NOTE

The census enumeration was carried out in full according to plan but the Government of India decided to restrict the tabulation for British India. Consequently the tables in this volume cover less than half the contemplated range and offer in effect only the distribution of the population by community and by province or state, district, tehsil and town.

2. The slips in which the remaining unsorted information is to be found are stored in each province against a possible reopening of tabulation in happier circumstances.

I—AREA, HOUSES AND POPULATION

The object of this table is to show the size of the province and the neighbouring states, the extent to which they are split up into towns and villages, and how far life in them is urban and how far rural. For this purpose it gives for each state and district the area, the number of towns and villages, the number of occupied houses, and the total urban and rural population, male and female.

It will be noticed that the areas of almost all the units shown in this table differ from those shown in Table I of 1931. This is due partly to inter-unit transfers and partly to more accurate surveys by the Survey of India since 1931. They also differ from the areas shown in Provincial Table I of the present volume. This is because the latter are the sum-totals of smaller units such as subdivisions and revenue thanas for which only obsolete figures can be had. Finally, the 1941 area of the province has a strangely dwindled air when put with the area of 1931. This is due to the separation of Orissa and the severance of administrative relations with the states.

There are certain terms which need explaining. Of these, "towns" in columns 3 and 6 means places treated as towns or cities for the purpose of Table IV and V, and "urban" in columns 9, 12 and 15 means persons enumerated in those places. "Villages" in columns 4 and 7 means with two exceptions all revenue villages or *mauzas*. The exceptions are *mauzas* wholly absorbed in towns, and *mauzas* uninhabited during the census period. These are excluded from the term. "Rural" in columns 10, 13 and 16 means persons enumerated elsewhere than in towns. "Houses" in columns 5—7 means census houses. This latter term relates to a family mess and not to a building or a homestead: a census house being every separate mess used by a separate family.

Some places with less than 5,000 population have been treated as towns. The urban population excluding these towns is 1,969,916 and the urban rural ratio 1:18.

At the census period there were 7,216 male Italian prisoners of war in the province.

II—VARIATION IN POPULATION DURING FIFTY YEARS

The object of this table is to show how the population of each district and state has changed in the last fifty years.

The figures for previous censuses are adjusted to the 1931 size of the various districts and states, while the 1941 figures relate to the form taken by the districts and states in 1941. The comparison, therefore, is between similar administrative units but not between strictly similar areas. Adjustments have been made for inter-provincial transfer.

III—TOWNS AND VILLAGES CLASSIFIED BY POPULATION

This table aims at showing how far the population lives in small villages, villages of moderate size, large villages and in towns. For this purpose, the same definitions have been used as in table I but the basis of classification is numerical and not urban or rural. The swollen village may therefore appear in the same section as the minor town.

Cantonments have been treated as separate units while the suburban areas adjoining the municipalities of Ranchi, Katihar, Dhanbad and Chakradharpur have been treated as parts of their parent towns. The new capital, Patna has been treated as a separate town and not as a suburb.

In the present census, passengers in trains were counted not in trains but at their homes and the floating population was accordingly limited to lodgers in hotels, boatmen on canals and rivers, the houseless poor, dwellers in the streets, vagrants, wandering tribes, seasonal immigrants, labourers in camp, and *sadhus*. They have been included in the population of the towns and villages where they were enumerated.

IV—CITIES CLASSIFIED BY POPULATION WITH VARIATIONS SINCE 1891

City includes all towns of one hundred thousand or more inhabitants. Figures for Bhagalpur are however also shown in this table.

The object of this table is to show how the four cities of the province have grown and how that growth has fluctuated. For this purpose it gives the city population and its distribution by sex at each of the last six censuses.

V—TOWNS ARRANGED TERRITORIALLY WITH POPULATION BY COMMUNITIES

The object of this table is to show the population of each town and how far each community forms a part of it.

The towns given in the table include all places which were treated as towns in the 1931 census together with a group of 18 others. Places treated as towns in 1931 included all municipalities and cantonments and a small group which although not under municipal government, was deemed to have urban characteristics. In 1941 this latter criterion was taken to mean a marked preference for the brick house as against the mud house and a population of at least 5,000. On this basis, the following places have been newly classified as towns :—

Sherghati	Phulwari	Balrampur
Dehri	Teghra	Adra
Nasriganj	Jamui	Jharia
Chainpatia Bazar	Bermo	Manoharpur
Maudhaneshpur	Baidkaro	Noamundi
Barbiga	Kargali	Musabani

The new towns are shown in *italics*.

