COLLEGE AND UNIVERSITY LIBRARY STATISTICS 1939-40.

General Facts About the Compilation

THE PURPOSE of this publication is to present basic statistical data on the libraries of the institutions of higher education in the United States and its outlying parts. The U. S. Office of Education has issued previous compilations in which college and university library statistics have been included, but this is the first separate comprehensive one for this type of library. Furthermore, it is planned to make the compilation the beginning of a series to be issued at periodic intervals so that college administrators, librarians, and others will have available essential data necessary in formulating policies and planning for future library development.

Method

To gather data for the compilation, the U. S. Office of Education used the uniform statistical report for the libraries of the institutions of higher education,¹ a blank devised by a joint committee composed of representatives from the American Library Association, State library agencies, and the U. S. Office of Education. The president of every college and university listed in the 1940 *Educational Directory* of the U. S. Office of Education was requested to have his librarian submit library statistics for the fiscal year ended June 30, 1940, to the Library Service Division. After 4 months, a second request for the statistics was sent to all libraries which had not replied. All returns were edited for possible discrepancies and omissions. In order to clear up misinterpretations, some 400 letters of inquiry were addressed to libraries. As a further assurance of the reliability of the data sent in, it should be noted that the uniform report form with its terms defined is being used regularly by the American Library Association and by many of the State library agencies. Consequently, it is reasonable to assume that the figures submitted by the libraries possess a high degree of comparability and reliability.

From the returns, a detailed table of basic data (table 12) was compiled with the institutions grouped according to the categories used in the *Educational Directory*:

Universities and 4-year colleges granting degrees.
Professional and technological schools.

¹ U. S. Office of Education Form 8-072.

- 4-year teachers colleges.
- 2- or 3-year normal schools.
- Junior colleges.

This detailed table served as a basis for the State summaries (tables 2 to 5) which give totals for bookstock, service, personnel, and finances for the various types of institutions. A further analysis of the data was made by compiling tables in which the libraries were distributed by number of volumes possessed as of June 30, 1940, by number of volumes added during the fiscal year, by size of staff, and by amount of operating expenditures. The data obtained from the colleges for Negroes were used also as part of a separate study, which has been published already.³

There are no doubt many other arrangements of the data which would be both useful and significant, if additional time and assistance had been available. One would have been to differentiate the institutions by type of control; and another, to separate the institutions offering graduate work from those not offering it. The *Educational Directory* furnishes the data necessary for such grouping, and it is hoped that supplementary studies will be made using data presented in this compilation. Ratios and per student averages would be especially desirable, as would also tables showing trends.

Number of Returns

Requests for statistical information were sent to every one of the 1,699 institutions of higher education listed in the 1940 *Educational Directory*. To this request for data 1,321 libraries replied, a return of 77.75 percent (table 1). The highest percentage of returns came from the college and university group (85.69 percent) and the lowest from the professional and technological schools (57.79 percent). Of the colleges and universities reporting, 7 asked that their data be considered confidential. Among the junior colleges, 6 reported that they had no separate library facilities but instead used those of the high school or a nearby public library. The junior colleges so reporting were: the Citrus Junior College and the Stockton Junior College in California; the Lincoln Junior College in Missouri; the Capitol Hill Junior College and the Kiowa County Junior College in Oklahoma; and the Wyomissing Polytechnic Institute in Pennsylvania.

The figure of 1,321 institutions supplying library data for this compilation is not as high as the number submitting general statistics for the recent issues of the *Biennial Survey of Education in the United States*. In 1933-34, for instance, 1,327 institutions reported; in 1935-36, 1,362 institutions; in 1937-38, 1,586 institutions; and in

³ U. S. Office of Education. National survey of the higher education of Negroes. General studies of colleges for Negroes. Washington, U. S. Government Printing Office, 1942. p. 95-108. (Misc. No. 6, volume II.)

1939-40, 1,708 institutions. However, it may be noted that only one or two library items were requested in the comprehensive higher education statistics contained in the *Biennial Survey* instead of the 88 major items with additional breakdowns on the library blank. In addition, the general field service of the Office was used extensively in obtaining the general reports from institutions of higher education but was employed only to the extent of obtaining 148 reports from college libraries.

