Census of India, 1951

VOLUME VII MADHYA PRADESH

PART I—B Subsidiary Tables and Notes thereon

By

THE LATE SHRI J. D. KERAWALLA, M.Sc.
*Formerly of the Indian Administrative Service
and Superintendent of Census Operations, Madhya Pradesh*

AND

H. N. BANERJEE, M.Sc., LL.B.
*Of the Madhya Pradesh Civil Service
Superintendent of Census Operations, Madhya Pradesh*

NAGPUR

GOVERNMENT PRINTING, MADHYA PRADESH

1953

[Price—Rs. 5]

NOTE

1. Census of India, 1951, Volume VII, for Madhya Pradesh, is divided into the following Parts :—

PART I Report, Subsidiary Tables and Notes thereon.

Part I—A .. Report.

Part I—B .. Subsidiary Tables and Notes thereon.

PART II Tables in four Volumes as follows :—

Part II—A .. General Population Tables of the "A" Series and Summary Figures for Districts constituting the "E" Series.

Part II—B .. The Economic Tables of the "B" Series.

Part II—C .. Household and Age (Sample) Tables of the "C" Series and Social and Cultural Tables of the "D" Series.

Part II—D .. The Maternity Tables.

2. The Administration Report is in two Parts:—

PART I Enumeration (The Enumeration Procedure—Training of Staff—The Census Questionnaire and details of putting it across to the People—The National Register of Citizens—Verification of the 1951 Census Count and the Sample Census Enquiry, etc.).

PART II Tabulation.

TABLE OF CONTENTS

<i>Table</i>	<i>Particulars</i>	<i>Pages</i>
SUBSIDIARY TABLES		
SERIES 1.		
1-1	Area and Population, Actual and Percentage, by Tahsil Density	1-3
1-2	Variation and Density of General Population	4
1-3	Mean Decennial Growth Rates during Three Decades—General Population	5-9
1-4	Immigration	10-11
1-5	Emigration	12-13
1-6	Migration between the State and other parts of India	14
1-7	Variation in Natural Population	14
1-8	Livelihood Pattern of General Population	15
1-9	Livelihood Classification of Immigrants into Madhya Pradesh from other States of India	16
1-10	Livelihood Classification of Emigrants from Madhya Pradesh to other States of India	17
1-11	Number of persons recruited by the Tea District Labour Association, from the districts of Madhya Pradesh during 1941-50.	18
1-12	The Northern Border Immigration from the Adjoining States into the districts of Nimar, Hoshangabad, Sagar, Jabalpur, Mandla and Surguja.	18
1-13	The South-West Border Immigration from the Adjoining States into the districts of Akola, Yeotmal, Buldana, Amravati and Chanda.	19
1-14	The South-East Border Immigration from the Adjoining States into the districts of Bastar, Raipur and Raigarh. ..	19
1-15	Adjusted Population in each age group for 1901, 1911, 1921, 1931, 1941 and 1951 Censuses	20-21
1-16	Death rates specific for certain age groups in Madhya Pradesh and the Natural Divisions for the decades 1931-40 and 1941-50.	22-23
1-17	Deaths registered from certain diseases and decennial death rates in the State of Madhya Pradesh excluding the Integrated States during the decades 1931-40 and 1941-50.	24-25
1-18	Number of persons in each age group per 1,000 of the total population for 1901, 1911, 1921, 1931, 1941 and 1951 Censuses.	26
1-19	Distribution of World Population and Land	27
1-20	Growth of population in different continents and the World during the last four half centuries	27
1-21	Growth of population in India and Pakistan, during the first half century	28
1-22	Mean Decennial Growth Rates of India, Burma and Pakistan during five Decades from 1871	28
 SERIES 2.		
2-1	Distribution of Population between Villages	29
2-2	Variation and Density of Rural Population	30
2-3	Mean Decennial Growth Rates during Three Decades—Rural Population	31-35
2-4	Livelihood Pattern of Rural Population	36
2-5	Immigration into Rural Area	37-39
2-6	Number of persons and their percentages in each livelihood class in villages having population over 5,000	40-42
2-7	Villages with a population over 5,000 in which the percentage of non-agricultural classes is greater than that of the agricultural classes.	43
2-8	Percentage of Immigrants in the Rural Population	44

SERIES 3.	SUBSIDIARY TABLES— <i>cont.</i>	
3-1	Distribution of Population between Towns	45
3-2	Variation and Density of Urban Population	46
3-3	Mean Decennial Growth Rates during Three Decades—Urban Population	47—51
3-4	Towns Classified by Population	52
3-5	Cities—Chief Figures	52
3-6	Number per 1,000 of the General Population and of each Livelihood Class who live in Towns	53—54
3-7	Livelihood Pattern of Urban Population	55
3-8	Immigration into Urban Area	56—57
3-9	Number of persons and their percentages in each Livelihood Class in towns having population below 5,000	58
3-10	Number of towns and percentage variation in each class of town as they were classified at previous Censuses	59
3-11	Number of displaced persons in the Towns of Madhya Pradesh	60
3-12	Percentage of immigrants in the Urban Population	61
3-13	Females per 1,000 males in all towns of the State	62
3-14	Females per 1,000 males in different wards of Nagpur City	63
3-15	Females per 1,000 males in different wards of Jabalpur City	63
SERIES 4.		
4-0	Classification of Agricultural Holdings by Size	65—69
4-1	Agricultural Classes per 1,000 Persons of General Population—Number in each Class and Sub-Class of 10,000 persons of All-Agricultural Classes; and Comparison with Agricultural Holdings by Size of Holding.	71—75
	Annexure A to Subsidiary Table 4-1	76
4-2	Livelihood Class I (Cultivators of land wholly or mainly owned and their dependants)—Number per 10,000 persons of Livelihood Class I in each Sub-Class; Secondary Means of Livelihood of 10,000 persons of Livelihood Class I.	77—79
4-3	Livelihood Class II (Cultivators of land wholly or mainly unowned and their dependants)—Number per 10,000 persons of Livelihood Class II in each Sub-Class; Secondary Means of Livelihood of 10,000 persons of Livelihood Class II.	80—81
4-4	Livelihood Class III (Cultivating Labourers and their dependants)—Number per 10,000 persons of Livelihood Class III in each Sub-Class; Secondary Means of Livelihood of 10,000 persons of Livelihood Class III.	82—83
4-5	Livelihood Class IV (Non-Cultivating owners of land; Agricultural rent receivers and their dependants)—Number per 10,000 persons of Livelihood Class IV in each Sub-Class; Secondary Means of Livelihood of 10,000 persons of Livelihood Class IV.	84—85
4-6	Active and Semi-Active Workers in Cultivation	87—89
4-7	Progress of Cultivation during Three Decades	91—93
4-8	Components of Cultivated Area Per Capita during Three Decades	95—97
4-9	Land Area Per Capita (1951) and trend of Cultivation Per Capita during Three Decades	98—99
4-10	Proportion of Effective Active Workers in Cultivation to the Total Population	100
4-11	Average Wholesale Prices of Rice, Juar, Wheat, Gram and Cotton-ginned in terms of maunds of 40 seers from the year 1931 to 1951, ruling at District Headquarters during the harvest period.	101
4-12	Average Retail Prices of Rice, Juar, Wheat and Gram in terms of seers of 80 tolas, per rupee from the year 1931 to 1951, ruling at District Headquarters during the harvest periods.	101
4-13	Value of seasons and percentage increase or decrease in area under crops	102—103
4-14	Percentage of variation of area under staple food-grains and cotton during 1920-21, 1930-31, 1940-41 and 1950-51 in Madhya Pradesh.	104—108
4-15	Yield factors (less seed) in lbs. on one cent of land (1/100th acre) in Madhya Pradesh, the Natural Divisions, and Sub-Divisions and Districts for Rice, Wheat, Juar, Kodon-Kutki, Bajra, Barley, Gram and Tur for Three Decades 1921—30, 1931—40 and 1941—50.	109—111

