**SEASON AND CROP REPORT OF GUJARAT STATE FOR THE
YEAR 1971-72.**

Introduction.

The Season and Crop report is an annual publication of the Directorate of Agriculture, Gujarat State, Ahmedabad. This is the twelfth report brought out in the series after the formation of Gujarat State. It gives in detail the information in respect of seasonal condition, rainfall, land utilization, crop wise and source wise area irrigated and area and out turn of different crops. Information on agricultural wages Farm (harvest) prices alongwith livestock situation of the State during the year under report is also incorporated in this report.

Two years data at a glance for the State as a whole have been shown in summary tables while district wise data for the year 1971-72 are presented in the statistical tables. This report is prepared on the basis of standard forms prescribed by the Directorate of Economics and Statistics, Government of India, New Delhi.

R. L. PATHAK,
Director of Agriculture,
Gujarat State, Ahmedabad

SEASON FOR THE YEAR 1971—72.**Season and Crop Report of Gujarat State for the year 1971—72.**

During the year 1971-1972, the onset of monsoon in Gujarat State was little earlier than usual. In the districts of South Gujarat and some of the districts like Jamnagar, Junagadh and Rajkot, first showers of rain were received in the last week of May in several talukas. This rainfall, however was not adequate for sowing of kharif crops in all these districts. In some of the places rainfall continued upto first week of June and early sowing of kharif crops was carried out, where ever this rainfall was adequate in first week of June. There was a complete dryspell thereafter for a period of about fifteen days except in few pockets. In the last week of June, there were wide spread rains throught the State and sowing of kharif crops was started thereafter in the entire State and continued till the end of August. In the first week of July, again there was dryspell. There was wide spread rainfall in all most all the areas of the State in the second week of July. The condition of kharif crops was reported to be satisfactory. In the last week of July, there was wide spread rain all over the State except few pockets. This rainfall continued till the first week of August and in some places in the middle of August. Thereafter, monsoon was reported to be rather active. However, there were wide spread rains all over the State upto the first week of Sept.

Thus, it can be seen that rainfall was well distributed however, rainfall received was not adequate and crop like Paddy got affected. Area under bajri crop declined during the year under report Area under groundnut crop however, was reported to be of the same order as that of previous year. The distribution of rainfall can be said to be favourable to the both these crops. In case of bajra, even with lesser area, the production was of the same order as that of previous year, because of the larger coverage under hybrid bajri. In case of groundnut crop distribution of rainfall was favourable besides the increase in area by 11.98 percent, the production was declined by 6.62 percent. In case of cotton crop area increased by 26.33 percent and production also increased by 51.68 percent as against the previous year.

Sowing of rabi crops was started in the month of October and continued upto the end of November. Due to adequate moisture in the soil and adequate irrigation water availability, condition of dry as well as irrigated wheat crop and other rabi crops was reported to be satisfactory. The fodder supply was also reported satisfactory in all the districts of the State.

There was no serious incidence of pests and diseases in the State reported during the year under report except Aphids and Jassids on groundnut in Panchmahals, Amreli, Kutch, Broach, Surendranagar, Mehsana, Surat Jamnagar, Junagadh and Rajkot and districts and bollworms aphids, jassids and heliothis on cotton crop in Bular, Kaira, Mehsana Bhavnagar, Kutch, Baroda and Broach districts.

Rainfall :

Rainfall (in m.m.) in each district of Gujarat State for the year 1971-1972 is shown in Table No. 1.

The distribution of rainfall during the year under report in Gujarat State is shown in the map. (Fig. 1)

District wise annual average rainfall compared with district normal is shown in the Barchart (Fig. 2)

Percentage departure annual rainfall 1971-72 from normal annual rainfall is shown in the map. (Fig. 3).

Land Utilisation :

The total geographical area of Gujarat State according to the survey General of India during the year 1971-72 is 195984 (hundred) hectares while the total reporting area for land utilization purpose is 188124 (hundred) hectare. The area under nine standard heads of classification along with the percentages of the total reporting area for land utilization are shown below

