J. B. Mallaradhya, M.A. I.A.S.

Census Commissioner for Mysore

PREFACE

ALTHOUGH this Volume looks very much like its counterpart of 1941, in size and format, it differs widely from its predecessor in the range and scope of its contents and in the arrangement of the Tables it presents.

2. In 1941 the Tables Volume gave under the same cover the Main Tables showing absolute figures and the Subsidiary Tables showing proportional figures. Reverting to the practice of the 1931 and earlier censuses we have now furnished only the absolute figures in this volume. The Subsidiary Tables will be found in the Report Volume (Part I).

3. The 1951 crop of Census Tables is presented here in five series. The A Series consists of General Population Tables. The B Series is devoted to the most important tables of this Census, *viz.*, the Economic Tables. In the C Series are furnished all the age-wise tables produced this time. In the D Series are grouped all the Social and Cultural Tables. The solitary table of the E Series shows summary figures by districts and taluks.

4. It was the practice in the past to have three sets of tables, Imperial, Provincial and State. The first two were obligatory tables prescribed by the Census Commissioner for India; the third included tables prepared at the discretion of the State Census Superintendent to supplement and elucidate the Imperial series. This three-fold distinction has now disappeared. The present volume is devoted exclusively to the obligatory All-India Tables prescribed by the Registrar-General, India.

5. Students of the Census will readily observe one striking change in the 1951 Tables, *viz.*, the shift of the basic viewpoint of Census Tabulation from the religious to the occupational. In the past the population was, at the very outset of sorting, divided on the basis of religion, and the separation was maintained throughout the sorting operations, in order that as many characteristics as possible could be cross-tabulated by religion. But this time, the basic religious categories have been substituted by occupational classes and these consequently pervade all the cross-tabulations carried out in 1951. The entire population has been divided, in the first instance, into two broad livelihood categories, namely agricultural and non-agricultural, and each

category has been sub-divided into four livelihood classes. These eight classes are as follows:—

Category A—Agricultural Classes

I Cultivators of land, wholly or mainly owned and their dependants.
II Cultivators of land, wholly or mainly unowned and their dependants.
III Cultivating labourers and their dependants.
IV Non-cultivating owners of land; agricultural rent receivers and their dependants.

Category B—Non-agricultural Classes

Persons (including dependants) who derive their principal means of livelihood from:—

V Production other than cultivation.
VI Commerce.
VII Transport.
VIII Other services and miscellaneous sources.

6. The Age Tables published in this volume contain changes which constitute yet another distinctive feature of the 1951 Census. The most important change by far is that all the age-tables (except C. I) are derived from a random 10 per cent sample taken out of enumeration slips. Again, it was customary in the past to smoothen the actual age-returns by the application of a formula during the process of tabulation, in order to offset the observed preference for multiples of five and for even digit endings. At this Census, we have invoked the principle that the duty of the Census is to publish the information as actually furnished by the people; and accordingly we have presented age-statistics here in the raw. Further, the time-honoured age-groups found in the tabulations of the past have been recombined into certain decennial age-groups which place the most favoured digit (0) at the centre of each group and are therefore likely to be most free from the effect of preferences for particular digits. In addition, a new table (C. V) has been devised to show individual year age-returns, for the use of research workers and actuaries.

7. Tables A. I, A. II and A. IV; C. III and C. IV; D. I (i), D. I (ii), D. II and D. IV and Table E correspond to similar tables of the previous censuses. The others have undergone changes as described below:—

A—General Population Tables.—Table A. III—(Towns and villages classified by population) follows an old table but provides some additional information, *viz.*, sex-wise figures for all groups of villages and sub-totals under all columns for three major

groups. This change has been made in deference to a recommendation of the Population Commission of the United Nations. In the case of Table A. V—Towns arranged territorially with population by livelihood classes the basis itself has been changed; information is given by livelihood classes instead of by communities or by religion as in the past.

B—Economic Tables.—These correspond to the Occupation (1931) and Means of Livelihood (1941) Tables of the past censuses; but they differ widely from the latter both in form and content. The changes are described fully in a separate introductory note which precedes the B-Series Tables.

C—Household and age (Sample) Tables.—Tables C. I—Household (size and composition) and C. II—Livelihood classes by age-groups are both altogether new.

D—Social and Cultural Tables.—Table D. III is a new table, furnishing the number of Scheduled Castes, Scheduled Tribes, and the number of Anglo-Indians. Table D. V—Displaced Persons is also new, and has been necessitated by the movement of population consequent on the creation of Pakistan. Table D. VI—Non-Indian Nationals is based on a suggestion by the United Nations Population Commission. It corresponds roughly to an abridged edition of Imperial Table XIX of the 1931 Census (and Table XV of 1941) showing "Europeans and Allied Races and Anglo-Indians by Race and Age". Table D. VII—Livelihood classes by educational standards, again, is brand new; it is designed to show the distribution of educated man-power among the different livelihood classes by different grades of academic qualification.

8. One word here about the fly-leaves. The notes that they contain draw attention to special features of the concerned table, if any, and frequently furnish figures for minor categories that might happen to have been omitted in the tables. As an essential supplement to the tables themselves, they merit careful study.

J. B. MALLARADHYA,
Census Commissioner for Mysore

E—SUMMARY FIGURES BY DISTRICTS AND TALUKS			333—355

A—General Population Tables

A. I—Area, houses and population

1. The districts shown in this Table are the same as in 1941 except that Chikmagalur District was formerly known as Kadur District.

2. Bangalore Civil and Military Station and Bangalore City which were being shown as separate Cities heretofore, were amalgamated in 1950 into a single Municipal Corporation and the Table furnishes figures for the Corporation as a whole. Separate figures for the City and Civil Station are published in the Bangalore District Handbook (Part I).

3. The areas of the three Cities, *viz.*, Bangalore Corporation, K. G. F. City and Mysore City are those furnished by the Municipal authorities. The areas of the districts are based on gross figures furnished by the Surveyor-General, India, and have been obtained by subtracting the city areas from the respective district figures of the Surveyor-General.

4. The total area of the State which was 29,458 square miles in 1941 has now become 29,489. The difference in area is partly accounted for by the exchange of enclaves between Mysore State and Madras, and partly by improvement in the method of computation.

5. Statistics of population by taluks are furnished in Table E. Statistics by villages are available in Part I of the concerned District Handbook.

6. By definition, "towns" consist exclusively of Municipalities of the State other than the three cities shown in the Table. The Laxmipura Sanitary Board, the Mandya New Town Board and the Bhadravati New Town Board have not been regarded as separate towns but have been combined with their parent Municipalities. The H.A.F. Sanitary Board and the Jog and Kargal Colonies have been regarded as rural areas. If only such places as have a population of 5,000 and over are regarded as urban, the total urban population of the State will be 2,110,107. On this basis, the urban/rural ratio will be 1 : 3 or 233 urban, 767 rural for every 1,000 of the population.

