PREFACE

IN the preparation of this work on water-power legislation, the author has had the valuable assistance of many people who have given freely of their time and advice. The author wishes especially to acknowledge with deepest gratitude the able guidance given by Professor Lindsay Rogers of Columbia University. To many men prominent in public life the author is greatly indebted: to Mr. Harry A. Slatery, prominent among conservation leaders; to Philip P. Wells, Deputy Attorney General of Pennsylvania and member of the Giant Power Commission of the same state; to the former congressmen John J. Esch of Wisconsin, William Kent of California, Thetus Sims of Tennessee—all of whom were active during the water-power controversy; to Senators George W. Norris of Nebraska, James Wadsworth of New York, and Thomas J. Walsh of Montana; to Judson King, to Mr. O. C. Merrill, and to ex-Secretary of the Interior Walter L. Fisher. To all of these men who have supplied valuable suggestions and helpful documentary sources the writer extends his thanks. In the trials of proof-reading the author has been greatly aided by Miss Gertrude Chalmers of the University of Chicago Library, by Edward P. Kerwin, Paul Kirkley, and William Klevs.

For any blame for errors of fact, judgment, or composition in the text the author absolves all of the above and through this preface cheerfully accepts the responsibility for his work.