It is hoped that in the future, as libraries become more accustomed to the use of the uniform statistical report blank, the percentage of returns will grow steadily. In this way, both government and non-government agencies, working for the development of libraries, will have adequate, basic data available on libraries.

Table 1.—Total number of institutions of higher education and number and percent reporting, 1939-40

Item	Total	Colleges and universities	Professional and technological schools	Teachers colleges	Normal schools	Junior colleges
Number listed in Educational Directory, 1940.....	1,699	734	263	181	62	459
Number reporting.....	1,321	629	152	149	40	361
Percent reporting.....	77.75	85.69	57.79	82.32	64.52	78.47

General Findings

How large are college book collections? How fast are they growing? To what extent are they used? How many librarians and assistants are employed? What are their total operating expenditures and capital outlays? The summaries (tables 2 to 5) afford answers to this series of questions about college and university libraries, both for the Nation as a whole and for the individual States.

As of June 30, 1940, the reporting libraries contained 71,666,801 volumes; they had added 3,194,578 during the year; they had a home circulation of 26,441,007 volumes and reserved book use of 36,591,088 volumes; they employed 6,760 full-time workers, including 4,716 professional librarians, but excluding student assistants paid on an hourly basis; their operating expenses amounted to \$17,976,231 and their capital outlays to \$4,270,470 which included sites and new buildings, additions to buildings and new equipment. The data for the libraries in the outlying parts are carried in a separate category at the end of each summary (tables 2-5).

Number of Volumes

Of the total number of volumes in the institutions of higher education (table 2) the college and university group contains 82.9 percent;

the professional and technological schools, 6.4 percent; teachers colleges, 6.2 percent; the normal schools, 0.6 percent; and the junior colleges, 3.9 percent.

The libraries of the institutions of higher education taken in the aggregate added 2.6 books per student (undergraduates and graduates included) during the year; they contained 59.8 books per student (tables 2 and 3). The college and university group possessed 65.4

books per student, the teachers colleges 37.3 books per student, and the junior colleges 25.3 books per student. The reporting libraries of the colleges and universities added during the year 2.8 books per student, the teachers colleges 2.2 books per student, and the junior colleges 1.8 books per student. In connection with averages for the teachers colleges, it should be noted that both the Teachers College Library of Columbia University and the Library at George Peabody College for Teachers have been placed in the college and university group, as each is part of a university system and not an independent teachers college library.

Use of the Library

Since library collections exist not for themselves, but for service to students and faculty, the measurement of use is of prime importance. To be of the greatest significance both qualitative and quantitative facts should be at hand. Unfortunately, in this general compilation it has been possible to obtain only certain quantitative data and these are subject to decided limitations. Statistics were requested for such items as number of volumes borrowed for home use, number of reserved books used in the building or taken out overnight, and extent of reference use.

The summary (table 2) covers the first two items but does not include reference use, the third item. This important phase of college library activity is not as yet recorded statistically except in a few cases.

Interpretation of circulation for home use and of reserved books must be made with extreme caution, because the figures are affected by such factors as methods of instruction, type of subjects taught, layout of building, regulations for the use of books, and living arrangements for the students. Calculations from the summaries (tables 2 and 3) show that, for the institutions as a whole, 21.7 books per student were borrowed for home use during the year. For the universities and colleges, the figure was 19 books per student; for the teachers colleges, 36 books per student; and for the junior colleges, 28.9 books per student. In the item of reserved books, the statistics for all institutions show a use of 30 volumes per student; for universities and colleges, 30.7 per student per year; for teachers colleges, 46.9 per student per year; for the junior colleges, 19.8 per year. The figures for reserved books are not complete because many institutions, as may be noted from the footnotes in the detailed statistics (table 12), do not record the use of reserved books within the building.

The replies to questions on the reference use of the libraries were not sufficient to justify tabulation. This situation may be explained by the fact that libraries heretofore have not attempted to record their reference use and also that the measurement of reference service is a

difficult process. On the uniform statistical form, reference use was defined as follows: -

A *general question* is any question which requires the use of library material in answering or which involves interpretation of the use of library tools resulting in the use of library material. Exclude all questions pertaining to the location of specific books or library tools.