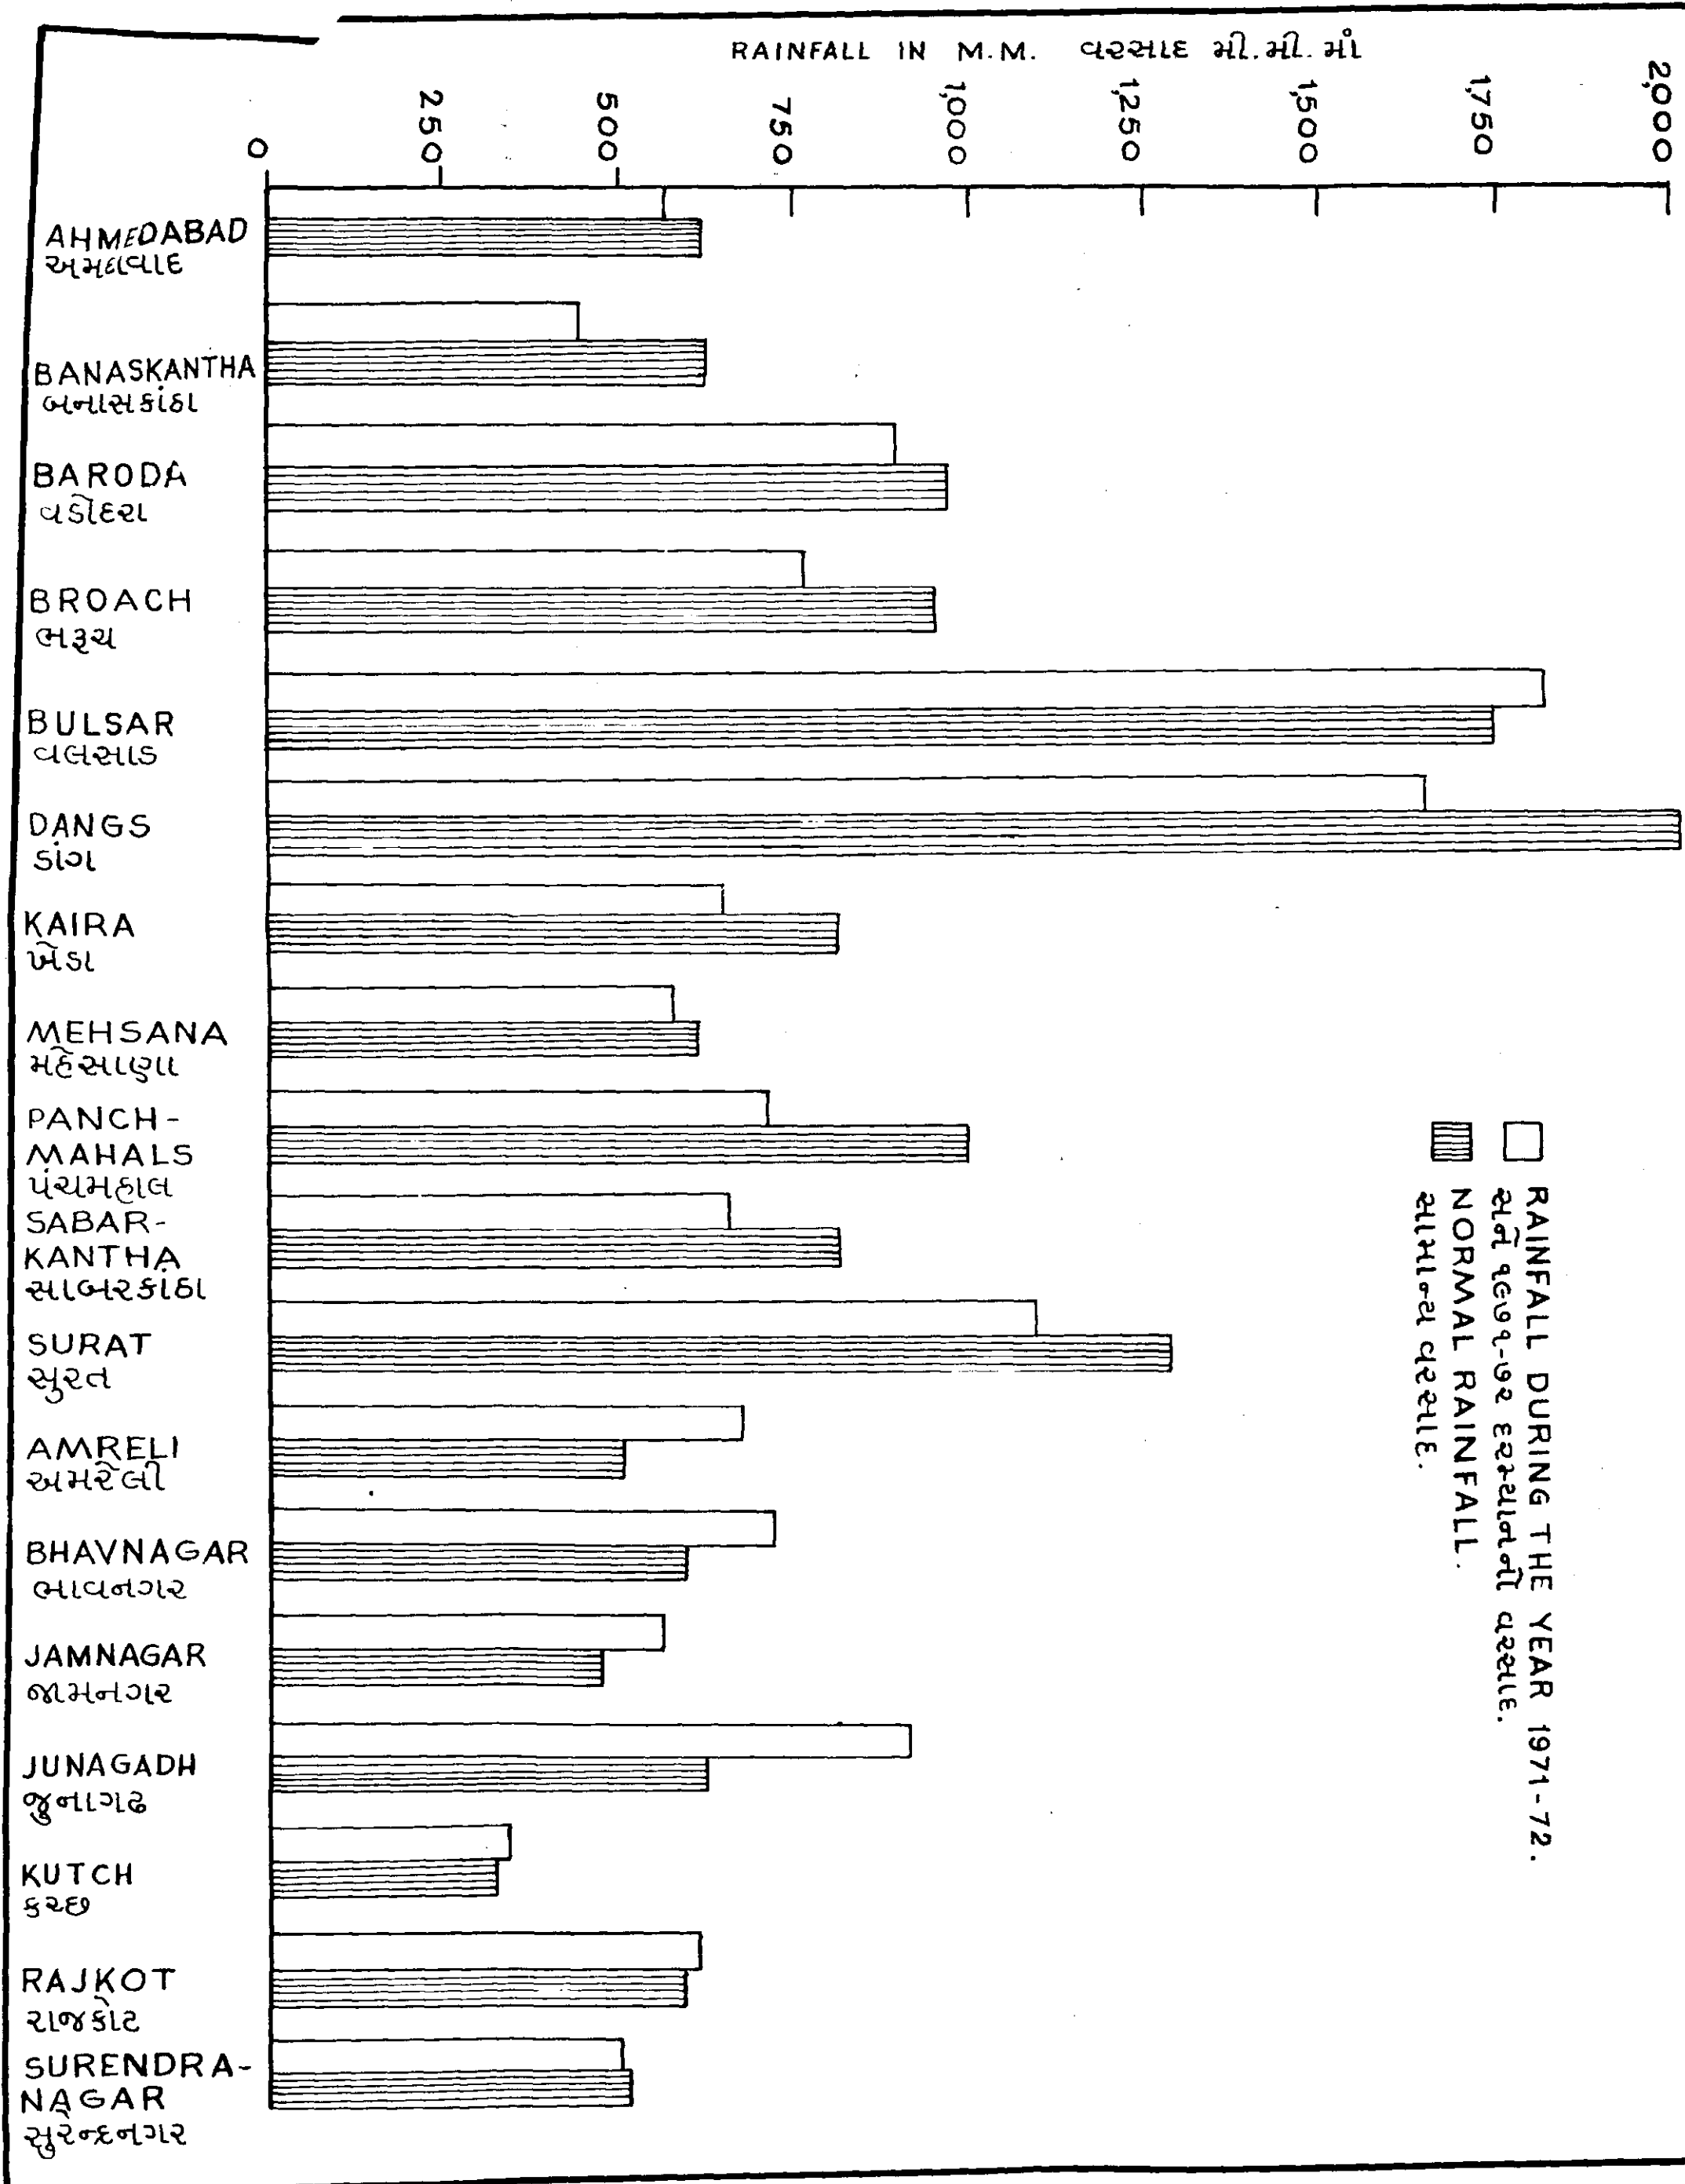

Sr. No.	Category	Area in hundred hect.	Percentage of the total reporting area for land utilization purpose.
1.	Forest	15761	8.38
2.	Barren and unculturable land	27215	14.47
3.	Land put to non agricultural uses	10344	5.50
4.	Culturable waste	22165	11.78
5.	Permanent pasture and other grazing land.	8582	4.56
6.	Miscellaneous treecrop and groves not included in net area sown.	55	0.03
7.	Current fallow	3265	1.73
8.	Other fallow	3116	1.66
9.	Net area sown	97621	51.89

The paidiagram showing classification of reporting area for land utilization purpose during the year 1971-72 is shown in Fig. 4.

CLASSIFICATION OF REPORTING AREA
FOR LAND UTILISATION PURPOSE
DURING THE YEAR 1971-72

- MISCELLANEOUS TREE CROPS AND GROVES.
પરચુરણ ઝાડ અને ઝાડના ઝુંડો.
- CURRENT FALLOW. ચાલુ પડતર.
- PERMANENT PASTURES AND OTHER GRAZING LAND.
કાયમી ચરણ અને અન્ય ચરણની જમીન.
- LAND PUT TO NON AGRICULTURAL USES.
બીન ખેતીના ઉપયોગમાં લેવાયેલ જમીન.
- FOREST. જંગલ.
- CULTURABLE WASTE. ખેડવા લાયક પડતર જમીન.
- BARREN AND UNCULTURABLE LAND.
ઉજજડ અને ખેડી ન શકાય તેવી જમીન.
- NET AREA SOWN. ચોખ્ખો વાવેતર વિસ્તાર.
- OTHER FALLOW. અન્ય પડતર.

1. Forest.

This class includes all lands classed as forests under any legal enactment dealing with forests or administrated as forests, whether state owned or private and whether wooded or maintained as potential forests land. The area of crops raised in forest and grazing lands or areas open for grazing within the forests should remain included under the forest area.

