General Explanation

1. The results of the 1951 Census of Madhya Bharat and Bhopal are contained in the following publications:—

(i) Census Report—

(a) Part I-A—Report.

(b) Part I-B—Subsidiary Tables.

(c) Part-II-A—General Population Tables (A-I to A-V and E), Household and Age (Sample) Tables (C-I to C-V) and Social and Cultural Tables (D-I to D-VII).

(d) Part II-B—Economic Tables (B-I to B-III and F).

(ii) District Census Hand-books.

2. In the tables of this volume the statistics have been exhibited by Natural Divisions and Districts. The Natural Divisions shown in the tables are part of an All-India scheme for the division of the country into Natural Regions, Sub-Regions and Divisions.

3. As a rule every person has been enumerated at his usual place of residence except those who had left their normal place of residence before the 9th February, 1951 and were not expected to come back until after the 1st March, 1951. Such persons were enumerated at the place where they were found. The persons having no normal place of residence were enumerated at the place where they were found during the night preceding the sunrise of 1st March, 1951.

(A-I to A-V. & E)

TABLE A-I

Area, Houses and Population

1. *General.*—This table shows for each districts the area, the number of towns and villages and a distribution of occupied houses and population between Urban and Rural areas. Similar details for Tahsils are given in Table E.

2. *Area.*—The area figures for districts given in this table are those supplied by the Surveyor-General of India and these differ to some extent from those given in Table E which are furnished by the Tahsil Authorities and are based on survey made for revenue purposes which commonly omits forest area.

3. *Village.*—A Census village means a Revenue village and includes all hamlets attached to it, but does not include a Revenue village or part of a Revenue village or any collection of Revenue villages, which are included in a Census Town (as defined below) or form the suburb of such a town.

4. *Town.*—means a locality having Municipality or a Cantonment Board and usually a population of 5,000 or more persons.

5. *Occupied House.*—For purposes of the census a house was defined as every dwelling with a separate main entrance and every such dwelling if used for human habitation has been classed as an "occupied house".

6. According to Census definition the rural population is all the population living outside the boundaries of towns as defined in para 4 above.

7. The total urban population is 1,441,231 and urban/rural ratio 18:82.

8. The number of Revenue villages which are depopulated is given below for each district :—

TABLE A-II.

Variation in Population during Fifty Years.

The State was constituted in its present form in June, 1948. Since then there have been changes of importance in the number, size and boundaries of the old administrative divisions, which have profoundly disturbed all the former territorial arrangements. Some districts and many tahsils which appeared as separate units in the Imperial and State Tables of the past censuses have been abolished and the territories of a number of small Princely States, which at previous censuses were treated as single units without regard to their individual size have been absorbed in the newly formed districts.

2. The administrative units mostly affected by this change were the tahsils in the districts of Rajgarh, Bhilsa, Dewas, Dhar, Jhabua and Nimar. All the tahsils in these districts still bear their old names but so innumerable have been the intertransfers of villages that today not one of them remains what it was at the Census of 1941.

3. The exchange of enclaves under 'The Provinces and States (Absorption of Enclaves) Order, 1950', has also affected the area and population figures of all the border districts.

4. For the reasons indicated above the construction of this and other tables in which comparison is made between the population statistics of this and the past censuses has involved a great deal of work. In the case of many units the population for past censuses has had to be reconstructed from the States' village tables and adjusted for changes in area. When the population of the tracts or villages transferred was known, it was transferred intact and when the exact population of any area for any decade was unknown it was calculated by applying to the known population of the previous decade the rate of growth of the unit to which it was transferred. Thus the figures given in this table and table E represent the persons enumerated at each census within the limits of the State (or smaller unit) as now constituted.

5. Sex details for 1901 Population of the districts are not available. These details for Natural Divisions have, however, been estimated and are given in this table.

6. Details of enclaves transferred to and from the State are given below:—

A.—Transferred from Madhya Bharat.—

93 villages to Rajasthan as detailed below:—

10 villages of Gangapur Tahsil of
Mandsaur District.

TABLE A-IV.

Towns classified by Population with Variation since 1901.

- 1. For definition of "Town" see fly-leaf of Table A-I. According to this definition only 67 localities have been (treated as towns on this occasion. At the previous census the total number of towns was 90.)**
- 2. Only two towns namely—Mhow and Neemuch are Cantonments, all the rest are Municipal towns.**
- 3. There are also two other cantonment areas in the State namely—Lashkar and Morar but these form part of the Gwalior city.**
- 4. As the 1901 population of Raghogarh town could not be ascertained, urban population of the State and its Plateau Division in which that town lies has not been shown in the Table.**

TABLE A-V.

Towns arranged Territorially with Population by Livelihood Classes.