A *search question* is any question of an investigatory or research nature requiring a search of 15 minutes or more.

Include under *bibliographies compiled* material of sufficient value to be typed and preserved.

Interlibrary Loans

Interlibrary loans may indicate weakness in a given book collection, or they may mean the operation of a well-planned system of cooperation in which different institutions assume responsibility for certain fields and then stand ready to lend to other libraries the printed materials in those chosen fields. Without a detailed analysis of the lending and borrowing of the libraries, interlibrary loan figures can show mainly the gross extent of this activity (table 2) and the ratio of borrowing to lending. The reporting libraries of the institutions of higher education borrowed 89,880 volumes and lent 65,896. The college and university group lent 1 volume through interlibrary loan for every one borrowed; the professional and technological school lent 1 for every 1.5 borrowed; the teachers colleges lent 1 for every 13.6 borrowed; the junior colleges lent 1 for every 8 borrowed.

Staff and Students

The libraries were asked to report their regular staffs under three major categories: Professional, subprofessional, and clerical and others. In accordance with library personnel practice, these terms were defined as follows:

A *professional assistant* is a member of the professional staff performing work of a professional grade which requires training and skill in the theoretical or scientific parts of library work as distinct from its merely mechanical parts and includes all the professional staff except the chief librarian or director, associate or assistant chief librarian, department heads, division heads, and heads of school, college, departmental, and laboratory school libraries.

To be classed as a professional assistant, the person must hold a professional position which requires the following educational background:

- (a) At least a bachelor's degree which includes 1 year of professional library education in the 4 years which lead to the bachelor's degree; or
- (b) An informal education considered by the librarian as the real equivalent of 4 years of college work plus 5 years' experience in a library of recognized professional standing. (This provision is to take care of those already in the profession who are performing duties which require a knowledge of books and library technique as taught in a library school.)

A *subprofessional assistant* is a person who performs under the immediate supervision of professional staff members, work largely concerned with the higher routine processes which are peculiar to library work and which require some knowledge of library procedure. (No assistant paid on an hourly basis should be included here.)

A subprofessional assistant should have had at least brief elementary training in library work as taught in a library summer session or a training class.

A *clerical assistant* is a person such as a typist, etc., who performs, under immediate supervision, processes which may require experience, speed, accuracy, and clerical ability of a high order, but do not require knowledge of the theoretical or scientific aspects of library work.

High-school graduation is presupposed for this classification.

"Others" usually includes those devoting either full or part time to the most simple clerical or manual tasks which involve no responsibility or independent judgment, such as the work performed by pages, shelvers, and beginning workers.

The building maintenance force is excluded from the figures, as are also student assistants paid on an hourly basis.

On the basis of the returns from all the institutions of higher education, 69.8 percent of the library employees are classed as professional; 8.7 percent as subprofessional; and 21.5 percent as clerical and other (table 3). For the university and college library group, the corresponding percentages are 67.8, 9.1, and 23.1; for the teachers colleges, 82.1, 11.4, and 6.5; for the junior colleges, 77.4, 7.0, and 15.6.

Calculations from the data on library staff and student enrollment (table 3) show that for the institutions of higher education as a whole, there is one library staff member for 179 students, undergraduate and graduate combined. For the universities and colleges, the average is 1 library staff member for 173 students; for professional and technological schools, it is 1 for 167 students; for teachers colleges, 1 for 233 students; for normal schools, 1 for 184 students; and for junior colleges, 1 for 202 students.

Source of Income

The precise determination of college library income is not a simple matter. Institutional accounting systems differ, and receipt items on statistical blanks are especially open to misunderstanding. In many institutions, items such as library salaries and building maintenance are charged not against a library budget but against a general institutional fund. Endowed institutions allocate certain sums for their libraries, but it is not always possible to specify which part comes from interest on endowment and which from tuition or other sources. Likewise, allocations from publicly controlled institutions may represent tax money, tuition, and some endowment interest. Colleges controlled by churches also present the problem of evaluating contributed services.

