Season and Crop Report of Gujarat State for the year 1972-73.**Introduction.**

The season and crop report is an annual publication of the Directorate of Agriculture, Gujarat State, Ahmedabad. This is the thirteenth report brought out in the series after the formation of Gujarat State. This report deals with agricultural statistics of the Gujarat State. It gives in detail information in respect seasonal conditions, rainfall, land utilisation, area irrigated, cropwise and sourcewise and total area under each crop alongwith the outturn of different crops. Information on agricultural wages and farm (harvest) prices alongwith, live stock situation of the State during the year under report is also incorporated in this report.

Two years data at a glance for the state as a whole have been shown in summary tables while district wise data for the year 1972-73 are shown in the statistical tables. This report is prepared on the basis of standard forms prescribed by the Directorate of Economic and Statistics, Government of India, New Delhi.

(R. L. PATHAK)
Director of Agriculture,
Gujarat State. Ahmedabad

Season for the year 1972-73.

During the year 1972-73, the onset of monsoon in Gujarat State was little late than usual. Even though there were light showers in some of the districts viz : Sabarkantha, Baroda, Kaira, Panchmahals, Dangs, Surat etc. in second and third week of June monsoon can be said to have commenced from the last week of June all over the State except in parts of Rajkot, Surendranagar, Bulsar, Sabarkantha and Junagadh, districts. Sowing was immediately started thereafter wherever there was adequate rainfall for sowing. The pockets which did not receive adequate rainfall during the first spell in the last week of June received adequate rainfall during the first week of July and sowing of kharif crops was completed all over the State in third week of July.

There was complete dry spell all over the State right from the second week of July except in some of the districts like Dangs, Surat and Bulsar. In these districts also eventhough it continued to rain through out the whole month of July, the quantity of rainfall received was very small and did not serve the purpose. In the first week of August, some of the talukas in Sabarkantha district received good rainfall but it was only in second and third week of August that second wet spell started mostly in all the districts of Baroda division and Surendranagar district of Rajkot division. In the remaining districts of Rajkot division viz :Kutch, Rajkot, Jamnagar, Junagadh Bhavnagar and Amreli the dry spell continued further creating a very grave situation. From the fourth week of August, there was again a dry spell in most of the areas in the State. Even though there was scattered rainfall here and there during the period from fourth week of August to second week of September, in some of the areas, it was not adequate so as to be beneficial to the crops except in some of the districts like Baroda, Kaira, Panchmahals, Surat, Bulsar, Dangs and Broach. Thus, in most of the areas in the state after 25th August, there were scattered and occasional rains comparatively, in the districts of South Gujarat and Central eastern areas, the rainfall received was more than in other areas where it was negligible. On the whole the monsoon of the year 1972-73 can be said to be a complete failure all over the Rajkot region except Surendranagar district and can be said to be very unfavourable and very disappointing for the rest of the districts of the State.

Rainfall.

District wise rainfall (in m.m.) received during the year 1972-73 is shown in table No. 1.

The district wise annual average rainfall and district normal rainfall are depicted in bar chart Fig. (1).

Land Utilization.—

The total geographical area of Gujarat State according to Surveyor General of India during the year under report is 19598400 hectares. While the total reporting area for land utilization purpose is 1882400 hectares. The area

under nine standard heads of land use classification alongwith percentage of total reporting area for land utilisation have been show below.

Sr. No.	Category	Area in '00 hec.	Percentage of the total reporting area for land utilisation purpose
1	2	3	4
1.	Forest.	15674	8.33
2.	Barren and unculturable land	26910	14.30
3.	Land put to non-agril. uses	10458	5.56
4.	Culturable waste.	22170	11.79
5.	Permanent pasture and other grazing land.	8551	4.55
6.	Misc. tree crops and grovees not included in net area sown.	61	0.03
7.	Current fallow	4748	2.52
8.	Other fallow.	3530	1.88
9.	Net Area sown	96022*	51.04*

* Excluding the net sown area of Dangs district.

The Pai diagram showing classification of reporting area for land utilization purpose during the year 1972-73 is shown in Fig. 2.