A. II—Variation in population during fifty years

1. Under the Provinces and States (Absorption of Enclaves) Order, 1950, the following villages were exchanged between Madras and Mysore States :—

(*a*) *Villages transferred from Mysore State.*—

District	*Taluk*	*Village*
Chitaldrug	Molakalmuru	Kasenaikanahalli (*Jodi*) Gauripura Bommonahalli (*Jodi*) Bommaghatta Obalapura (*Sarva Inam*) Buddenahalli
Kolar	Bangarpet	Varadikoppa Volagalakoppa (*Jodi*) Byparedddihalli Harakachinnapalli (*Khayamgutta*) Gollahalli Hosapete Chinnaradoddi
	Malur	Koladasanapura
Mysore	Chamarajnagar	Badagalapura

(*b*) *Villages transferred to Mysore State.*—

From			To	
District	*Taluk*	*Village*	*District*	*Taluk*
Salem	Hosur	Araleri Rayasandiram Balanapalli Ettakodi	Kolar	Malur
		Madivalam Morasur	Bangalore	Anekal
Anantapur	Hindupur	Tsondikuntapalli	Kolar	Gudibanda
	Madakasira	Kotagaralahalli Sarjammanahalli(*Jodi*)	Tumkur	Madhugiri
		Kanajanahalli	Chitaldrug	Hiriyur
South Canara	Coondapur	Nagodi Hebbige Koteshirur	Shimoga	Hosanagar

Population figures of previous censuses were adjusted on the basis of data obtained from the Superintendent of Census Operations, Madras.

2. The net result of this exchange of enclaves in each of the districts involved is as follows :—

State and District	*Area in square miles Added (+) Excluded(—)*	*1941 Population*		
		Persons	*Males*	*Females*
MYSORE STATE	+45.8	+8,678	+4,651	+4,027
Bangalore	+5.4	+1,966	+1,008	+958

A. III—Towns and villages classified by population

Only inhabited villages have been taken into account in this table. The number of uninhabited villages in the several districts is as under :—

District	*Number*
MYSORE STATE	2,801
Bangalore	296
Kolar	499
Tumkur	331
Mysore	363
Mandya	152
Chitaldrug	267
Hassan	344
Chikmagalur	180
Shimoga	369

The number of uninhabited villages in each taluk is furnished along with the Village Statistics published in Part I of the District Handbooks.

The "Village" of the Census is, by definition, the same as the Revenue Village; it includes the main settlement as well as all its hamlets.

A. III—Towns and villages classified by population

State, City and District	Total number of inhabited towns and villages	Total population			Towns and villages with population less than 2,000													Towns and villages with a population of 2,000—10,000

* Includes the population of 4 Camps which together have been treated as one village for the purposes of this table

A. IV—Towns classified by population with variations since 1901

1. For the definition of "towns", *vide* Note 6 to Table A. I.

2. The towns listed in this Table and Table A.V differ from those of the 1941 Census in the following respects :—

(*a*) Four places, *viz.*, Manchenahalli (Kolar District), Y. N. Hoskote (Tumkur District), Bellur (Mandya District), Turuvanur (Chitaldrug District) have become towns since the last census. The previous census figures in respect of these towns have been taken from the Village Statistics of those censuses and included in this table.

(*b*) Harnahalli (Hassan District) which figured as a Town in all censuses upto 1941, ceased to be a town in 1951.

3. As in the 1941 Census, population figures of villages having the same name as the towns to which they are adjacent but comprising the area lying outside the municipal limits, have been included in the rural area and excluded from the respective towns listed in this Table.

4. Towns have been divided into six classes according to their population as follows :—

(i) Class I—100,000 and over
(ii) Class II— 50,000—100,000
(iii) Class III— 20,000— 50,000
(iv) Class IV— 10,000— 20,000
(v) Class V— 5,000— 10,000
(vi) Class VI— Under 5,000

The class to which each town belongs is indicated in the table. In addition, totals of all the towns coming under each class are also furnished. All the towns in the State have been listed in one sequence in order of size and not by districts. The district-wise arrangement will be found in Table A. V.

A. V—Towns arranged territorially with population by livelihood classes

1. This table is different from its counterparts of the past in that it shows the population of towns according to livelihood classes rather than by religion (1931) or by communities (1941). The entire population has been divided into two livelihood categories (agricultural and non-agricultural) and eight livelihood classes, four agricultural and four non-agricultural. Each one of the livelihood classes under the non-agricultural category is shown separately in the table. In the case of agricultural category the three livelihood classes relating to cultivation are lumped together.

2. The class to which each town belongs is indicated against each, within brackets, by the abbreviations M. and S.B. which stand respectively for Municipality and Sanitary Board.

3. Although Davangere has now acquired the status of a City, it has not been shown as such in any of the tables because its population falls very much short of a lakh.

4. *Vide* also note 6 to Table A. I.

A. V—Towns arranged territorially with population by livelihood classes

State, City, District and Town	Population			Livelihood Classes: Non-agricultural Classes — Persons (including dependants) who derive their principal means of livelihood from: V—Production other than cultivation		VI—Commerce		VII—Transport		VIII—Other services and miscellaneous sources		Agricultural Classes: IV—Non-cultivating owners of land; agricultural rent receivers and their dependants		I-III—Cultivators, cultivating labourers and their dependants

B—Economic Tables

INDIAN CENSUS ECONOMIC CLASSIFICATION SCHEME

The Economic Tables for the 1951 Census are based on the Indian Census Economic Classification Scheme, 1951, prepared by the Registrar-General, India. The Scheme is reproduced below :

1. *1931 Scheme of occupations.*—The last occasion on which the economic characteristic of the people were not only ascertained but also classified and tabulated on an All-India basis was in the 1931 Census.

The basis of classification adopted at that census was a Scheme of Occupations consisting of 4 Classes, 12 Sub-classes, 55 Orders and 195 Occupational Groups. The total following the occupations for each Class, Sub-class, Order and Group was given, together with sub-totals for numbers following occupations as "principal occupation" or as "working dependant" or as "subsidiary to other occupations".

2. *I.C.E.C. Scheme.*—The scheme of classification set out in this memorandum may be referred to as the Indian Census Economic Classification Scheme. It is based on the 1931 Scheme of Occupations. It embodies, however, extensive revision and re-arrangement designed to secure the following purposes, *viz.*,—

(i) to establish a comprehensive economic classification of the people as a whole, and not merely of persons who are gainfully occupied ;

(ii) to simplify and improve the method of presentation of census economic data ; and provide additional data ; and

(iii) to secure international comparability of data as recommended by the Economic and Social Council of the United Nations.

3. *Basis of classification.—Economic status and means of livelihood.*—The 1951 Census seeks to ascertain the "economic status" and the "means of livelihood" of every person enumerated. Questions 9, 10 and 11 relate to these economic characteristics. What the enumerators are required to ascertain and record in respect of these questions is explained in Annexure I. The answers to Question 10 and the two parts of Question 9 will form the basis of classification of each individual.

4. *Livelihood categories and classes.*—On the foregoing basis, the people will be divided into two broad livelihood categories, *viz.*, the Agricultural Classes and the Non-agricultural Classes.

