P R E F A C E

This volume on District Educational Statistics for the State of Punjab is the eighteenth in the series of such volumes which will be brought out for all the States and Union Territories. The main aim is to highlight the inter-district variations in a State by giving educational data at district levels with the help of some important indices such as Enrolment Ratio, Percentage of Trained Teachers, Per Capita Expenditure and Teacher Pupil Ratio etc.

In order to ascertain whether the educational imbalances have widened or narrowed down with time the data for the year 1976-77 has been analysed and compared with that for the year 1970-71.

I take this opportunity to express my appreciation of the cooperation received from the Director of Education, Punjab and the project staff of the Planning, Monitoring and Statistics Division who have prepared this report.

I N T R O D U C T I O N

Regional imbalances do exist in the field of Educational Development just as in urbanisation, industrialisation, distribution of Income and Wealth etc. with a view to highlight the regional imbalances in the educational sector, the Ministry of Education and Culture brings out the publication 'Educational Statistics - District-wise' quinquennially.

2. A volume of this nature was first published by National Council of Educational Research & Training in 1960-61. Thereafter it was decided that such reviews will be brought-out in respect of each State every five years by the Ministry of Education & Culture. Accordingly, the reviews for the year 1965-66 were brought out by this Ministry in respect of some of the States.

3. For making inter-district comparisons possible, some important indices such as Enrolment Ratios, Percentage of Trained Teachers and Per Capita Expenditure on Education have been worked out. These indices show wide range of variations between the districts and hence the need for formulating educational plans at the district level.

II - AREA AND POPULATION

4. There were 11 districts in Punjab in 1971. After reorganisation of the State in 1977 the number increased to 12. Total area of the State also slightly increased from 50362 Sq. Kms. in 1971 to 50376 in 1976. In 1971, Ferozepur had the highest area of 10145 Sq. Kms. followed by Bhatinda (7022 Sq. Kms.) and Sargur (5407 Sq. Kms.). The district-wise area figures after the re-organisation in 1977 are also given in the Statement (I). District-wise details of area, population and density of population for 1971 as well as 1977 have been given in Statement (I).

5. In 1971, Punjab had a population of 135.5 lakhs (72.7 lakhs Males and 62.8 lakhs Females). In 1971 among the districts the population varied from 19.06 lakhs in Ferozepur to 4.30 lakhs in Kapurthala. For 1977, the total population of the State is estimated to have increased to 150.1 lakhs (79.9 lakhs Males and 70.2 lakhs Females). Among the districts the highest population was reported by Amritsar 20.3 lakhs followed by Jullundur 16.1 lakhs and the estimated population is the lowest in case of Kapurthala 4.76 lakhs in 1977. It may be seen from the Statement (I) that population of Bhatinda and Ferozepur districts declined in 1977 as the new district of Faridkot was created from these districts.

6. The over-all density of population per Sq. Km. was 269 in 1971 for the State. Among the districts which varied from 188 in Bhatinda and Ferozepur to 428 in Jullundur. The population density was estimated to be 298 per Sq. Km. in the State for the year 1977. Table (I) below gives a general view of the extent of variation in area, population and density of population.

TABLE NO. (1) - EXTENT OF VARIATION IN AREA, POPULATION & DENSITY OF POPULATION

7. The total population of the State including that of different districts for the year 1971 relates to 1971 Census figures. However population figures on 1977 and age-group population figures for both the years as on 1st April given in the report are based on the revised population projections received from the office of the Registrar General of India. District-wise population for the age-groups 6-11, 11-14 and 14-17 for both the years of the report has been calculated by using the following formulae:

$$p_{6-11}^i = k \cdot p_{6-11}^i$$

Where K = $\frac{P_{6-11}}{P}$

Our assumption being

$$\frac{P_{6-11}}{P} = \frac{p_{6-11}^i}{p^i} \quad i = 1, 2, 3, 4.$$

Where

- P = Total Population of the State.
- P_{6-11} = Total 6-11 age-group population of the State.
- p^i = Total population of ith district
- p_{6-11}^i = Total 6-11 age-group population of the ith district.

8. To get sex-wise break-up of the total population of different age-groups for the districts, after calculating the total population the Girls population is estimated from the above formula with the difference that total population is replaced by Girls population. The Boys population is compiled by simple residual method viz. Boys population in the age-group 6-11 = Total population of 6-11 age-group minus total Girls population in the age-group 6-11.

9. The total population of the age-group 6-11 of the whole State was estimated to be 19.07 lakhs (10.08 lakhs Boys and 8.99 lakhs Girls) forming 12.7 % of the whole population of the State in 1977.

10. Similarly the estimated population of the age-group 11-14 works out to 11.11 lakhs (5.94 lakhs Boys and 5.17 lakhs Girls) constituting 7.4 % of the total population in 1977.

11. 14-17 age-group population of the State was 9.5 lakhs in 1971 which is estimated to increase to 10.58 lakhs forming 5.67 lakhs Boys and 4.91 lakhs Girls in 1977. The total 14-17 age-group population of 1977 was 7.1 of population of the whole State.

12. Thus of the total population of 135.5 lakhs the School going population in age-group 6-17 years was 38.01 lakhs (20.33 lakhs Boys and 17.68 lakhs Girls) in 1971. In 1977 the School going children population formed 27.2% (27.1% Boys and 27.2% Girls). District-wise details of population for different age-groups have been given in the Statement (2).

III - LITERACY

13. According to 1971 Census the effective literacy viz. the number of literates per one hundred of population excluding the 0-4 age-group was 23.8 for the whole State. It was 31.8 for Males and 14.4 for Females. Among the districts of the State the highest literacy 34.8 was in Ludhiana followed by 32.5 in Jullundur.
