The Baluchistan District Gazetteer series comprise 8 volumes of Text or A Volumes :—

British and adminis- tered territory.	{	I.      Zhob District.
		II.     Loralai District.
		III.    Sibi District.
		IV.     Bolán Pass and Nushki Railway Dis- trict.
		IV-A.  Chágai District.
Native States      ...      {	{	VI.     Sarawán Division of Kalát.
		VI-A.  Kachhi           do.
		VI-B.  Jhalawán       do.
		VII.    Makrán           do.
		VII-A.  Khárán       do.
		VIII.  Las Béla State.

It has been found convenient to bind in one volume, volumes IV and IV-A; VI, VI-A and VI-B; and VII and VII-A. In addition to these, there are six volumes of Statistical Tables (or B volumes) for six Districts in British and administered territory; the Bolán and Chágai Statistical Tables being bound in a single volume.

Orders regarding the compilation of an Index volume had been passed by the Government of India from time to time and it was finally decided in July\* 1903 that the preparation of an Index volume was considered to be an essential feature of the District Gazetteer series and it was laid down that "this volume should refer to all localities, etc., in the Province which will form the subject of Imperial Gazetteer articles and will therefore also appear in the Provincial volume or volumes as well

as to all places which are described in the A volumes of the District Gazetteers. The divisions, districts, sub-districts, units of administration such as tahsils and the more important towns should receive mention on the lines indicated in Circular No. 2948-60, dated the 24th September 1902; in the case of mountain ranges, rivers and canals it should be stated what districts they are situated in or pass through; while in the case of minor entries it will suffice to note the latitude and longitude, the district in which the place is situated and (for towns and villages) the population. In every case reference should be made to the volume and page of the District Gazetteer series in which the place, etc., is referred to, while those places which are also the subject of Imperial Gazetteer articles should be marked with an asterisk."

The Local Government considered it desirable to add brief notes about the main tribes of the Province.

The present volume, which forms volume IX of the Baluchistán District Gazetteer series, has been prepared on the plan indicated above and copies of Tables of contents prefixed to the various District Gazetteers have also been embodied in an Appendix. The latter may be found useful in connection with administrative and economic subjects which are not mentioned in the first portion of the volume.

The work has been compiled under my supervision by M. Gul Muhammad, Head Clerk of the Gazetteer office.