There will be four Agricultural Classes, defined as below :—

I—Cultivators of land, wholly or mainly owned and their dependants.

II—Cultivators of land, wholly or mainly unowned and their dependants.

III—Cultivating labourers ; and their dependants and

IV—Non-cultivating owners of land ; agricultural rent-receivers and their dependants.

There will be four Non-agricultural Classes, defined as comprising all persons (including dependants) who derive their principal means of livelihood from—

V—Production (other than cultivation).

VI—Commerce.

VII—Transport.

VIII—Other Services and Miscellaneous Sources.

All these Classes will be referred to as Livelihood Classes.

5. *Livelihood sub-classes.*—Each of the 8 Livelihood Classes will be divided into three sub-classes, with reference to their economic status as below :—

(i) Self-supporting Persons ;

(ii) Non-earning Dependants and

(iii) Earning Dependants.

The tests to be applied in determining to which sub-class any individual belongs are defined and fully explained in Annexure I.

6. *Economically active, semi-active, and passive persons.*—All non-earning dependants are economically passive. They include persons performing house-work or other domestic or personal services for other members of the same family household. But they do not include "unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise.

All earning dependants are economically semi-active only. Though they contribute to the carrying on of economic activities, the magnitude of their individual contribution is deemed to be too small to justify their description as economically active. [Their contribution to economic activity is, however, taken into account, in the tabulation of data based on secondary means of livelihood (*vide* para 9 below).]

All self-supporting persons are, ordinarily, economically active. But, there are certain classes and groups which constitute an exception to this rule.

These are mentioned below :—

(i) All self-supporting persons of Agricultural Class IV.

(ii) The following groups of self-supporting persons who are included in Non-agricultural Class VIII, and derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity) :—

(*a*) Non-working owners of non-agricultural property,

(*b*) Pensioners and remittance holders,

(*c*) Persons living on charity and other persons with unproductive occupations, and

(*d*) inmates of penal institutions and asylums.

7. *Classification of economic activities and economically active persons.*—Economic activities may be defined as including all activities of which the result is the production

of useful commodities or the performance of useful services; but not including the performance of domestic or personal services by members of a family household to one another.

The most important among all economic activities is the cultivation of land (or the production of field crops). It stands in a category by itself. All other economic activities may be regarded as falling in another category which may be referred to as "Industries and Services". All these activities may be classified with reference to the nature of the commodity produced or service performed. Under the present scheme, all Industries and Services are classified into 10 divisions; and these divisions are sub-divided into 88 sub-divisions, as shown in Annexure II. The scope of activities included in each sub-division is indicated by its title, as well as by the specification of groups which are comprised in them.

Economically Active Persons engaged in cultivation, are either cultivators or cultivating labourers—that is, they are persons of sub-class (i) of Agricultural Classes I to III.

Economically Active Persons engaged in Industries and Services are classifiable in the divisions and sub-divisions shown in Annexure II. All persons included in each sub-division are further divisible into three sections, *viz.*,—

(i) Employers,
(ii) Employees and
(iii) Independent Workers.

In effecting this classification, no account will be taken of the fact whether the classified person was actually employed or unemployed on the date of enumeration. He should be allocated to that particular description of economic activity, from which he has in fact been deriving a regular (that is non-casual) income, as his principal means of livelihood.

8. *Form and method of tabulation.*—The replies recorded in Census Slips against Census Questions 9, 10 and 11 will be used for classifying every enumerated person within the framework of economic classification of the people described above. The result will be exhibited in three tables entitled, "The Economic Tables I, II and III". There will be approximately 350 million census slips which will have to be sorted by hand, and not by mechanical processes.

9. *Comments on Economic Tables.—Economic Table No. I* will show the numbers of 24 livelihood sub-classes grouped under 4 agricultural classes, and 4 non-agricultural classes. A complete picture will be presented of economically active, semi-active and passive persons.

Economic Table No. II will specify the numbers in each of the 8 classes mentioned above, who possess a secondary means of livelihood; and cross-classify them (according to the nature of such means of livelihood) under the same eight classes. [This table is designed to include not only self-supporting persons who have more than one means of livelihood, but also earning dependants who supplement (with their own contribution) the resources provided for their maintenance by the persons on whom they are dependent. The contribution made to economic activity by economically semi-active persons (*vide* para 6 above) will be shown by this Table.]

Economic Table No. III is limited to economically active persons. The number of persons engaged in industries and services as a whole, as well as in each division

and sub-division thereof will be shown in this table, divided into the three sections "Employers", "Employees" and "Independent Workers".

In all three tables, the numbers are separated by sexes, as well as residence in urban and rural areas. The All-India Tables will furnish totals by States. The State Tables will furnish totals by Districts.

10. *Comparability.*—The principal change involved in the present Scheme is the setting up of a comprehensive economic classification of the people as a whole and not merely of those among them who are engaged in gainful occupation. In the process of sorting of census information, the division of the people into "livelihood classes" takes the place of the division of the people into "communities" at the former censuses.

Consistently with this main purpose, the present scheme of classification is based mainly on the Scheme of Occupations of former censuses. Comparability with the published census tables of 1931 is secured by the references to the Occupational Group numbers of the 1931 census which are found under each sub-division in Annexure II.

The United Nations Organisation has evolved a Scheme of Classification of all economic activities known as the "International Standard Industrial Classification" Scheme. The scheme of divisions and sub-divisions of industries and services set out in Annexure II has been framed so as to maintain comparability with data arranged in accordance with the I.S.I.C. Scheme. This is explained fully in Annexure II.

ANNEXURE I

Census Questions 9, 10 *and* 11 *and related instructions*

1. The Census is concerned with two economic characteristics of every individual—his economic status, and his means of livelihood. The scope and meaning of these expressions will appear from an explanation of three census questions, *viz.* :—

Question 9—Economic status;

Question 10—Principal Means of Livelihood; and

Question 11—Secondary Means of Livelihood.

2. Form of questions:

Question 9.—*Economic status*—

Part One—Dependency.—Write 1 for a self-supporting person, 2 for a non-earning dependant, and 3 for an earning dependant. Write the answer in the first compartment.

Part Two—Employment.—If a self-supporting person earns his principal means of livelihood as an employer write 1, as an employee write 2, as an independent worker write 3. Write 0 in other cases. Write the answer in the second compartment.

Question 10.—*Principal means of livelihood.*—An answer to this question should be recorded on every slip. If the slip relates to a self-supporting person record his principal means of livelihood. If the slip relates to a dependant (whether earning or non-earning) record here the principal means of livelihood of the self-supporting person on whom he is dependent. The means of livelihood which provides the largest income is the principal means of livelihood for a self-supporting person who has more than one means of livelihood. In the case of other self-supporting persons, it is the only means of livelihood.

Use the following contractions.—Write 1 for a person who cultivates land owned by him; 2 for a person who cultivates land owned by another person; 3 for a person who is employed as a labourer by another person who cultivates land; 4 for a person who receives rent in cash or kind in respect of land which is cultivated by another person.

For all other means of livelihood write fully and clearly what the person does in order to earn his livelihood and where he does it.