The total area under forest in Gujarat State during the year under report was 15761 (hundred) hectares. i. e. 8.38 % of the total reporting area while in previous year the total area under forest was 15731 (hundred) hectare i.e. 8.36 % of the total reporting area.

Dangs, Junagadh and Panchmahals districts accounts for 10.8 %, 12.4 % and 14.0 % respectively of the total area under forest in the State, while Surat, Broach Bulsar, Banaskantha, and Kutch districts, account for 9.5 %, 9.0 %, 8.7 %, 8.3 % and 6.4 % of the total area under forest respectively. Out of the remaining districts no district accounts for more than 5.0 % of the total area under forest in the State.

Barren and unculturable land.

This class of land covers all barren and unculturable land like mountain deserts etc. land which cannot be brought under cultivation except at an exorbitant cost has been classed as unculturable whether such land can be isolated blocks or within cultivated holdings.

Nearly, 38.95 % of total reporting area of Kutch district falls under this category. This land use class accounts for 15.67 %, 12.45 %, 11.17 %, 10.69 % and 10.11 % of the reporting area in Surendranagar, Jamnagar, Surat, Rajkot and Sabarkantha districts respectively. The area under barren and unculturable land varies from 9.00 % to 10.00 % in Ahmedabad and Bhavnagar districts of the reporting area. In rest of the districts area under this category is not sizable.

Land put to non agricultural uses :

This class of land includes all lands occupied by buildings roads, and railways or under water i. e. rivers and canals and other lands puts to uses other than agriculture. Such type of land during the year under report is 10344 (hundred) hectares i. e. 5.50 % of the total reporting area in the State.