It is with these limitations in mind, therefore, that the facts in the summary of receipts (table 4) should be considered. Of the total

receipts reported, \$15,975,434, or 83.3 percent, was in the form of an allocation from the institutional budget, an amount which included \$164,370 listed as State or city grants made specifically to the library. Income from endowment and invested funds specifically designated for library purposes amounted to \$1,644,702, or 8 percent of the total. This latter amount also included gifts of money made for current operating expenses. Library fees, including only those which were credited directly to the library budget, aggregated \$835,499, or 4 percent of the total. Other income, which comprised fines and sales of publications when credited directly to the library budget and miscellaneous sources, amounted to \$600,605, or 3 percent.

Operating Expenses

The term "operating expenditures" in the compilation (table 5) includes expenses for the salaries of the library staff, wages of students employed on an hourly basis, purchase of books and periodicals, payments for binding and rebinding. The item, "other expenses," includes the amounts spent for supplies, printing, telephone, postage, freight, express, and similar purposes. Operating expenses do not include outlays for new buildings, alterations to buildings, sites, and new equipment, all of which are considered capital outlay. Further-

more, they do not include building maintenance. Of the total operating expenses, \$17,976,231, reported by the institutions, 52.3 percent went for salaries of the library staff; 6.9 percent for wages of students; 36.3 percent for books, periodicals, binding, and rebinding; and 4.5 percent for other operating expenses.

If only the university and college library group is considered (table 5), 51.5 percent of their total operating expense went for salaries, 7 percent for student wages, 36.7 percent for books, periodicals, binding, and rebinding. The corresponding figures for the teachers

colleges are 53.4 percent, 9.1 percent, and 34.5 percent; for junior colleges, 54.3 percent, 6.1 percent, and 35.8 percent.

The operating expenditures per student afford some significant figures. If all the institutions are considered as a whole, the total of \$14.79 was spent per student for library purposes during the year in question, of which \$7.72 per student was for staff salaries and \$5.37 per student for books, periodicals, binding, and rebinding. Corresponding figures for university and college libraries are \$16.06, \$8.27, and \$5.90; for teachers colleges, \$12.67, \$6.77, and \$4.38; for junior colleges, \$8.75, \$4.73, and \$3.14.

In connection with the foregoing, it may be well to note that authorities have recommended at least \$25 per student as the minimum for adequate library support.³ The president of one liberal arts college, at which honors courses are highly developed, has reported that his institution was spending \$85 per student for library purposes, but really should be spending \$100.⁴

A measure of library support frequently used is the ratio of library operating expenditures to the total expenditures of the institution for educational and general purposes, excluding capital outlay and auxiliary enterprises. Since the latter figures appear in the general statistics for the institutions of higher education, they are not repeated here. A few general calculations are worth noting, however. If all reporting institutions are considered, the library operating expenditures formed 3.81 percent of the total institutional expenditures, as defined above. For universities and colleges, the percentage was 3.83; for professional and technological schools, 2.32 percent; for teachers colleges, 4.68 percent; normal schools, 4.23 percent; and junior colleges, 4.33 percent.

Unfortunately, data for previous years are not available in a form which makes possible reliable comparisons and indications of trends. The only items which can be compared—and these only to a limited extent—are the number of volumes contained in the libraries and the annual expenditures (tables 6 and 7). For instance, the data obtained from the *Biennial Surveys* show that, in the period from 1929-30 to 1939-40, the holdings in the libraries of the institutions of higher education increased from 48,461,498 to 71,666,801 volumes, a gain of 47.8 percent. In 1929-30, 1,409 institutions reported; in 1939-40, 1,321.

The statistics (table 6) show that the rate of increase in number of volumes, taking 1929-30 as the base year, was as follows: by 1931-32, 9.1 percent; by 1933-34, 19.5 percent; by 1935-36, 29.7 percent; and by 1939-40, 47.8 percent. No statistics for library holdings were

³ McCrum, B. P. An estimate of standards for a college library. Lexington, Va., Journalism Laboratory Press, 1937. p. 78-79.

⁴ *Ibid.*, p. 4.

obtained in 1937-38. If the figures for two decades ago are considered, only 26,576,442 volumes were contained in the libraries of the institutions of higher education, but it should be noted that only 1,000 libraries reported in 1919-20, as compared with the larger numbers during the present decade.

