marathwada and the Vidarbha there was a decrease of 1·5, 4·8 and 1·3 per cent. respectively.

12. *Food crops.*—Among the main food crops as compared with the corresponding figures of the preceding year, the area under rice increased by 321,100 acres or 8·0 per cent. This increase was shared by all the divisions but mainly by the Gujarat and the Marathwada divisions where there was an increase in the acreage by 229,700 acres or 21·7 per cent. and 27,000 acres or 19·5 per cent. respectively. The area under wheat at the State level showed an increase of 79,300 acres or 2·2 per cent. The increase was recorded by the Gujarat and the Vidarbha divisions to the extent of 12·2 and 4·2 per cent. respectively. The remaining wheat growing divisions viz. the Saurashtra and Kutch, the Maharashtra and the Marathwada showed a decrease of 7·3, 1·5 and 2·7 per cent. respectively. During the year under report, the acreage under jowar (kharif and rabi) at the State level recorded a decline of 434,600 acres or 2·4 per cent. This was due to the fall in the acreage in the Saurashtra and Kutch and the Maharashtra divisions by 17·9 and 5·4 per cent. or by 408,300 acres and 359,100 acres respectively. The Gujarat, the Marathwada and the Vidarbha divisions recorded an increase of 38,100, 200,600 and 94,200 acres, or 2·4, 5·0 and 2·7 per cent. respectively. The area under bajri remained almost stationary showing a slight decrease of 89,100 acres or 1·0 per cent. The divisions of the Maharashtra and the Marathwada, however, showed an increase of 290,400 acres or 8·3 per cent. and 2,400 acres or 0·3 per cent. respectively. The remaining divisions, particularly the Gujarat and the Vidarbha showed a decrease of 15·3 and 6·7 per cent. or 295,000 and 5,000 acres respectively. The area under ragi showed a slight increase of 25,700 acres or 3·6 per cent. This increase was shared by the two divisions viz. the Gujarat and the Maharashtra and was of the order of 14·6 per cent. or 18,000 acres and 4·0 per cent. or 13,100 acres. The area under maize declined by 67,500 acres or by 12·1 per cent. The decline was shared by all the divisions except the Marathwada division where a slight increase of 400 acres or 3·4 per cent. was noticed. The decline in the area in the Gujarat was of the order of 62,400 acres or 12·9 per cent. The area under gram at the State level remained practically stationary with a slight decrease of 26,500 acres or 1·6 per cent. The Gujarat and the Maharashtra divisions recorded an increase of 70,900 acres, 37,900 acres or 25·7 and 8·6 per cent. respectively; while the Saurashtra and Kutch, the Marathwada and the Vidarbha showed a decline to the extent of 63,600, 51,200 and 20,800 acres or 36·2, 9·2, 9·4 per cent. respectively. The area under tur decreased slightly by 25,000 acres or by 1·6 per cent. Although the decrease to varying extent was noticed in all the divisions except the Konkan and the Maharashtra it was mainly shared by the Vidarbha division being of the order of 24,500 acres of 4·5 per cent. The area under sugarcane recorded an increase of 12·0 per cent. or 31,300 acres. This significant increase was shared mainly by the Gujarat, the Maharashtra and the Marathwada divisions by 46·4, 10·5 and 28·1 per cent. or 3,900, 20,100 and 7,400

acres respectively. The Saurashtra and Kutch division recorded a small decrease of 2.2 per cent. or 600 acres. The total area under kharif and rabi food crops for the State as a whole was 31,115,600 acres and 14,793,100 acres respectively.

13. *Non-food crops*.—In the case of cotton, there was a decrease of 321,700 acres or 2.8 per cent. The decrease was shared by the three divisions, viz. the Maharashtra, the Marathwada and the Vidarbha and was of the order of 147,600 acres, 238,800 acres and 144,500 acres, or 11.7, 11.0 and 4.0 per cent. respectively. The Saurashtra and Kutch and the Gujarat divisions, however, recorded an increase of 119,400 and 89,800 acres or 8.0 and 3.2 per cent. respectively. The area under groundnut, however, recorded an increase of 22.8 per cent. or 1,081,800 acres at the State level. This increase was shared by all the crop growing divisions except the Marathwada which recorded a slight decrease of 1,700 acres or 0.2 per cent. Significant increase in area to an extent of 833,100 acres was noticed in the Saurashtra and Kutch division. The total area under sesamum recorded a decline of 8.6 per cent. or 64,200 acres. This decrease was shared by the Saurashtra and Kutch, the Gujarat, the Maharashtra and the Marathwada where the area went down by 57,500, 35,400, 3,500 and 8,300 acres, or 17.8, 25.4, 4.4 and 10.1 per cent. respectively. The Vidarbha division, however, recorded a significant increase in area of 39,800 acres or 38.0 per cent. The area under tobacco went up by 3.7 per cent. or 9,500 acres. This increase was shared by all the divisions except the Vidarbha where the area declined by 3,000 acres or 42.9 per cent. For the State the total area under kharif and rabi non-food crops was 20,797,700 acres and 3,655,100 acres respectively.

14. On the whole, during the year under review, the gross cropped area showed a slight increase of 1.2 per cent. as compared with the corresponding figure of the previous year. The accompanying table gives the gross cropped area, double cropped area, net cropped area and the area under principal crops in the six divisions of the State during the years 1955-56 and 1956-57.

