TO-DAY AND TO-MORROW

THIS series of books, by some of the most distinguished English thinkers, scientists, philosophers, doctors, critics, and artist, was recognized on publication as a noteworthy event. Written from various points of view, one book frequently opposing the argument of another, they provide the reader with a stimulating survey of the most modern thought in many departments of life. Several volumes are devoted to the future trend of Civilization, conceived as a whole; while others deal with particular provinces, and cover the future of Woman, War, Population, Clothes, Wireless, Morals, Drama, Poetry, Art, Sex, Law, etc.

It is interesting to see in these neat little volumes, issued at a low price, the revival of a form of literature, the Pamphlet, which has been in disuse for 200 years.