An effort to indicate trends in expenditures did not succeed fully (table 7). The totals of money spent for library purposes do show an upward swing from 1929-30 to 1939-40, but it must be noted that the number of reporting libraries likewise increased during the period. The tabulation is presented, therefore, for the information contained in it.

Table 6.—Number of volumes in libraries, 1919-20 to 1939-40

Year	Type and number of institutions reporting				Number of volumes			
	Total	Colleges, universities, and professional schools ¹	Teachers colleges	Normal schools	Total	Colleges, universities, and professional schools ¹	Teachers colleges	Normal schools
1919-20.....	1,002	670	45	287	26,576,442	24,191,204	878,996	1,506,242

Further Analysis of the Findings

Distribution by Number of Books

The number of books in a college library is not a sound index to the adequacy of the book collection for service to students and faculty. The figure does throw some light on the subject, however, because it is a fair assumption that the larger the collection, the greater the

probability that it will contain titles suitable for the curricular and research needs of the institution.

A grouping of the libraries by size of collections affords some idea of the present status of our university and college libraries. From the facts presented (table 8), 43 percent of our college and university libraries have less than 25,000 volumes. In the case of the teachers college libraries, 52 percent have less than 25,000 volumes. The junior college libraries with less than 10,000 volumes form 78 percent of the total in that group. According to some specialists in library administration, 35,000 volumes constitute the minimum number with which a 4-year liberal arts college can perform adequately its functions.⁵ For teachers colleges a study has shown that the "typical" teachers college library contains 37,200 volumes.⁶ For junior colleges, the accrediting agencies have recommended from 3,000 to 10,000 volumes as the minimum number, but they specify that above all else the book and periodical collection must be suited to the needs of the curriculum.⁷

Table 8.—*Distribution of libraries by number of volumes*

Number of volumes in collection	Number of libraries					
	Total	Colleges and universities	Professional and technological schools	Teachers colleges	Normal schools	Junior colleges
Total	1,319	633	154	149	40	343
Fewer than 10,000.....	409	45	61	8	26	269
10,000 to 24,999.....	410	228	35	70	12	65
25,000 to 49,999.....	236	139	36	51	2	8
50,000 to 99,999.....	131	99	15	17
100,000 to 199,999.....	70	63	3	3	1
200,000 to 499,999.....	42	38	4
500,000 to 999,999.....	13	13
1,000,000 or more.....	8	8

At the other end of the scale (table 8) it may be noted that 8 libraries in the university and college group have collections of a million or more volumes and 21 are now above the 500,000 mark. Among the teachers colleges, 1 has more than 200,000 volumes and 3 fall within the bracket of 100,000 to 199,999 volumes.

Distribution by Annual Acquisitions

Perhaps more indicative of the competence of a college library than the gross number of volumes contained is the number of volumes added annually. The distribution of the reporting libraries by this

⁵ *Ibid.*, p. 23.

⁶ Barcus, T. R. The "typical" teachers college library. *Library Journal*, 68:361, Nov. 15, 1938.

⁷ Adams, H. M. Junior college library program. Chicago, American Library Association and Stanford University Press, 1940, p. 52.

factor yields some interesting information (table 9). Of the 1,271 institutions reporting on the item, 645 (50.7 percent) added less than 1,000 volumes during the year; 492 (38.7 percent) added between 1,000 and 4,999 volumes; 69 (5.4 percent) added between 5,000 and 9,999 volumes; and 65 (5.1 percent) added 10,000 volumes or more. Three institutions reported annual acquisitions in excess of 50,000 volumes: Harvard University, adding 79,888; Yale University, 68,892; and Columbia University, 50,082.

Of the college and university libraries, 30 percent acquired less than 1,000 volumes during the year. In the case of the teachers colleges, 35 percent added less than 1,000 volumes; and for the junior colleges, the corresponding percent is 85.