The remarks in respect of major crops are given below:—

Rice.—In the Saurashtra and Kutch, the crop was in a fair condition except that it suffered to some extent due to rains in the last fortnight of September and early part of October. In the Gujarat, the crop was affected due to excessive rains in July in some areas. Late rains had an adverse effect on the crop in Sabarkantha and Kaira districts. In the Konkan, the agricultural operations were held up due to excessive rains in July. Further, the crop was lodged due to heavy and continuous rains in August and October, in some areas of the division. In the Maharashtra, the condition of the crop was fair, except that it was lodged in Dangs district due to excessive rainfall in October. In the Marathwada and the Vidarbha, the crop fared well. Katra trouble was reported from Sabarkantha district, while grass hoppers on paddy were reported from parts of Surat district. Attacks of grass hoppers on paddy were reported from Kolaba district, while army worms were noticed in parts of Ratnagiri district. Blue beetle and bacterial blight were reported from all the districts in the division. Grasshoppers on paddy were reported from Nasik and Kolhapur districts while army worms were noticed in parts of Poona district. Blast on paddy crop was observed in North Satara district. Blister beetles were noticed in some areas of Sholapur district. The area increased from 4,021,500 acres during the previous year to 4,342,600 acres during the year under report or by 8·0 per cent, while the outturn went up from 1,439,200 tons in the preceding year to 1,578,400 tons in the year under report or by 9·7 per cent.

Wheat.—In the Gujarat and the Vidarbha, sowing of wheat crop was delayed due to rains in October. In the Marathwada, the crop suffered to some extent on account of rains in November and prevalence of other unfavourable weather conditions. The crop suffered in parts of the Vidarbha due to untimely rains received in January. Frost damaged the crop to a varying extent in parts of the Saurashtra and Kutch division. Severe attack by grass hoppers was reported from Zalawad district. Army worms were noticed in parts of Nasik district. Rust attack was reported from all the divisions in the State. The area under the crop slightly rose from 3,555,500 acres during the preceding year to 3,634,800 acres during the year under report or by 2.2 per cent. The outturn of the crop decreased from 735,100 tons during 1955-56 to 604,900 tons during the year under report or by 17.7 per cent. The reduction in the yield per acre was due to unfavourable season and rust attack.

Kharif Jowar.—The sowing was hampered in parts of the Saurashtra and Kutch and the Gujarat divisions due to continuous rains in July. The rainfall received in September and October proved to be somewhat harmful to the standing crop in parts of the Saurashtra and Kutch. In the Gujarat, heavy rainfall received in August and September damaged the crop in parts of Sabarkantha, Ahmedabad and Surat districts. In the Maharashtra, the condition of the crop was fairly satisfactory. In the Marathwada, the crop yield suffered in quantity as well as quality on account of unseasonal rainfall in the latter part of October. In Osmanabad, rainfall received in November adversely affected the crop which was ready for harvest. In the Vidarbha, the crop suffered to a varying extent due to rains received in October and November. Menace of locust infestation was reported from parts of Mehsana and Ahmedabad districts. The area and outturn of the crop were 9,372,500 acres and 2,169,300 tons, respectively.

Rabi Jowar.—In the Gujarat, the sowing of the crop was held up due to continuous rains received in October. In the Marathwada, the crop suffered to some extent on account of rainfall received in November. Further, the crop development was not satisfactory due to prevalence of unfavourable weather conditions in the division. Elsewhere in the State, the conditions of the crop was fair. In the Saurashtra and Kutch, the crop was affected to some extent by frost in January. Sugary disease was noticed on the crop in parts of Nasik, Ahmednagar, Sholapur and Aurangabad districts. The area and outturn of the crop were 8,262,800 acres and 1,235,400 tons respectively during the year under report.

Bajri.—In the divisions of the Saurashtra and Kutch and the Gujarat, the sowing of the crop was hampered due to rains in July. The resowing of the crop was resorted to in some areas of these divisions. The crop was adversely affected in some areas of the Saurashtra and Kutch due to rains received in the last fortnight of September and October. The pollen of bajri was washed away. The rainfall received in August and September proved to be somewhat harmful to the crop in parts of Sabarkantha, Ahmedabad and Surat districts. Further, the untimely rains in October adversely affected the crop in parts of Sabarkantha and Kaira districts. In the Maharashtra, the conditions of the crop was fair except that it was adversely affected in parts of Ahmednagar and North Satara districts, due to rains received in August and October, respectively. Blue beetle was noticed on the crop in the parts of Banaskantha district. Blister beetle, semi-loopers and caterpillars were reported from Ahmednagar district, while blister beetle was reported from Sholapur district. Attacks of army worms were reported from Poona district. Ergot disease was noticed on the crop in parts of South-Satara District. The area under the crop

increased slightly from 8,791,600 acres during the preceding year to 8,702,500 acres during the year under report or by 1·0 per cent. The outturn went up slightly from 826,100 tons during the preceding year to 841,200 tons during the year under report or by 1·8 per cent.

Maize.—In the Gujarat, the crop suffered heavily due to continuous rains, during the growing period. The crop had to be resown in parts of Panchmahals district. The crop suffered in some areas of the Maharashtra and the Vidarbha divisions due to excessive moisture in the soil. Katra trouble was reported from parts of Panchmahals in the early stage of the crop. Slight attack of army worms was reported from Kolhapur district. Also damage was caused to the crop by birds. The area under the crop considerably decreased from 557,900 acres during the preceding year to 490,400 acres during the year under report or by 12·1 per cent, while the outturn went down from 186,300 tons during the previous year to 93,400 tons during the year under report or by 49·9 per cent. The abnormal decrease in outturn was partly due to reduction in area and mainly due to the unfavourable season.