4. Culturable waste.

This class of land includes lands available for cultivation. Whether not taken for cultivation or taken up for cultivation once but not cultivated during current year and last, five years or more in succession for one reason or the other. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. It may be assessed or un-assessed and may be in isolated blocks or within cultivated holdings, land once cultivated but not cultivated for five years in succession also gets

included in this category at the end of five years. An area of 22165 i. e. 11.78 % of the total reporting area falls under this category.

5. Permanent pasture and other grazing land.

This class of land includes all grazing lands, whether they are permanent pastures and meadows or not. Village common grazing land is included under this head.

Area under this category during the year under report is 8582 (hundred) hectares. This works out to 4.56 % of the total reporting area.

6. Miscellaneous tree crops etc.

This class of land includes all cultivable land which is not included in "Net area Sown" but is put to some agricultural uses. Land under casuarina trees, thatching grasses, bamboo bushes and other grooves which are not included under orchards are classed under this category.

Area under this category is only 55 (hundred) hectares i. e. 0.03 % of the total reporting area.

7. Current fallow.

This class of land represents cropped area which is kept fallow during the current year, for example if any is used for raising seedling but is not cropped during the year under report it is treated as current fallow.

Area under this category during the year under report is 3265 (hundred) hectares i. e. 1.73 % of the total reporting area.

8. Other Fallow.

(Fallow land other than current fallow)

This class of land includes all lands which are taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years. The reasons for keeping such lands fallow may be one or more of the following :-

- (1) Poverty of the cultivators
- (2) Inadequate supply of water
- (3) Malarial climate
- (4) Unremunerative nature of farming.

Area under this category of land is 3116 (hundred) hectares i. e. 1.66 of the total reporting area.

9. Net Area sown. :

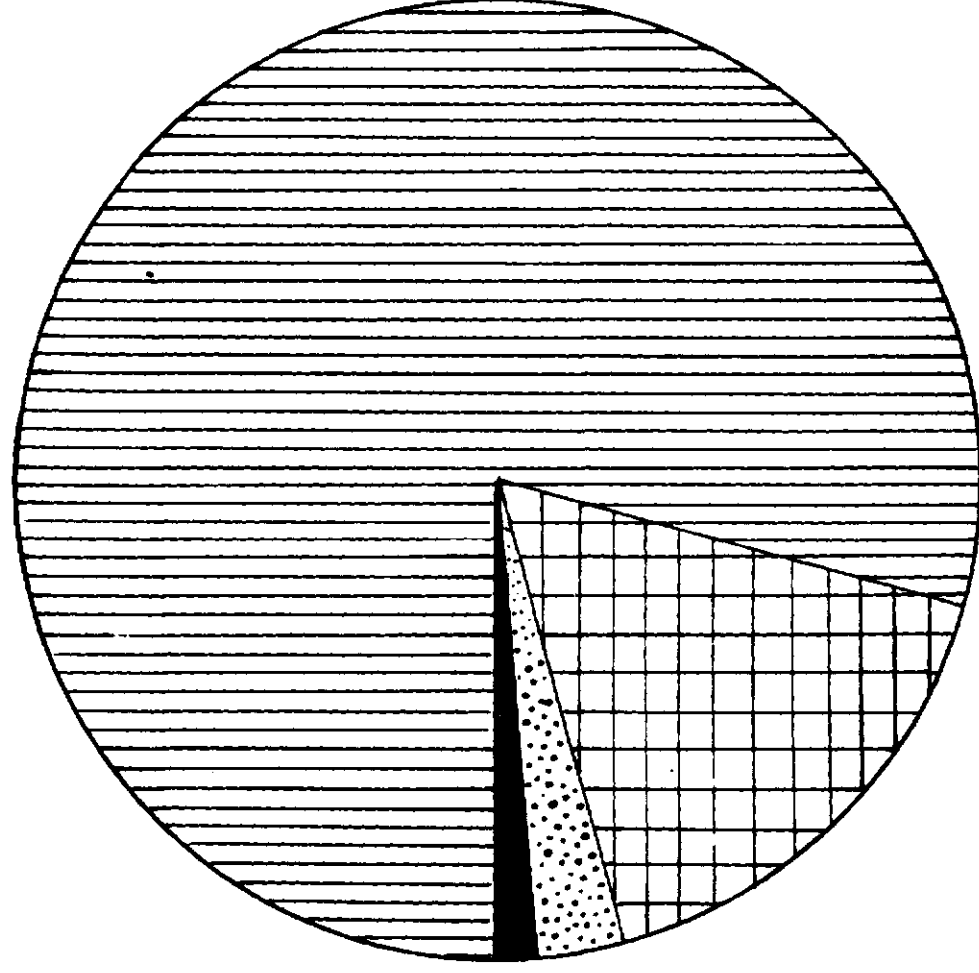

This class of land represents total area sown with crops and orchards, counting area sown more than once in the same year only once.

Such type of land during the year under report is 9721 (hundred) hectares (except Dangs district) i. e. 51.89 % of the total reporting area. In five districts viz : Ahmedabad, Amreli, Gandhinagar, Kaira and Mehsana districts net sown area is more than 70 % while in Kutch and Dangs districts, the net sown area is only 13.9 % and 28.2 % of the total reporting area respectively. In rest of districts the net sown area varies from 50 % to 70 % of the report of area. Area sown more than once in the state is only 7.35 % of the net sown area during the year under report.

Area irrigated by different sources :

The net area irrigated by different sources during the year under report is 14073 (hundred) hectares which worksout 14.35 % of the net area sown in the State. The percentage of net and gross cropped area irrigated in Gujarat State is as under :-

	Area in '00 hect.
1. Net sown area (including Dangs)	98103
2. Net irrigated area.	14073
3. Percentage to net area sown	14.35
4. Gross cropped area	105276
5. Gross irrigated area.	15247
6. Percentage of gross irrigated area	14.48

The information on source wise net irrigated and net irrigated area expressed as percentage of the total net area irrigated in the State for the year 1971-72 is presented in the table given below :-

In 41% of the talukas irrigated area is hardly 10% and below of the total gross cropped area while in 32% of the talukas irrigated area ranges between 10.00 to 19.99 of the total gross cropped area. In 15.22%, 6.52% and 4.35% of the talukas irrigated area ranges between 2.00 to 29.99%, 30 to 39.99% and 40.00 to 49.99% respectively of gross cropped area while 0.54% of the talukas come under the range of 60.00 to 69.99% of the gross cropped area under irrigation. Number of districts and talukas falling in different percentage area classes of irrigated area according to sources of irrigation are as under :-

It can be seen that well is the largest single source of irrigation in Gujarat State. In as many as 14 districts out of 19 districts and in as many as 124 talukas out of 184 talukas more than 75% of the total irrigated area is irrigated by wells, while canal as a source of irrigation ranks second. There are only 95 talukas in 15 districts of the State in which facility of canal irrigation exists. Out of these 95 talukas in as many as 77 talukas canal irrigation accounts for less than 50% of the total irrigated area.

