**SEASON AND CROP REPORT OF
GUJARAT STATE
FOR THE YEAR—1975-76**

DIRECTORATE OF AGRICULTURE
GUJARAT STATE : KRISHI BHAVAN
PALDI : AHMEDABAD—380 006.

SEASON AND CROP REPORT OF GUJARAT STATE FOR THE YEAR 1975-76**Introduction.**

The season and crop report is an annual publication of the Directorate of Agriculture, Gujarat State, Ahmedabad. This is the Sixteenth report brought out in the series since the formation of the Gujarat State. This report deals with Agricultural statistics of the Gujarat State. It gives in detail the information regarding seasonal condition, rainfall, Land utilization, Area irrigated crop wise and source wise and area and out turn of different crops. Information on agricultural wages (daily) and farm (harvest) prices along with livestock situation of the State during the year under report is also covered in this report.

Summary tables contain two years data at a glance for the State as a whole, while district wise data for the year 1975-76 are given in the statistical tables. This report is prepared on the basis of standard forms prescribed by the Directorate of Economics and Statistics, Government of India, New Delhi.

R. L. PATHAK,
Director of Agriculture,
Gujarat State, Ahmedabad.

Season and crop report for the year 1975-76.

Season for the year 1975-76.

During the year 1975-76 onset of monsoon can be considered little late than usual. However, light showers were received in some of the talukas specifically in north Gujarat, central Gujarat and south Gujarat in the first fortnight of June but only in few places, it was adequate for sowing. Adequate and wide spread rainfall was received during the second fortnight of June in greater part of the State for sowing. In the first week of July, most of the talukas except some talukas in Rajkot, Amreli, Kutch and Banaskantha districts received adequate rain. These talukas later on received adequate rainfall and sowing of kharif crops in the entire state could be done satisfactorily. Thereafter, there was dryspell of the duration ranging from ten to twenty days adequate and timely rainfall was however received there after. This well distributed and timely adequate rainfall throughout the growth period of crops resulted in a very bright prospects for all kharif crops. All indications of very good kharif harvest were there except for bajri crop in north Gujarat and central Gujarat where incidence of downy mildew was heavy. Bajri crop in both these zones was affected to some extent.

In the month of September during the second week ten districts viz. Ahmedabad, Banaskantha, Broach, Broach, Kaira, Gandhinagar, Mehsana, Sabarkantha, Surendranagar and Rajkot received abnormally heavy rains resulting in heavy losses to agricultural crops. All the kharif crops were affected to more or less extent in all these districts.

Rainfall was also received in the month of October in first fortnight in most of the districts of the states. No damage due to this late rain was reported. There was a heavy storm in coastal areas of Saurashtra while in Porbandar and Ranavav talukas of Junagadh district the storm was accompanied with heavy rainfall.

On the whole, monsoon season of the year 1975-76 can be termed as quite good all over the state except in flood and heavy rain affected districts. Due to heavy rains in North Gujarat and late rains in some of the districts, prospects of rabi crops improved to some extent.

Harvesting of kharif crops started little late than usual due to last rain in the month of September and was continued till the end of November. Sowing of rabi crops started in the month of November and continued till the end of December.

Condition of rabi crops was satisfactory Harvesting and threshing of rabi crops started in the month of March and continued upto the end of April.

No serious pests and diseases had been reported during the year under report except downy mildew disease in north and south Gujarat and slight attack of bollworms, heliothis, aphids and jassid on cotton crop in Kaira, Sabarkantha, Broach, Surat, Kutch and Mehsana districts.

Rainfall:

District wise rainfall (in m.m.) received during the year 1975-76 is shown in table-No. 1. District wise annual average rainfall and district normal rainfall are depicted in the bar chart in figure-1.

Land utilization:

The total geographical area of Gujarat State according to Surveyer General of India during the year under report is 19593400 hectares while total reporting area for land utilization purpose is 18816300 hectares. The area under nine standard heads of land use classification alongwith percentage of total reporting area for land utilization have been shown here below:-

Sr. No.	Category	Area in '00 hect.	Percentage of total reporting area for land utilisation purpose.
1	2	3	4
1.	Forest.	18892	10.04
2.	Barren and unculturable land.	25672	13.64
3.	Land put to non-agricultural use.	10635	5.65
4.	Culturable waste.	20076	10.67
5.	Permanent pasture and other grazing land.	8531	4.54
6.	Misc. tree crops and grooves not included in net area sown.	42	0.02
7.	Current fallow	4062	2.16
8.	Other fallow	3779	2.01
9.	Net area sown including Dangs district	96974	51.54
	Net area sown excluding Dangs district.	96474	51.27

The pie diagram showing classification of reporting area for land utilization purpose during the year 1975-76 is shown in Fig. no. 2.