Ragi.—Due to excessive rainfall, the crop suffered in Kaira and Ratnagiri districts. The rains in August affected the crop in Dangs district. Attack of stem borer was noticed in parts of Dangs district. The area and outturn of the crop during the year under report viz. 743,900 acres and 228,900 tons were above the corresponding figures of the previous year of 718,200 acres and 209,700 tons or by 3·6 and 9·2 per cent respectively.

Gram.—In the Gujarat, the crop progressed well although the sowing of the crop was held up in parts due to rains in October. The rainfall in November adversely affected the crop in parts of the Marathwada division. In the Vidarbha, the rains received in October and November impeded the sowings. The crop was attacked by the caterpillars in parts of Bhandara district. The area and outturn of the crop which were 1,672,200 acres and 243,100 tons in 1955-56 went down to 1,645,700 acres and 228,900 tons or by 1·6 and 5·8 per cent. respectively, during the year under report.

Cotton.—In the Saurashtra and Kutch, the crop was required to be resown due to damage caused to the seedlings by continuous rains in July and August. In the Gujarat, the sowing was hampered at places due to heavy showers in July. The crop was considerably affected by excessive rains in August and September in Sabarkantha, Ahmedabad and Surat districts. Crop was resown in Baroda district. In the Maharashtra, the crop progressed fairly well except in parts of Ahmednagar district where rainfall was excessive in August. In the Marathwada, though the rainfall was heavy in July and August, the situation improved subsequently due to favourable weather conditions which prevailed till the middle of October. The crop was affected by frost particularly the long staple cotton in Amreli district it was attacked by aphids, leaf-rollers and boll worms in parts of Zalawad, Gohilwad, Sorath and Kutch districts. Heavy infestation by leaf-rollers, jassids, wolly mites, boll-worms and blackarm was reported from parts of the Gujarat division. The crop was affected by caterpillars, blackarm, boll-worms, anthracnose, thrips, jassids and aphids in parts of the Maharashtra division. Semi-loopers, caterpillars and boll-worms were reported from parts of Aurangabad and semi-loopers were observed in parts of Parbhani and Nanded districts. The crop was attacked by boll-worms in parts of Akola district, by jassids, blackarm and boll-worms in parts of Amraoti district and by leaf-rollers and boll-worms in parts of Nagpur district. Cotton mildew

was reported from parts of Buldana district. The area which was 11,012,000 acres in 1956-57 was below the corresponding figure of 11,333,700 acres during or by 2.8 per cent. during 1955-56, while the outturn went up from 1,920,300 bales in 1955-56 to 2,299,700 bales during the year under report or 19.8 per cent.

16. *Yield per acre.*—During the year under review, Statewise crop estimation surveys were continued on the ten principal crops, viz. paddy, kharif jowar, bajri, wheat, rabi jowar, gram, cotton, tobacco, maize and groundnut, while the survey on ragi was continued in Ratnagiri and Dangs districts and on tur in the districts of the Vidarbha division.

17. *Kharif crops.*—The State as well as the divisionswise average yields per acre of kharif crops based on crop estimation surveys except for bajri in respect of the Vidarbha divisions are given below :—

Division.	Yield per acre.								
	Rice.			Kharif jowar.			Bajri.		
	1955-56	1956-57	Percentage increase or decrease.	1955-56	1956-57	Percentage increase or decrease.	1955-56	1956-57	Percentage increase or decrease.
	lb.	lb.		lb.	lb.		lb.	lb.	
Saurashtra Kutch.	610	733	+20.2	NA	182	..	129	262	+103.1
Gujarat ..	525	639	+21.7	242	285	+17.8	280	153	-45.4
Konkan ..	1,120	1,030	-8.0	640	640
Maharashtra ..	787	811	+3.0	645	770	+19.4	234	222	-5.1
Marathwada ..	412	434	+5.3	NA	565	..	192	159	-17.2
Vidarbha ..	835	878	+5.1	NA	686	..	303	431	+42.2
State ..	802	814	+1.5	NA	518	..	210	217	+2.8

N. B.—Figures of average yield per acre of kharif jowar for the Saurashtra and Kutch, Marathwada and Vidarbha divisions and for the State for the year 1955-56 are not available.

From the above table, it is seen that for rice, the average yield at the State level, recorded an increase of 1.5 per cent. going up from 802 lb in 1955-56 to 814 lb. during the year under report. There was a large increase in average yield in the Saurashtra and the Gujarat and slight increase in the remaining divisions, except the Konkan where the average yield showed a decrease of 8.0 per cent. The State average yield per acre of kharif jowar during 1956-57 was estimated at 518 lb. and varied from 182 lb. in the Saurashtra and Kutch to 770 lb. in the Maharashtra. In the case of bajri, the State average recorded an increase of 2.8 per cent. it being 217 lb. during 1956-57 as against 210 lb. during the previous year. This increase was shared by the Saurashtra and Kutch and the Vidarbha divisions where it was of the order of 103.1 and 42.2 per cent. respectively, the average yield going up from 129 lb. and 303 lb. in 1955-56 to 262 lb. and 431 lb. respectively in 1956-57. The average yield for the Gujarat, the Maharashtra and the Marathwada declined by 45.4, 5.1 and 17.2 per cent. or from 280 lb., 234 lb. and 192 lb. during 1955-56 to 153 lb., 222 lb. and 159 lb. respectively during the year under report.