1. Forest.

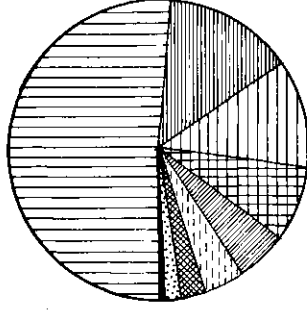

This class includes all lands classed as forests under any legal enactment dealing with forest or administrated as forest, whether State owned or private and whether wooded or maintained as potential forest land. The area under crops raised in forests and grazing lands or area open for grazing within the forests should remain included under the forest area.

The total area under forest in Gujarat State during the year under report was 15674 (hundred) ha. i. e. 8.33 % of the total reporting area while in the previous year, the total area under forest was 15761 (hundred) ha. i. e. 8.38 % of the total reporting area.

Dangs, Junagadh and Panchmahals districts accounts for 10.84 %, 12.48 % and 14.12 % respectively of the total area under forest in the State. While Surat, Broach, Banaskantha, Bulsar and Kutch districts account for 9.50 %, 9.06 %, 8.59 %, 8.06 % and 6.55 % respectively of the total area under forest. Out of the remaining districts no district accounts for more than 5 % of the total area under forest in the State.

CLASSIFICATION OF REPORTING AREA FOR
LAND UTILISATION PURPOSE .YEAR 1972-73.

જમીનના વર્ગીકરણના હેતુ માટેના વિસ્તારનું
વર્ગીકરણ અને ૧૯૭૨-૭૩. FIG.No.2 આકૃતિ નં.૨

- MISC.TREE CROPS AND GROOVES NOT INCLUDED
IN NET AREA SOWN. ચોખ્ખા વાવેતરના ક્ષેત્રફળમાં
સમાવેશ ન થયો હોય તેવા પરચુરણ આડોના ઝુડ.
- ▨ OTHER FALLOW. અન્ય પડતર.
- ▩ CURRENT FALLOW. ચાલુ પડતર.
- ▧ PERMANENT PASTURES AND OTHER GRAZING
LAND. કાયમી ચરાણ અને અન્ય ચરાણની જમીન.
- ▦ LAND PUT TO NON AGRIL USES.
બીજા ખેતીના ઉપયોગ હેઠળની જમીન.
- ▤ FOREST. જંગલ.
- ▣ CULTURABLE WASTE. ખેડવા લાયક પડતર.
- ▢ BARRAN AND UNCULTURABLE LAND.
ઉજજડ અને ન ખેડી શકાય તેવી જમીન.
- NET AREA SOWN. ચોખ્ખો વાવેતર વિસ્તાર.

2. Barren and unculturable land.

This class of land includes all barren and unculturable land like mountain deserts etc. land which cannot be brought under cultivation except at an exorbitant cost has been classed or unculturable whether such land can be isolated blocks or within cultivated holdings. Nearly, 38.36 % of the total reporting area of Kutch district falls under the category of barren and unculturable land. This land use class accounts for 15.22 %, 12.18 %, 10.68 % and 10.43 % of the reporting area in Surendranagar Jamnagar, Rajkot and Surat districts, respectively. In Bhavnagar and Ahmedabad districts, the area under barren and unculturable land is 9.94 % and 9.83 % of the reporting area respectively. In rest of the districts, area under barren and unculturable land is not sizable.

3. Land put to non-agricultural uses.

This class of land includes all lands occupied by buildings, roads, and railways or under water i. e. land utilised for other than agriculture purpose. Area under this category of land during the year under report is 10458 (hundred) ha. This works out to 5.56 % of the total reporting area in the State.

4. Culturable waste.

This class of land includes lands available for cultivation whether not taken for cultivation or taken up for cultivation once but not cultivated during current year and last five years or more in succession for one reason or the other. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. It may be assessed or unassessed and may be in isolated blocks or within cultivated holdings, land once cultivated but not cultivated for five years in succession also gets included in this category at the end of five years.

