PREFACE

IN JULY 1935, Government desired that the public mind should be educated in the various activities of Government since the introduction of the present constitution and suggested that Heads of Departments under the Development Department should prepare an account of the progress achieved in each Department. The Agricultural Department was fortunate in having a "Popular Account" of its work published in 1922. The present publication aims at bringing the book upto date both in matter and presentation and includes information relating to a period of 13 years from 1922 to 1935.

As I write, I am conscious of two facts: that the old order is fast changing and will quickly give place to the new. The new constitution is soon to dawn. Secondly, in the activities of the Department things have moved so quickly during the last year or two that by the time the Account reaches the hands of the public it would almost cease to be upto date in at least two sections, namely, live-stock improvement and demonstration.

The preparation of an Account of this kind, comprehensive and popular, depicting the various activities of the Department must have meant a good deal of work to every member of my staff. I avail myself of this opportunity to acknowledge the help so readily given. Equally difficult is the editing of such a publication but I was fortunate in having the whole-hearted assistance of M.R.Ry. Rao Bahadur G. N. Rangaswami Ayyangar Avargal, but for whose ready help it would not have been possible to bring it out in so short a time. The hard and persistent effort needed to collate the information in such a manner as to make it readable and interesting was at the sacrifice of the leisure of both Mr. Rangaswami Ayyangar and his staff to whom I owe my sincere thanks.

MADRAS,
18th February 1937.

D. ANANDA RAO,
Director of Agriculture.