The average yields per acre of tur and sesamum (based on anna-valuation figures of the Revenue Department except for tur in respect of Vidarbha division for the different divisions of the State are as shown below :—

Division.	Yield per acre.					
	Tur.			Sesamum.		
	1955-56	1956-57	Percent- age in- crease or decrease.	1955-56	1956-57	Percent- age in- crease or decrease.
	lb.	lb.		lb.	lb.	
Saurashtra and Kutch	106	111	+4.7
Gujarat	..	457	429	246	221	-10.2
Konkan	..	272	272	219	199	-9.1
Maharashtra	..	520	558	232	268	+15.5
Marathwada	..	246	340	139	178	+28.1
Vidarbha	..	1,119	850	229	197	-14.0
State	..	623	563	169	173	+2.4

For tur, the average yield per acre recorded a decline of 9.6 per cent going down from 623 lb. in 1955-56 to 563 lb. during the year under report. The decrease was shared by the Gujarat and the Vidarbha where the average yield went down by 6.1 and 24.0 per cent respectively, or from 457 lb. and 1119 lb. in 1955-56 to 429 lb. and 850 lb. during the year under report. The Maharashtra and the Marathwada, however, recorded an increase from 520 lb. and 246 lb. in 1955-56 to 558 and 340 lb. during the year under report or by 7.3 and 38.2 per cent. respectively. In the case of sesamum, the average yield at the State level, showed a slight increase of 2.4 per cent. In the Saurashtra and Kutch, the Maharashtra and the Marathwada, the average yield per acre went up by 4.7, 15.5 and 28.1 per cent respectively, while it went down by 10.2, 9.1 and 14.0 per acre in the Gujarat, the Konkan and the Vidarbha divisions respectively.

18. *Rabi crops*.—The State and the divisionwise average yield per acre of the rabi crops (based on crop estimation surveys) are as under :—

Divisions.	Yield per acre.					
	Wheat.			Rabi Jowar.		
	1955-56	1956-57	Percent- age in- crease or decrease.	1955-56	1956-57	Percent- age in- crease or decrease.

Maharashtra	..	394	287	280	300	+7.1
Marathwada	..	345	267	NA*	402	..
Vidarbha	..	403	370	NA*	322	..
State	..	463	373	NA*	335	..

*N.B.—Separate details in respect of Rabi Jowar are not available.

From the above table, it is seen that for 1956-57, the State average yield per acre of wheat went down by 19.4 per cent or from 463 lb. in 1955-56 to 373 lb. during 1956-57. This decrease was noticed in all the divisions and more particularly in the Gujarat the Maharashtra and the Marathwada divisions. The State average yield of rabi jowar during 1956-57 was estimated at 335 lb. per acre and ranged between 300 lb. and 429 lb. in the different divisions.

The average yield per acre of rabi crops viz. gram (based partly on crop estimation surveys and partly on anna-valuation figures of the Revenue Department), linseed, rape and mustard (based on the anna-valuation figures of the Revenue Department) for the six divisions of the State are given below :—

Division.	Yield per acre.					
	Gram.			Rape, mustard and linseed.		
	1955-56.	1956-57.	Percentage increase or decrease.	1955-56.	1956-57.	Percentage increase or decrease.
	lb.	lb.		lb.	lb.	
Saurashtra and Kutch ..	162	263	+62.3	90	230	+155.6
Gujarat ..	396	364	-8.1	208	413	+98.6
Konkan ..	303	280	-7.6
Maharashtra ..	326	309	-5.2	181	235	+40.9
Marathwada ..	346	285	-17.6	186	187	+0.5
Vidarbha ..	318	335	+5.3	174	188	+8.0
State ..	326	312	-4.3	183	230	+25.7

For gram, the average yield for the State went down from 326 lb. to 312 lb. or by 4.3 per cent. This decrease was shared by the Gujarat, the Konkan, the Maharashtra and the Marathwada, where the average yield went down by 8.1, 7.6, 5.2 and 17.6 per cent respectively. The Saurashtra and Kutch and the Vidarbha, however, showed an increase of 62.3 and 5.3 per cent, respectively. The average yield per acre at the State level of rape, mustard and linseed went up by 25.7 per cent, or from 183 lb. during 1955-56 to 230 lb. during the year under report.

As separate details for kharif and rabi jowar are not available for certain divisions for the year 1955-56, the State and divisionwise average yields per acre of jowar (kharif and rabi combined) are as under :—

Division.	Yield per acre.			
	Total Jowar (Kharif and Rabi).			
	1955-56.	1956-57.	percentage increase or decrease.	
	lb.	lb.		
Saurashtra and Kutch ..	87	186	+113.8	
Gujarat ..	280	316	+12.9	
Konkan ..	640	640	
Maharashtra ..	345	389	+12.8	
Marathwada ..	325	478	+47.1	
Vidarbha ..	438	635	+45.0	
State ..	321	432	+34.6	

For jowar, the average yield per acre went up from 321 lb. during the preceding year to 432 lb. during the year under report or by 34·6 per cent. The increase was noticed in all the divisions but particularly in the Saurashtra and Kutch, the Marathwada and the Vidarbha divisions, where it went up by 113·8, 47·1 and 45·0 per cent. respectively or from 87 lb., 325 lb. and 438 lb. in 1955-56 to 186 lb., 478 lb. and 635 lb. during the year under report.