An area of 22170 (hundred) ha. fall in this category which works out to 11.79 % of the total reporting area of the State.

5. Permanent pastures and other grazing land.

This class of land includes all grazing lands, whether they are permanent pastures and meadows or not, village common grazing land is included under this head. Area under this category at land during the year under report is 8561 (hundred) ha. This works out to 4.55 % of the total reporting area of the State.

6. Miscellaneous tree crops and groves not included in net area sown.

This class of land includes all cultivable land which is not included in "net area sown" but is put to some agricultural use. Land under casuarine, trees, thatching grass, bamboo, bushes, and other groves etc. which are not included under "Orchards" are classed under this category. Area under this category of land is only 61 (hundred) ha. which works out to 0.03 % of the total reporting area of the State.

7. Current fallow.

This class of land represents cropped area which is kept fallow during the current year. Area used for raising seedlings but is not cropped

during the year under report, is treated as current fallow. Area under this class during the year under report is 4748 (hundred) ha. which works out to 2.52 % of the total reporting area of the State.

8. Other fallow.

(Fallow land other than current fallow)

This class of land includes all lands which are taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years. The reasons for keeping such lands fallow may be one or more of the following.

- (1) Poverty of cultivators
- (2) Inadequate supply of water
- (3) Malarial climate
- (4) Sitting of canals and rivers
- (5) Unremunerative nature of farming.

Area under this category of land is 3530 (hundred) ha. which works out to 1.88 % of the total reporting area of the State.

9. Net area sown.

This class of land represents the total area sown with crops and orchards, counting area sown more than once in the same year only once. Such type of land during the year under report is 96516 (hundred) ha. which works out to 51.04 % of the total reporting area, including Dangs district.

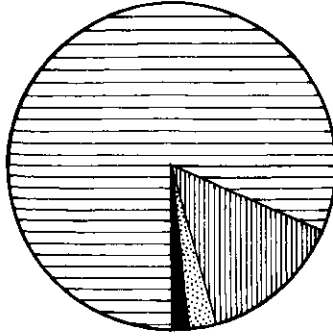

In Kutch and Dangs districts only 12.47 % and 28.92 % respectively of the total reporting area is under net area sown. In Gandhinagar, Kaira, Mehsana and Amreli districts net sown area constitutes more than 70 % of the reporting area while in rest of the districts net sown area varies from 50 % to 70 % of the total reporting area. Area sown more than once in the State is only 6.81 % of the net area sown during the year under report.

Area irrigated by different sources.

Net area irrigated by different sources during the year under report is 13414 (hundred) ha. which works out 13.90 % of the net area sown in the State. The percentage of net and gross cropped area irrigated in Gujarat State is as under :

	Area in '00' hec.
1. Net sown area. (including Dangs district)	96516
2. Net irrigated area -	13414
3. Net irrigated area in terms of percentage of net area sown	13.90
4. Gross cropped area.	103087
5. Gross irrigated area.	15212
6. Gross irrigated area in terms of percentage of gross irrigated area.	14.71

8	2	184
4.4%

In 44.0 percent of the talukas, irrigated area is hardly 9.99 % and below of the total gross cropped area. In 30.4 % of the talukas, irrigated area, ranges between 10.00 to 19.99 percent of the total gross cropped area. In 12.5 % of the talukas, irrigated area ranges between 20.00 to 29.99 percent of the gross cropped area while in 7.6 %, 4.4 % and 1.1 % of the talukas, irrigated area ranges between 30.00 to 39.99, 40.00 to 49.99 and 50.00 to 59.99 percent respectively of the gross cropped area.

