## ACKNOWLEDGEMENT

**T**HE soil survey of Missisquoi, Brome and Shefford Counties was financed by the Experimental Farms Service of the Dominion Department of Agriculture. Macdonald College provided the headquarters and laboratory facilities for the analytical studies. The Dominion Department of Mines and Resources supplied the topographic base maps.

The authors of this report wish to acknowledge their appreciation for suggestions and assistance received from the following:

Mr. D. McClintock, agronome for Brome County for valuable information on the agricultural development in the area.

Prof. L. C. Raymond, Macdonald College, for information regarding crop and pasture improvement.

Dr. W. A. DeLong, Macdonald College, for assistance in the laboratory.

Dr. R. T. D. Wickenden, Department of Mines and Resources, Ottawa, for information on the geology of the area.

Dr. A. Leahey, Central Experimental Farm, Ottawa, for suggestions regarding the classification of soils and the organization of this report.

Members of the Horticultural Division, Central Experimental Farm, Ottawa, for information of fertilizer studies in connection with the apple orchards in the Frelighsburg area.

# TABLE OF CONTENTS

	Page
I. Introduction.....	7
II. Description of the Area.....	9
1. Location and Extent.....	9
2. Physiography.....	9
(a) Topography.....	9
(b) Geology.....	10
(c) Surface Geology.....	11
(d) Drainage.....	14
3. Vegetation.....	15
4. Climate.....	15
5. History and Development of Agriculture.....	18
6. Transportation and Markets.....	19
III. Morphology and Genesis of Soils.....	21
IV. Soil Survey Methods.....	24
V. Soils.....	25
A. Soils of the Appalachian Upland Developed from Till.....	29
Ascot sandy loam.....	30
Ascot sandy loam — shallow phase.....	30
Magog loam.....	31
Berkshire loam.....	32
Berkshire loam — shallow phase.....	32
Blandford loam.....	33
Blandford loam — shallow phase.....	34
Blandford sandy loam.....	34
Blandford gravelly loam.....	34
Woodbridge loam.....	35
Woodbridge loam — shallow phase.....	35
Peru loam.....	36
Roxton slaty sandy loam.....	36
Mawcook sandy loam.....	37
Mawcook gravelly sandy loam.....	38
Racine sandy loam.....	38
Racine sandy loam — shallow phase.....	39
Brompton sandy loam.....	39
Brompton gravelly loam.....	40
Shefford shaly loam.....	40
Shefford shaly loam — shallow phase.....	41
Milton sandy loam.....	41
B. Soils of the St. Lawrence Plain Developed from Till.....	42
St. Sebastien shaly loam and shaly clay loam.....	42
Henryville loam.....	43
Bedford sandy clay loam.....	44
Bedford clay loam.....	45
Ste. Brigide clay loam.....	45
Ste. Brigide sandy loam.....	46
Farmington loam.....	46
C. Soils of the Appalachian Area Developed from Water-Deposited Materials.....	46
Colton sandy loam.....	47
St. Francis sandy loam.....	48
Knowlton gravelly sandy loam.....	49
Rougement gravelly loam.....	49
Rougement gravelly sandy loam.....	50
Sheldon sandy loam.....	50
Suffield clay loam.....	51
Suffield loam.....	52

Milby sandy loam.....	52
Milby silt loam.....	52
Alluvial soils — undifferentiated.....	53
D. Soils of the St. Lawrence Plain Developed from Water-Deposited Materials.....	53
Ste. Sophie sand.....	54
Rubicon sandy loam.....	55
Rubicon fine sandy loam.....	56
St. Damase sandy loam.....	56
Yamaska silt loam.....	57
Yamaska loam and fine sandy loam.....	57
Richelieu clay loam.....	57
Iberville clay loam.....	58
Ste. Rosalie clay loam.....	58
Ste. Rosalie clay loam-calcareous phase.....	59
Ste. Rosalie loam.....	60
Ste. Rosalie heavy clay loam.....	60
E. Miscellaneous Soils.....	60
Iron Hill gravel.....	61
Rough stony land.....	61
Muck.....	61
Peat.....	61
Swampy land.....	62
Soil Complexes.....	62
VI. Land Uses and Agricultural Methods.....	63
VII. Crop Adaptation and Land Use Capability.....	66
Soils of Land Capability Class I.....	68
Soils of Land Capability Class II.....	68
Soils of Land Capability Class III.....	68
Soils of Land Capability Class IV.....	69
Soils of Land Capability Class V.....	69
VIII. Discussion of Analytical Data.....	69
IX. References.....	70