19. *Cotton, sugarcane and tobacco*—The table below gives the average yield per acre of cotton (based partly on crop estimation surveys and partly on anna-valuation of the Revenue Department), sugarcane (based on anna-valuation of the Revenue Department) and tobacco (based partly on crop estimation surveys in the major crop growing districts and elsewhere on anna-valuation figures of the Revenue Department)—

Division.	Yield per acre.								
	Cotton.			Sugarcane.			Tobacco.		
	1955-56.	1956-57.	Percentage increase or decrease.	1955-56.	1956-57.	Percentage increase or decrease.	1955-56.	1956-57.	Percentage increase or decrease.
	lb. (Lint.)	lb. (Lint.)		lb. (Gul.)	lb. (Gul.)		lb. (Dryleaf).	lb. (Dryleaf).	
Saurashtra and Kutch.	72	111	+54·2	4,675	4,880	+4·4
Gujarat	122	81	-33·6	4,533	4,662	+2·8	599	641	+7·0
Konkan	2,613	2,240	-14·3
Maharashtra	49	98	+100·0	7,036	7,498	+6·6	349	409	+17·2
Marathwada	37	47	+27·0	5,068	3,809	-24·8	448	560	+25·0
Vidarbha	44	83	+88·6	2,926	2,775	-5·2	416	448	+7·7
State	71	82	+15·5	6,386	6,594	+3·3	533	576	+8·1

The average yield per acre of cotton (lint) for the State was 82 lb. as against 71 lb. during the previous year, thus showing a rise of 15·5 per cent. The average yield went up in the Saurashtra and Kutch, the Maharashtra, the Marathwada and the Vidarbha, by 54·2, 100·0, 27·0 and 88·6 per cent. respectively. The Gujarat, however, showed a decrease of 33·6 per cent. or from 122 lb. in the preceding year to 81 lb. during the year under report. The State yield per acre of sugarcane was 6594 lb. (gul) as against 6386 lb. (gul), thus recording a slight increase of 3·3 per cent. The average yield of tobacco (dry leaf) also went up by 8·1 per cent. it being 576 lb. in 1956-57 as against 533 lb. during the previous year. This increase was shared by all the divisions in the State.

20. *Cotton*—During the year under report, the total area and outturn of cotton were 11,012 thousand acres and 2,300 thousand bales as against 11,334 thousand acres and 1,920 thousand bales during the preceding year. Thus, there was decrease of 2·8 per cent. in the area while an increase of 19·8 per cent. in outturn.

The table below gives the total area and outturn of cotton according to different divisions in the State during 1955-56 and 1956-57.

Area and outturn figures in thousands.							
Division.	Area in Acres.			Outturn in bales of 392 lb. each.			
	1955-56.	1956-57.	Percentage increase or decrease.	1955-56.	1956-57.	Percentage increase or decrease.	
Saurashtra and Kutch ..	1,487	1,607	+8.0	274	457	+66.8	
Gujarat ..	2,840	2,930	+3.2	882	606	-31.3

CHAPTER VI—PRICES.

(Table VI—Pages 33—345).

(Summary Table F—Page 38).

21. Table VI of the report gives the average prices, during the harvest period, of the principal crops in different districts. The prices of agricultural produce ruled higher during the year under report in comparison with those of the preceding year.

22. The major variations, in the average harvest prices of principal commodities at the State level and in different divisions as compared with the prices during the corresponding period of the previous year, are summarised below—

At the State level, the prices of rice (paddy) viz. Rs. 13.20 per maund of 82-2/7 lb. was higher by 10.9 per cent. than that of the previous year. The price went up by 16.3, 4.1, 18.6, 17.0 and 51.9 per cent. in the Saurashtra and Kutch, the Gujarat, the Konkan, the Maharashtra and the Marathwada respectively, while it declined by 4.4 per cent. in the Vidarbha. The price of wheat viz. Rs. 18.44 per maund was higher by 12.2 per cent. than that of the preceding year at the State level. In the Saurashtra and Kutch, the Gujarat, the Maharashtra, the Marathwada and the Vidarbha it rose by 11.8, 15.4, 20.8, 2.9 and 3.3 per cent. respectively. The price of Rs. 13.36 per maund of jowar at the State level, was higher by 31.6 per cent. when compared with that of the previous year. The upward trend was noticed in all the divisions and was of the order of 10.3, 32.3, 37.7, 59.5 and 35.9 per cent. in the Saurashtra and Kutch, the Gujarat, the Maharashtra, the Marathwada and the Vidarbha respectively. At the State level, the average price of Rs. 16.12 per maund of bajri was higher by 42.5 per cent. when compared with that of the previous year. The increase was shared by almost all the divisions and was of the order of 19.2, 32.2, 45.6 and