Table 9.—*Distribution of libraries by number of volumes added, 1939-40*

Number of volumes added	Number of libraries					
	Total	Colleges and universities	Professional and technological schools	Teachers colleges	Normal schools	Junior colleges
Total	1,271	618	128	146	36	333
Fewer than 1,000.....	645	189	96	51	27	282
1,000 to 4,999.....	492	311	36	87	9	49
5,000 to 9,999.....	69	54	6	7	—	2
10,000 to 14,999.....	26	25	—	1	—	—
15,000 to 24,999.....	21	21	—	—	—	—
25,000 to 49,999.....	16	15	—	—	—	—
50,000 to 99,999.....	3	3	—	—	—	—
100,000 or more.....	—	—	—	—	—	—

Although conclusions in this connection should be drawn cautiously, it might be well to note that a study of 20 selected college libraries rendering adequate service showed that the annual acquisitions of these institutions averaged 3,209 volumes.⁸ In a study of teachers college libraries doing good work, 1,500 volumes on the average were being accessioned annually.

At the upper end of the scale, it may be noted that, although no institution of higher education is adding more than 100,000 volumes annually, there are 3 universities in the bracket of 50,000 to 99,999 volumes. One teachers college is adding more than 10,000 volumes per year, and 2 junior colleges have annual accessions of more than 5,000 volumes. It should be remembered that both the Teachers College Library of Columbia University and the Library of George Peabody College for Teachers are included in the college and university group.

⁸ Randall, W. M., and Goodrich, F. L. D., *Principles of college library administration*. Chicago, American Library Association and University of Chicago Press, 1941. p. 219.

Distribution by Size of Staff

In order to obtain an over-all view of the personnel situation, the libraries were distributed by size of staff, with students on an hourly wage and janitorial force excluded (table 10). Although no specific conclusions regarding the adequacy of the staffs for the job at hand can be drawn from the figures, some significant facts do emerge.

Table 10.—*Distribution of libraries by size of staff*

Size of staff	Number of libraries					
	Total	Colleges and universities	Professional and technological schools	Teachers colleges	Normal schools	Junior colleges
Total	1,249	612	179	148	33	328
1.....	454	133	61	27	19	214
2 or 3.....	415	206	37	70	8	94
4 to 10.....	258	166	22	47	5	18
11 to 20.....	62	50	7	3	2
21 to 50.....	39	36	2	1
51 to 75.....	13	13
76 to 100.....	2	2
101 to 150.....	3	2
150 or more.....	3	3

For instance, of the 1,249 libraries reporting on the staff item, 454 (36.3 percent) are operating with a staff of 1, exclusive of student assistants paid on an hourly basis; and 869 (69.6 percent) of the total have staffs of 3 or fewer. At the top of the range, 60 institutions (4.8 percent) have library staffs of more than 20. Three libraries, all belonging to universities, have staffs numbering over 150. Columbia University libraries, with Teachers College and Barnard College excluded, lead with 232 full-time employees, followed by Harvard University with 169, and Yale University with 157.

Approximately a tenth (9.3 percent) of the libraries in the university and college group have staffs which number above 20 full-time workers. In the case of the teachers colleges, about half are operated by staffs composed of only 2 or 3 workers; and if the number of institutions with only 1 worker is added, 65.5 percent of the teachers colleges are manned by 3 persons or less. One teachers college library reported a staff of more than 20 employees. Of the 328 junior colleges reporting on the personnel item, 214 (65.2 percent) have regular staffs of only 1 librarian, 2 libraries are found in the 11 to 20-bracket, and no junior colleges have a library staff in excess of 20. In general, it would seem safe to say that far too many libraries are operating with staffs insufficient to fulfill the functions required of a college library.

Distribution of Libraries by Expenditures

In the final analysis, the amount of money expended for library service and facilities determines to a large extent the adequacy of a given library. The facts regarding the library expenditures, if libraries are grouped according to amount of expenditures, have considerable significance (table 11). According to these figures, 81 percent of our colleges and universities and 91 percent of our teachers colleges are spending less than \$25,000 per year for library service. In the case of junior colleges, 88.6 percent are allotting less than \$5,000 annually for library purposes.