No. of districts and talukas falling in different percentage area classes of irrigated area according to sources of irrigation are as under :

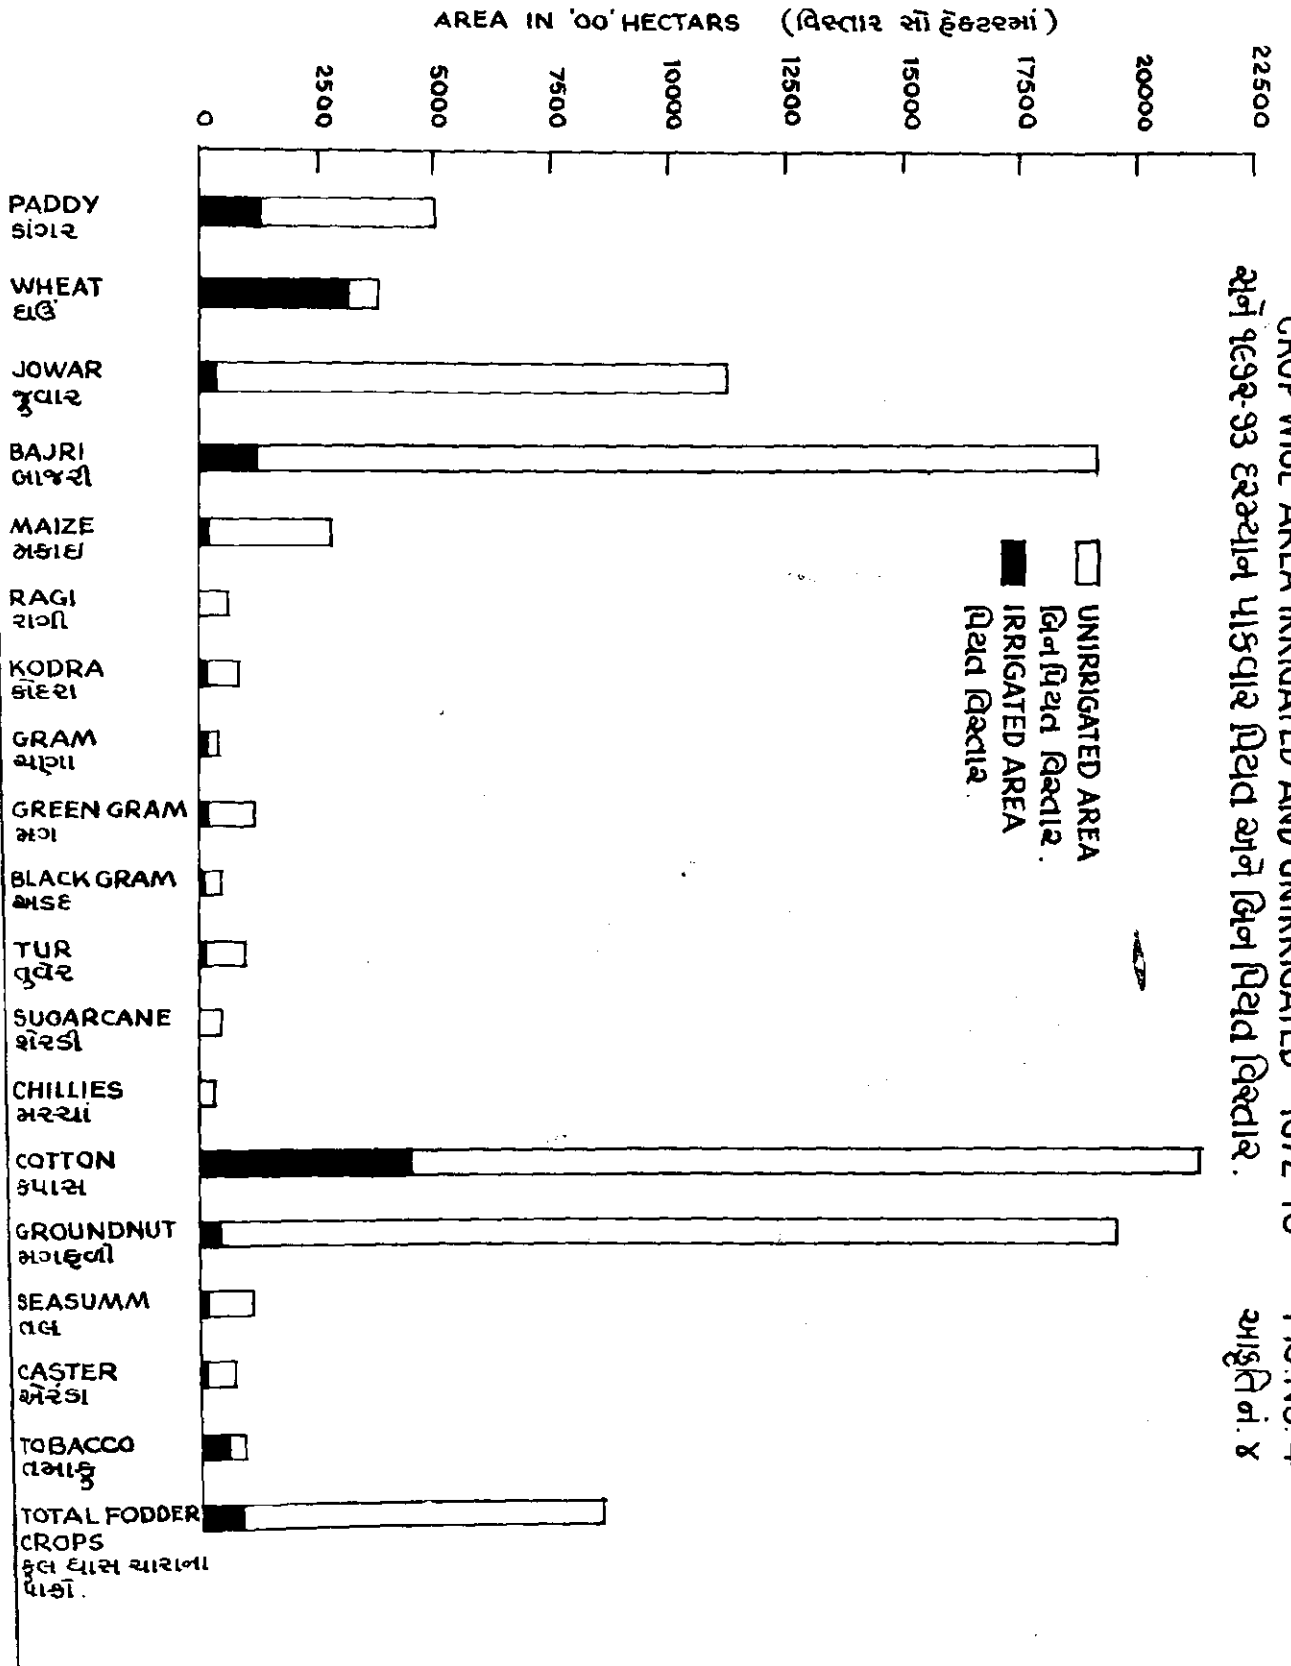

Year 1972-73

Percentage of area under irrigation(Name and source of irrigation									
	All sources		Canals.		Tanks		Wells.		Other sources	
	Dist.	taluka	dist.	taluka	dist.	taluka	dist.	taluka	dist.	taluka
0.00 to 9.99.	6	81	9	22	12	38	..	1	7	20
10.00 to 19.99	9	56	4	20	2	9	..	6	1	5
20.00 to 29.99.	2	23	2	16	..	3	1	3	..	1

40.00 to 49.99.	..	8	..	5	..	4	..	8	..	3
50.00 to 74.99	..	2	1	8	..	1	3	24	..	1
75.00 to 100.00.	6	15	138
Total :-	19	184	17	83	14	56	19	184	8	30

It can be seen that well is the largest single source of irrigation in Gujarat State. In as many as 15 districts out of 19 district and in as many as 138 talukas out of 184 talukas well irrigation accounts for more than 75 % of the total irrigated area, while canal as a source of irrigation ranks second. There are only 83 talukas in 17 districts of the State in which facility of canal irrigation exists. Out of these 83 talukas in as many as 69 talukas, canal irrigation accounts for less than 50 % of the total irrigated area.