27.7 per cent. in the Saurashtra and Kutch, the Gujarat, the Maharashtra and the Vidarbha respectively. The average price of Rs. 10.96 per maund of barley for the State, ruled higher by 7.8 per cent. as compared with that of the previous year. The price was higher by 10.4 per cent. in the Gujarat, while it remained practically the same in the Saurashtra and Kutch. The average price of Rs. 12.77 per maund at the State level for ragi (nachni) was higher than that of the previous year by 19.4 per cent. The increase was of the order of 17.3, 19.9 and 15.0 per cent. in the Gujarat, the Konkan and the Maharashtra respectively. The average price of maize viz. Rs. 13.94 per maund was higher by 52.7 per cent. at the State level and the increase was of the order of 19.6, 57.4, 11.7 and 8.5 per cent. in the Saurashtra and Kutch, the Gujarat, the Maharashtra and the Marathwada while it remained constant in the Vidarbha. The price of kodra at Rs. 7.52 per maund was higher by 23.3 per cent. at the State level. The increase of 7.2 per cent. was noticed in the Gujarat. Among pulses, the average price of Rs. 17.44 per maund of tur dal at the State level was higher by 10.9 per cent. The increase was of the order of 37.8, 30.7, 18.3 and 6.0 per cent. in the Gujarat, the Maharashtra, the Marathwada and the Vidarbha respectively. The price of gram viz., Rs. 13.59 per maund was higher by 20.9 per cent. The increase was of the order of 10.2, 4.2, 3.8, 50.4, 11.2 and 4.6 per cent. in the Saurashtra and Kutch, the Gujarat, the Konkan, the Maharashtra, the Marathwada and the Vidarbha respectively. The average price of gul viz., Rs. 13.80 per maund was higher by 5.7 per cent. than that of the previous year. The increase was of the order of 4.4, 5.1, 3.2 and 16.8 per cent. in the Saurashtra and Kutch, the Gujarat, the Maharashtra and the Vidarbha respectively. The average price of groundnut at the State level viz., Rs. 16.28 per maund was higher by 18.8 per cent. than that of the previous year. It was higher by 6.0, 3.7, 31.7, 17.2 and 4.7 per cent. in the Saurashtra and Kutch, the Gujarat, the Maharashtra, the Marathwada and the Vidarbha respectively. The price of Rs. 38.19 per maund of tobacco was higher by 27.7 per cent. at the State level when compared with that of the previous year. The price increased by 38.0 and 10.1 per cent. in the Gujarat and the Maharashtra respectively. The average price of cotton (kapas) of Rs. 30.91 per maund was lower by 9.1 per cent. at the State level when compared with that of the preceding year. The decline in price was noticed in all the divisions except the Marathwada (where it rose by 11.1 per cent.) and was of the order of 1.6, 5.4, 4.2 and 8.9 per cent. in the Saurashtra and Kutch, the Gujarat, the Maharashtra and the Vidarbha respectively.

23. The table below compares the prices of Vijay and Jarila/Virnar cotton ruling at Bombay during the year under review with those of the preceding year and the average of the five years ending 1954-55 :—

Variety of Cotton.	Prices per Khandi of 784 lb.			Variation.	
	Average of the five years ending 1955.	1956.	1957.	Compared with the average price.	Compared with the price of 1956.
	Rs.	Rs.	Rs.	Per cent.	Per cent.
Vijay	931	945	969	+4.1	2.5
Jarila/Virnar	829	820	820	+1.1

In September 1956, all cotton growing areas received welcome showers of rain which brightened the prospects of the crop. Encouraging new crop prospects and upward revision of excise duty on cloth bearishly affected the market, but reports of deterioration in Suez canal situation and reports that textile mills would be encouraged to expand production by working a third shift and consequent increase in consumption of cotton, firmed up the prices which ruled, at the highest in September. During October 1956, dull condition prevailed in the cloth market, the mill purchases of cotton were on a moderate scale and expectation of a bumper crop brought down the prices. However, the downward trend of prices was checked due to tense situation in the Suez canal area. During November 1956, inclement weather reports and expectations of a new export quota kept the market somewhat up, but Government decision not to announce export quota for cotton, unnerved the market and the prices drifted lower. During December 1956, poor off-take, uninspiring cloth market reports, rumours of new tax proposals and tight money position coupled with absence of a decisive trend resulted in the decline in prices and the same ruled at the lowest. Cold spells during January 1957, in the Saurashtra and the North Gujarat retarded development of the crop. The fears of scarcity of tenderable cotton and active demand from spinners in view of better off-take in cloth coupled with short covering and trade support, the prices of cotton rose. Apart from the severe cold wave early in February, which damaged the crop in parts of the Gujarat, the development of late crop was sub-normal. Futures as well as spot market displayed a firm trend mainly due to reduced crop estimates, higher mill consumption proximity of the delivery period and scarcity of tenderable cotton coupled with an announcement of a fresh export quota. During March, lower crop estimates, scarcity of tenderable cotton against the maturity contract and increased cloth output coupled with limited stock of raw cotton with mills, pushed up the prices in the futures and also in the spot. During April 1957, due to the lack of tenderable cotton and uptrend in mill consumption coupled with good off-take in cloth, the prices ruled very firm and displayed an upward trend in the subsequent months as will be evinced from the trend of prices recorded in the sub-joined table, wherein the prices of Jarilla/Vinnar fine and Vijay fine ruling at Bombay have been given for those months for which prices were available.

(Prices per khandi of 784 lb.)

CHAPTER VII—AGRICULTURAL WAGES.

(Table VII—Pages 346–369).

(Summary Table G—Page 39)

24. In this State, according to the *Manual of Revenue Accounts*, agricultural labour is classified under three categories *viz* (a) skilled, (b) Ordinary, and (c) field labour. Skilled labour comprises of carpenters, black-smiths and cobblers, ordinary labour consists of load carrying coolies, well-diggers, mason's or carpenter's assistants, earth workers, etc. while field labour comprises of plough-men, sowers, reapers, harvesters, weeders and transplanters, etc. In the report (in Table VII agricultural wages) in addition to the above three categories, one more category is added *viz.* herdsmen, whose main work is to collect livestock from different owners and to feed them in the jungle during the day and to bring them back in the evening to the owner's places.