Table 11.—*Distribution of libraries by operating expenses*

Amount of annual expenditure	Number of libraries					
	Total	Colleges and universities	Professional and technological schools	Teachers colleges	Normal schools	Junior colleges
Total	1,241	608	129	145	35	324
Less than \$5,000.....	668	233	91	30	27	287
\$5,000 to \$9,999.....	244	132	14	66	6	26
\$10,000 to \$24,999.....	193	128	18	37	2	8
\$25,000 to \$49,999.....	66	48	4	11	-----	3
\$50,000 to \$99,999.....	38	35	2	1	-----	-----
\$100,000 to \$299,999.....	25	25	-----	-----	-----	-----
\$300,000 or more.....	7	7	-----	-----	-----	-----

It is dangerous to make comparisons about the adequacy of college libraries without taking many factors into account. It is, therefore, with much caution that the foregoing figures should be contrasted with the findings of Randall and Goodrich regarding the annual expenditures of 20 selected college libraries rendering adequate service. According to that study, \$20,034 was the average amount expended. In the case of the teacher-college study, Barcus found that the "typical" teachers college library could be expected to spend \$12,025 annually on the average.⁹

In the university group, 7 institutions have annual operating expenses in excess of \$300,000, the highest being the \$542,543 expenditure of Columbia University Libraries. Among the teachers colleges, 11 libraries are spending between \$25,000 and \$49,999, and 1 reports a total of \$56,010 used for library purposes, Teachers College of Columbia University and George Peabody College again not being included. In the case of junior colleges, 3 have reached the \$25,000 and above group.

If the reporting libraries in the institutions of higher education are considered in the aggregate, 53 percent are spending less than \$5,000

⁹ Randall and Goodrich, *Op. cit.*; Barcus, *Op. cit.*

annually on their libraries; 2.6 percent are spending more than \$100,000 annually. In the light of these figures, it would seem evident that, although college and university libraries have made notable advances during the last several decades, financial support is still considerably below the adequate state.

Detailed Data About the Libraries

The preceding summaries and analyses present only a few of the possible combinations of facts about college and university libraries. In order that basic data may be available to administrators and others, however, certain statistical details about individual libraries have been compiled (table 12). From the report blank, 19 items were selected as being of likely significance. These do not exhaust the wealth of data contained in the returns, but rather represent what seems most useful, in the face of limitation of printing funds.

The compilation of detailed statistics (table 12) groups the individual libraries into the five major types: Colleges and universities, professional and technological schools, teachers colleges, normal schools, and junior colleges. Within each group the arrangement is by States. The data for the libraries in the outlying parts of the United States are carried in a separate category at the end of the section on each type of institution.

Some of the terms used may need additional clarification. In the case of book stock, the reporting libraries were asked to consider a volume as "any printed, typewritten, mimeographed, or processed work, bound or unbound," and to consider volumes as added "only after they have been cataloged and fully prepared for use."

For the purpose of comparability of returns, the libraries were requested to report only the actually recorded circulation, "counting *one* for each lending for home use of a volume, pamphlet, or a periodical." Renewals of material "under library rules at or near the end of regular terms of issue shall also be counted, but no increase shall be made because books are read by others or for any other reason."

In any use of the figures for the circulation of reserved books, considerable caution is necessary. The variations in reporting figures for reserved books have been indicated in the footnotes and have considerable bearing on any interpretations. Unless modified by footnotes, the figures given in the column under "reserved books" represent a total of (1) reserved book use in the building and (2) overnight and other use of reserved books. The item, total number of hours open per week, refers only to the schedule for the regular session, and is limited to the time that the library is open for circulation.

The term "total staff" includes the number of persons employed by the library, and on the central library budget; all part-time positions being reduced to their full-time equivalent. It excludes the building maintenance staff and persons employed on NYA, WPA, or other Federal projects. Neither are student assistants paid on an hourly basis included in the item. The paid assistance rendered by students is, of course, an appreciable item and must be taken into account. Since the question about total number of hours worked by students was not answered fully, the returns were not tabulated. A rough estimate of the hours of service may be obtained by dividing the amount paid out for student assistance by 37 cents, the average hourly rate paid per student assistant, as calculated from a sample of the returns.

The statistics on student enrollment were included in the detailed table, so that the data might be readily at hand for calculations made on a per student basis. The libraries were requested to report enrollment as of the third week of the fall term. Short-course students and correspondence students were not included in the figures.