Forest.—

Area under forests includes all lands classed as forest under any legal enactment dealing with forest or administrated as forest, whether state owned or private, and whether wooded or maintained as potential forest land. The area under crops raised in forest and grazing lands or area open for grazing land within the forest have been included under forest areas. The total area under forest in Guja at State during the year under report is 18892(00) ha. Thus forest accounts for 10.04% of the total reporting area in the state while in previous year, the total area under forest was 18283(00) ha. It accounted for 9.72% of the total reporting area in the State.

Kutch, Panchmahals and Junagadh districts, account for 15.5%, 12.1% and 10.3% respectively of the total area under forest in the State, while Dangs, Banaskantha, Broach, Surat, Bulsar and Sabarkantha districts account for 9.0%, 7.8, 7.7%, 7.5%, 6.6% and 5.8% respectively of the total area under forest. Out of the remaining district, no district accounts for more than 5.0% of the total area under forest in the state.

Barren and unculturable land.

This class of land includes all barren and unculturable land like mountains, deserts etc. lands cannot be brought under cultivation unless at an exorbitant cost has been classed as unculturable, such lands can be isolated blocks or within cultivated holdings. Area under this category of land is 25672(00)ha., thus, this class of land accounts for 13.6% of the total reporting area, while in previous year area under barren and unculturable land was 26294(00) ha, it accounted for 14.0% of the total reporting area.