25. Table VII of the report gives districtwise figures of wages of different classes of agricultural labour. Perusal of Summary Table G shows that during the year 1956–57, the wages of carpenters showed a slight rise from Rs. 3·31 during the preceding year to Rs. 3·45 during the year under report, that of black-smiths from Rs. 3·14 to Rs. 3·23, of cobblers from Rs. 2·49 to Rs. 2·74, of field labourers from Rs. 1·36 to Rs. 1·41, of other agricultural labourers from Rs. 1·21 to Rs. 1·27 and of herdsmen from Rs. 1·01 to Rs. 1·09.

CHAPTER VIII—AGRICULTURAL STOCK.

(Table VIII—Pages 370–379)

(Summary Table H—Page 40–41)

26. Table VIII of this report gives the details of livestock, poultry and agricultural machinery and implements as per quinquennial census of livestock conducted in April 1956 by the Director, Bureau of Economics and Statistics. The comments on the variation in the livestock numbers during the two quinquennia are based on the note sent by the Director Bureau of Economics and Statistics. Summary Table H gives the total number of livestock, poultry, agricultural machinery and implements, under each main head.

Cattle.—There is a slight increase in the number of cattle from 18,954,675 to 20,211,190 or by 6·6 per cent over that of the preceding quinquennial census of livestock taken in May 1951. The number of breeding bulls over three years went down by 37·0 per cent. This decline was due to the general tendency to utilise the bulls kept for breeding purposes, for other work also. It is, therefore, likely that a substantial number of the breeding bulls might have been enumerated as “working bulls” and consequently included in that category. On the other hand, the number of ‘other males over three years’ recorded a slight increase of 7·5 per cent. The number of breeding cows over three years recorded an increase by 3·4 per cent, while the number of other cows over three years went down by 50·9 per cent. It will be seen from the foot note given below Table VIII that the number of breeding cows in columns 5 and 11 relates to the cows in milk, dry cows and also cows not calved. The number of youngstock showed an increase of 16·3 per cent. over that of 1950–51.

Buffaloes.—The total number of buffaloes increased from 5,146,389 to 5,327,709 or by 3·5 per cent. over that of 1950–51. The number of breeding bulls over three years as also the number of other males over three years declined by 9·2 and 9·4 per cent.

respectively. The number of breeding cows over three years recorded a decrease of 3.0 per cent, while the number of 'other cows over three years' increased by 27.2 per cent. The number of young stock, recorded an increase of 16.3 per cent. There had been reports that the people engaged in milk trade resorted to killing the young stock, as the rearing of the calves proved uneconomic. Government have, therefore, taken steps by instituting calf rearing units. As a result, the survival rate of the young stock has considerably increased as evinced at the time of the 1956 census, which speaks for the increase noticed.

Sheep and Goats.—The number of sheep increased by 1.8 per cent, and that of goats by 17.8 per cent, as compared with the corresponding numbers of the year 1950-51.

Horses and Ponies.—The total number of horses and ponies remained practically the same as that of the year 1950-51.

The number of mules went down by 68.7 per cent, and that of donkeys, camels and pigs showed a rise of 1.2, 15.7 and 27.4 per cent, respectively.

The total number of livestock recorded an increase of 7.7 per cent, over that of the year 1950-51.

Poultry.—The total number of poultry showed an increase of 47.1 per cent. The increase in the number of poultry is principally due to the mass vaccination programme launched by the Veterinary Department.

Agricultural Machinery and Implements.—The number of tractors, electric pumps, oil engines, ploughs, carts and ghannies showed an increase of 175.2, 73.8, 55.0, 19.8, 5.2 and 10.2 per cent respectively, while that of sugarcane crushers declined by 4.2 per cent, when compared with the corresponding figures of the 1951 census.

CHAPTER IX—AGRICULTURAL OUTLOOK.

27. As mentioned in Chapter I of the report, the agricultural season of 1956-57 was on the whole disappointing in parts of the state. The season was characterised by uneven distribution of rains proving excessive at various stages and causing damage to crops to a varying extent. This resulted in a serious set back to the healthy development of crops like wheat, maize, gram, tur, etc. and caused lowering of the outturn of these crops.

28. The table below compares for the years 1955-56 and 1956-57 the actual acreage sown and the outturn of food grain crops in the State and its different divisions.

(Figures in thousands.)

Division.	Area in acres.		Outturn in tons.	
	1955-56.	1956-57.	1955-56.	1956-57.
Saurashtra and Kutch	5,809	5,237	420	621
Gujarat	7,623	7,745	1,374	1,331
Konkan	1,567	1,576	625	591
Maharashtra	14,302	14,411	2,227	2,288
Marathwada	7,932	8,219	1,037	1,335
Vidarbha	7,240	7,331	1,654	1,953
State	44,473	44,519	7,337	8,119

29. It will be seen from the above table that the area under food grain crops has slightly gone up from 44,473 thousand acres during the year 1955-56 to 44,519 thousand acres during the year under report. This increase has been shared by all

the divisions in the State except the Saurashtra and Kutch where it has declined from 5,809 thousand acres during the preceding year to 5,237 thousand acres during the year under report. The outturn of the food grain crops at the State level shows an increase from 7,337 thousand tons during the preceding year to 8,119 thousand tons during the year under report. This increase has been mainly shared by the Saurashtra and Kutch, the Marathwada and the Vidarbha divisions having risen from 420, 1,037 and 1,654 thousand tons during the preceding year to 621, 1,335 and 1,953 thousand tons respectively, during the year under report. The outturn showed a slight increase also in the Maharashtra, while it declined from 1,374 thousand tons during the preceding year to 1,331 thousand tons during the year under report in the Gujarat and from 625 thousand tons to 591 thousand tons in the Konkan. Supply of improved seeds and manures, grant of tagai loans to the cultivators through Government schemes and adoption of improved cultivation and plant protection practices, etc. by the cultivators in general, contributed towards relieving the situation caused by the natural calamities. The prices of food grains, in particular those of millets soared up and continued to rule high. The Development projects continued to function in several National Extension Blocks during the year under report and proved of benefit and afforded relief to the masses in the rural areas.