SUBSIDIARY TABLES—cont.		
4-16	Districtwise average seed rate in lbs. per acre for certain crops in Madhya Pradesh	112
4-17	Area under Rice, Wheat and Juar (in thousand acres) production (in thousand acres) and average production in pounds on one cent of land.	113
4-18	Agricultural, forest, old fallow, culturable land and other lands in the State by districts	115—117
SERIES 5		
5-1	Non-Agricultural Classes per 1,000 Persons of general population; number in each class and sub-class per 10,000 persons of all Non-Agricultural Classes; and number of Employers, Employees and Independent Workers per 10,000 Self-supporting persons of all Non-Agricultural Classes.	119—120
5-1 (A)	Non-Agricultural Classes per 1,000 persons of rural population; number in each class and sub-class per 10,000 persons of all Non-Agricultural Classes, and number of Employers, Employees, and Independent Workers per 10,000 Self-supporting Persons of all Non-Agricultural Classes.	121—123
5-1 (B)	Non-Agricultural Classes per 1,000 persons of urban population; number in each class and sub-class per 10,000 persons of all Non-Agricultural Classes, and number of Employers, Employees and Independent Workers per 10,000 Self-supporting Persons of all Non-Agricultural Classes.	124—125
5-2	Livelihood Class V (Production other than cultivation)—Number per 10,000 persons of Livelihood Class V in each sub-class; Number per 10,000 Self-supporting persons of Livelihood Class V who are Employers, Employees and Independent Workers; Secondary means of Livelihood of 10,000 persons of Livelihood Class V.	127—129
5-3	Livelihood Class VI (Commerce)—Number per 10,000 persons of Livelihood Class VI in each sub-class; Number per 10,000 Self-supporting persons of Livelihood Class VI who are Employers, Employees and Independent Workers; Secondary means of Livelihood of 10,000 persons of Livelihood Class VI.	130—131
5-4	Livelihood Class VII (Transport)—Number per 10,000 persons of Livelihood Class VII in each sub-class; Number per 10,000 self-supporting persons of Livelihood Class VII who are Employers, Employees and Independent Workers; Secondary means of Livelihood of 10,000 persons of Livelihood Class VII.	132—133
5-5	Livelihood Class VIII (Other services and miscellaneous sources)—Number per 10,000 persons of Livelihood Class VIII in each sub-class; Number per 10,000 self-supporting persons of Livelihood Class VIII who are Employers, Employees and Independent Workers; Secondary means of Livelihood of 10,000 persons of Livelihood Class VIII.	134—135
5-6	Comparison of the Classification of the Population by Livelihood Classes at the 1951 and 1931 Censuses	137—139
5-7	Territorial Distribution of 10,000 Self-supoprtng persons of all Industries and Services in the State (by Divisions)	141—143
5-8	Territorial Distribution of 10,000 Self-supporting persons in the State, engaged in Primary Industries not elsewhere specified (By Sub-divisions).	144
5-9	Territorial Distribution of 10,000 Self-Supporting persons in the State, engaged in Mining and Quarrying (By Sub-divisions).	145
5-10	Territorial Distribution of 10,000 Self-Supporting persons in the State, engaged in Processing and Manufacture—Foodstuffs, Textiles, Leather and Products thereof (By Sub-divisions).	146—147
5-11	Territorial Distribution of 10,000 Self-Supporting persons in the State, engaged in Processing and Manufacture—Metals, Chemicals and Products thereof (By Sub-divisions).	148—149
5-12	Territorial Distribution of 10,000 Self-Supporting persons in the State, engaged in Processing and Manufacture— not elsewhere specified (By Sub-divisions).	150—151
5-13	Territorial Distribution of 10,000 Self-supporting Persons in the State, engaged in Construction and Utilities (By Sub-divisions).	152
5-14	Territorial Distribution of 10,000 Self-Supporting Persons in the State, engaged in Commerce (By Sub-divisions).	153
5-15	Territorial Distribution of 10,000 Self-Supporting Persons in the State, engaged in Transport, Storage and Communications (By Sub-divisions).	154
5-16	Territorial Distribution of 10,000 Self-Supporting Persons in the State, engaged in Health, Education and Public Administration (By Sub-divisions).	155
5-17	Territorial Distribution of 10,000 Self-Supporting Persons in the State, engaged in Services not elsewhere specified (By Sub-divisions).	156
SERIES 6.		
6-1	Persons per 1,000 Houses and Houses per 100 Square Miles and Comparison with Past Censuses	157—159
6-2	Number of Households per 1,000 Houses and Distribution by Size of 1,000 Sample Households of Rural and Urban Population.	161—163

SUBSIDIARY TABLE 1-1

Area and Population, Actual and Percentage, by Tahsil Density

This Table is prepared from Main Table E—Summary Figures by districts and tahsils given in Part II-A of the Census Report, 1951. The area figures supplied by the Deputy Commissioners have been made use of as the Surveyor-General of India was unable to supply the area figures for the tahsils.

2. The total area and the population of all the tahsils falling under the different density groups together with the percentage which they bear to the total area and population respectively are given one below the other for each district, Natural Sub-Division, Division and the State.

SUBSIDIARY TABLE 1·2

Variation and Density of General Population

[This table is prepared from the Main Tables A-I (Area, Houses and Population) and A-II (Variation in Population during 50 years) given in Part II-A of the Census Report, 1951. In calculating the density for 1941, 1931 and 1921, the adjusted population for these areas is taken for calculation with reference to the present area of each district as given by the Surveyor-General of India.]

Natural division and district (1)	General population						
	Percentage increase (+) decrease (—)			Density			
	1941—51 (2)	1931—41 (3)	1921—31 (4)	1951 (5)	1941 (6)	1931 (7)	1921 (8)
MADHYA PRADESH	+8.2	+10.3	+12.6	163	151	137	121

SUBSIDIARY TABLE 1.3

Mean Decennial Growth Rates during Three Decades—General Population

This table is prepared from Main Table A-II (Variation in population during 50 years) given in Part II-A of the Census Report, 1951, and from Vital Statistics supplied by the Director of Public Health duly adjusted for the variation in area on *pro rata* basis.

2. The birth and death figures in respect of the following areas are not considered reliable and therefore these areas are treated as excluded from the area under registration, while considering the mean population of the State as a whole and the Natural Divisions in columns (5) to (7) of the table. As, however, these areas are actually declared to be areas under registration of births and deaths, their population is shown against the particular districts and Natural Sub-Divisions only in the above columns. Similarly, in columns (14) to (16) giving the registered births during the three decades and columns (20) to (22) giving registered deaths during the three decades the figures in respect of these areas are omitted in respect of the State as a whole and the Natural Divisions but they are shown against the individual districts and the Sub-Divisions as mentioned above. The object of following the above procedure is to give as accurate an idea as possible of the birth and death rates of the State and the Natural Divisions as possible based on the most reliable available statistics. The birth and death figures are also not available for all the decades in respect of the particular areas. The decades for which the birth and death figures for these areas are available as well as their population in 1951 are given below:—

Particulars of area (1)	Decades for which birth and death figures are available (2)	Population in 1951 (3)
(1) The old Makrai State in the Hoshangabad district	1921—30 ; 1931—40	18,834
(2) The old States of Chhuikhadan, Kawardha, Nandgaon and Khairagarh in the Durg district.	1921—30 ; 1931—40	522,827
(3) The whole of Raigarh district	1921—30 ; 1931—40	919,520
(4) The whole of Surguja district	1921—30	822,041
(5) The whole of Bastar district	1921—30 ; 1931—40 ; 1941—50	913,746

3. Columns (2) to (31) of the table were filled in as follows:—

Columns (2) to (4).—These are arithmetical mean of the Census general population at the beginning and at the end of the decade in each column.

Columns (5) to (7).—These are arithmetical mean of the general population of the area under registration at the beginning and at the end of the decade in each column. As already mentioned the population of the areas referred to in paragraph 2 above has been excluded from consideration in filling up these columns in respect of the State as a whole and the Natural Divisions, and it is included only in respect of the particular districts and the Natural Sub-Divisions.

Columns (8) to (10).—These are the differences between the Census general population at the end and at the beginning of the decade in each column.

Column (11).— $100 \times \text{Col. (8)} \div \text{Col. (2)}$.

Column (12).— $100 \times \text{Col. (9)} \div \text{Col. (3)}$.

Column (13).— $100 \times \text{Col. (10)} \div \text{Col. (4)}$.

Columns (14) to (16).—These are the total number of births in the general population registered during the decade in each column.

Column (17).— $100 \times \text{Col. (14)} \div \text{Col. (5)}$.

Column (18).— $100 \times \text{Col. (15)} \div \text{Col. (6)}$.

Column (19).— $100 \times \text{Col. (16)} \div \text{Col. (7)}$.

Columns (20) to (22).—These are the total number of deaths in the general population registered during the decade in each column.

Column (23).— $100 \times \text{Col. (20)} \div \text{Col. (5)}$.

Column (24).— $100 \times \text{Col. (21)} \div \text{Col. (6)}$.

Column (25).— $100 \times \text{Col. (22)} \div \text{Col. (7)}$.

Column (26).—Col. (17)—Col. (23).

Column (27).—Col. (18)—Col. (24).

Column (28).—Col. (19)—Col. (25).

4. Columns (29) to (31) are filled in as follows, except in the cases mentioned in paragraph 5 below:—

Column (29).—Col. (11)—Col. (26). Column (30).—Col. (12)—Col. (27). Column (31).—Col. (13)—Col. (28).

5. In the case of the State as a whole, the North-West Madhya Pradesh Natural Division, the Nerbuda Valley Sub-Division, the district of Hoshangabad, the East Madhya Pradesh Natural Division, the Chhattisgarh Plain Sub-Division and the district of Durg, the figures in columns (29) to (31) relating to the migration-cum-registration error are similarly calculated except that in place of the mean decennial growth rate of the entire population, as given in columns (11) to (13), the mean decennial growth rate of the population of the area under registration, as mentioned below, is substituted in respect of certain decades, because in these cases in the particular decades the area under registration is different from the total area and, therefore, the mean decennial growth rate of the total area might not be the same as that of the area under registration. The migration-cum-registration error, as given in columns (29) to (31) of the table, thus gives as correct a picture as possible on the basis of the available data in the different decades:—

Natural Division and district (1)	Mean Decennial Growth-rate		
	1941-50 (2)	1931-40 (3)	1921-30 (4)
Madhya Pradesh	7.2	9.3	10.9
North-West Madhya Pradesh Division	6.1	9.0	9.0
Nerbadda Valley	6.7
Hoshangabad	0.7
East Madhya Pradesh Division	8.2	12.5	11.2
Chhattisgarh Plain	8.3	12.2	..
Durg	3.2

SUBSIDIARY TABLE 1·6

Migration between the State and other parts of India

[This Table gives the Migration between Madhya Pradesh and other parts of India as well as Pakistan. The different columns of the statement have been filled in as follows :—

Column (2)—Cols. (11)+(14)+(17) of Subsidiary Table 1·4.