4. Crop wise area irrigated.

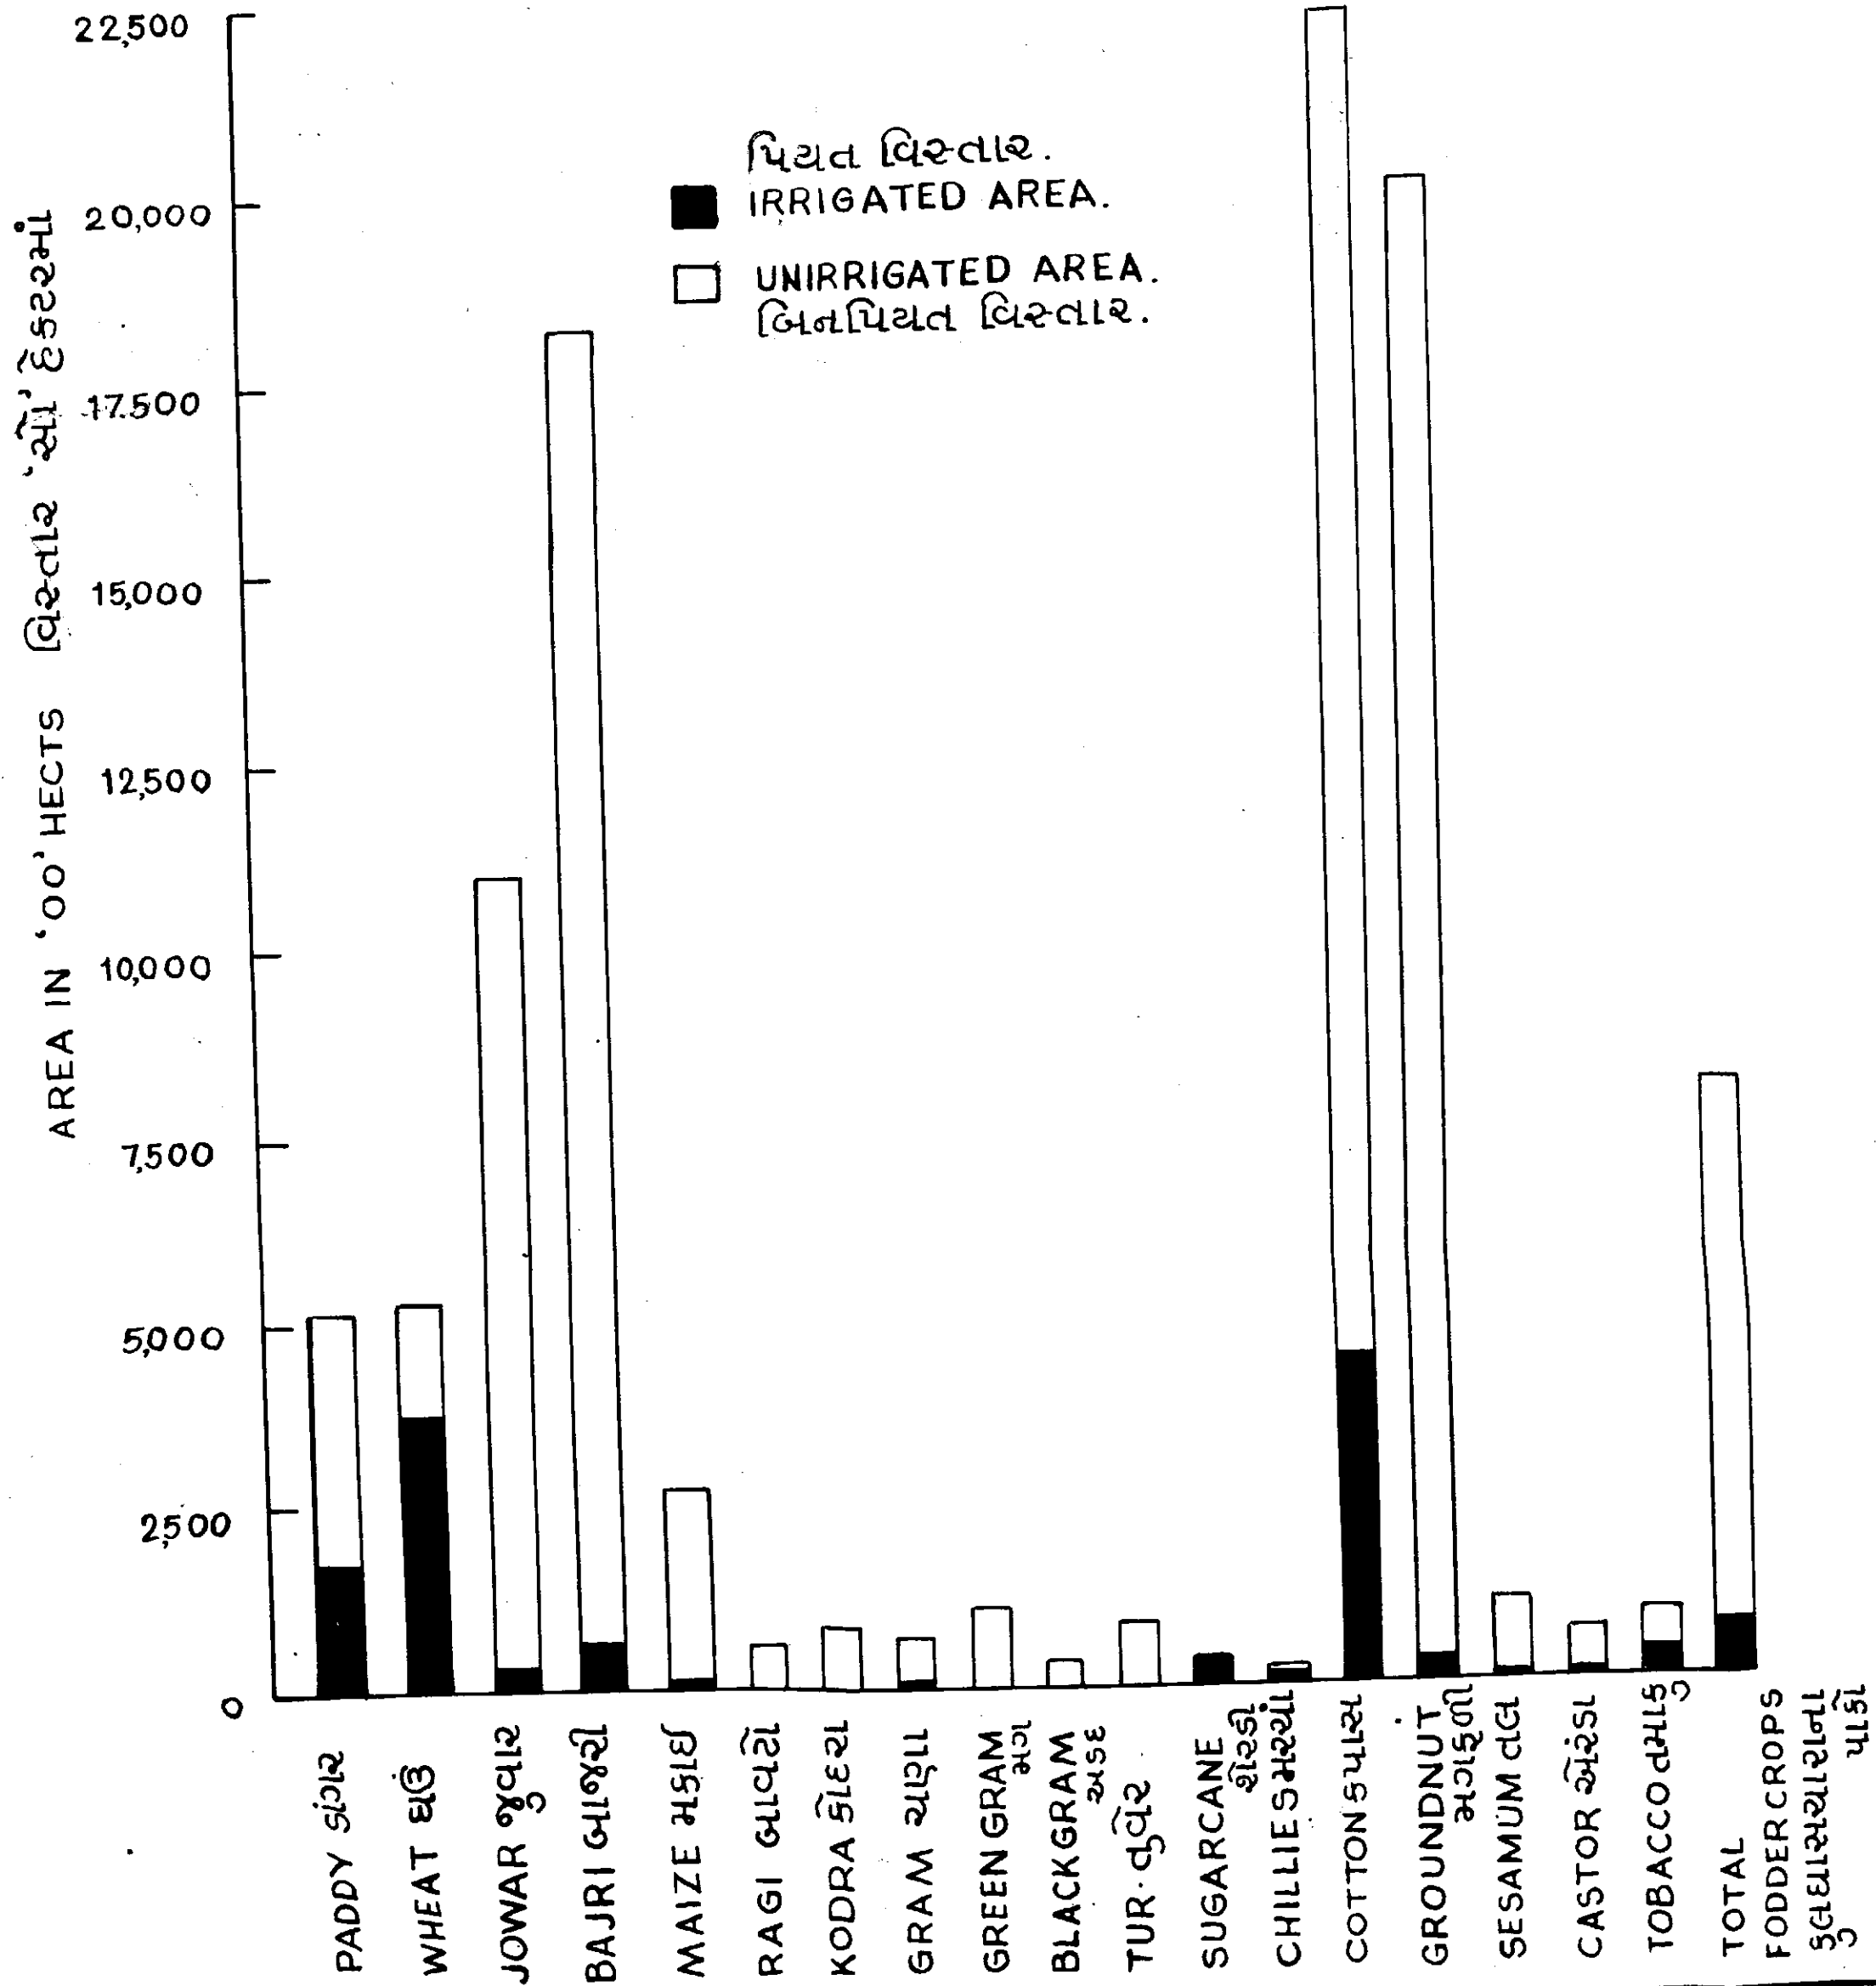

During the year under report, an area of 15247 (hundred) ha. i.e. 14.48 percent of gross cropped area received irrigation in the State, while in the previous year an area of 14939 (hundred) hectares, i.e. 14.15 % of the gross cropped area received irrigation. Thus there has been increase of 0.33 percent in irrigated area. Crop wise total area and irrigated area is shown in the statement given below. The percentage barchart regarding this information is also shown in Fig. 6.

Q-706-3.

Crop wise area, irrigated area, percentage area under the crop irrigated in the state for important crops is given below for the 1971-72.

