## NOTE

The census enumeration was carried out in full according to plan but the Government of India decided to restrict the tabulation for British India. Consequently the tables in this volume cover less than half the contemplated range and offer in effect only the distribution of the population by community and by province or state, district, tehsil and town. In many areas however village tables will also be produced by provincial governments.

Opportunity has been taken however to sort wherever possible the 1/50 random sample taken in every area.

2. The slips in which the remaining unsorted information is to be found are stored in each province against a possible reopening of tabulation in happier circumstances.

## I—AREA, HOUSES AND POPULATION

The areas in column 2 are those of the latest determination of the Survey Department. The area of the Biloch trans-frontier tract is included in that of Dera Ghazi Khan district.

The differences between some of the areas shown in this table and those given in the corresponding tables of 1931 are due to territorial transfers and recalculations of areas by the Survey department. The province has gained a total area of 1.74 sq miles during the inter-censal period as a result of inter-provincial transfers as under:—

District or State affected	Transfer from or to	Gain or loss	
		Area (sq miles)	Population (1931)
1. Gurgaon District .. ..	Bullandshahr (U.P.) .. ..	+1.89	+12
2. Karnal District .. ..	Muzaffargarh and Meerut Districts (U.P.) .. ..	-1.15	..
3. Sirmoor State .. ..	Dehra Dun (U.P.) .. ..	+1.00	..
	<i>Net Gain</i> .. ..	+1.74	+12

The inter-district transfers that have occurred since the last census are given below:—

From	To	Transfer of	
		Area (sq miles)	Population (1931)
1. Multan district .. ..	Lyalpur district. .. ..	151.00	15,351
2. Jhang district .. ..	Do .. ..	11.00	Nil
3. Sheikhpura .. ..	Amritsar .. ..	0.91	365

2. A "house" was defined at this census as a dwelling place of a commensal family. "Occupied house" means a census house.

3. "Towns" include municipalities, civil lines not included in municipal limits, cantonments and other places of usually not less than 5,000 inhabitants and possessing distinct urban characteristics. "Cantonments" have been treated as forming part of the towns in which they are situated. "Village" means a revenue village. "Urban" and "rural" refer to persons living in towns or villages as above defined.

NOTE 1.—A few villages of the Shahdara tehsil in the Sheikhpura district with a population of 16,368 have been included within the limits of Lahore municipality, but they still remain part of the Shahdara tehsil for revenue and other administrative purposes. In this table, therefore, the population of these villages has been included in the urban population of the Sheikhpura district.

NOTE 2.—The population details for tehsils are given in Provincial Tables I and II.

4. The urban/rural ratio when towns with a population of 5,000 or over are taken as urban is 165 : 1,000, *i.e.*, for every 1,000 of the rural population there are 165 persons living in towns with a population of 5,000 or over.

NOTE.—Figures in column 2 have been calculated from the latest survey area. Figures in columns 3—7 and 9—12 for British districts have been calculated from tables of agricultural statistics published by the Director of Land Records, Punjab, for the year 1939-40 and those for Punjab States from figures supplied for the same year by the Census Superintendents of those States. Rainfall figures recorded in column 8 are those recorded at the headquarters of Districts and States and those for the British Territory have been taken from the Season and Crops Report published by the Director of Land Records, Punjab, for the agricultural year ending 30th June, 1940.

## II—VARIATION IN POPULATION DURING FIFTY YEARS

The table compares the population, both total and sex-wise, as ascertained at the census of 1941 with those of the previous censuses. Previous census figures have been adjusted to allow for inter-district and inter-provincial transfers.

NOTE.—No vital statistics being available for the Biloch trans-frontier tract of Dera Ghazi Khan District, its population has been omitted in calculating column 7.

### III—TOWNS AND VILLAGES CLASSIFIED BY POPULATION

This table has been compiled from the village tables, every inhabited revenue estate being treated as one unit. When, however, one or more villages are included in a town or a cantonment, the latter has been taken as one unit. Accordingly, Lahore city, which includes a portion of the Sheikhpura District (see note 1 given in the fly-leaf of Table I) has been treated as a single unit for the purposes of this table.

The total number of inhabited towns and villages comes to 52,343 as against 50,925 at the last census. Some Indian States show a marked increase in the number of inhabited villages. Apparently, it is due to the fact that separate *Hadbast* numbers have been assigned to their hamlets. The colonization of waste areas is also responsible for the increase in the number of villages.

2. The figures of cantonments are shown in *italics* within parentheses in the proper class, and this accounts for an excess of 13 in the number of towns and villages in this table as compared with Table I, in which the thirteen cantonments adjoining towns (including temporary military camps set up in the Attock District and constituted into one unit) are shown as forming part of them. Civil lines have been included in the towns which they adjoin, except two (Hidayatpur Chhauni and Sanawar) which are isolated units.