Column (3)—The figures are taken from Table VI of the Census of India, 1931, Volume XII, C.P. and Berar, Part II (Tables), pages 32—33.

Column (4)—Col. (2)—Col. (3).

Column (5)—Col. (5)+Col. (8) of Subsidiary Table 1·5.

Column (6)—The figure is taken from Subsidiary Table III, page 107 of the Census of India, 1931, Volume XII, Central Provinces and Berar, Part I, Reports.

Column (7)—Col. (5)—Col. (6).

Column (8)—Col. (2)—Col. (5).

Column (9)—Col. (3)—Col. (6).]

State	Immigration			Emigration			Immigration minus Emigration	
	1951	1931	Variation	1951	1931	Variation	1951	1931
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
MADHYA PRADESH	723,750	648,536	+75,214	456,226	421,390	+34,836	267,524	227,146

SUBSIDIARY TABLE 1·7

Variation in Natural Population

[The columns of the table are filled in as follows :—

Column (2)—Census Population of 1951.

Column (3)—Cols. (11)+(14)+(17)+(20) of Subsidiary Table 1·4.

Column (4)—Cols. (5)+(8) of Subsidiary Table 1·5.

Column (6)—Unadjusted Census Population of 1931. (No adjustment is made as migration from the transferred territory is not known)

Column (7)—The figure is taken from Table VI of the Census of India, 1931, Volume XII, Central Provinces and Berar, Part II (Tables), pages 32—33.

Column (8)—The figure is taken from the Subsidiary Table III, page 107 of the Census of India, 1931, Volume XII, Central Provinces and Berar, Part I Report.

Column (10)— $\frac{\text{Cols. (5)-(9)}}{\text{Col. (9)}} \times 100.$

State	1951				1931				Percentage Increase (+) Decrease (—) (1931—51) in Natural Population
	Recorded Population	Immigrants	Emigrants	Natural Population (2+4-3)	Recorded Population	Immigrants	Emigrants	Natural Population (6+8-7)	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
MADHYA PRADESH	21,247,533	727,377	456,226	20,976,382	17,990,937	655,563	421,390	17,756,764	+18.1

SUBSIDIARY TABLE 1-8

Livelihood Pattern of General Population

[This Table is prepared from Main Table B-I (Livelihood Classes and Sub-Classes) given in Census Report, 1951, Part II-B.]

Per 10,000 of General Population belonging to Livelihood Class

Natural division and district		Per 10,000 of General Population belonging to Livelihood Class

SUBSIDIARY

Adjusted Population in each age group for 1901,

This table is prepared

From the Census Reports, the actual population by age-groups of the various districts was noted down. The Census of India Paper No. 9, 1951". The age-group-wise population figures for 1951 Census were available for the 10

and the displaced persons population was then added to the product and the total estimated population of the

By adding the district figures arrived at as explained above, the age-groupwise population of the Natural

For purposes of making adjustment for transfer of territory, the population figure for each age-group Division and the State as follows:—

The total number of persons in the different age-groups from 0-5 to 60 and over for 1951 would not add up left out of account.

The adjusted population of the State or Division, as given in main Table A—II (Variation in population Census Report of the State or Division for the particular Censuses.

For distribution of population per 1,000 persons in different age groups please see Subsidiary Table—1.18.

SUBSIDIARY TABLE 2·2

Variation and Density of Rural Population

[The adjusted rural population at the previous Census is derived as follows:—

The adjusted general population is given in Table A-II—Variation in population during fifty years—in Part II-A of the Census Report, 1951. The adjusted rural population is obtained by deducting from the adjusted general population the actual urban population as determined at each Census as there was no transfer of urban area.]

The area figures supplied by the Deputy Commissioners have been used for calculating the density.

Natural division and district	Percentage increase (+) or decrease (—)				Density 1951	Natural division and district	Percentage increase (+) or decrease (—)				Density 1951

SUBSIDIARY TABLE 2·3
Mean Decennial Growth Rates during Three Decades—Rural Population

This table is prepared for the districts of Madhya Pradesh excluding the Integrated States as separate figures of births and deaths were not available for the rural and urban areas of the States.

2. The mean population of the decade required in columns 2, 3 and 4 was arrived at as follows:—

The adjusted rural population at the beginning and end of the decade was first ascertained by deducting from the total general adjusted population (as given in Main Table A-II—Variation in population during fifty years) the relevant urban population and the mean of the rural population thus obtained at the two Censuses was taken as the mean population for columns 2, 3 and 4. Thus, if at the 1921 Census there were 10 towns in a district and if at the 1931 Census the number differed, for purposes of arriving at the rural population at the beginning and end of the decade 1921—30, the population of the ten places considered as towns at the 1921 Census only was subtracted from the duly adjusted general population as ascertained at the 1921 and 1931 Censuses.

3. Certain places, which are regarded as towns at a particular Census, are not so regarded in the Public Health Reports. Similarly, there are certain places, which are regarded as towns in the Public Health Reports, but are not so regarded during the relevant Censuses. To overcome this difficulty, the mean population for area under registration needed for columns 5 to 7 has been worked out as follows:—

The rural population at the beginning and end of the decade is first determined again as above by subtracting from the general adjusted population as at the two Censuses in the beginning and end of the decade, the population of those places only which are regarded as towns in the Public Health Report and then taking the mean of the two populations as the mean population of the decade for the area under registration. Thus, if in 1921 there were six towns recognised in a particular district in the Public Health Report and a different number in 1931, for purposes of determining the rural population at the beginning and end of the decade 1921—30 for the area under registration, the population of only the six towns was subtracted from the total adjusted general population as ascertained at the 1921 and 1931 Censuses and the mean of these two was taken as the mean population of the decade for the area under registration.

4. The births and deaths required for columns 14 to 16 and 20 to 22 were the actual number of adjusted births and deaths in the area under registration as shown in columns 5 to 7.

5. The adjusted number of births and deaths in the rural territory under registration was obtained by subtracting the actual births and deaths in the urban areas from the relevant adjusted figures of births and deaths as given in Subsidiary Table 1·3 for the general population.

6. The remaining columns of the table were filled in the same manner as the corresponding columns in Subsidiary Table 1.3, as explained in the fly-leaf to that table.

SUBSIDIARY

Notes on Subsidiary Table 2-7

The particulars in respect of the 19 villages given in Subsidiary Table 2-7 are as follows:—

- (4) Nachangaon and (5) Kursla form part of the Military area in Pulgaon and the people are engaged in the Military works or in the cotton mills in Pulgaon.
- (2) Bhiwapur—This village is situated on the Nagpur-Chanda road and is also a Railway Station on the Narrow Gauge line. There is a large number of Koshtis, who weave cloth and the village is well-known for its weekly cattle and general market, which keeps many people engaged in small business. The trade in chillies of Bhiwapur has good local importance.
- (3) Babulkheda—It is a suburb of Nagpur and has now been included in the Corporation area. Many Government servants from Nagpur are reported to have purchased plots of land for building houses and actually this village is now a part of Nagpur City.
- (6) Tiroda—This place was the tahsil headquarter up to 1914, when the tahsil was shifted to Gondia. The grain market of Tiroda with its rice mills is well-known. It is also a centre of 'bidi' industry of the Bhandara district. There is a Gram Panchayat, a Post and Telegraph Office, a High School and a Dispensary. It is also a Railway Station on the Bombay-Calcutta main railway line.
- (9) Chirimiri—It is in the Surguja district in the colliery area.
- (15) Jamai, (17) Datal Bhandhi, (18) Badkuhi and (16) Chhikhali Kalan—These villages are also situated in the coal field area of the Chhindwara district and people find employment in the collieries near by.
- (14) Lodhikheda—It is in the Sausar tahsil of the Chhindwara district in which the population of Koshtis is considerable and they manufacture saris and cloth of different varieties. Many of the Mahars also are engaged in the weaving trade.
- (10) Gourella—It is in the Bilaspur district and is a centre of the 'bidi' industry and has also saw mills. Many people from Gourella work in the forests near by and also in the coal mines of Chirimiri in the Surguja district.
- (11) Pendra—It is well-known in the Bilaspur district for its Tuberculosis Clinic. It is an important grain centre with a number of rice mills and a grain market. There are also saw mills and a lac factory in Pendra.
- (12) Baloda-Bazar is the headquarter of the Baloda-Bazar tahsil in the Raipur district and is an important rice market.
- (13) Mahasamund is also the headquarter of the Mahasamund tahsil of the Raipur district and has a number of rice mills and a flourishing grain trade.
- (19) Khalwai—This village is near Kymori in the Murwara tahsil of the Jabalpur district and people get employment in the cement factories.
- (1) Risod—This village is situated in the Washim taluq of the Akola district. It is a big village with a flourishing grain trade and is a central market place in the heart of thickly populated rural area. The number of non-agriculturists is slightly higher than that of the agriculturists.
- (7) Adyar—This village in the Bhandara tahsil has a number of weavers (Mahars and Koshtis) as well as basket-makers. It is also a centre of the 'bidi' industry. Some of the Dhimars are engaged in preparing parched rice (Poha) and also in fishing. Adyar is a Government grain procurement centre and has rice mills and a good cattle market. It has much importance as it connects the Lakhandur tract of the Sakoli tahsil with the main Bhandara-Paoni first class road.
- (8) Nagbhir—It is a Railway Junction on the Narrow Gauge Eastern Railway line in the Chanda district.