Explanations regarding the items under "operating receipts" were made in connection with the summary tables (p. 16) and apply equally to the detailed table. It might be added that "unexpended balances carried over from the previous year" have been given a footnote only when the amount of the unexpended balance was \$7,000 or more.

It is well to keep in mind that the "total operating expenditures" (table 12, footnote 4) do not include, in the case of a number of institutions, sums which were paid out of "operating receipts" for such purposes as building maintenance, some equipment, and miscellaneous purposes not easily classified by the categories used in the uniform statistical blank. Under the item "capital outlay" are included expenditures for the purchase of sites, construction of new buildings or major alterations to old ones, and permanent equipment.

As previously mentioned, limitations of funds have necessitated certain omissions in this publication. In addition, the following items were not tabulated, although the data are available in the files of the Library Service Division: Length of service of the chief librarian; number and size of the various units (school, college, and departmental libraries) which make up a given university library system; number of days open during the year; daily schedules; source of additions to book stock; number of periodicals and newspapers currently received; break-down of staff by positions and training; and break-down of expenditures for such separate categories as: Books, periodicals, binding and rebinding, supplies, stationery, and printing.

In the use of the detailed statistics (table 12) it is well perhaps to keep in mind also that these libraries are integral parts of institutions

and that consequently their data should be studied in conjunction with other data of the college or university to which they are attached. In order that statistics of a given library become fully meaningful, it is necessary to know the characteristics of its college or university. Furthermore, valid comparisons between libraries or groups of libraries are possible only when a knowledge of the characteristics of the institutions permits an identification of homogeneous samples.

- 13 Central library only.
- 14 In addition, received \$600,000 for new building.
- 15 Includes \$22,027 unexpended balance from previous year.
- 16 Only use in building recorded.
- 17 Circulation of overnight loans and reserved books included in home use figures.
- 18 Contributed services.
- 19 Open shelf reserve system.
- 20 Not paid from library budget.
- 21 Includes only College of Arts and Sciences and Graduate School.
- 22 Circulation does not include summer session figures.
- 23 Plus part-time assistants.
- 24 Books and periodicals only.
- 25 Excludes salaries.
- 26 Contributed services evaluated.
- 27 Excludes contributed services.
- 28 Allowance made for all library needs; no regular budget allotted.
- 29 Includes only overnight and other use.
- 30 Includes other expenditures.
- 31 Excludes maintenance of lay librarian and contributed services.
- 32 Excludes departmental libraries.
- 33 Includes only books, periodicals, binding, and rebinding.
- 34 Amount allotted for supervision.
- 35 Includes all books used in the building.
- 36 Included in report of the University of Louisville.
- 37 Total for second semester, 1939-40.
- 38 Includes evaluation of amount paid out for rooms, board, and laundry of 12 students who assist in the library.
- 39 Included in report of Louisiana State University.
- 40 Second session.
- 41 Includes \$12,892 unexpended balance from previous year.
- 42 Partial count only.
- 43 Circulation figures apply mainly to 218 students.
- 44 Excludes books, periodicals, and binding.
- 45 Statistics for period January 8-June 30, 1940. Records previous to that time destroyed by fire.
- 46 Includes 18,137 volumes returned to stock, which were previously lost or withdrawn.
- 47 Librarian spends part time teaching; teachers assist in the library.
- 48 Estimated.
- 49 Cost of binding and rebinding included under other expenditures.
- 50 Includes \$7,383 unexpended balance from previous year.
- 51 Includes \$9,019 unexpended balance from previous year.
- 52 Includes only one of six college libraries.
- 53 Part time.
- 54 Includes library fees.
- 55 Includes overnight loans.
- 56 Includes 52,468 in New York State College of Forestry.
- 57 Includes 23,796 in Patients' Library.
- 58 Includes Rabbi Isaac Elchman Theological Seminary.
- 59 Included in University of North Dakota.
- 60 Includes circulation in building.
- 61 Part of chief librarian's salary charged to teaching account.
- 62 Includes reserves, but excludes 2-week loans.
- 63 Operated by students on an hourly basis.
- 64 Includes \$8,569 unexpended balance from previous year.
- 65 Plus clerical assistants.
- 66 Plus board and room.
- 67 Unexpended balance from previous year.