Question 11.—*Secondary means of livelihood.*—For a self-supporting person who has more than one means of livelihood write the means of livelihood next in importance to his principal means of livelihood. For an earning dependant write the means of livelihood which provides the earning. Use contractions given in question 10.

For a self-supporting person who has only one means of livelihood write 0. In the case of a non-earning dependant also, write 0.

3. *Question* 9—*Economic status.*—This question is in two parts. The first part requires the labelling of every person as " a self-supporting person ", " an earning dependant" or "a non-earning dependant". Every single human being must be

allotted one of these labels and not more than one of them, and this will be referred to as his Primary Economic Status.

The second part of the question has no application to non-earning dependants or to earning dependants. It relates only to self-supporting persons; and even among them, those exceptional cases of self-supporting persons who support themselves without gainful occupation or economic activity (*e.g.*, rentiers and pensioners) are not covered. All others (*i.e.*, all those self-supporting persons who are both economically active and gainfully occupied) are to be allotted one or other of the three labels, *viz.*, "Employer"; "Employee"; or "Independent Worker"; and this will be referred to as his Secondary Economic Status.

The following extracts from the model-instructions to enumerators explain the criteria to be applied and the treatment of border-line cases.

"Where a person is in receipt of an income, *and that income is sufficient at least for his own maintenance* then he (or she as the case may be) should be regarded as a "self-supporting person". Such income may be in cash or kind.

Any one who is not a "self-supporting person" in this sense is a "dependant". A dependant may be either an "earning dependant" or a "non-earning dependant"; the test is whether or not he secures a regular income, even though it may be small. Where the income which he secures is not sufficient to support him, that person is an 'earning dependant'. A person who does not secure any income either in cash or in kind, is a 'non-earning dependant'.

Where two or more members of a family household jointly cultivate land and secure an income therefrom, each of them should be regarded as earning a part of the income. None of them, is, therefore, a non-earning dependant. Each of them should be classed as either a self-supporting person or an earning dependant, according to the share of income attributable to him (or her). The same applies to any other business carried on jointly.

This does not mean that any one *who works* is necessarily a self-supporting person or an earning dependant. Thus, for instance, a housewife who cooks for the family, brings up the children or manages the household is doing very valuable work. Nevertheless, her economic status is that of a nonearning dependant, if she does not also secure an income.

(An) Employer (is) only that person who has necessarily to employ other persons *in order to carry on the business from which he secures his livelihood.* A person (who) employs a cook or other person for domestic service should not be recorded as an employer merely for that reason.

Persons employed as managers, superintendents, agents, etc., (who) control other workers are also employees only, and should not be recorded as employers.

An independant worker means a person who is not employed by anyone else and who does not also employ anybody else in order to earn his livelihood."

4. *Question* 10—*Principal means of livelihood.*—"Means of Livelihood" of any individual ordinarily means the gainful occupation which forms the source from which that income which is utilised for his maintenance is normally derived; but it is more comprehensive, inasmuch as in exceptional cases, income may be secured without

gainful occupation. "Principal Means of Livelihood" means the same thing as "Means of Livelihood" for every person who has only one means of livelihood. Where a person has more than one, that which gives him the greater part of his income is his "Principal Means of Livelihood". In the sense thus defined, every human being, without any exception, has a Principal Means of Livelihood—whether or not he is a self-supporting person. Every non-earning dependant is maintained exclusively by the income of some self-supporting person on whom he is dependent. Consequently, the Principal Means of Livelihood of the latter is required to be recorded as the Principal Means of Livelihood of the former. The same rule applies to earning dependants also (no attempt being made to assess the degree of sufficiency of his own income or the extent of his dependence on others).

Agricultural and non-agricultural means of livelihood are distinguished by the manner in which enumerators are required to record the answers to this question. This is important for purposes of subsequent classification of the answers. The following extracts from instructions are relevant :—

"Four simple contractions have been provided which will cover most cases where the livelihood is dependent on agriculture—Write 1 for a person who cultivates land owned by him ; 2 for a person who cultivates land owned by another person ; 3 for a person who is employed as a labourer by another person who cultivates land ; 4 for a person who receives rent in cash or kind in respect of land which is cultivated by another person. If you find that a person falls under two of these categories note that category which provides the largest income against question 10 and the second against question 11. No note need be taken of more than two such categories in any case.

In all other cases, write fully and clearly what the person does in order to earn his livelihood and where he does it. There are three lines on the slip provided for answering this question. Use them fully. Avoid vague and general terms. Do not write "service" or "labour". If you are enumerating a trader, describe the articles in which he is carrying on trade and state clearly whether he is a wholesale trader or a retail trader. A retail trader sells to the public. A wholesale trader does not. If you are enumerating a factory worker give the name of the factory or the product it makes, *e.g.*, coal mine, jute factory, cotton mill, etc.

[NOTE.—The word "owned", used in relation to land, includes every tenure which involves the right of permanent occupancy of land for purposes of cultivation. Such right should be heritable ; it may be, but need not necessarily be also transferable.]

5. *Question* 11—*Secondary means of livelihood.*—A self-supporting person may or may not have more than one means of livelihood. If he has more than one, that which provides the greatest income is recorded under question 10 as the "Principal Means of Livelihood" and the next under Question 11 as the "Secondary Means of Livelihood". It has been laid down that no note should be taken of more than two such means of livelihood in any case.

The answer to this question is invariably 'Nil' for non-earning dependants. *Ex hypothesi* they secure no income ; they are supported by the Principal Means of Livelihood of the persons on whom they are dependent which alone is taken to be their only means of livelihood.

In the case of every earning-dependant, there are two means of livelihood which are combined in order to support him. One is the Principal Means of Livelihood of the person on whom he is dependent. The other is the source wherefrom he secures his

own income. The former is always to be treated as the "Principal Means of Livelihood" of the "earning dependant"; and the latter as his "Secondary Means of Livelihood".

6. Further elucidation of the scope and implications of these questions have been provided in supplementary instructions in the form of question and answer.

These are extracted below:—

I—Census Question 9 (1)—

Question (1).—In the instructions the words are "the test is whether he secures a regular income, even though it may be small. Does the use of word 'regular' rule out persons who earn an income by seasonal employment?

Answer.—No. The word 'regular' is used in the sense of 'non-casual'. It is not intended to be confined only to income derived from continuous employment. It also includes income derived from seasonal employment. What it does exclude is individual income accruing casually and not constituting a source of income which is regularly depended upon.

Question (2).—The word 'self-supporting' as defined in the instructions, means any person whose income is sufficient at least for his own maintenance. Does this mean that an income sufficient for one man is self-supporting income? What about his direct dependants—wife, children, etc.?

Answer.—Yes. The instructions mean what they say. A person must be deemed to be self-supporting if his income (such as it is) is sufficient to support him individually at his present level of living (such as it is). He does not cease to be self-supporting merely for the reason that he, his wife and children taken are not maintained by his own income.