SUBSIDIARY TABLE 3·3
Mean Decennial Growth Rates During Three Decades—Urban Population

This table is prepared for the districts of Madhya Pradesh excluding the Integrated States, because figures of births and deaths for the towns in these States are not available.

2. In preparing the table, the following instructions were followed :—

(i) The mean population of the decade required in columns 2, 3 and 4 was the mean of the population of the places regarded as towns at the beginning of the decade. Thus, if there were ten towns in a particular district at the time of the 1921 Census and if there were twelve towns at the 1931 Census, for purposes of calculating the mean urban population of the decade 1921—30, the mean of the population of the particular ten places only as ascertained at the 1921 and 1931 Censuses was taken into account for purposes of columns 2 to 4 and the two newly declared towns of 1931 were taken into account for the next decade 1931—40. Similarly, where certain towns were omitted at a particular Census, *e.g.*, at the 1931 Census, but were regarded as towns during the 1921 Census, their population at the 1931 Census was taken into account for the decade 1921—30, but was not taken into account during the decade 1931—40.

(ii) The Census urban population and the urban population for purposes of vital statistics differed from decade to decade and, therefore, for purposes of columns 5 to 7 concerning the mean population of the decade for area under registration of births and deaths, the population of those towns alone was taken into consideration for which births and deaths figures were available for the entire decade in the Public Health Reports. It was found that in certain cases, some places, which were declared as towns at a particular Census, were not regarded as towns in the Public Health Reports for a few years after the Census and for those years no figures were available for these places. After some years, they were regarded as towns in the Public Health Reports and figures were given. In such cases, such places were completely omitted for purposes of calculating the mean population of the decade for the area under registration of births and deaths of the particular decade and as pointed out above, only those towns, for which births and deaths figures were available for the whole decade, were taken into consideration.

(iii) The registered births during the decade given in columns 14 to 16 and the registered deaths given in columns 20 to 22 relate only to those towns, which were taken into consideration in arriving at the mean population for the area under registration in columns 5 to 7 mentioned above.

(iv) The remaining columns of the table were filled in the same manner as the corresponding columns in Table 1·3 as explained in the fly-leaf to that table.

SUBSIDIARY
Mean Decennial Growth Rates during

Natural division and district	Mean population of decade			Mean population of decade for area under registration of births and deaths

SUBSIDIARY TABLE 3·4 Towns Classified by Population

[This table is prepared by ascertaining the population in the different classes of towns at the different Censuses from 1921 to 1951 tracing the changes in each class regardless of the towns or cities that make it up. It shows what is happening to the population in terms of its distribution by size of the towns or cities.]

2. The columns of the table are filled in as follows :—

Column 2 = The actual number of towns in each class as given in Main Table A-IV of 1951 Census (Towns classified by population with variation since 1901).

Column 3 = $\frac{\text{Population of the particular class of towns as in 1951}}{\text{Total urban population of the State in 1951.}} \times 100.$

Column 4 = $\frac{\text{Difference in population between the particular class of towns at the 1951 and 1941 Census}}{\text{The population of the particular class of towns in 1941.}} \times 100.$

Columns 5 and 6 are filled in the same manner as column 4.

3. Jabalpur Cantonment and Khamaria are included in Jabalpur City.]

Class of Town	Towns of each class in 1951	Proportion to total urban population	Percentage increase (+) or decrease (-) in class totals			Class of Town	Towns of each class in 1951	Proportion to total urban population	Percentage increase (+) or decrease (-) in class totals		
			1941 to 1951	1931 to 1941	1921 to 1931				1941 to 1951	1931 to 1941	1921 to 1931
(1)	(2)	(3)	(4)	(5)	(6)	(1)	(2)	(3)	(4)	(5)	(6)
Total	140	100	+29·7	+26·4	+21·7	10,000—20,000	47	23	+26·9	+9·2	+28·5

SUBSIDIARY TABLE 3·5 Cities—Chief Figures

[This table is prepared from Main Table A-IV (Towns classified by population with variation since 1901). Jabalpur city includes Jabalpur Cantonment and Khamaria. The columns of the table are filled in as follows :—

Column 3 = $\frac{\text{Population}}{\text{Area.}}$

Column 4 = $\frac{\text{Difference in population at the 1951 and 1941 Censuses}}{\text{Population at the 1941 Census}}$

Columns 5 and 6 are filled in the same manner as column 4.]

City	Population 1951	Density	Percentage increase (+) or decrease (-)			City	Population 1951	Density	Percentage increase (+) or decrease (-)		
			1941 to 1951	1931 to 1941	1921 to 1931				1941 to 1951	1931 to 1941	1921 to 1931
(1)	(2)	(3)	(4)	(5)	(6)	(1)	(2)	(3)	(4)	(5)	(6)
Nagpur	449,099	54,768	+48·7	+40·3	+48·2	Jabalpur	256,998	8,107	+44·1	+43·4	+14·3

SUBSIDIARY TABLE 3·6

Number per 1,000 of the General Population and of each Livelihood Class who live in Towns

This table is prepared from the Table B-I (Livelihood Classes and Sub-Classes) given in Part II-B of the Census Report, 1951 :—

Column 2 =	$\frac{\text{Total urban population}}{\text{Total general population}}$	× 1,000.
Column 3 =	$\frac{\text{Livelihood Class I (Urban population)}}{\text{Livelihood Class I (General population)}}$	× 1,000.
Column 4 =	$\frac{\text{Livelihood Class II (Urban population)}}{\text{Livelihood Class II (General population)}}$	× 1,000.
Column 5 =	$\frac{\text{Livelihood Class III (Urban population)}}{\text{Livelihood Class III (General population)}}$	× 1,000.
Column 6 =	$\frac{\text{Livelihood Class IV (Urban population)}}{\text{Livelihood Class IV (General population)}}$	× 1,000.
Column 7 =	$\frac{\text{Livelihood Class V (Urban population)}}{\text{Livelihood Class V (General population)}}$	× 1,000.
Column 8 =	$\frac{\text{Livelihood Class VI (Urban population)}}{\text{Livelihood Class VI (General population)}}$	× 1,000.
Column 9 =	$\frac{\text{Livelihood Class VII (Urban population)}}{\text{Livelihood Class VII (General population)}}$	× 1,000.
Column 10 =	$\frac{\text{Livelihood Class VIII (Urban population)}}{\text{Livelihood Class VIII (General population)}}$	× 1,000.

SUBSIDIARY TABLE 3·6
Number per 1,000 of the General Population and of each Livelihood Class

SUBSIDIARY TABLE 3-7
Livelihood Pattern of Urban Population

[This table is prepared from the table B-I (Livelihood classes and sub-classes).
Columns (2) to (9) are filled in by using the formula:—

$$\frac{\text{Urban population of each livelihood class}}{\text{The total urban population}} \times 10,000.]$$

Natural division and district	Per 10,000 Urban Population belonging to Livelihood Class								
	I—Culti- vators of owned land	II—Cultiva- tors of land wholly or mainly un- owned	III—Culti- vating labourers	IV—Non- cultivating owners of land and agricultural rent recei- vers	V—Pro- duction other than cultiva- tion	VI— Commerce	VII— Transport	VIII— Other services and mis- cellaneous sources

SUBSIDIARY TABLE 4.1

Agricultural Classes per 1,000 Persons of General Population—Number in Each Class and Sub-Class of 10,000 Persons of All-Agricultural Classes ; and Comparison with Agricultural Holdings by Size of Holding

This table is prepared from the Table B-I (Livelihood Classes and Sub-Classes) given in Part II-B of Census Report, 1951 and from Subsidiary Table 4.0.

The columns of the table are filled in as follows :—

$$\text{Column 2} = \frac{\text{Total Agricultural Classes Population}}{\text{General Population}} \times 1,000$$

$$\text{Columns 3 to 5} = \frac{\text{Population of each of the Sub-Classes}}{\text{Population of Agricultural Classes}} \times 10,000$$

$$\text{Columns 6 to 9} = \frac{\text{Population of each of the Agricultural Livelihood Classes}}{\text{Population of the Agricultural Classes}} \times 10,000$$

$$\text{Columns 10 to 42} = \frac{\text{Number of Holdings of Particular Size}}{\text{Total Number of Holdings}} \times 1,000$$

SUBSIDIARY

Agricultural Classes Per 1,000 Persons of General Population—Number in and Comparison with Agricultural

Natural division and district	Number per 10,000 persons of all-agricultural classes									Distribution of 1,000 agricultural holdings by size of holding (in acres) Not exceeding one acre
	Agricultural classes per 1,000 persons of General Population	Total			I—Cultivators of land wholly or mainly owned and their dependants	II—Cultivators of land wholly or mainly unowned and their dependants	III—Cultivating labourers and their dependants	IV—Non-cultivating owners of land, agricultural rent receivers and their dependants

ANNEXURE A TO SUBSIDIARY TABLE 4·1

Method of determining the Upper Quartile, the Lower Quartile and the Median size holdings for Madhya Pradesh, the Natural Divisions and Sub-Divisions.