5. Area under different crops.

Total area under food and nonfood crops during the year under report was 51604 (hundred) hectares and 53672 (hundred) hectares respectively against 58241 (hundred) hectares under food crops and 47162 (hundred) hectares under non food crops during the previous year.

Crop wise area and percentage of total gross area under each crop during the year 1970-71 and 1971-72 is shown in the statement given below. Bar chart depicting the said information is shown in Fig. 7.

Crop wise area of principal food and non food crops and its percentage to total cropped area for the year 1970-71 and 1971-72 is given below :

Jowar, Bajri, cotton and groundnut crops account for 67.4 % of the total cropped area during the year under report as against 65.9 % of the total cropped area during the previous year. These four principal crops are found to have been grown in almost all the districts of the State. Remaining 32.6 % of the total cropped area was under other crops during the year under report. The graph showing the above information is shown in fig. 8.

6. Crop wise state average yield per ha. and the total outturn during the year under report and the previous year are presented in table 'E' while farm harvest prices of principal crops and monthwise daily agricultural wages for the 1970-71 and 1971-72 are shown in summary tables.

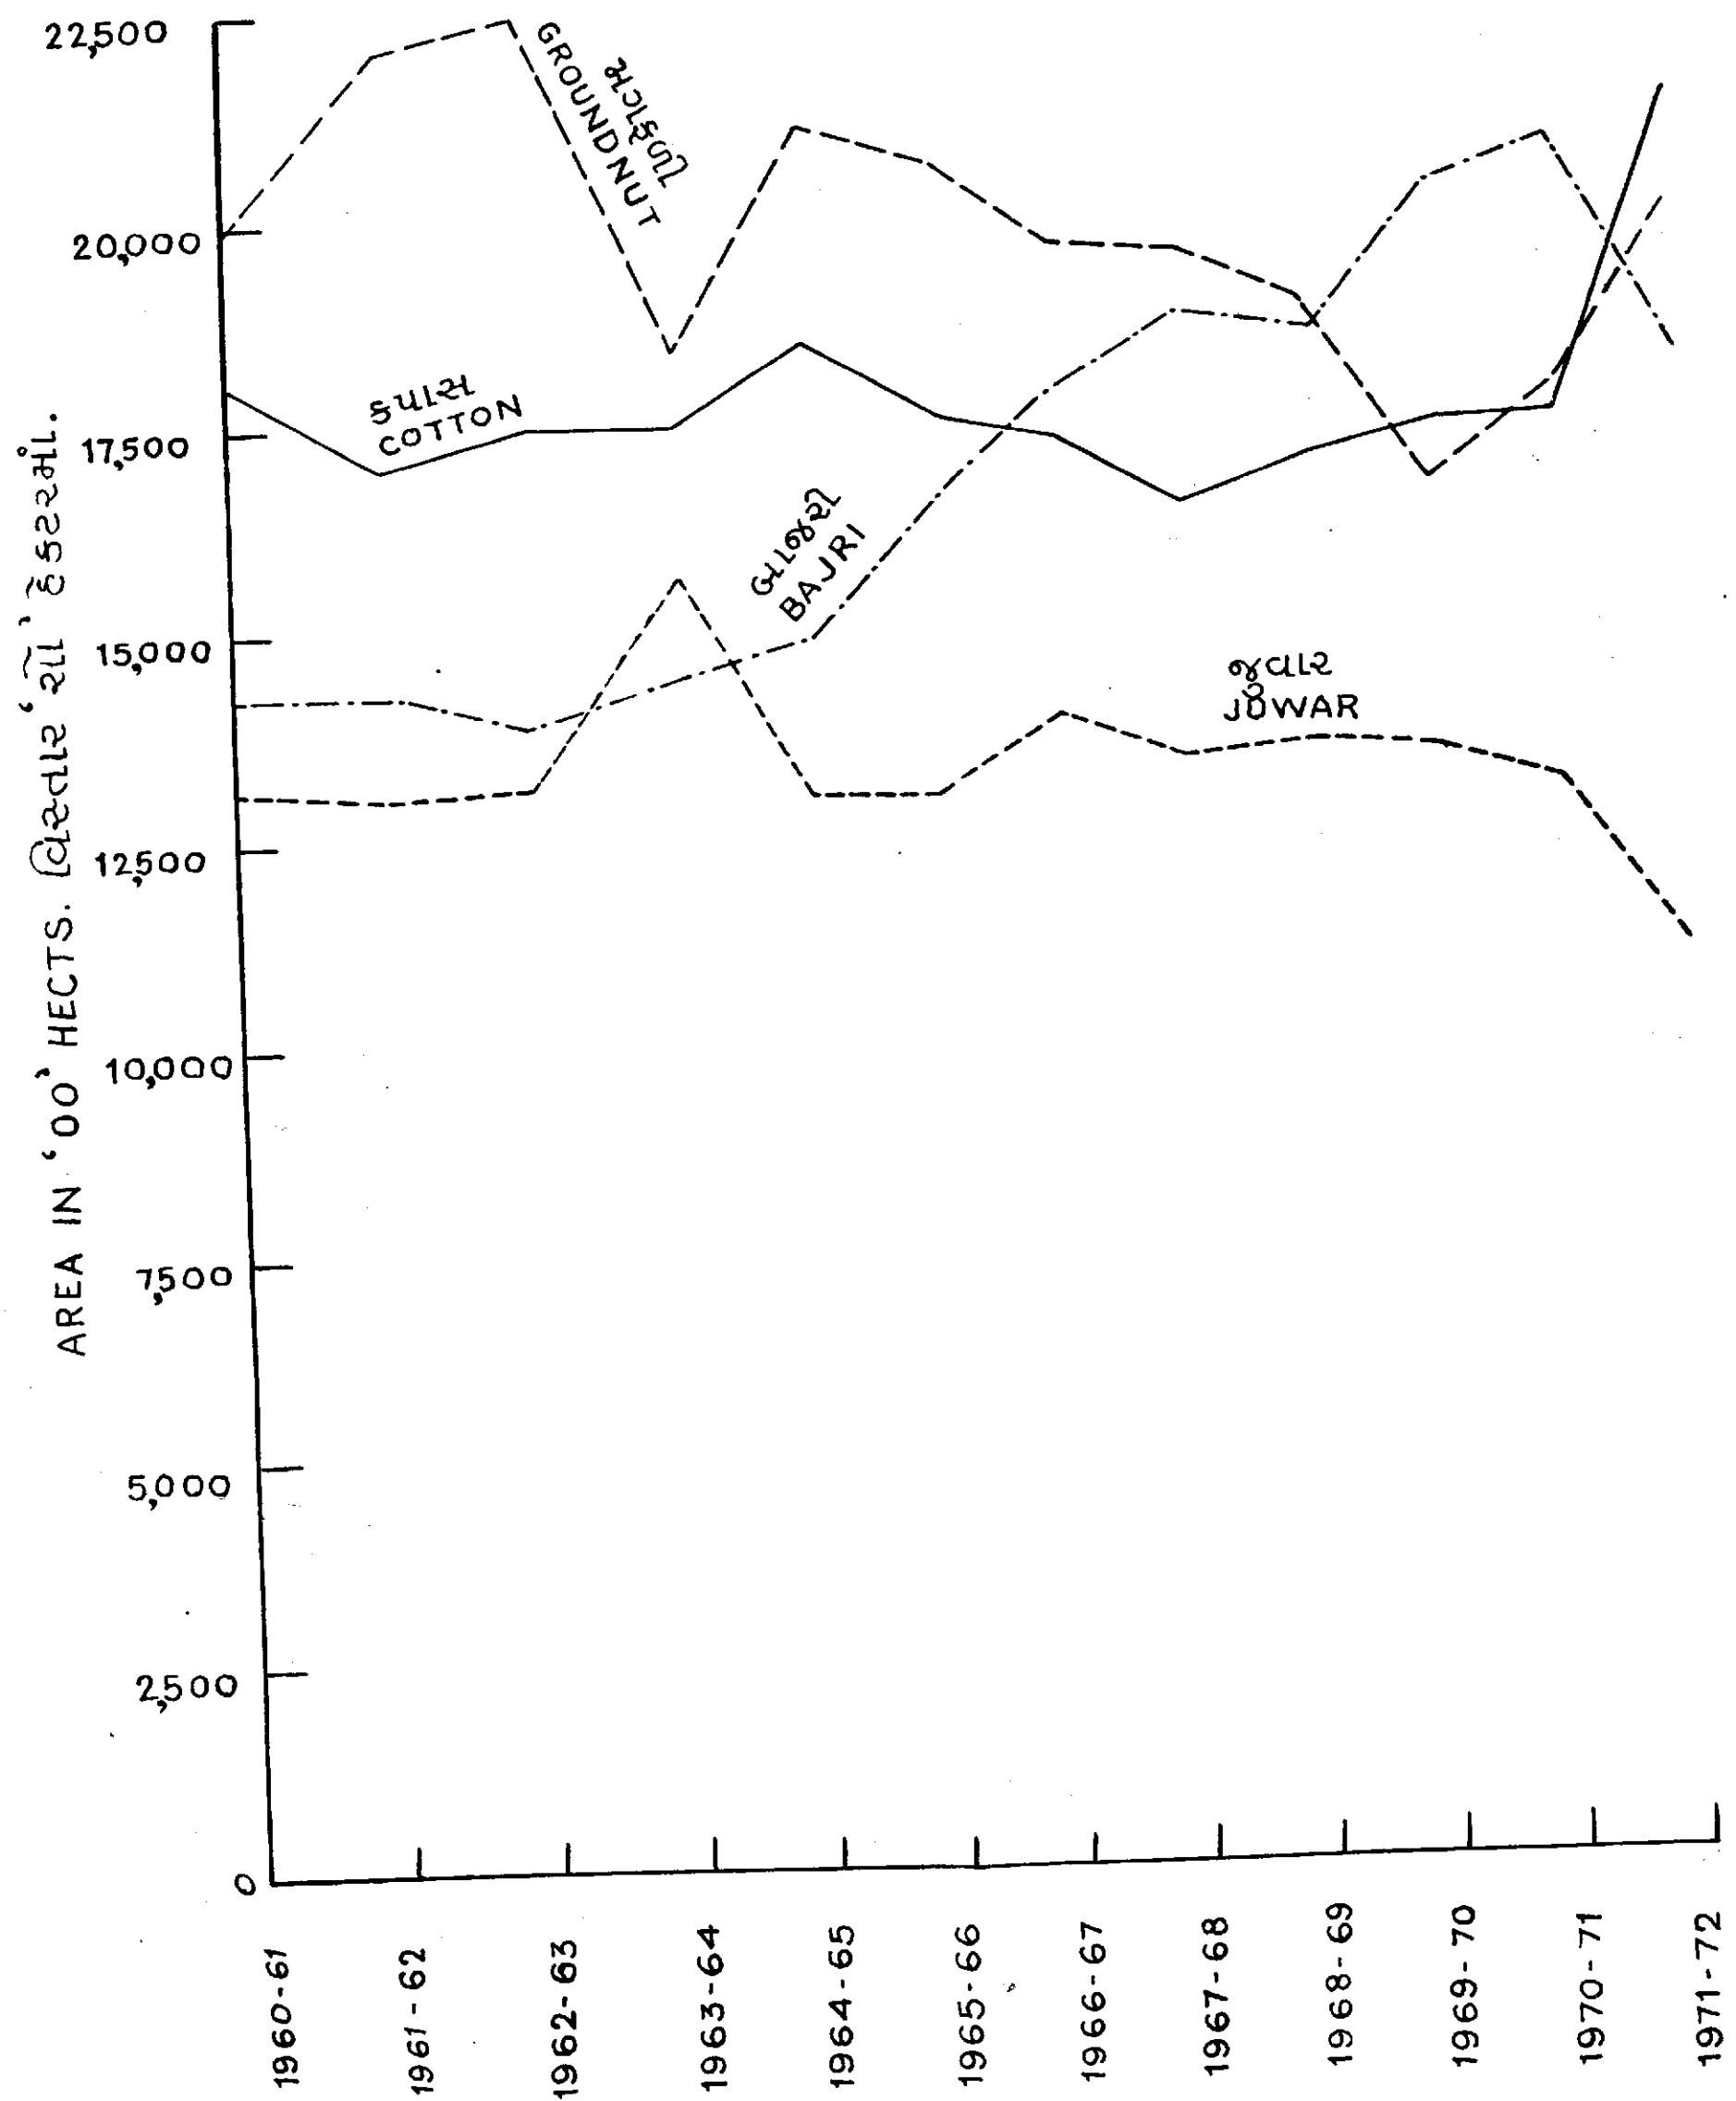

The number of livestock, poultry and agricultural machinery as per 1971-live stock census are shown in Statement-No. H4.