1. This Table differs from Imperial Table V of the previous Censuses in that it presents information by Livelihood Classes instead of by Religions.

2. In column 2 against each town the form of the Local Government it enjoys, has been indicated in brackets. The abbreviation (Mpl.) means a Municipality and (Cantt.) means a Cantonment.

3. The figures in columns 16 and 17 of the Table are the male and female totals respectively, of Agricultural Classes I, II and III taken together. The total strength of each of these Classes in all the towns of the State is as follows:—

Class I—Cultivators of land wholly or mainly owned and their dependants:—

Males .. 32,701

Females .. 30,627

Class II—Cultivators of land wholly or mainly unowned and their dependants:—

Males .. 18,444

Females .. 16,897

Class III—Cultivating labourers and their dependants:—

Males .. 12,648

Females .. 13,893

TABLE E.

Summary Figures by Districts and Tahsils.

This table shows for each District and Tahsil as a whole and for the urban and rural tracts—the Area, Population, Percentage variation in the population and Density of population for the last two censuses and the distribution of 1951 population by Livelihood Classes.

2. The area figures given in this table differ considerably from those given in Table A-1. For explanation of this difference see Note 2 on the fly-leaf of Table A-1.

3. The area figures of urban tracts are those supplied by the Municipalities and are in some cases only approximate.

4. The 1941 population given in this table represents the population of areas now constituting the Tahsil.

5. As the four tracts namely Alirajpur Tahsil of Jhabua District, Khilchipur and Rajgarh towns in the Rajgarh District and Gautampura town in Indore District are unsurveyed, their areas have not been shown in this table.

6. The area figures have been rounded up to the nearest integer and the density has been calculated on the actual area figures furnished by the Tahsildars and the District Officers concerned.

(C-I to C-V)**

TABLE C-I.

Household (Size and Composition).

This table embodies some essential information about the size and composition of households. The procedure adopted for the presentation of the information was briefly this :—

- (i) Information about the relationship with the Head of the household was collected on the slip of every individual enumerated at this census.
- (ii) This information from the census slips was copied in the National Register of Citizens by households and each household was given a serial number in the register for every village/ward.
- (iii) After the preparation of the National Register, a one in one thousand sample of the households was taken and the results were compiled in the Tabulation Office. The sample was drawn in the following manner :—
 - (a) In rural tracts, one village census block was chosen out of every hundred blocks and in each of the selected blocks, every tenth household was chosen. In urban tracts, one town census block was chosen out of every twenty blocks and in each of the selected blocks every fiftieth household was chosen.
 - (b) Selection of the blocks on the foregoing basis was made from the lists of the census blocks in each rural and urban tract. The number of census blocks in a rural tract was divided by hundred and one was added to the remainder after the division. The number thus obtained was taken as first sample block and then every hundredth block from the first sample block was selected for the sample. In urban areas the number of census blocks in a tract was divided by twenty and one was added to the remainder. The number thus obtained was taken as first sample block and thereafter every twentieth block from the first sample block was selected for the sample.
 - (c) The selection of households from each selected census block was made from that section of the National Register of Citizens which related to that census block. The procedure was—that in the case of rural areas the number of households in each register was divided by ten and one was added to the remainder, the number thus obtained was marked in the register as first sample household. After this every tenth household in the register was marked as sample household. In urban tracts the number of households in a register was divided by fifty and one was added to the remainder, the number thus got was the number of first sample household in the register and every fiftieth household after that household was taken to be a sample household.

2. The procedure outlined above has not given exactly a one in one thousand sample, actually the sampling fractions for the rural and urban tracts of the State as a whole come to 1/1039 and 1/1101 respectively.

3. Household in this Table means a person or group of persons living in one house-keeping community. The persons constituting this group may or may not be related by ties of kinship but if they live together under common house-keeping arrangements, they constitute a household.

4. The households in each tract of a district have been divided in four Livelihood and Social classes according to the means of livelihood and social class of the selected households.

5. The only figures in the table requiring explanation are the figures given in columns 19 to 24 of the table. These figures do not include the unrelated members of the households and therefore fall short by 16 males and 5 females in Madhya Bharat and 7 males and 2 females in Bhopal State in comparison with the figures given in columns 7 to 9.

6. Since no household from the urban area in Jhabua District fell within the Sample, there are no entries against this district in columns 7 to 36.

TABLE C-II.

Livelihood Classes by Age Groups.