In column (1) the figures are copied from Subsidiary Table 4·1 for the State as well as the Natural Sub-Division. The figures begin from the lowest size of the holding. The second column is constructed from column (1) by the process of simple addition. Thus $165 + 108 = 273$; $273 + 88 = 361$ and so on. As there are 1,000 holdings under review the Lower Quartile holding would be the 250th holding from the bottom. The Median size holding would be the 500th and the Upper Quartile would be the 750th. From column (2) below for Madhya Pradesh we find that the Lower Quartile holding, that is the 250th would be of the size of 1 to 2 acres, because the 273rd holding is the last holding of two acres. We, therefore, take 1·8 as the size of the Lower Quartile holding for Madhya Pradesh. Similarly, the 500th holding comes at the 5 acres group and the Upper Quartile of 750th holding at about 12·7 acres.

2. The size of the holdings in the Natural Divisions and Sub-Divisions are also similarly arrived at.

SUBSIDIARY TABLE 4-2

**Livelihood Class I (Cultivators of land wholly or mainly owned and their dependants)—
Number per 10,000 persons of Livelihood Class I in each Sub-Class ; Secondary
Means of Livelihood of 10,000 persons of Livelihood Class I**

This table is prepared from the Main Table B-I (Livelihood Classes and Sub-Classes) given in Part II-B of Census Report, 1951.

The columns are filled in as follows :—

Columns 2 to 4 = $\frac{\text{Population in each of the Sub-Classes in Livelihood Class I}}{\text{Total Population of the Livelihood Class I}} \times 10,000.$

Columns 5, 7, }
9, 11, 13, 15, } = $\frac{\text{Self-supporting Persons of Livelihood Class I, who derive their secondary means of livelihood from one of the eight livelihood classes.}}{\text{Total Population of Livelihood Class I}} \times 10,000.$
17 and 19. }

Columns 6, 8, }
10, 12, 14, 16, } = $\frac{\text{Earning Dependants of Livelihood Class I who derive their secondary means of livelihood from one of the eight livelihood classes.}}{\text{Total Population of Livelihood Class I}} \times 10,000.$
18 and 20. }

SUBSIDIARY TABLE 4·6
Active and Semi-Active Workers in Cultivation

This table is prepared from the Table B-I (Livelihood Classes and Sub-Classes) and Table B-II (Secondary means of Livelihood) given in Part II-B of the Census Report, 1951.

The columns of the table are filled in as follows :—

Column 2 = Columns 3 + 4 + 5.

Column 3 = Columns 7 + 11 + 15.

Column 4 = Columns 8 + 12 + 16.

Column 5 = Columns 9 + 13 + 17.

Column 6 = Columns 7 + 8 + 9.

Column 7 = Total Self-supporting Persons of Livelihood Class I.

Column 8 = Total Self-supporting Persons of Livelihood Classes IV to VIII who derive their secondary means of livelihood from cultivation of own land.

Column 9 = Total of all earning dependants who derive their principal means of livelihood from Livelihood Classes I to VIII and their secondary means of livelihood from cultivation of own land.

Columns 10 to 17 = They are also filled in as above.

The proportion of effective workers in cultivation to the total population is calculated in Subsidiary Table 4·10

SUBSIDIARY Active and Semi-Active

SUBSIDIARY TABLE 4.7
Progress of Cultivation during Three Decades

This table gives progress of cultivation during the last three decades.

Figures for the Integrated States were not available and therefore the table gives statistics only for the original areas of the districts of the old Central Provinces and Berar.

The relevant figures were supplied by the Director of Land Records after working out the quinquennial averages. Figures are given in units of acres.

Quinquennial averages are given as follows :—

1951	..	5 years ending with crop year—1949-50.
1941	..	5 years ending with crop year—1939-40.
1931	..	5 years ending with crop year—1929-30.
1921	..	5 years ending with crop year—1919-20.

SUBSIDIARY TABLE 4·8
Components of Cultivated Area per Capita during Three Decades

For reasons given in the fly-leaf to Subsidiary Table 4·7, this table also gives statistics for the old districts of the State excluding the Integrated States.

2. In calculating the figures for the different years, the areas and population of the districts as they existed in the particular years were taken into consideration except to the extent mentioned in paragraph 1 above.

3. Values for (USC), (UDC), (ISC) and (IDC) were derived from the area figures of Table 4·7—Progress of cultivation during three decades—and the Census Population (P) of the Census year in question (and expressed in cents) according to the formulae :

$$(i) \quad (USC) = \frac{A(1) + A(4) - A(2) - A(3)}{P} \times 100 \text{ cents.}$$

$$(ii) \quad (UDC) = \frac{A(2) - A(4)}{P} \times 100 \text{ cents.}$$

$$(iii) \quad (ISC) = \frac{A(3) - A(4)}{P} \times 100 \text{ cents.}$$

$$(iv) \quad (IDC) = \frac{A(4)}{P} \times 100 \text{ cents.}$$

[NOTE.—The above formulae are derived as follows :—

To get unirrigated single cropped area per capita (USC), we first take the average net area sown (A-1), which includes all irrigated area (A-3) as well as the double cropped area (A-2). The double cropped area (A-2) includes the unirrigated double cropped as well as the irrigated double cropped area (A-4). Therefore, to get unirrigated double cropped area, we have to subtract (A-4) from (A-2). In other words, (A-2) minus (A-4) represents the unirrigated double cropped area.

As we have seen, the average net area sown (A-1) includes all irrigated area (A-3), which in itself also includes the double irrigated area (A-4). Therefore, to get unirrigated single cropped area out of (A-1) (the average net area sown), we must subtract from it the entire single irrigated and double irrigated area contained in (A-3) as well as the double cropped unirrigated area contained in (A-2) minus (A-4). In other words :

$$\begin{aligned} (USC) &= \frac{A1 - A3 - (A2 - A4)}{P} \times 100 \text{ cents.} \\ &= \frac{A1 - A3 - A2 + A4}{P} \times 100 \text{ cents.} \\ &= \frac{A1 + A4 - A2 - A3}{P} \times 100 \text{ cents.} \end{aligned}$$

We now proceed to the calculation of (UDC) :

As we have seen, (A-2) must contain all double cropped area including double cropped unirrigated as well as irrigated crop. Therefore, to get unirrigated double cropped area, we subtract from (A-2) the area (A-4).

$$\text{And, therefore, } (UDC) = \frac{A2 - A4}{P} \times 100 \text{ cents.}$$

Calculations for (ISC) :

As pointed out already, (A-3) must contain all irrigated crop including single cropped area and double cropped irrigated area. Therefore, to get irrigated single cropped area only, you must subtract from (A-3) the area (A-4), which represents double cropped irrigated area.

$$\text{Therefore, } (ISC) = \frac{A3 - A4}{P} \times 100 \text{ cents.}$$

Calculations for (IDC) :

(A-4) represents irrigated double cropped area.

$$\text{Therefore, } (IDC) = \frac{A4}{P} \times 100 \text{ cents.}$$

SUBSIDIARY TABLE 4·9

Land area per capita (1951) and trend of cultivation per capita during three decades

The total land area per capita in column (2) of the table is calculated on the basis of the total geographical area of the districts.

2. The cultivated and cultivable area per capita given in column (3) of the table includes—(a) the net cropped area, (b) current fallow land and (c) old fallow land only; as figures for forest and other areas which can be brought under cultivation were not available.

3. As in the case of Subsidiary Table 4·7 the statistics in this table relate to the old districts of the State excluding the Integrated States.

4. The columns of this Table are filled in as follows :—

Column (2).—Total land area per capita = $\frac{\text{Total Land Area (in acres)}}{P} \times 100$.

Column (3).—Cultivated and cultivable area per capita = $\frac{\text{Total cultivated and cultivable area (in acres)}}{P} \times 100$.

Columns (4)–(7).—A (Area of cultivation per capita) is the sum of the four figures in Table 4·8, *i.e.*, (USC) + (UDC) + (ISC) + (IDC) in each year.

Area figures supplied by the Director of Land Records are adopted.

SUBSIDIARY TABLE 4-10

Proportion of effective active workers in cultivation to the total population

This table is prepared from Subsidiary Table 4-6.—Active and Semi-Active workers in cultivation.

Column (2) of the table gives the total population of the State and its Natural Divisions, Sub-Divisions and Districts, as ascertained at the Census of 1951.

Column (3) gives the effective active workers in cultivation obtained by adding one-third of the earning dependants with a secondary means of livelihood and one-sixth of the number of self-supporting persons whose principal means of livelihood is other than cultivation and who have a secondary means of livelihood to the number of self-supporting persons with principal means of livelihood as given in columns (3) to (5) of Subsidiary Table 4-6.

Column (4) is equal to column (2) divided by column (3).

						1951	..	2.6	2.9	2.2	2.5						

NOTES.—(1) Averages for the years 1948 to 1951 are for all districts of Madhya Pradesh, while for the years prior to 1948 are for old Central Provinces and Berar.

(2) This table was supplied by the Director of Land Records, Madhya Pradesh.