FIG.-1

BAR CHART SHOWING DISTRICTWISE ACTUAL RAINFALL 1975-76 AND NORMAL RAINFALL

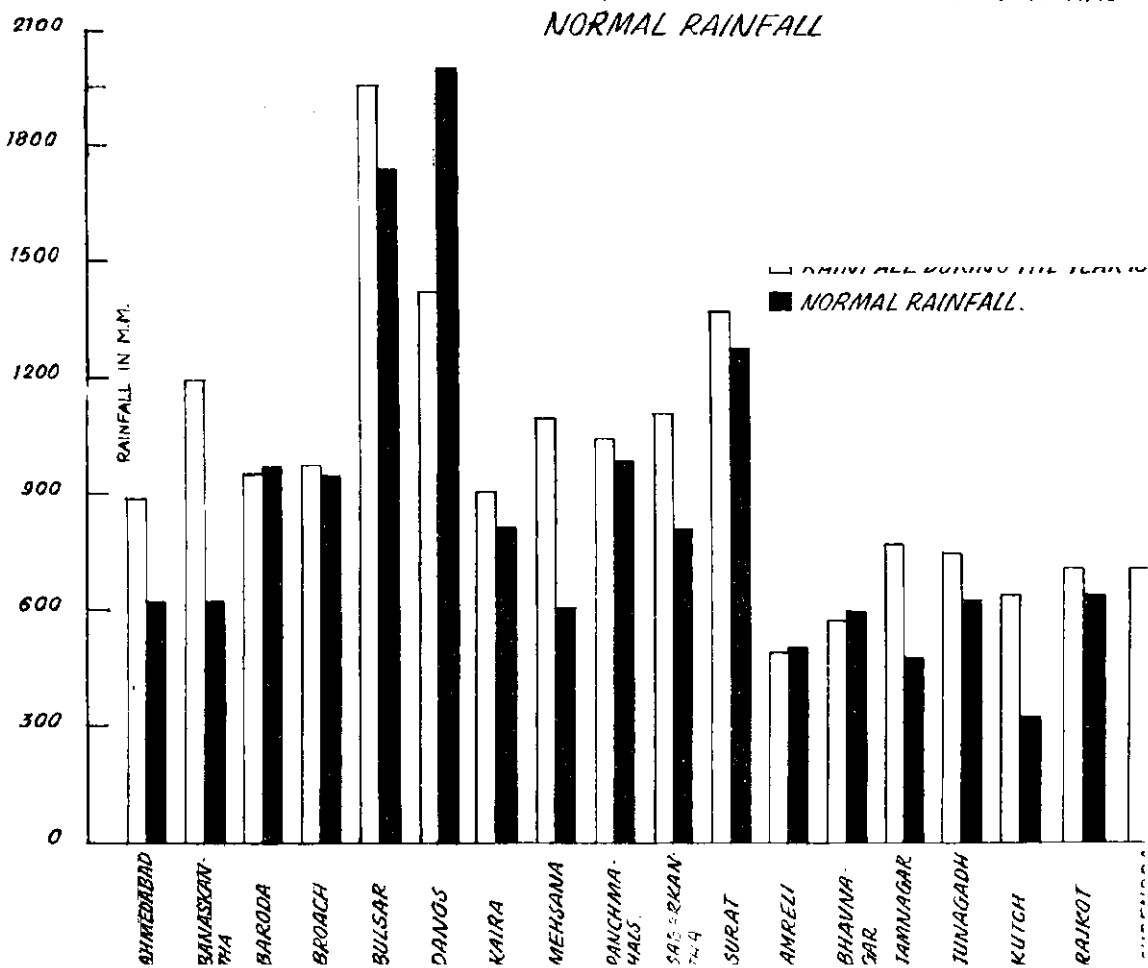

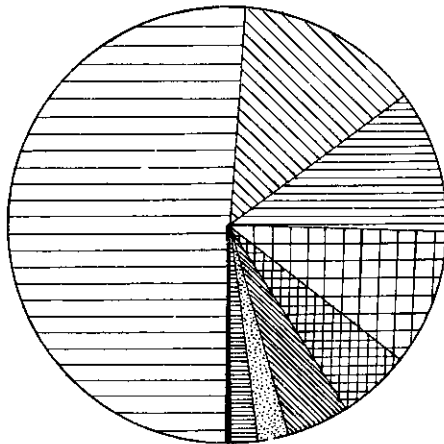

FIG. 2

*CLASSIFICATION OF REPORTING AREA
FOR LAND UTILIZATION PURPOSE-1975/76.*

-  NET AREA SOWN.
-  BARREN AND UNCULTURABLE LAND.
-  CULTURABLE WASTE.
-  FOREST.
-  LAND PUT TO NON AGRICULTURAL USES.
-  PERMANENT PASTURE AND OTHER GRAZING LAND.
-  CURRENT FALLOW.
-  OTHER FALLOW.
-  MISCELLANEOUS TREE CROP AND GROOVES NOT INCLUDED IN NET AREA SOWN.

As high as 38.7% of the total reporting area of Kutch district falls under this category. This class of land utilization accounts for 14.1%, 10.9%, 10.7%, 10.0%, 9.1%, 6.8% and 5.4% of the reporting area in Surendranagar, Jamnagar, Bhavnagar, Rajkot, Ahmedabad, Surat and Sabarakantha districts respectively. In rest of the districts area under this category is not sizeable.

3. *Land Put to non agricultural uses.*

This class of land includes all lands occupied by buildings, roads and railways or under water i.e. rivers and canals and lands utilised for other than agricultural purpose. Area under this category of land during the year under report is 10635(00)ha. This works out to 5.65% of the total reporting area in the State while in previous year, the area under this class of land was 10588(00) ha. and it accounted for 5.63% of the total reporting area in the state.

4. *Culturable waste.*

This class of land includes lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during current year and last five years or more in succession for one reason or the other. Such land can be either fallow or covered with shrubs and jungles which are not put to any use. It may be assessed and may be in isolated blocks or within cultivated holdings, lands once cultivated but not cultivated for five years in succession are included in this category at the end of the five years.

An area of 20076(00)ha. i.e. 10.67% of the total reporting area falls under this category while in previous year area under this head was 20104(00) ha. i.e. 10.68% of the total reporting area.

5. *Permanent pasture and other grazing land.*

This class of land includes all grazing lands, whether they are permanent pasture and meadows or not. Village common grazing land is included under this head. Area under this category during the year under report is 8531(00)ha. which work out to 4.54% of the total reporting area. In previous, year, the area under this class of land was 8568(00) ha. it accounted for 4.55% of the total reporting area.

6. *Miscellaneous tree crops and grooves not included in net area sown.*

This class of land includes all cultivable land which is not included in "net area sown" but is put to some agricultural use. Land under casurina trees, Thatching grass, bamboo bushes and other grooves etc. which are not included under orchards are classed under this category.

