1. CHAPTER I—INTRODUCTION ..... 1
2. CHAPTER II—RESULTS OF ANALYSIS ..... 3
   (a) PERCENTAGE MORTALITY ..... 3
   (b) SECULAR TREND ..... 6
   (c) SEASONAL DISTRIBUTION ..... 9
   (d) ZONES OF HIGH, NORMAL AND LOW MORTALITY ..... 21
3. CHAPTER III—CONCLUSION ..... 33
4. APPENDIX ..... 39
List of Tables

TABLE I—Annual mortality from cholera, small-pox and plague expressed as percentage of total mortality from all causes in United Provinces during 1906—45 3

TABLE II—Annual mortality rate per one thousand population from cholera, small-pox and plague during 1906—45 7

TABLE III—Monthly deaths from cholera in United Provinces expressed as percentage of total deaths from cholera during the year, for the years 1906—45 10

TABLE IV—Monthly deaths from small-pox in United Provinces expressed as percentage of total deaths from small-pox during the year, for the years 1906—45 14

TABLE V—Monthly deaths from plague in United Provinces expressed as percentage of total deaths from plague during the year, for the years 1906—45 18

TABLE VI—Adjusted values of seasonal indices (normal=100) for cholera, small-pox and plague in the United Provinces based on data for the period 1906—45 21

List of Graphs

GRAPH I—Showing percentage mortality and general tendency for cholera, small-pox and plague in United Provinces during 1906—45.

GRAPH II—Showing mortality rate (deaths per thousand of population) and general tendency for cholera, small-pox and plague in United Provinces during 1906—45.

GRAPH III—Showing seasonal indices of mortality from cholera in United Provinces based on data over the period 1906—45.

GRAPH IV—Showing seasonal indices of mortality from small-pox in United Provinces based on data over the period 1906—45.

GRAPH V—Showing seasonal indices of mortality from plague in United Provinces based on data over the period 1906—45.
GRAPH VI—Dot-diagram 1—Showing districts of high, normal and low mean mortality from cholera in United Provinces based on data over the period 1906—45.

GRAPH VII—Dot-diagram 2—Showing districts of high, normal and low variation from cholera in United Provinces based on data over the period 1906—45.

GRAPH VIII—Dot-diagram 3—Showing districts of high, normal and low mean mortality and variation from cholera in United Provinces based on data over the period 1906—45.

GRAPH IX—Dot-diagram 4—Showing districts of high, normal and low mean mortality from small-pox in United Provinces based on data over the period 1906—45.

GRAPH X—Dot-diagram 5—Showing districts of high, normal and low variation from small-pox in United Provinces based on data over the period 1906—45.

GRAPH XI—Dot-diagram 6—Showing districts of high, normal and low mean mortality and variation from small-pox in United Provinces based on data over the period 1906—45.

GRAPH XII—Dot-diagram 7—Showing districts of high, normal and low mean mortality from plague in United Provinces based on data over the period 1906—45.

GRAPH XIII—Dot-diagram 8—Showing districts of high, normal and low variation from plague in United Provinces based on data over the period 1906—45.

GRAPH XIV—Dot-diagram 9—Showing districts of high, normal and mean mortality and variation from plague in United Provinces based on data over the period 1906—45.