SUBSIDIARY TABLE 4·13

Value of seasons and percentage increase or decrease in area under crops

This table is prepared from Subsidiary Table 4·7—Progress of Cultivation during three decades and from the Statistics available in the Season and Crop Reports of Madhya Pradesh. For reasons given in the fly leaf to Subsidiary Table 4·7 this table also gives statistics for the old districts of the State excluding the integrated States.

2. Columns (2), (5) and (8) relating to value of season are filled in as follows :—

The percentage which the year's crop represents of the normal crop over the normal year, as given in the Season and Crop Reports, is classified according to the value assigned to each as shown below :—

	Class	Value
80 per cent and above	Good ..	9
60 to 80 per cent	Very fair	7
40 to 60 per cent	Fair ..	5
Below 40 per cent	Bad ..	3

The values for the decades are added up and entered in the respective columns.

3. The Season and Crop Reports do not give the percentage which the year's crop represents of the normal crop over the normal area for the Natural Divisions and Sub-Divisions. Therefore the arithmetical average of the percentages for the districts comprised in the Natural Division or Sub-Division is taken as the percentage for the Division and the Sub-Division.

4. Columns (3), (6) and (9) are filled in as follows :—

The increase or decrease in the net cropped area between a decade obtained from columns (2) to (5) of Subsidiary Table 4·7 is expressed as a percentage of the area at the beginning of the decade, and as shown in these columns.

5. Columns (4), (7) and (10) are filled in as follows :—

In the first instance gross cropped area is obtained by adding the figures of average net area sown to the figures of average area sown more than once as given in columns (2) to (9) of Subsidiary Table 4·7. The increase or decrease in the gross cropped area between a decade is expressed as a percentage of the gross cropped area at the beginning of the decade.

SUBSIDIARY TABLE 4-13

SUBSIDIARY

Percentage of variation of area under staple foodgrains and cotton during

This Table is prepared from the statistics of gross area under crop available in the "Statistics of rainfall, area, Madhya Pradesh, Department of Agriculture. The statistics in this publication are available only up to 1946-47 and

2. Figures are given in units of acres.

3. Actual figures under staple foodgrains and cotton show the quinquennial averages ending with the crop

4. The increase or decrease in the area under a particular crop during the decade is expressed as a percentage of

SUBSIDIARY TABLE 4-15

Yield factors (less seed) in lbs. on one cent of land (1/100th acre) in Madhya Pradesh, the Natural Divisions, Sub-Divisions and districts for rice, wheat, juar, kodon-kutki, bajra, barley, gram and tur for three decades 1921—30, 1931—40 and 1941—50.

This table shows the average yield (less seed) on one cent of land of the principal foodgrains of the State. It is very kindly prepared by the Director of Land Records, Madhya Pradesh, in the manner indicated below :—

The annawari outturn for each district for each year during the decade was obtained from the Season and Crop Reports and with reference to the standard outturn for the particular district the total production in lbs. for the particular crop for the whole district for each year was calculated. Similarly, the total area sown under the particular crop in each district during each year of the decade was obtained from the Season and Crop Reports and by dividing the total ten years' production by the total area sown during the period, the gross average production per acre of the particular crop during the particular decade, was arrived at, that is the weighed average was struck. Out of this production per acre a quantity required for seed per acre for the particular district as given in Subsidiary Table 4-16 was subtracted and the balance was taken as the average yield (less seed) per acre of land and the yield in lbs. per one cent of unirrigated land or the yield factor W-1 was obtained by dividing the average yield per acre (less seed) by 100. The yield factor W-3 or the weight (in lbs.) of average annual yield (less seed) of the principal food grain of the district (or Natural Division, etc.) cultivated as an irrigated crop on one cent of land of average quality was also calculated by adopting the same procedure as mentioned above.

SUBSIDIARY

SUBSIDIARY TABLE 4-17

Area under rice, wheat and juar (in thousand acres), production (in thousand acres) and average production in pounds on one cent of land.

Columns 2, 3, 5, 6, 8 and 9 of this table are filled in from the figures of area under crop available in the "Statistics of rainfall, area, production and trade of agricultural commodities in Madhya Pradesh Vol. II-1951" published by the Government of Madhya Pradesh, Department of Agriculture. The area figures for the years subsequent to 1946-47 were, however, obtained from the office of the Director of Land Records, Madhya Pradesh. Columns 4, 7 and 10 are filled in by converting the total production of the quinquennium into pounds and dividing it by the corresponding total area in cents. One cent is equal to one hundredth of an acre.

Years	Rice			Wheat			Juar		
	Total gross cropped area	Total production	Average production in lbs. on one cent of land during each quinquennium	Total gross cropped area	Total production	Average production in lbs. on one cent of land during each quinquennium	Total gross cropped area	Total production	Average production in lbs. on one cent of land during each quinquennium

SUBSIDIARY TABLE 4-18

Agricultural, forest, old fallow, culturable land and other lands in the State by districts

This table is prepared from the Season and Crop Report of the Central Provinces and Berar for the year ending the 31st May 1949 and from the information contained in Statement B of the Report of the Forest Policy Committee, Madhya Pradesh, appointed by the State Government, *vide* Forest Department Order No. 1811-690-XII of 1946, dated Nagpur, the 28th October 1947. In the Season and Crop Report, Statement II-A relates to the districts of Madhya Pradesh, except for those of Berar, the details for which are given in Statement II-B.

Column (3) is filled in from column (5) of Statement II-A and columns (2) and (4) of Statement II-B.

Column (4) is filled in from column (9) of Statement B at page (18) of the Report of the Forest Policy Committee.

Column (5) is filled in from columns (11) and (13) of Statement II-A and from columns (5), (13) and (14) of Statement II-B, except for Buldana district, for which it has been filled from columns (13) and (14) of Statement II-B.

Column (6) is filled in from column (6) of Statement II-A and column (7) of Statement II-B.

Column (7) is filled in from column (12) of Statement II-A. For Buldana district, it has been filled in from column (5) of Statement II-B. For other Berar districts, the information is not available.

Column (8) is the total of columns (6) and (7).

Column (9) is the total of columns (3), (4), (5) and (8) and gives the figures of area in acres while column (10) gives the same figures in square miles.

Figures in column (10) slightly differ from the corresponding figures in Tables A-I and E. This is because the area figures in the former tables have been adopted from the district figures supplied by the Surveyor General of India and the tansil figures furnished by the Deputy Commissioners respectively, while the figures in column (10) of Subsidiary Table 4-18 have been adopted from the season and crop Report and the Report of the Forest Policy Committee.

Column (11) of the table has been filled in on the basis of the information received from the Deputy Commissioners. The Deputy Commissioners were requested to report the probable area of land other than new and old fallow suitable for cultivation in their districts. The figures, received from them are based on their and their officers' general knowledge and should be regarded as illustrative of the probable area fit for cultivation. The question of desirability or otherwise of excising forest areas for extending cultivation is discussed in the concluding Section of Chapter IV of the Census Report, Part I-A.

In addition to the actual figures, proportions are also mentioned for columns (3), (4), (5), (6), (7), (8) and (9) in respect of the State and Natural Divisions.

SUBSIDIARY TABLE 5.1

Non-Agricultural Classes per 1,000 persons of general population; number in each class and sub-class per 10,000 persons of all Non-Agricultural Classes; and number of Employers, Employees and Independent Workers per 10,000 Self-supporting persons of all Non-Agricultural Classes.

This table is prepared from Table B-I (Livelihood Classes and Sub-Classes) and Table B-III (Employers, Employees and Independent Workers by Industries and Services, Divisions and Sub-Divisions) given in Part II-B of the Census Report, 1951.

The columns of the table are filled in as follows :—

$$\text{Column 2} = \frac{\text{Total number of persons in Non-Agricultural Classes of general population}}{\text{Total general population}} \times 1,000.$$

$$\text{Columns 3 to 5} = \frac{\text{Total number of persons in each of the Non-Agricultural Sub-Classes of the general population}}{\text{Total number of persons in all Non-Agricultural Classes of general population}} \times 10,000.$$

$$\text{Columns 6 to 9} = \frac{\text{Total number of persons in each of the Non-Agricultural Livelihood Class of the general population}}{\text{Total number of persons in all Non-Agricultural Classes of general population}} \times 10,000.$$

$$\text{Columns 10 to 13} = \frac{\text{Total number of Employers, Employees or Independent Workers or others in general population.}}{\text{Total Self-supporting persons in Non-Agricultural Classes of general population}} \times 10,000.$$

SUBSIDIARY TABLE 5.1

Non-Agricultural Classes per 1,000 persons of general population; number in each class and sub-class per 10,000 persons of all Non-Agricultural Classes; and number of Employers, Employees and Independent Workers per 10,000 Self-supporting persons of all Non-Agricultural Classes.

Natural division and district	Non-Agricultural classes per 1,000 persons of general population	Non-Agricultural classes of general population	Number per 10,000 persons of all Non-Agricultural classes							Number per 10,000 Self-supporting persons of all Non-Agricultural classes

SUBSIDIARY TABLE 5.2

Livelihood Class V (Production other than cultivation)—Number per 10,000 persons of Livelihood Class V in each sub-class ; Number per 10,000 Self-supporting persons of Livelihood Class V who are Employers, Employees and Independent Workers; Secondary means of Livelihood of 10,000 persons of Livelihood Class V

This table is prepared from main Table B-I (Livelihood Classes and Sub-Classes), B-II (Secondary means of livelihood) and B-III (Employers, Employees and Independent Workers by Industries and Services, Divisions and Sub-Divisions) given in Part II-B of the Census Report, 1951.

