This book should be returned on or before the last date stamped below.

An overdue charge of Re. 1/- will be levied for each day the book is kept beyond this date.
"A COMPUTABLE GENERAL EQUILIBRIUM ANALYSIS OF MONEY, FINANCE AND ECONOMIC ACTIVITY IN INDIA"

A THESIS SUBMITTED TO THE UNIVERSITY OF PUNE FOR THE DEGREE OF DOCTOR OF PHILOSOPHY IN ECONOMICS

BY VEENA KESHAV PAILWAR

UNDER THE GUIDANCE OF DR. V.S. CHITRE PROFESSOR OF ECONOMICS, GOKHALE INSTITUTE OF POLITICS AND ECONOMICS, (DEEMED TO BE A UNIVERSITY) SHIVAJINAGAR, PUNE - 411004

SEPTEMBER, 1997
CERTIFICATE
(FORM 'A')

Certified that the work incorporated in the thesis entitled "A COMPUTABLE GENERAL EQUILIBRIUM ANALYSIS OF MONEY, FINANCE AND ECONOMIC ACTIVITY IN INDIA", submitted by MISS VEENA KESHAV PAILWAR, was carried out by the candidate under my guidance. Such material as has been obtained from other sources has been duly acknowledged in the thesis.

V. S. CHITRE
Research Guide

Date: 27th September, 1997
Pune 411004.
ACKNOWLEDGEMENTS

First and foremost, I would like to thank my Ph.D guide, Professor V.S. Chitre, Gokhale Institute of Politics and Economics, for his valuable guidance. On several occasions, I was benefitted by his deep understanding of the theoretical issues as well as inter-linkages working in the economy. During my long association with him, he patiently went through several drafts of this thesis, pointed out logical weaknesses in it, posed thought provoking queries and provided constructive suggestions which definitely improved my understanding of the subject, sharpened my writing skills and enabled me to present this thesis in its present form.

I am highly indebted to Shri V. P. Ojha of Shri Ram College of Commerce, University of Delhi, for explaining me the process of carrying out simulation experiments using the mathematical package GAMS and also sparing his valuable time for discussions related to the issue of infeasibilities in solutions obtained using this package.

I am thankful to Professor K. Parikh, Director, Indira Gandhi Institute Of Development Research (IGIDR), Bombay for permitting me to use the excellent computer facilities available at IGIDR. I am also thankful to Mr Satyanarayan, a Ph.D. student at IGIDR, for helping me with the GAMS Syntax.

I sincerely acknowledge the help received in proof-reading some of the chapters in this thesis from Ms Raji Rajan and Ms Priyanka Sood, friends and colleagues at National Council of Applied Economic Research.

I thank the University of Pune for granting me U.G.C. Junior and Senior Research Fellowship without which it would have been difficult for me to pursue this time consuming work.

I take this opportunity to express my profound gratitude to my parents who constantly gave me mental strength, encouragement, and inspiration to complete this work.

My thanks are also due to my brother, Pankaj, for helping me with the computers as well as for proof-reading some of these chapters.

(Veena Patelwar)

Chapter 1

INTRODUCTION

1.1 Background

1

1.2 Chapter Scheme

4

Chapter 2

CONCEPTS IN GENERAL EQUILIBRIUM ANALYSIS AND A SELECT REVIEW OF LITERATURE

8-106

2.1 Concepts in General Equilibrium Analysis

8

2.1.1 Definition of CGE Model

8

2.1.2 Types of Computable General Equilibrium Models

11

2.1.3 Major Weaknesses of the CGE Models

22

2.1.4 Integration of Money in General Equilibrium Framework

23

2.2 A Select Review of Literature

45

2.2.1 Modelling of the Financial Sector in the Reviewed Literature

45

2.2.2 A Select Review

60

2.2.3 Conclusions

103
Chapter 3
A FINANCIAL SOCIAL ACCOUNTING MATRIX FOR INDIA

3.1 Introduction
3.2 Basic Structure of a SAM
3.3 The Disaggregated Financial Social Accounting Matrix for India
   3.3.1 The Base Year
   3.3.2 Sources of Data
   3.3.3 The Level of Disaggregation
3.4 Construction of the FSAM-1983-84 for India
   3.4.1 Current Account of the FSAM
   3.4.2 Capital Account of the FSAM

Chapter 4
THE MODEL

4.1 Introduction
4.2 Description of the Model
   4.2.1 Real Sector
   4.2.2 Financial Sector
   4.2.3 Interim Period Model: Dynamics
4.3 Inter-linkages and Conclusions
   4.3.1 Interlinkages from the Financial Side to the Real Side
   4.3.2 Interlinkages from the Real Side to the Financial Side

Chapter 5
SIMULATION AND SENSITIVITY ANALYSIS

5.1 Parameter Values and Model Calibration
5.2 Policy Simulations
   5.2.1 Monetary Policy Adjustments
   5.2.2 Fiscal Policy Adjustments
5.2.3 Exogenous Change
5.2.4 Simulation in a Partially Liberalized Regime
5.3 Sensitivity Analysis
5.4 Summary and Highlights

Chapter 6
CONCLUSIONS AND FURTHER RESEARCH WORK

6.1 Contribution of the Study
6.2 Major Findings, Insights Gained and Policy Implications
   6.2.1 Major Findings and Insights Gained
   6.2.2 Policy Implications
6.3 Suggestions for Further Research