Area under this category of land is only 42(00) ha. it accounts for hardly 0.02% of the total reporting area of the State.

7. *Current fallow.*

This class of land represents cropped area, which is kept fallow during the current year. Land used for raising seedlings but is not cropped during the year under report is treated as current fallow. Area under this category of land during the year under report is 4062(00) ha. which works out to 2.16% of the total reporting area of the State.

8. *other fallow (Fallow land other than current fallow).*

This class of land includes all lands which are taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years.

The reasons for keeping such lands fallow may be one or more of the following :

- (1) Poverty of cultivators.
- (2) Inadequate supply of water.
- (3) Malarial climate.
- (4) Unremunerative nature of farming.

Area under this category of land is 3779(00)ha. which works out to 2.01 % of the total reporting area of the State.

Net area sown.

This class of land represents area sown with crops and orchards counting area sown more than once in the same year only once. Such type of land during the year under report is 96474(00)ha. (excluding the net area sown of Dangs district) which works out to 51.27% of the total reporting area of the State. In Mehsana, Kaira, Amreli and Gandhinagar districts, net area sown constitutes more than 70% of the reporting area while in Kutch and Dangs districts, net area sown is hardly of the order of 14.5% and 29.4% respectively of the reporting area. In remaining districts, net area sown varies from 50% to 70% of the reporting area.

Area sown more than once in the state is 8.79% of the net area sown during the year under report.

Area irrigated by different sources.

Net area irrigated by different sources during the year under report is 15144(00) ha. which works out to 15.7% of the net area sown in the State. Net and gross sown area and net and gross irrigated area with percentage irrigated area of net and gross sown area in Gujarat state are as under :

Sr.No.	Item	Area in '00' hec.
1.	Net sown area. (including Dangs. dist.)	96974
2.	Net sown area (excluding Dangs dist.)	96474
2.	Net irrigated area.	15144
3.	Net irrigated area as percentage of net area sown.	15.62
4.	Gross cropped area	105494
5.	Gross irrigated area.	17091
6.	Gross irrigated area as percentage of gross cropped area.	16.20

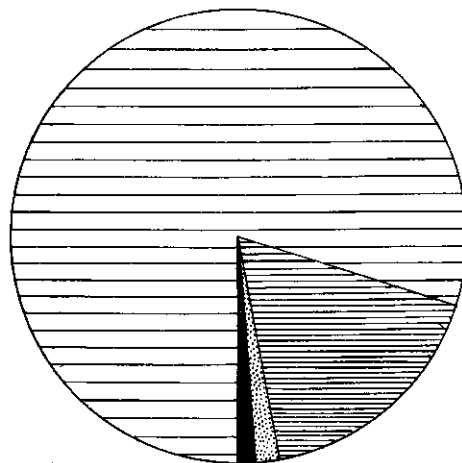

The information on source wise net irrigated area and net irrigated area expressed as percentage of total net area irrigated in the State in the year 1975-76 is presented in table given below:—

Sr. No.	Source of irrigation.	Net area irrigated in '00 ha.	Percentage of total net irrigated area.
1.	Cannals.	2844	18.78
2.	Tanks.	252	1.66
3.	Tube wells	1745	11.52
4.	Wells.	10155	67.06
5.	Other sources.	148	0.98
Total :—		15144	100.00

Net area irrigated by different sources during the year under report is depicted in pie diagram in fig 3. District wise distribution of talukas according to percentage gross irrigated area is shown in the following Statement.