2. In columns 2 to 7 of the table figures for the Rural and Urban break up of the State and the Natural Divisions are also given.

3. The columns of the table are filled in as follows :—

Total number of persons in each of the sub-classes of Livelihood Class V of
General, Rural or Urban population as the case may be

Columns 2 to 4 = $\frac{\text{Total number of persons in each of the sub-classes of Livelihood Class V of General, Rural or Urban population as the case may be}}{\text{Total number of persons of Livelihood Class V of the General, Rural or Urban population as the case may be.}} \times 10,000.$

Total number of Employers, Employees and Independent Workers of Livelihood
Class V of General, Rural or Urban population as the case may be.

Columns 5 to 7 = $\frac{\text{Total number of Employers, Employees and Independent Workers of Livelihood Class V of General, Rural or Urban population as the case may be.}}{\text{Total number of Self-supporting persons of Livelihood Class V}} \times 10,000.$

Total number of Self-supporting persons of Livelihood Class V of the general
population, who derive their secondary means of livelihood from one of the
different eight Livelihood Classes

Columns 8 to 10,
12, 14, 16, 18,
20 and 22 = $\frac{\text{Total number of Self-supporting persons of Livelihood Class V of the general population, who derive their secondary means of livelihood from one of the different eight Livelihood Classes}}{\text{Total number of persons in Livelihood Class V of the general population}} \times 10,000.$

Total number of earning dependants of Livelihood Class V of the general
population who derive their secondary means of livelihood from one of the
different eight Livelihood Classes

Columns 9 to 11,
13, 15, 17, 19,
21 and 23. = $\frac{\text{Total number of earning dependants of Livelihood Class V of the general population who derive their secondary means of livelihood from one of the different eight Livelihood Classes}}{\text{Total number of persons of Livelihood Class V of the general population}} \times 10,000.$

SUBSIDIARY TABLE 5-6

Comparison of the Classification of the Population by Livelihood Classes at the 1951 and 1931 Censuses.

This table is prepared from Main Tables B-I (Livelihood Classes and Sub-Classes) and B-II (Secondary Means of Livelihood). Figures for the year 1931 are taken from Table X (Occupation or Means of Livelihood) of the Census of India, 1931, Volume XII Central Provinces and Berar Part II Tables.

Details of the Groups of 1931 Census which correspond to different Livelihood Classes are given below :—

Livelihood Class of 1951 Census	Corresponding Groups of 1931 Census
(1)	(2)
I	5 and 8
II	6
III	7
IV	1
V	9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 88, 89, 91, 92, 93, 95, 96, 97, 98, 99, 188 and 190.
VI	115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152 and 189.
VII	101, 102, 103, 107, 108, 109, 110, 111 and 112.
VIII	2, 3, 4, 85, 86, 87, 90, 94, 100, 104, 105, 106, 113, 114, 127, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 191, 192, 193, 194 and 195.

The columns of the table are filled in as follows :—

$$\text{Column 2} = \frac{\text{Total number of persons in each Livelihood Class}}{\text{General population}} \times 10,000.$$

$$\text{Columns 3 to 5} = \frac{\text{Total number of persons in the Sub-Classes of each of the Livelihood Classes}}{\text{General population}} \times 10,000.$$

$$\text{Column 6} = \frac{\text{Columns 12 + 14}}{\text{Total population of 1931 as ascertained at that Census}} \times 10,000.$$

$$\text{Column 7} = \frac{\text{Column 12}}{\text{Total population of 1931 as ascertained at that Census}} \times 10,000.$$

$$\text{Column 8} = \frac{\text{Column 14}}{\text{Total population of 1931 as ascertained at that Census}} \times 10,000.$$

SUBSIDIARY TABLE 5-7
Territorial Distribution of 10,000 Self-Supporting Persons of all Industries and Services
in the State (By Divisions).

This table is prepared from the Main Table B-III (Employers, Employees and Independent workers by Industries and Services, Divisions and Sub-Divisions).

The figures for the rural and urban break up have also been shown for the State and the Natural Divisions only.

Columns (3) to (12) of the table are filled in by using the formula :—

$$\frac{\text{Total number of persons in each Division of Industries and Services of General, Rural or Urban population as the case may be}}{\text{Total number of persons of all Industries and Services of General, Rural or Urban population as the case may be}} \times 10,000.$$

SUBSIDIARY

Territorial Distribution of 10,000 Self-Supporting Persons of all

Natural division and district	All Industries and Services Persons.	Total of columns (3) to (12)	0 Primary Industries not elsewhere specified	1 Mining and Quarrying	2 Processing and Manufacture— Food stuffs, Textiles, Leather and Products thereof

SUBSIDIARY TABLE 5·8

Territorial Distribution of 10,000 Self-Supporting Persons in the State engaged in Primary Industries not elsewhere specified (By Sub-divisions).

[This table is prepared from the Main Table B-III (Employers, Employees, and Independent workers by Industries and Services Divisions and Sub-Divisions).

For the State and the Natural Divisions the figures for the rural and urban break up are also given.

Column 1-A gives the total number of self-supporting persons in Division 'O', while column 2 gives the proportion of self-supporting persons in Division 'O' out of 10,000 persons of all Industries and Services as given in Column 3 of Subsidiary Table 5.7.

The columns are filled in as follows:—

Column 2 — Total number of persons in the Division "O" of the General, Rural or Urban population as the case may be $\times 10,000$.
 Total number of persons of all Industries and Services of General, Rural or Urban population as the case may be
 Total number of persons in each of the Sub Divisions of the Division "O" of the General, Rural or Urban population as the case may be.

Columns 3 to 8 — Total number of persons in the Division "O" of the General, Rural or Urban population as the case may be $\times 10,000$.]

Natural division and district	Division 0 Persons	0	0·1	0·2	0·3	0·4	0·5	0·6	
		Total division	Stock Raising	Rearing of small animals and insects	Plantation Industries	Forestry and collection of products not else- where specified	Hunting (including trapping and game pro- pagation)	Fishing

SUBSIDIARY TABLE 5-13

Territorial Distribution of 10,000 Self-Supporting Persons in the State engaged in Construction and Utilities (By Sub-divisions).

[This table is prepared in the same manner as the Subsidiary Table 5-8 and the instructions for filling in the columns of that table apply to this table also with the substitution of words "Division 5" for "Division 'O'". In this table also column 1-A gives the actual number of self-supporting persons in Division '5' and column 2 their proportion as given in Subsidiary Table 5.7 (column 8).]

Natural division and district	Division 5 Persons	Total Division	5	5-0	5-1	5-2	5-3	5-4	5-5	5-6	5-7
			Cons- truction and Main- tenance— other wise unclassi- fied	Cons- truction and Main- tenance— Buildings	Construc- tion and main- tenance— Roads, Bridges and other Transport Works	Construc- tion and Main- tenance— Telegraph and Tele- phone Lines	Construc- tion and Main- tenance— Irrigation and Land Improvement Works	Works and Services— Domestic and Industrial water supply	Sani- tary Works and Services including scaven- gers

SUBSIDIARY TABLE 5-16

Territorial Distribution of 10,000 Self-Supporting Persons in the State, engaged in Health, Education and Public Administration (By Sub-divisions)

[This table is prepared in the same manner as the Subsidiary Table 5.8 and the instructions for filling in the columns of that table apply to this table also with the substitution of words "Division 8" for "Division 'O'". In this table also column 1-A gives the actual number of self-supporting persons in Division "8" and column 2 their proportion as given in Subsidiary Table 5-7 (column 11).]

Natural division and district	Division 8 Persons	Total Division	8	8-1	8-2	8-4	8-5	8-6	8-7	8-3, 8-8 & 8-9
			Medical and Health Services	Educational Services research	Police (other than village watchmen)	Village officers and servants including village watchmen	Employees of municipalities and local bodies (but not including persons classifiable under any other division or sub-division)	Employees of State Governments (but not including persons classifiable under any other division or sub-division)	Employees of the Union Government (but not including persons classifiable under any other division or sub-division) and employes of non-Indian Governments

SUBSIDIARY TABLE 6·1

Persons per 1,000 houses and houses per 100 square miles and comparison with past Censuses

This table is prepared from the Main Table A-I (Area, Houses and Population) given in Part II-A of Census Report, 1951, and corresponding tables of the previous Censuses.

The different columns are filled in as follows :—

Columns 2 to 13 = $\frac{\text{General, rural or urban population of the respective Census}}{\text{The number of occupied houses of the general, rural or urban areas of the respective Census}} \times 1,000.$

Columns 14 to 16 = $\frac{\text{Number of houses at the respective Census}}{\text{Area in square miles at the respective Census}} \times 100.$

The figures of occupied houses in the rural and urban areas of the Nagpur district, given in Table I—Area, Houses and Population in Census of India, 1941, Volume VIII—Central Provinces and Berar—Tables, appeared to be erroneous. Consequently, a reference was made to the Tahsildars and the figures of rural and urban occupied houses for the Nagpur district were corrected. Figures in columns (7) and (11) of the Table in respect of the Nagpur district are those worked out on the basis of the revised figures of occupied houses.

