Famine.—In 1899-1900 the rains failed, and the district was affected throughout by severe famine. The outturn of crops for the year was estimated at 49 per cent. Relief works were opened in September-1899, and were continued till September 1902, the daily average number being 3,826. In 1899-1900, the highest number relieved was 123,247, and in receipt of gratuitous relief, 72,473. The death-rate *per mille* was 134·91. The total deaths from all causes on relief works were 8,181, of which 3,924 were attributed to diarrhoea and 1,802 to cholera. The percentage proportion among the relief workers in the district was 40 males, 45 females and 15 children. In 1900-1901 the area affected was 267 square miles, and the population 43,000, or 15 per cent. of the total. The highest number in receipt of relief was 5,716 in December 1900, and gratuitously relieved 4,013. The death-rate for the year was 64·76 *per mille* in the district. In 1901-1902 the area affected was 706 square miles, and the population 86,000 or 29 per cent. of the total. The total daily average attendance on relief works, which was reduced to 10 in October 1901, again rose to 3,253 in May 1902. The number in receipt of gratuitous relief was a little over 400. The death-rate was 60·45 *per mille*. Since 1901-1902 the district has remained unaffected. (For further details see Table No. XIII.)

Plague.—The first indigenous case of plague occurred in Ankleshwar town in April 1898, and to the end of July only 4 more sporadic cases were registered. It assumed epidemic form in the following August and caused 200 deaths. It then spread to some thirteen villages near Ankleshwar, and reached Broach town in September. The total mortality up to the end of March 1914 in the district amounted to over 11,000 or 4 per cent. of the total population :—