If the wife and children have no income of their own, they are non-earning dependants. The instructions provide that their principal means of livelihood should be deemed in every case to be the same as that of the person on whom they are dependent. This would in most cases be the husband or father who will also be the head of the household. In those exceptional cases where the husband or father is *not* the head of the household, and is also not able to support anyone but himself, then the head of the household in which the non-earning dependant is living is the person on whom he (or she) is dependent.

Remember—every "family household" is (collectively) self-supporting; otherwise it would not exist. The surplus of self-supporting persons within a family household is in every case sufficient to meet the deficit of the earning and non-earning dependants in that family household.

Question (3).—In the instructions it is recorded that if two or more members of the family household jointly cultivate land they would be classed as self-supporting or earning dependant "according to the share of income attributable to him or her". How are these shares to be assigned? What about females who, in some cases, take an active part in agricultural operations?

Answer.—The share of the income attributable to a person is what the head of the household (or whoever is the managing member) deems it to be. No attempt should be made to make a detailed calculation of this share. All that has to be ascertained is whether (in the opinion of the head of the household or managing member)

the member concerned is entitled to a share which would be sufficient to cover the cost of his own maintenance.

If the answer is 'yes', he is 'self-supporting'; if the answer is 'no', he is an 'earning dependant'.

The considerations are exactly the same whether the individual is a male or a female, an adult or a non-adult.

II—Census Question 9 (2)—

Question (4).—Are doctors and lawyers, who employ compounders and clerks independent workers or employers ?

Answer.—They are employers. A doctor employs a compounder in order to relieve him of part of the work connected with the business on which he is engaged and by which he secures his livelihood. A lawyer employs a clerk for a like purpose.

Question (5).—A money-lender employs four persons to realise interest. Is he an employer or independent worker ?

Answer.—He is an employer. He would be an employer even if he employed only one person, provided that person was regularly employed and derived his principal means of livelihood by such employment. Casual employment, or part-time employment which does not provide the principal means of livelihood of the person employed, should not be taken into account.

Question (6).—What is the status of tenants or zamindars who do not cultivate themselves but employ labourers ?

Answer.—If they employ others they are 'employers'—provided the purpose of the employer and the nature of the employment are as stated in the answers to the employment or as stated in the answers to the two preceeding questions.

Question (7).—What is the status of beggars; orphans in orphanages; convicts in jails ?

Answer.—They fall in none of the three categories. Record 0 for them.

III—Census Question 10—

Question (8).—What is the category of a minor, a blind person or a lady who has land in his or her name but gets it cultivated by labourers.—Category 1 or Category 4 ?

Answer.—Learn to distinguish between "cultivation of the land", and "performance of labour necessary for cultivating the land". There are, of course, millions of persons who perform both functions—but the functions are distinguishable and should be distinguished. The man who takes the responsible decisions which constitute the direction of the process of cultivation (*e.g.*, when and where to plough, when and what to sow, where and when to reap and so on); it is this person who should be referred to as the cultivator, even though he does not perform any manual labour whatever. The man who ploughs, or sows, or reaps, under the directions of some one else is not the cultivator—but a cultivating labourer, a different thing altogether.

The cultivator may be the owner of the land cultivated. In that case he is category 1, whether or not he also combines in himself the functions of a cultivating labourer.

Alternatively, the cultivator may be a lessee, an agent or manager (paid or unpaid). Even in this case it is immaterial whether this lessee or agent or manager also combines in himself the functions of a cultivating labourer; he (the cultivator) is category 2, and the other person (the owner) is category 4.

Applying these principles, the answer to the question put depends on whether the minor, blind person, or lady does or does not actually direct the process of cultivation. If the person, does this, the answer is category 1; otherwise, the answer is category 4.

ANNEXURE II

The 1951 Scheme of Occupations compared with the International Standard Industrial Classification Scheme and the Occupational Classification of past Censuses

International Standard Industrial Classification Scheme	Indian Census Economic Classification Scheme—(1951)	Scheme of Occupations (1941 and 1931) Group No. 1941	Group No. 1931	Description (1931)

6.1 Wholesale and retail trade	*6.0 Retail trade otherwise unclassified*			Order 23—*Banks, establishments of credit, exchange and insurance*
	6.01 Hawkers and street vendors otherwise unclassified	151	115	Bank Managers, money-lenders, exchange and insurance agents, money changers and brokers and their employees
	6.02 Dealers in drugs and other chemical stores	153		
	6.03 Publishers, booksellers and stationers	154		
	6.00 General storekeepers, shopkeepers and persons employed in shops otherwise unclassified			Order 24—*Brokerage commission and export*
	6.1 Retail trade in foodstuffs (including beverages and narcotics)	155	116*	Brokers, commission agents, commercial travellers, warehouse owners and employees
	6.11 Retail dealers in grains and pulses; sweetmeats, sugar and spices, dairy products, eggs and poultry, animals for food; fodder for animals; other foodstuffs, vegetables and fruits			Order 25—*Trade in textiles*
	6.12 Vendors of wine, liquors, aerated waters and ice in shops	156	117	Trade in piece goods, wool, cotton, silk, hair and other textiles
	6.13 Retail dealers in tobacco, opium and ganja			Order 26—*Trade in skins, leather and furs*
	6.14 Hawkers and street vendors of drink and foodstuffs	157	118	Trade in skins, leather, furs, feathers, horn, etc., and the articles made from these
	6.15 Retail dealers in pan, bidis and cigarettes			Order 27—*Trade in wood*
	6.2 Retail trade in fuel (including petrol)	158	119	Trade in wood (not firewood)
	6.21 Petroleum distributors	159	120	Trade in barks
	6.20 Retail dealers (including hawkers and street vendors) in firewood charcoal, coal, cowdung and all other fuel except petroleum		121	Trade in bamboos and canes
	6.3 Retail trade in textile and leather goods		122	Trade in thatches and other forest produce
	Retail trade (including hawkers and street vendors) in piece goods, wool, cotton, silk, hair, wearing apparel, made up textile goods, skin, leather, furs, feathers, etc.			Order 28—*Trade in metals*
	6.4 Wholesale trade in foodstuffs	160	123	Trade in metals, machinery, knives, tools, etc.
	Wholesale dealers in grains and pulses, sweetmeats, sugar and spices, dairy products, eggs and poultry, animals for food, fodder for animals, other foodstuffs, wholesale dealers in tobacco, opium and ganja			Order 29—*Trade in pottery, bricks and tiles*
	6.5 Wholesale trade in commodities other than foodstuffs	161	124	Trade in pottery, bricks and tiles
				Order 30—*Trade in chemical products*
		162	125	Drugs, dyes, paints, petroleum, explosives, etc.

* A part of this group 116 belongs to sub-division 7.5—the operation of storage facilities such as warehouses, etc., under Division 7 (part 2) (L.C. VIII) and the rest to sub-division 6.6 here. However, for Subsidiary Table 5.6 in Census Report—Part I, the entire population of this group has been taken into sub-division 6.6.