This table and other succeeding tables of this series have been prepared on sample basis and do not cover the whole population. The sample for these tables was intended to be one in ten. How the sample was drawn will be clear from the instructions which were issued to the sorters. These are reproduced below :—

“Break each pad and stake the slips of the pad ; and cut the stake as in Card Game. Place the lower portion above the upper portion and then deal the slips into the pigeon holes. You should deal the slips into pigeon holes in the order 1, 2, 3, 4, 5, 6, 7, 8, and 9 successively. All the time, you should watch the slips for the answer to question 6. If you come across any slip in which the answer to question 6 is different from ‘O’ deal it with the pigeon hole for ‘Displaced Persons’.”

“When you have finished one pad, take up the next ; and cut and deal similarly, until all the pads of the Village/Ward given to you are completely sorted. You should combine the slips in pigeon holes marked 1, 2, 3, 4, 5, 6, 7, 8, and 9. These are called the “General Slips”. You have now got 3 bundles of slips, *viz.*, “General Slips”, ‘Sample Slips’ and slips of ‘Displaced Persons’, if any.”

2. It will be seen from the above instructions that the sample thus drawn was not exactly one-tenth of the whole population but of the whole population *minus* the number of displaced persons.

3. The instructions to enumerators for recording age were as follows :—

“Age— write age last birthday *i. e.*, the actual number of completed years, write ‘O’ for infants below ‘1’.”

“This is an important question and many persons are likely to find it difficult to state their age correctly. You should assist them and try to record, as far as possible, the correct age of the person enumerated. If you are not able to elicit the correct age directly you should get at it by referring to some event of importance that occurred in the past and is remembered by everyone. You should use any local calendar of such events which may have been prepared for the purpose.”

4. No smoothing formula has been adopted in preparing the table as in the previous census and the figures have been tabulated as actually returned in suitable age group.

TABLE C-IV.
Age and Literacy.

1. This table was also prepared on the basis of data collected from the 10 per cent. sample slips of general population as in the case of Table C-II and the figures have been tabulated as returned without the use of any smoothing formula and the remarks contained in the fly leaf to Table C-II apply in this case also.

2. A person who was able to read and write has been treated as literate for the purpose of this table. The test for reading was ability to read any simple letter either in print or in manuscript. The test for writing was the ability to write a simple letter.

3. Persons who were partly literate, i. e., persons able to read only but unable to write, have been included among the illiterates and details for such persons by age-groups are given below :—

D-Social and Cultural Tables.

(D-I to D-VII)

TABLE D-1.

Languages.

This table is in two parts. Part (i) contains the statistics about the mother-tongue while part (ii) deals with the languages which are spoken as subsidiary to the mother-tongue. These Tables correspond to Table XII (i) and (ii) of the previous census.

The information contained in this table is the outcome of two questions, number 7 and 8 of the census questionnaire. The mother-tongue was the language spoken from the cradle, while in the case of infants and deaf-mutes the mother-tongue of their mother was taken to be their mother-tongue. If a person commonly spoke any Indian language other than his mother-tongue that language was recorded as a subsidiary language.

TABLE D-II

Religion

Like all the previous censuses this time too every person was asked to state the religion to which he or she belonged and the information obtained through this question has been exhibited in this table. This table differs from table XIII of 1941 census in two respects.—(i) The Heading of the 1941 table was "Community", and (ii) the persons belonging to the tribal class irrespective of the religion they returned were lumped together as "Tribal community".

TABLE D-V.

Displaced Persons.

This table is in two parts. In part (i) the displaced persons from West and East Pakistan have been classified according to the year of their arrival in India and in part (ii) their distribution according to Livelihood Classes has been given.

The information about displaced persons was collected through a question asking whether the person enumerated was a displaced person and if so what was the date of his arrival in India and his district of origin in Pakistan? For the purpose of this table the displaced person was defined as:—

“Any person who has entered India having left or being compelled to leave his home in Western Pakistan on or after the 1st March, 1947 or his home in Eastern Pakistan on or after the 15th October, 1946, on account of civil disturbances or the fear of such disturbances or on account of the setting up of the two Dominions of India and Pakistan”.

TABLE D-VII.

Livelihood Classes by Educational Standard.

The information about literacy and education collected at this Census has been exhibited in three separate tables:—

- (i) Table C-IV which has been prepared on sample basis contains the number of literate persons according to age groups;
- (ii) Table D-VII (this table) in which the literate persons have been classified according to Educational Standards and Agricultural and Non-Agricultural Classes, and
- (iii) The Primary Census Abstracts forming part of the District Census Hand-Books, wherein the number of literate persons in each village and ward has been given.

For the users of the figures given in the above three tables a note of caution seems to be necessary and that is that the three sets of figures given in different tables are not comparable with each other. The reason is that the figures in Primary Census Abstracts and in Table D-VII, although they relate to the whole population, have been compiled from two different sources, *i.e.*, in the case of Primary Census Abstract from the National Register of Citizens and in the case of this table from the enumeration slips.