4. Crop wise area irrigated.

During the year under report an area of 15212 (hundred) ha. (14.76 percent of gross cropped area) received irrigation in the State while in the previous year, an area of 15247 (hundred) ha. 14.48 percent of the gross

18.	Tobacco	962	556	57.80
19.	Fodder crops	8414	836	9.94

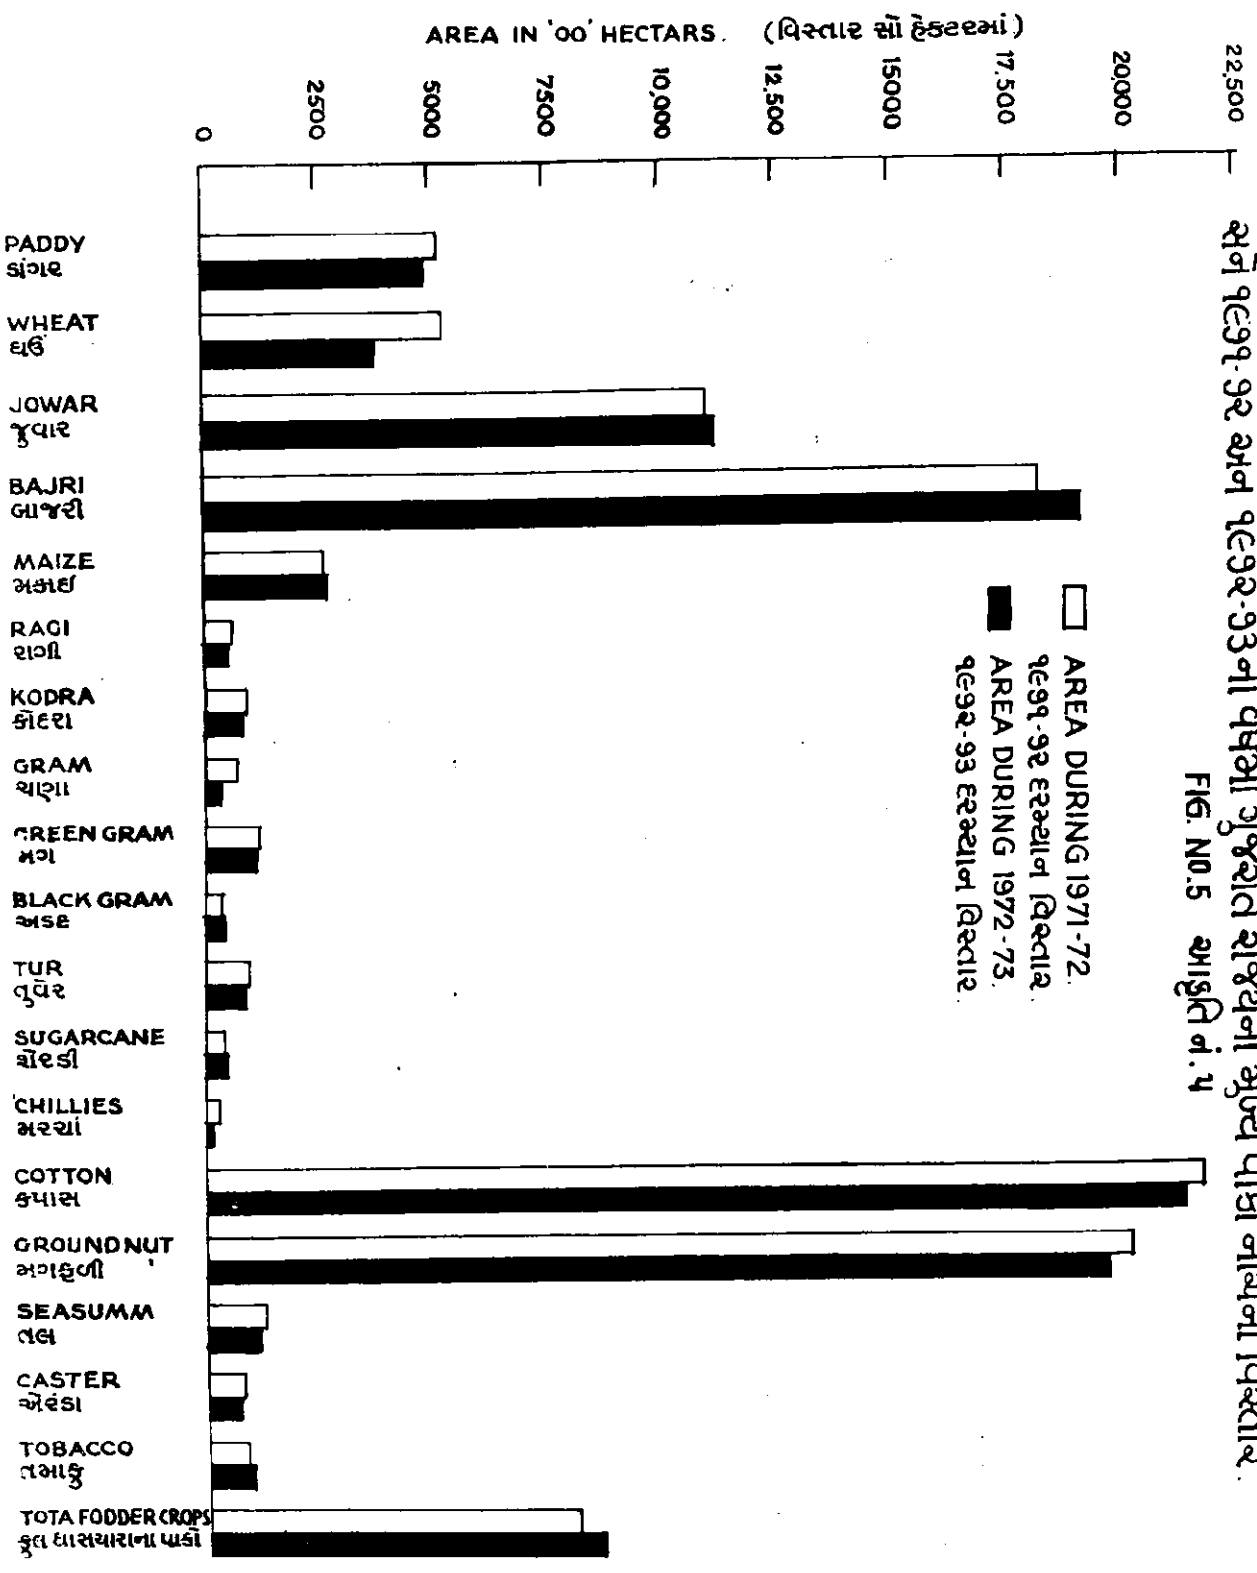

5. Area under different crops.

Total area under food and nonfood crops during the year under report is 50061 (hundred) hectares and 53026 (hundred) hect. respectively as against 51604 (hundred) hectare under food crops and 53672 (hundred) hectares under non-food crops during the previous year.

Information on Crop wise area and percentage of total gross area under each crop during the year 1971-72 and 72-73 is shown in the statement given below. Bar chart depicting the said information is shown in Fig. 5.

Crop wise area of principal food and non food crops and its percentage to total cropped area for the year 1971-72 and 72-73 is given below.

Sr. No.	Name of the crop	1971-72		1972-73

30.	Misc. nonfood crops	2	—	9	—
31.	Total nonfood crops	53672	51.0	53026	51.4

Jowar, bajri, cotton and groundnut crops jointly accounts for 69.0 % of the total cropped area during the year under report as against 67.4 % of the total cropped area during the previous year. These four principal crops are found to have been grown in almost all the districts of the State. Remaining 31.0 % of the total cropped area is under other crops. The graph showing fluctuation in area under these crops is shown in Fig. 6.

(6) Crop-wise state average yield per hectare and the total out turn during the year under report and in previous year are presented in summary table 'E'. While Farm Harvest prices of Principal crops and month wise daily agricultural wages for the year 1971-72 and 1972-73 are shown in summary tables 'F' and 'G'.

The number of live stock, poultry and agricultural machinery as per 1971 live stock census are shown in table 'H'.