ANNEXURE III

NOTE ON THE RELATIONSHIP BETWEEN THE INDIAN CENSUS ECONOMIC CLASSIFICATION SCHEME AND THE INTERNATIONAL STANDARD INDUSTRIAL CLASSIFICATION SCHEME OF THE UNITED NATIONS

1. *Comparison with ISIC Scheme.*—The United Nations Organisation has evolved a Scheme of Classification of all economic activities known as the "International Standard Industrial Classification" Scheme. The Economic and Social Council of the United Nations has recommended the use of this Scheme by all member Governments "either by adopting this system of classification as a national standard, or re-arranging their statistical data in accordance with this system for purposes of international comparability". The present scheme of classification gives effect to the latter of the two alternative forms of this recommendation. There are 10 divisions and 44 major groups of economic activities under the ISIC Scheme which include Agriculture and, in addition, correspond to the 10 divisions and 88 sub-divisions of Industries and Services under the ICEC Scheme. The elements of the ICEC Scheme which correspond to each individual Division and each individual Major Group of the ISIC Scheme are set out in Annexure II.

2. *Unit of classification.*—Under the ISIC Scheme, the Unit of Classification is the organised "Establishment". The commodity produced or the service performed as a result of the work of the organised establishment is the criterion for classifying the establishment. The classification of the establishment is the classification of every member of the establishment.

Under the present (ICEC) Scheme the unit of classification is, in every case, the individual. All employers and all independent workers will be classified with reference to the commodity produced or service performed by them individually—this will be same as in the ISIC Scheme, there being no question of an "establishment" distinct from the individual in these cases.

As regards "Employees", all persons engaged in production, commerce or transport (and not being domestic servants) will be classified under the appropriate sub-divisions with reference to their own activity, and without reference to that of their employer. Domestic servants will all be classed in one sub-division without reference to the nature of their work. All other employees (including all managerial and supervisory employees, clerical services, messengers, watchmen and unskilled labour of every description) will be classified with reference to the commodity produced or service rendered by their employers.

Thus, there is a technical distinction regarding the unit of classification adopted in the two Schemes. This is unavoidable having regard to the nature of the questions which alone can be put in a general population census in India. Nevertheless, there will be no difference between the two Schemes, except as regards the allocation of those "employees" who are individually engaged in activities classifiable as production, commerce or transport, and who are employed in "establishments" whose main purpose is classifiable differently from the activity of the individual employee. The proportion of employees of this kind to the total of all active workers in industries and services (as they are organised at present in India) is unlikely to be large enough to make a significant difference to the comparability of data classified under the two Schemes.

B. I—Livelihood classes and sub-classes

1. The abbreviation S. C. used in the Table heading stands for sub-class.

2. By definition, self-supporting persons (S.C. i) are economically active, earning dependants (S. C. iii) are economically semi-active; and non-earning dependants (S.C. ii) are economically passive.

B. III—Employers, employees and independent workers in industries and services by divisions and sub-divisions

1. Like the preceding Table, this Table exhibits figures only for a part of the population, *viz.*, the economically active self-supporting persons belonging to the four non-agricultural livelihood classes.

2. The divisions and sub-divisions of the ICEC Scheme that go into each of the non-agricultural livelihood classes are as follows :—

Class V—Production (other than cultivation).

Division 0—Primary industries not elsewhere specified ;
1—Mining and quarrying ;
2—Processing and manufacture—foodstuffs, textiles, leather and products thereof ;
3—Processing and manufacture—metals, chemicals and products thereof ;
4—Processing and manufacture—not elsewhere specified.

Class VI—Commerce.

Division 6—Commerce.

Class VII—Transport.

Division 7—Transport, storage and communications (only Sub-divisions 7·1 to 7·4).

Class VIII—Other services and miscellaneous sources.

Division 5—Construction and utilities.
7—Transport, storage and communications (except sub-divisions 7·1 to 7·4).
8—Health, education and public administration.
9—Services not elsewhere specified.

3. Livelihood Class VIII also includes persons drawing sustenance from the following unproductive means of livelihood :

i non-working owners of non-agricultural property ;
ii pensioners and remittance holders ;
iii persons living on charity and other persons with unproductive occupations ; (*e.g.*, beggars, prostitutes) ; and
iv inmates of penal institutions and asylums.

Since these persons are regarded as economically inactive they do not find a place in this Table ; consequently the figures for total self-supporting persons in Table B. I will

not tally with those in Table B. III unless their numbers are taken into account. The reconciliation between the two tables is shown in the following statement :—

State, City and District	Number with unproductive means of livelihood			Total S/S persons in Industries and Services as per Table B. III		Total S/S persons in the population as per Table B. I

UNEMPLOYMENT TABLES

1. The Government of India had left one of the topics to be investigated at the Census to provincial discretion. The Government of Mysore exercised their discretion accordingly in favour of investigating "Unemployment", on the recommendation of the Census Commissioner. The results of the investigation are embodied in the following tables which fall outside the regular All-India Series :—

B. IV—Distribution of unemployed by districts and livelihood classes on which depending.

B. V—Classification of the unemployed by livelihood classes and class of employment sought.

B. VI—Distribution of unemployed by period of search for employment.

B. VII—Distribution of unemployed by birthplace, period of unemployment and kind of employment sought.

B. VIII—Distribution of unemployed by age, sex and civil condition.

B. IX—Distribution of unemployed by educational standards.

2. The tables included in this series show the distribution of unemployed persons in the State who were actually in search of employment at the time of the Census, persons who were not in search of employment and persons who were in search of alternative employment being specifically excluded from the scope of the enquiry.

3. Distribution of Mysorean and Non-Mysorean elements is given separately in all the tables while the urban/rural breakdown by districts is furnished for all except Table B. VII. In the case of the latter, details are furnished for the State, Cities, Non-City Urban and Rural only and not for individual districts and cities.

TABLE B. IV

B. IV—Distribution of unemployed by districts and livelihood classes on which depending

C—Household and Age (Sample) Tables

C. I—Household (size and composition)

1. The sample on which this Table is based differs in the following respects from the general 10 per cent sample of enumeration slips from which the remaining tables of the C Series have been prepared :—

(i) It was drawn from the National Register of Citizens and not from enumeration slips. However, investigation has confirmed that the National Register of Citizens is an exact copy of the enumeration slips to within 0.01 per cent.

(ii) It consisted of households whereas the other sample was composed of individuals (slips).

(iii) It is very much smaller than the other, being of size only about 1 in 2,000 in the rural area and about 1 in 1,000 in the urban area as against the slip sample size of 1 in 10.

(iv) The sample drawn from the slips was a simple random one; on the other hand, that used here is a stratified, two-stage sample drawn randomly from lists.

2. Rural and Urban figures have not been added to give "Total" figures since the sampling ratios are different for the two strata.

3. Columns 2, 3, 4, 5, and 6 show, not estimates worked out from sample values, but "exact" figures based on the full count of all enumeration slips.

4. The sample used here is the same as that used for the Sample Verification of the Census Count. However :—

(*a*) verified households as well as those that could not be verified for various reasons have been taken into account in this Table;

(*b*) this Table has been compiled on the basis of the original entries in the National Register of Citizens, and not on the enumeration record as corrected by the verifiers;

(*c*) but errors of relationship (but not of age) discovered by the verifiers have been taken into account in preparing the table.