FIG-3

*NET AREA IRRIGATED BY DIFFERENT
SOURCES DURING THE YEAR 1975-76.*

- BY WELLS (INCLUDING TUBE WELLS)
- BY CANALS.
- BY TANKS.
- BY OTHERS SOURCES

Distribution of talukas according to percentage irrigated area is shown below:-

Year:- 1975-76

Sr. No.	District.	0.10 to 9.99	10.00 to 19.99	20.00 to 29.99	30.00 to 39.99	40.00 to 49.99	50.00 to 59.99	60.00 to 69.99	70.00 to 79.99	80.00 to 89.99	90.00 to 100.00	total no. of talukas
1	Ahmedabad	2	3	1	..	2	7
2	Banaskantha	2	2	2	4	10
3	Baroda	4	3	2	1	1	1	12
4	Broach	7	3	1	11
5	Bulsar	4	2	1	1	8
6	Dangs	1	1
7	Gandhinagar	1	1
8	Kaira	1	2	2	..	4	..	1	10
9	Mehsana	1	..	3	2	4	..	1	11
10	Panohmahala	9	3	11
11	Sabarkantha	2	3	3	2	10
12	Surat	6	2	..	1	2	1	1	13
13	Amreli	9	..	1	10
14	Bhavanagar	7	4	1	12
15	Jamnagar	6	4	10
16	Junagadh	5	10	15
17	Kutch	5	2	2	9
18	Rajkot	3	8	2	13
19	Surendranagar	7	2	9
Gujarat State		81	51	22	11	13	1	3	1	163

It can be seen from the above table that in 44.0% of the talukas gross irrigated area is hardly 9.99% of the total cropped area, while in 27.7% of the talukas, gross irrigated area ranges from 10.0 to 19.9% of the total cropped area. In 12.0% 6.0% and 7.1% of the talukas gross irrigated area ranges from 20.0% to 29.9%, 30.0 to 39.9% and 40.0% to 49.9% of the total cropped area respectively. In 0.5% 1.6% and 0.5% of the talukas gross irrigated area ranges from 50.0 to 59.9%, 60 to 69.9% and 70.0 to 79.9% respectively of gross cropped area. Due to non availability of water by any source, irrigation was not given to any crop in Santhalpur taluka of Banaskantha district.

Number of districts and talukas falling in different percentage area classes of gross irrigated area according to source of irrigation is shown in the following table.

No. of districts and talukas falling in different percentage area classes of irrigated area according to source of irrigation area as under:

Year : 1975-76.

Percentage area under irrigation.	Name and source of irrigation										
	All sources		Canals.		Tanka.		Wells.		Other sources.		
	Dist.	Tal.	Dist.	Tal.	Dist.	Tal.	Dist.	Tal.	Dist.	Tal.	
1	2	3	4	5	6	7	8	9	10	11	
0.10 to 9.99.	7	81	7	21	12	44	..	2	10	26	
10.00 to 19.99.	6	51	4	26	1	5	1	7	..	5	
20.00 to 29.99	4	22	3	14	..	8	..	5	..	2	
30.00 to 39.99	2	11	1	12	..	1	1	4	..	3	
40.00 to 49.99	..	13	..	6	..	1	..	3	..	1	
50.00 to 74.99	..	4	1	10	5	35	
80.00 to 100.00	..	1	1	9	12	126	
Total :	..	19	183	17	98	13	54	19	182	10	36