In the table the area at Ranchi administered by the Doranda Notified Area Committee, and the railway settlements at Katihar, Dhanbad and Chakradharpur have been treated as suburbs of the adjoining municipalities. Their populations have, however, been given separately and have not been included in the municipal totals.

As the tribal community overlaps into both the Scheduled Caste community and the Indian Christian community, twin columns have been used for the latter two communities. Column A gives the numbers of those who are in the community and *not* in the tribal community while column B gives the numbers of those who are in the community and *also* in the tribal community.

NOTE:—The 1941 figures include figures for Tribal Christians

XIV—VARIATION IN POPULATION OF SELECTED TRIBES

This table shows in detail where most of the aboriginal and semi-aboriginal tribes live, and how their numbers have varied during the last ten years. Notes on the tribes with bibliographies are given in the appendix volume.

Where statistics are given for localities smaller than a district, the unit of locality adopted is, in the case of the province, the police station and in the case of a state, the census charge. In parts of the Santal Parganas where there are no police stations the census charge has been adopted. Details of these charges are given in Provincial Table II.

Concerning variation figures, two assumptions have been made. Where a provincial total was given in 1931 but a particular district has not been noted, it has been assumed that the 1931 figures for that district was *nil* and variation figures have been given. Where, however, no 1931 figures are available, it has been assumed that they were not recorded. In such cases variation figures have no value so they have not been given.

**PROVINCIAL TABLE II—POPULATION OF REVENUE THANAS AND POLICE STATIONS BY
COMMUNITIES AND LITERACY**

The main object of this table is to show the total population of each revenue thana and police station jurisdiction and the way that population is distributed between the main communities. Members of the tribal community who are also members of the Indian Christian or Scheduled caste community have been shown in the tribal community.

Figures of literates have also been given for each police station and revenue thana. These figures were reported by the enumerators and although they should be treated as strictly provisional, it is unlikely that they will differ greatly from the final figures when compiled.

The unit of locality adopted is, in the case of the province, the police station but in the case of the states, the census charge.

The following statement gives details of overlapping areas in Bihar. Necessary adjustments in the table have been made :—

<i>Village</i>	<i>Police station</i>	<i>Revenue thana of police station</i>	<i>Revenue thana of village</i>
Kansari	Fatwa	Fatwa	Masaurhi Buzurg
Dariapur	Dinapore	Dinapore	Maner
Banwaripur	Maner	Maner	Bikram
Murghichak	Giriak	Bihar	Nawada
Mohiuddinpur }	Masaurhi	Masaurhi Buzurg	Hilsa
Nanauri }			
Bauri }			
Kashichak }	Pakribarwan	Pakribarwan	Nawada
Dulachak }			

Patna city includes the Bankipore Ward (Patna Sadr Subdivision) and excludes the rural area of Patna City Subdivision.

A portion of Chaibassa police station lies in Manoharpur revenue thana.

SAMPLE TABLES

This census has seen the beginning of sampling as a census method.

2. The tables below have been prepared from sample slips taken from the following subdivisions and Seraikela State :—

District	Subdivision
Gaya	Sadr and Aurangabad
Shahabad	Buxar
Muzaffarpur	Sitamarhi
Darbhanga	Sadr and Samastipur
Bhagalpur	Sadr
Purnea	Sadr and Kishanganj
Santal Parganas	Pakaur
Ranchi	Gumla
Palamu	Sadr
Manbhum	Dhanbad
Singhbhum	Dhalbhum

Every fiftieth slip in each charge in these subdivisions was extracted. They were then counted and their numbers brought up to one fiftieth of the subdivisional total by a supplementary selection made at random later.

3. 1/50 of the population of the area from which sample slips were extracted is 214,011 ; the number of slips in the sample is 213,998.

The sample however is not fully representative of the whole province since some districts are not represented at all and random sampling was not applied throughout the subdivisions.

4. The communal representation for the population of the area for which the sample was taken and the sample population is given below :—

Community	Percentage of the population of the area from which sample was taken	Percentage revealed by the sample
Scheduled castes	11·3	11·6
Other Hindus	57·5	57·9
Muslims	17·2	17·4
Tribes	13·8	12·9

The difference between the two is below 1 percent and in most cases considerably below.

5. The sample tables cover tables VI, VII, XI, XII and XV.