The following is a detailed description on the method by which samples were selected :—

The sample was drawn in two stages, sample blocks being selected in the first stage from lists of villages and town-wards and sample households being drawn in the second stage from the National Register of Citizens of each block. An over-all sampling rate of 1/2,000 was used in the rural area; for the urban area the higher of the two rates allowed by the Registrar General, *viz.*, 1/1,000 was adopted. For the first stage of sampling, *viz.*, blocks within each district, a fraction of 1/50 was adopted in urban areas and a fraction of 1/1000 in rural areas. Accordingly the fraction for the second stage (households within each block) was 1/20 uniformly for both rural and urban areas. The number of households within each block was generally so small

(even in urban areas) that the possibility of employing a smaller fraction at the second stage was ruled out.

The Charge Lists and the Circle Summaries constituted the lists of villages and town-wards from which the sample blocks were selected. On account of the numerous defects that were found in the existing serials of block numbers, all blocks were placed in new serials, by the simple expedient of striking progressive totals.

The sampling procedure prescribed by the Registrar General said, "Strike the total number of blocks for the tract and divide it by the reciprocal of the sampling fraction (50 or 100 as the case may be). Add 1 to the remainder. This is the serial number of the first sample block. To get the others, take every 50th or 100th block thereafter". Since the tracts in Mysore were rather small, the district was substituted for the tract. Within each district the taluks in the rural area and the towns in the urban area were placed in the alphabetical order to ensure strict randomness. The total number of blocks in the district was struck separately for the urban and rural areas and these totals were used to determine the first sample block. Thereafter every 50th or 100th block was taken into the sample. In the case of the rural area the residuary blocks were found to be so numerous (594 out of a total of 25,094 blocks) as to cause a substantial divergence between the theoretical and actual sampling fractions. They were therefore listed in a separate serial and sampled in the usual way.

As soon as the first-stage sample was drawn, the National Registers of Citizens of the sample blocks were taken out from the Record Keeper's stock. Once again, many mistakes had been committed in writing the household serial number in the National Register of Citizens. This demanded a thorough overhaul of the household serial. In the process, the institutions and houseless families figuring in each Register were carefully excluded.

The drawing of sample households in each block followed exactly the same procedure as the drawing of sample blocks in the first stage. The first sample household (obtained by dividing the total number of households by 20 and adding 1 to the remainder) being determined, the rest of the sample households (*viz.*, every 20th household after the first) were spotted out with the aid of page-wise cumulative totals. Strict randomness was ensured by maintaining special supervision at all stages of the sampling operation.

A word of explanation is necessary here regarding rejections. In the first stage of the sampling, blocks were rejected only if they were uninhabited. In such cases the block nearest to, but preferably next after, the rejected block was chosen as substitute. In the second stage, the entire block was rejected if the total number of households was less than ten ; there was no substitution for such blocks. If the number of households in the block was ten or more but less than 20, the quotient obtained by dividing the total number of households by 2 was taken as the serial number of the first sample household. This happened in ten blocks (all rural) or 4 per cent of all rural blocks in the sample. The actual fraction of blocks sampled in the rural area as a result of rejections was 1 in 105.4 as compared with the working sampling fraction of 1 in 100.

Household (size and composition)

C. II—Livelihood Classes by age-groups

1. This Table shows the distribution of the sample population according to livelihood classes by age-groups.

2. This Table is prepared from the data collected from the 10 per cent sample slips separated at the time of initial sorting of the enumeration slips. The 10 per cent sample was taken as follows :—

> Each enumeration pad which mostly consisted of 100 enumeration slips was broken and the pack of slips was "cut" as in a card-game. The lower portion was placed above the upper portion and then the slips were dealt into the pigeon holes marked 1, 2, 3, 4, 5, S, 6, 7, 8 and 9 respectively. If a displaced person's slip was encountered during this sorting, it was dealt into a separate pigeon hole marked "Displaced Person". All the slips contained in the pigeon hole marked "S" were taken as the 10 per cent sample slips of the general population.

3. No smoothing formula has been adopted in preparing the table as in the previous census and the figures have been tabulated as actually returned in suitable age-groups.

C. II—Livelihood Classes by age groups

Age Groups	Sample population			Livelihood Classes: Agricultural Classes — I Cultivators of land wholly or mainly owned and their dependants		II Cultivators of land wholly or mainly unowned and their dependants		III Cultivating labourers and their dependants		IV Non-cultivating owners of land; agricultural rent receivers and their dependants		Non-agricultural Classes — Persons (including their dependants) who derive their principal means of livelihood from: V Production other than cultivation		VI Commerce		VII Transport		VIII Other services and miscellaneous sources

C. III—Age and civil condition

1. See Note 2 to Table C. II.

2. In previous censuses the counterpart of this Table gave figures by religion, and by age for single years up to age 5 and then by 5-yearly intervals ending with 70 and over.

C. IV– Age and literacy

1. See Note 2 to Table C. II.

2. In previous censuses the table corresponding to this one gave figures by religion and by age-groups beginning with 0–5 and continuing in 5-yearly intervals up to 20 and over. In 1941 information was also presented for age-groups 20–30, 30–50 and 50 and over.

3. In the 1931 and previous censuses information was published on literacy by the language in which a person was "literate". In 1941 full figures were furnished only for all literates and those literate in English and summary figures by districts were given in a State Table for literacy by script.

D—Social and Cultural Tables

There are altogether 10 tables in this Series. Of these only four namely D-I (i) Mother Tongue, D-I (ii) Bilingualism, D-II Religion and D-IV Migrants had their exact, or near exact, counterparts in earlier censuses. The rest are brand new or very nearly so.

Except that the languages are arranged in the order of their numerical importance, the two language tables differ very little from the corresponding tables of the past. D-II Religion is a truncated version of the "Community" table of 1941. Details for Scheduled Tribes, Scheduled Castes and Anglo-Indians which appeared in the 'Community' table itself on the previous occasion are now separately exhibited in table D-III. D-IV Migrants corresponds to the 'Birthplace' table of the previous censuses. Table D-VI Non-Indian Nationals is based on a suggestion made by the United Nations Population Commission and corresponds roughly to an abridged edition of Imperial Tables XIX of 1931 and XV of 1941 showing "Europeans and Allied Races and Anglo-Indians by Race and Age".

D IV-A 'Immigrants by Livelihood Classes' D-V (i) 'Displaced persons by year of arrival in India' and D-V (ii) 'Displaced Persons by Livelihood Classes' and DI-VII 'Livelihood Classes by Educational Standards' are brand new tables. D-IV A shows the distribution by 'Livelihood Classes of immigrants from other States in India.' D-V (i) and (ii) are new tables necessitated by the movement of population consequent on the creation of Pakistan; and D-VII is designed to show the distribution of educated man-power among the different livelihood classes by different grades of academic qualification.

Table D. I—Languages

(i) Mother tongue

1. Mother tongue is defined as the language spoken from the cradle. In the case of infants it is the mother tongue of the mother.