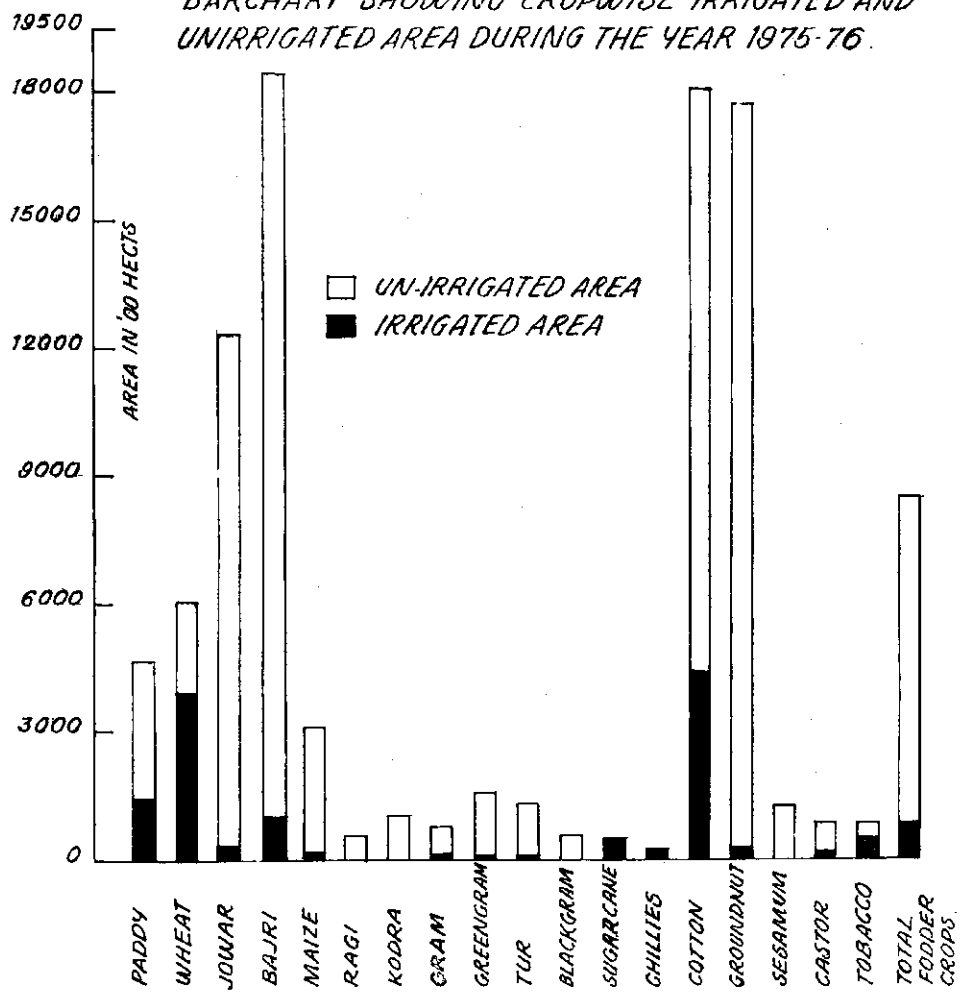

It can be seen from the above table that well is the largest single source of irrigation in Gujarat State. In as many as 12 districts, out of 19 districts and as many as 126 talukas out of 184 talukas, well irrigation accounts for more than 75 % of the total irrigated area, while canal as a source of irrigation ranks second. There are 98 talukas out of 184 talukas in 17 districts of the State in which facility of canal irrigation exists. Out of these 98 talukas in as many as 79 talukas, canal irrigation accounts for less than 50. % of the total irrigated area while in 10 talukas, irrigated area by canal ranges from 50% to 74.9% and in the remaining 9 talukas it ranges from 75.0% to 100. % of the total irrigated area.

Crop wise area irrigated.

During the year under report an area of 17091 (00) ha. (16.3% of the total cropped area in the State received irrigation while in the previous year total area that received irrigation was 15232 (00) ha. (17.1% of the total cropped area). Thus there has been an increase in area by 1859(00) ha. in the irrigated area over the previous year. Crop wise total area and cropwise irrigated area is shown in the following table. Bar chart showing this information is also presented in fig. No. 4

FIG-4

BARCHART SHOWING CROPUWISE IRRIGATED AND UNIRRIGATED AREA DURING THE YEAR 1975-76.

STATEMENT—A.

Crop wise total area, area irrigated and unirrigated area as percentage of total area under the crop for important crops during the year 1975-76

Sr. No.	Name of the crop	Area under crop in '00 hec.	Irrigated area in '00 hec.	Irrigated area as percentage of total area under the crop.
1	2	3	4	5
1.	Paddy	4639	1488	32.08
2.	Wheat	6037	3882	64.30

17.	Castor	938	168	17.91
18.	Tobacco	907	566	62.40
19.	Fodder crops	8559	859	10.04

Area under Different crops .

Total area under food and non food crops during the year under report is 55904 (00) ha. and 49390 (00) ha. respectively against 44263 (00) ha. under food crops and 44735 (00) ha. under non food crops during the previous year.

Information in respect of crop wise area and area as percentage of gross cropped area during the year 1974-75 and 1975-76 is shown in the following table. Bar chart showing crop wise area is shown in fig No. 5.

Jowar, bajri, cotton and groundnut crops jointly account for 63.7% of the total cropped area during the year under report as against 66.2% of the total cropped area in the State during the previous year. These four principal crops are found to have been grown in all most all the districts of the State. The graph showing fluctuation in the area under these crops is shown in fig 6.

6. Crop wise state average yield per hectare and total out turn during the year under report and previous year have been shown in summary table 'E'. While farm harvest prices of principal crops and month wise daily agricultural wages for the year 1974-75 and 1975-76 are shown in summary table 'F' and 'G'. Information on number of live stock population and agricultural machinery as per 1972 live stock census have been shown in statement No. 'H'.

Crop wise area under principal food and non food crops and crop wise area as percentage of total cropped area for the years 1974-75 and 75-76.