3. For the purposes of this table the floating population is shown separately from the populations gathered under columns 5, 7, 9, etc. This element, however, is included in town populations for the purposes of Imperial Tables IV and V and hence slight differences in totals.

#### IV—CITIES CLASSIFIED BY POPULATION WITH VARIATION SINCE 1891

“ City ” covers all towns of 100,000 or more inhabitants.

2. In this table, civil lines and cantonments have been included in the cities which they adjoin. Separate figures, however, have been given for them under the cities concerned. Abbreviations used are :—

M=Municipality

C L=Civil line

Cantt=Cantonment

The city populations for previous censuses are those then recorded ; no adjustments have been made for intervening changes in area.

NOTE.—Lahore city embraces a portion of the Sheikhpura District as shown in the note given in the fly-leaf of Table I.

## PROVINCIAL TABLE I—AREA AND POPULATION OF TEHSILS

The figures of area have been taken from the revenue records as survey figures are not available by tehsils. The totals of these figures, therefore, do not agree with the figures of Imperial Table I which are based on the survey data.

2. The difference between some of the areas shown in this table and those given in the corresponding table of 1931, is due to remeasurement or territorial transfers. The details of transfers, whether inter-district or provincial, that have altered the area of certain tehsils are as given below :—

## PROVINCIAL TABLE II—POPULATION OF DISTRICTS AND TEHSILS BY COMMUNITIES

This table has been compiled for British Territory, as at the last census.

2. The figures by communities for each tehsil have been taken from the village tables.

3. The figures of Hindus have been split up, as in Imperial Tables, into "Scheduled castes other than Ad-Dharmis" and "other Hindus". Ad-Dharmis have been shown separately in columns 6 and 7 and in order to ascertain the total for all scheduled castes these should be added to columns 2 and 3.

4. Indian Christians have been shown separately while Anglo-Indians and Europeans and Allied Races have been classified under the head "Others", as detailed below :—

						Males	Females
Europeans and Allied Races	..	..	..	..	..	7,834	2,221
Anglo-Indians	..	..	..	..	..	3,269	2,622
Other Christians	..	..	..	..	..	1,566	1,391

### SAMPLE TABLES VII, XI & XIII

The accompanying tables, namely, VII (age, sex and civil condition), XI (literacy by religion and age) and XIII (major communities) are the results of the sorting and tabulation of the 1/50 sample of the British territory (excluding the old municipal area of Lahore city) taken on the lines indicated in paragraph 8 of Chapter II of my Administration Report. A study of these tables makes very interesting reading. An analysis of the figures shown in these tables gives the communitywise distribution of population and percentage of literacy as under :—

Community	Percentage of population	Percentage of literacy		
		Persons	Males	Females
Hindus .. .. .	26.55	16.35	11.89	4.46
Sikhs .. .. .	13.48	17.03	12.13	4.90
Jains .. .. .	0.08	41.93	29.03	12.90
Muslims .. .. .	56.92	6.97	5.52	1.45
Christians .. .. .	1.74	7.76	4.69	3.07
Others .. .. .	1.23	7.62	6.85	0.77
<b>Total</b> .. .. .	<b>100.00</b>	<b>10.87</b>	<b>8.13</b>	<b>2.74</b>

The Muslim literacy is pitifully low. This is apparently due to the fact that in rural areas the backward elements form a much larger proportion of the Muslims than of any other community. But of the persons who are able to read only, the percentage of the Muslims is the highest. The percentage of the provisional literacy figures for the province (excluding Lahore municipality) works out to 11.66 (males 8.84% and females 2.82%) as against 10.87% shown above.

2. Let us now examine the proportion of the various communities to the total population as recorded at this census, and see how far the communitywise proportion is maintained in our sample. According to the present Census, the figures work out as under :—

Hindus .. .. .	26.56
Sikhs .. .. .	13.22
Jains .. .. .	0.13
Muslims .. .. .	57.06
Christians .. .. .	1.77
Others .. .. .	1.26

This reveals a very negligible difference between the two-sets of percentages.

3. The sexwise distribution, according to the sample is : Males 53.95% and Females 46.05% ; while the distribution according to the present census comes to : Males 54.05 % and females 45.95%.

4. As Imperial Tables VII and XI have not been compiled their comparison with the sample tables will have to be deferred until the resumption of the tabulation. The conclusions arrived at will, however, I think, be near the mark and the percentages could be worked out to make a rough estimate of the civil condition etc of the entire population.