2. Dialects of the principal languages of the State that could be clearly recognised as such have been merged with their respective parent languages. All other tongues are shown in the table as returned.

3. The figures under "Hindustani" include also persons who have returned "Urdu" and "Western Hindi" as their mother tongue.

4. The Table proper is preceded by an abstract in which the figures for the State as a whole are shown for each mother tongue.

5. Both in the Table and in the abstract, languages are given in the order of the total number of speakers.

6. Under each language only such districts and cities have been listed as have at least one person with that language as mother tongue.

D. I—Languages

(i) MOTHER TONGUE

ABSTRACT FOR THE STATE

Table D. I—Languages

(ii) Bilingualism

1. The instructions at this Census introduced two changes from past practice. First only Indian languages were taken into account. Secondly, where a person spoke two or more languages in addition to the mother tongue the enumerator was required to record only one of them. This was the language which was used most commonly by the speaker, next to the mother tongue.

2. Against each mother tongue only such subsidiary languages are listed as had at least 100 persons speaking some subsidiary language or the other. For mother tongues which returned at least one but fewer than 100 bilinguists details for the State as a whole are as follows :—

Mother tongue	Total no. of bilinguists	Subsidiary languages									
		Language	Persons	Language	Persons	Language	Persons	Language	Persons	Languag	Persons
1	*2*	*3*	*4*	*5*	*6*	*7*	*8*	*9*	*10*	*11*	*12*
Assamese ..	36	Hindi	29	Bengali	7	..	..	..	..	..	..

Table D.II—Religion

1. In 1941 this Table was prepared by community. The present arrangement reverts to the 1931 practice of showing figures by religion.

2. The term "Parsees" has been replaced by "Zoroastrians".

D. IV—Migrants

1. The three Cities (Bangalore Corporation, Mysore City and Kolar Gold Fields City) form part of the corresponding Birth Districts.

2. Pakistan, it should be noticed, is now shown under "*B—Countries in Asia beyond India.*" In former Censuses the different States of which it is composed, were under "*A—II Provinces and States in India beyond Mysore*".

3. "*Elsewhere in Asia*" includes (i) "*French and Portuguese Settlements in India*" and (ii) "*India Unspecified*" which were shown as separate *items* under "*Born in India*" in earlier Censuses.

4. A table showing, under each of the eight livelihood classes, the number of persons enumerated within the State whose birthplace was in each of the 26 other States in India is given after this Table as a separate Table entitled "D.IV-A, Immigrants by Livelihood Classes." For a description of livelihood classes, please see Note 2 to Table B. III.

D. V (i) and D. V (ii)—Displaced Persons

(i) by Year of Arrival and (ii) by Livelihood Classes

These Tables relate only to Displaced Persons. A Displaced Person is defined as "a person who has entered India having left or been compelled to leave his home (i) in Western Pakistan on or after 1st March 1947, (ii) in Eastern Pakistan on or after the 15th October 1946, on account of civil disturbances or on account of the setting up of the two Dominions of India and Pakistan."

D. VII—Livelihood Classes by Educational Standards

1. This Table shows the incidence of literacy and education in each of the eight livelihood classes.

2. The test for literacy was ability to read and write a simple message in some language or other. In the Table, "Literates" refers to persons who could read and write but who had not passed any examination; and "Illiterates" includes partly literates who could read but not write.

3. The enumeration of educational attainments was based on the highest examination passed. Where a person held academic qualifications in more than one field, all of them were enumerated; but at the time of tabulation the professional or technical qualification was preferred to the general *e.g.*, a B.A., B.L., was classified under "Legal"; a B.Sc., M.B.B.S., was classified under "Medical".

E—Summary figures by districts and taluks

1. The details for taluks are preceded by an abstract showing figures for districts and cities only.

2. The previous census tables corresponding to Table E of this census gave figures only for districts and cities in the Imperial Table; figures for taluks were shown in a separate Provincial Table. This time figures for districts as well as taluks are presented in a single table, with break up by livelihood classes.

3. A further innovation of this census is the display of separate figures for rural and urban areas against each district and taluk. For a description of the term "Urban", please see Note 6 to Table A. I.

4. Since the Surveyor-General, India, was not in a position to furnish area figures for administrative units smaller than the district, the area figures of taluks were computed from village and town-wise data furnished by the Amildars of taluks and Municipal Presidents of towns. The areas of the three Cities, (Bangalore Corporation, Mysore City and Kolar Gold Fields City) were obtained from the Municipal Authorities. The district areas compiled in this way from locally available data do not agree with those given in Table A. I which are the latest determinations of the Surveyor-General, India. The discrepancy is stated to be due to inevitable differences in the methods of measurement employed by the Survey of India and by the local Survey Department.

5. The districts and cities of the State have remained unchanged since 1941 except that there have been some minor alterations in their composition due to the transfer of enclaves between Madras and Mysore. Please see the fly-leaf to Table A. II for a list of these enclaves.

6. Within the districts extensive and important alterations have taken place during the last decade. Kumsi Sub-taluk was abolished by merger with Shimoga Taluk and a new taluk 'Bhadravati' was formed out of the aggregate. Numerous villages, sometimes comprising entire revenue circles, were transferred from one taluk to another. A detailed account of these transfers is given below:—

Bangalore District.—Thirteen villages transferred from Hoskote Taluk to Anekal Taluk; and eleven villages from Kankanhalli Taluk to Bangalore South Taluk.

Kolar District.—Twenty-seven villages transferred from Malur Taluk to Kolar Taluk.

Mysore District.—Nineteen villages transferred from Hunsur Taluk to Periapatna Taluk.

Mandya District.—Eighteen villages transferred from Pandavapura Taluk to Krishnarajapete Taluk.

Hassan District.—Eighty-two villages were added to Alur Taluk as follows:—

(*a*) Nine villages from Hassan Taluk.

(*b*) Twenty villages from Belur Taluk.

(*c*) Fifty-three villages from Manjarabad Taluk.

Shimoga District.—(*a*) Kumsi Sub-taluk was merged with Shimoga Taluk; (*b*) three hoblies of the old Shimoga Taluk (*viz.*, Bhadravati, Holehonnur and Kudlagere) with the exception of five villages in Bhadravati hobli, (*viz.*, Nidigi, Honnavalli, Ramapura, Manchenahalli and Sogana) were constituted into a new taluk called Bhadravati.

7. The population figures for 1941 and 1931 used for purposes of columns 6, 7 and 8 of the Table, were obtained after making adjustments for all the territorial changes described above.

8. The area figures in column 2 of the Table have been rounded up to the nearest integers, while the density figures for 1951 and 1941 have been calculated on the actual area figures furnished by the Amildars of taluks and Municipal Presidents of towns. The area figures for urban areas which were less than 0·5 have been omitted from the Table.

9. The rural and urban density figures for 1941 (column 10) have been calculated after deducting the area and population figures for the towns figuring for the first time in the 1951 Census from the area and population figures given for urban areas for 1951 and adding those figures to the area and population figures given for the rural areas in the districts and taluks where new towns have emerged.

E—Summary figures

E—Summary figures by cities, districts and taluks