30. The condition of cattle was generally satisfactory. There were, however outbreaks of cattle diseases such as food and mouth, black quarters, rinder-pest, *furha* etc. in parts of the State, but these were brought under control by taking prompt and effective measures. There were also outbreaks of attacks of malaria, flue, cholera, typhoid, small pox, etc. in parts of the State, but these too, were brought under control by resorting to prompt remedial and preventive measures. Prevalence of these epidemics and epizooties, however, did not hamper the progress of the agricultural operations to any considerable extent.

31. The table below gives the average prices of agricultural commodities prevailing at harvest time for the years 1952-53 to 1956-57 :—

(Prices are in rupees per maund of 3,200 tolas except cotton, the prices of which are recorded in rupees per khandi of 784 lbs.)

Note—Dashes indicate that the prices are not available.

The centres mentioned in the table are representative market and accordingly the prices of agricultural produce in these markets indicate the general tendency in the variations of prices of the commodities in the State.

CHAPTER X—CONDITIONS OF AGRICULTURAL POPULATION.

32. The unfavourable seasonal conditions described in Chapter I of the Report resulted in reduced yields of certain crops and created scarcity conditions in certain areas. The cost of living generally remained high all over the State. In the districts of Kaira, Broach, East Khandesh and Kolhapur, market rates of cash crops like cotton and tobacco were low as compared to the rates in the previous year and as such caused hardship to cultivators, whose economy largely depended on these crops. Further, the prices of food crops in particular those of millets, ruled high during the year. The benefits that should have accrued as a result of high prices of food-grains were off-set, to some extent by the increased cost of cultivation resulting from scarcity conditions and by high cost of other necessities of life. Due to failure of both kharif and rabi crops on account of heavy rains and the high floods, scarcity was declared in 61 villages and semi-scarcity conditions in the remaining 60 villages of the Akkalkot taluka of Sholapur district. In order to mitigate the situation and to afford relief, Government started relief works such as construction of Shirwali tank, large scale contour bunding and road works as also cash doles to the old and decrepits population and to inferior village servants and to the low paid patils. There was also seasonal unemployment throughout the Sholapur district on a large scale than usual. In order to provide seasonal employment to the agriculturists and agricultural labourers, 15 normal relief works were started. Although wages of labour have shown slightly higher trend, there was dearth of labour for agricultural purpose in some areas due to divergence of labour to the industrial concerns and Government projects which fetched still higher wages. Efforts were continued for the successful implementation of the Second Five-Year Plan and the results so far achieved have been encouraging. The operation of the Bombay Tenancy and Agricultural Land Act has benefitted the tenant class and created in it a sense of security from the usurious practices of the landlords. The Act also acted as an incentive to the poor tenants for the better cultivation of the land. The Bombay Money Lenders Act and the Bombay Agricultural Debtors Relief Act in operation also afforded protection to the agriculturists from the exploitation of the money lenders. The economic condition of the agriculturists during the year 1956-57, on the whole, was rather unsatisfactory, due to adverse conditions as described above.

SUMMARY TABLE A.

CLASSIFICATION OF AREA.

(figures in hundreds)

Heads of classification	1955-56		1956-57		Percentage increase or decrease.
	Area	Percentage of total.	Area	Percentage of total.	
	Acres.		Acres.		
Total area (by village papers) ...	1,202,567	...	1,208,757	...	+0.5
Forests ...	154,644	12.9	151,862	12.8	+0.1

SUMMARY TABLE E—*contd.*

[Outturn figures in hundreds]

Crops.	1955-56		1956-57	
	Average yield in lb. per acre.	Total outturn in tons.	Average yield in lb. per acre.	Total outturn in tons.
Cotton (lint)	71	19,203 (Bales)	82	22,997† (Bales)
Groundnut	501	10,629	623	16,240‡
Sesamum	169	565	173	530
Rape	**645	408	233
Mustard	350	60
Linseed	189	563
Castor	252	369	271	367
Tobacco	533	608	576	682‡

* Not available.

** Including Mustard.

† These outturn estimates are entirely based on the results of Crop estimation surveys conducted in the year 1956-57.

‡ These outturn estimates are obtained by using the results of Crop estimation surveys for the districts mentioned below against each crop; the anna valuation and the Standard Normal Yield reported by the Collectors being used in the case of the remaining districts :—

Bajri—All Saurashtra & Kutch, Gujrat and Maharashtra districts and Aurangabad, Bhir and Osmanabad districts.

Maize—All Gujarat Districts.

Ragi—Ratnagiri and Dangs Districts.

Gram—All districts except for Marathwada districts.

Tur—All Vidarbha districts.

Cotton—All districts except for Marathwada districts.

Groundnut—All Saurashtra & Kutch, Gujarat and Maharashtra districts.

Tobacco—Mehsana, Ahmedabad, Kaira, Panch Mahals, Baroda, Broach, South Satara and Kolhapur Districts.

SUMMARY TABLE F.
FARM PRICES OF PRINCIPAL CROPS (STATE AVERAGES).

[Prices per maund of 82 2/7 lb.]