SUBSIDIARY TABLE 6·2

Number of Households per 1,000 Houses and Distribution by Size of 1,000 Sample Households of Rural and Urban Population

This table is prepared from the Main Tables A-I (Area, Houses and Population) and C-I (Household-Size and Composition) given in Parts II-A and Part II-C of the Census Report, 1951 respectively. Table C-I has been compiled with the help of data yielded by a 4 per cent Sample of house holds randomly chosen from the National Register of Citizens.

The columns of the table are filled in as indicated below :—

RURAL	URBAN
Column (2) = $\frac{\text{Column (2) of C-I (Rural)} \times 1,000}{\text{Occupied Houses (Rural)}}$	Column (14) = $\frac{\text{Column (2) of C-I (Urban)} \times 1,000}{\text{Occupied Houses (Urban)}}$
Column (3) = $\frac{\text{Column (7) of C-I (Rural)} \times 1,000}{\text{Column (6) of C-I (Rural)}}$	Column (15) = $\frac{\text{Column (7) of C-I (Urban)} \times 1,000}{\text{Column 6 of C-I (Urban)}}$
Column (4) = $\frac{\text{Column (8) of C-I (Rural)} \times 1,000}{\text{Column (6) of C-I (Rural)}}$	Column (16) = $\frac{\text{Column (8) of C-I (Urban)} \times 1,000}{\text{Column (6) of C-I (Urban)}}$
Column (5) = $\frac{\text{Column (9) of C-I (Rural)} \times 1,000}{\text{Column 6 of C-I (Rural)}}$	Column (17) = $\frac{\text{Column (9) of C-I (Urban)} \times 1,000}{\text{Column (6) of C-I (Urban)}}$
Column (6) = $\frac{\text{Column (10) of C-I (Rural)} \times 1,000}{\text{Column (6) of C-I (Rural)}}$	Column (18) = $\frac{\text{Column (10) of C-I (Urban)} \times 1,000}{\text{Column (6) of C-I (Urban)}}$
Column (7) = $\frac{\text{Column (11) of C-I (Rural)} \times 1,000}{\text{Column (6) of C-I (Rural)}}$	Column (19) = $\frac{\text{Column (11) of C-I (Urban)} \times 1,000}{\text{Column (6) of C-I (Urban)}}$
Column (8) = $\frac{\text{Column (12) of C-I (Rural)} \times 1,000}{\text{Column (6) of C-I (Rural)}}$	Column (20) = $\frac{\text{Column (12) of C-I (Urban)} \times 1,000}{\text{Column (6) of C-I (Urban)}}$
Column (9) = $\frac{\text{Column (13) of C-I (Rural)} \times 1,000}{\text{Column (6) of C-I (Rural)}}$	Column (21) = $\frac{\text{Column (13) of C-I (Urban)} \times 1,000}{\text{Column (6) of C-I (Urban)}}$
Column (10) = $\frac{\text{Column (14) of C-I (Rural)} \times 1,000}{\text{Column (6) of C-I (Rural)}}$	Column (22) = $\frac{\text{Column (14) of C-I (Urban)} \times 1,000}{\text{Column (6) of C-I (Urban)}}$
Column (11) = $\frac{\text{Column (15) of C-I (Rural)} \times 1,000}{\text{Column (6) of C-I (Rural)}}$	Column (23) = $\frac{\text{Column (15) of C-I (Urban)} \times 1,000}{\text{Column (6) of C-I (Urban)}}$
Column (12) = $\frac{\text{Column (16) of C-I (Rural)} \times 1,000}{\text{Column (6) of C-I (Rural)}}$	Column (24) = $\frac{\text{Column (16) of C-I (Urban)} \times 1,000}{\text{Column (6) of C-I (Urban)}}$
Column (13) = $\frac{\text{Column (17) of C-I (Rural)} \times 1,000}{\text{Column (6) of C-I (Rural)}}$	Column (25) = $\frac{\text{Column (17) of C-I (Urban)} \times 1,000}{\text{Column (6) of C-I (Urban)}}$

SUBSIDIARY TABLE 6-3

Family Composition of 1,000 Households of the General Population

This table is prepared from the Main Table C-I (Household Size and Composition) given in Part II-C of the Census Report, 1951.

The columns of the Table are filled in as indicated below:—

$$\text{Column (2)} = \frac{\text{Column (7) of C-I} \times 1,000}{\text{Column (6) of C-I}}$$

$$\text{Column (3)} = \frac{\text{Column (8) of C-I} \times 1,000}{\text{Column (6) of C-I}}$$

$$\text{Column (4)} = \frac{\text{Column (9) of C-I} \times 1,000}{\text{Column (6) of C-I}}$$

$$\text{Column (5)} = \frac{\text{Column (18) of C-I} \times \text{Column (3) of Subsidiary Table}}{\text{Column (8) of C-I}}$$

$$\text{Column (6)} = \frac{\text{Column (19) of C-I} \times \text{Column (4) of Subsidiary Table}}{\text{Column (9) of C-I}}$$

$$\text{Column (7)} = \frac{\text{Column (20) of C-I} \times \text{Column (3) of Subsidiary Table}}{\text{Column (8) of C-I}}$$

$$\text{Column (8)} = \frac{\text{Column (21) of C-I} \times \text{Column (4) of Subsidiary Table}}{\text{Column (9) of C-I}}$$

$$\text{Column (9)} = \frac{\text{Column (22) of C-I} \times \text{Column (3) of Subsidiary Table}}{\text{Column (8) of C-I}}$$

$$\text{Column (10)} = \frac{\text{Column (23) of C-I} \times \text{Column (4) of Subsidiary Table}}{\text{Column (9) of C-I}}$$

SUBSIDIARY TABLE 6-4

Females per 1,000 males (General, Rural and Urban Population) ; and Comparison with Previous Censuses

[This table is prepared from the Table A-II (Variation in Population during fifty years) given in Part II-A of the Census Report, 1951.

Columns 2 to 13 are filled in by using the formula :—

$$\frac{\text{Females of General, Rural or Urban Population, for the respective Census}}{\text{Total Males of General, Rural or Urban Population, for the respective Census}} \times 1,000.]$$

Natural division and district	General Population				Rural Population				Urban Population

SUBSIDIARY TABLE 6·5

Females per 1,000 Males in Agricultural Classes and Sub-Classes

This table is prepared from the Main Table B-I (Livelihood Classes and Sub-Classes) given in Part II-B of the Census Report, 1951.

The columns of the table are filled in as follows :—

Columns 2 to 5 = $\frac{\text{Total females of all agricultural classes and the respective sub-classes}}{\text{Total males of all agricultural classes and the respective sub-classes}} \times 1,000.$

Columns 6 to 21 = $\frac{\text{Total females of individual livelihood classes and the respective sub-classes of the livelihood classes}}{\text{Total males of the respective livelihood class and the respective sub-classes of the livelihood class}} \times 1,000.$

The figures in columns (2), (6), (10), (14) and (18) thus show the proportion of females per 1,000 males and are not the totals of the sub-classes.

SUBSIDIARY TABLE 6·6

Females per 1,000 Males in Non-Agricultural Classes and Sub-Classes

This table is prepared from the Main Table B-I (Livelihood Classes and Sub-Classes) given in Part II-B of the Census Report, 1951.

The columns of the table are filled in as follows :—

Columns 2 to 5 = $\frac{\text{Total females of all non-agricultural classes and the respective sub-classes}}{\text{Total males of all non-agricultural classes and the respective sub-classes}} \times 1,000.$

Columns 6 to 21 = $\frac{\text{Total females of individual livelihood class and the respective sub-classes of the livelihood classes}}{\text{Total males of the respective livelihood class and the respective sub-classes of the livelihood class}} \times 1,000.$

The figures in columns (2), (6), (10), (14) and (18) thus show the proportion of females per 1,000 males and are not the totals of the sub-classes.

SUBSIDIARY TABLE 6·7

Marital Status of 1,000 of each sex of General Population and comparison with previous Censuses

This table is prepared from the Main Sample Table C-III (Age and Civil Condition). The figures of the previous Censuses are taken from the respective Census tables.

2. As the figures for 1931 and 1921 were not available, separately for the Integrated States in the case of the three districts of Bastar, Raigarh and Surguja, no calculations have been made for these three districts.

3. Calculations for 1931 and 1921 for Chhattisgarh Plain and East Madhya Pradesh Division have been made on the basis of the figures for the old districts of Durg, Raipur and Bilaspur only as the figures for the Integrated States were not available.

4. The figures for Makrai State, now forming part of the Hoshangabad district, were also not available for 1931 and 1921 and, therefore, while arriving at the figures for these years, Makrai State was excluded from the Hoshangabad district, the North-West Madhya Pradesh Division and the Nerbudda Valley Sub-Division.

5. As the consolidated figures for 1931 and 1921 for all the "Feudatory States" were available, they have been included in arriving at the figures for Madhya Pradesh as a whole.

6. Figures for the year 1941 are based on the 'Y' sample tables for Madhya Pradesh prepared at the Indian Statistical Institute and published in the form of "Census of India paper No. 9, 1951."

7. The columns of the table are filled in as follows :—

Columns 2 to 13 = $\frac{\text{Unmarried, married, widowed or divorced males of the respective Censuses}}{\text{Total males of the respective Censuses}} \times 1,000.$

Cols. 14 to 25 = $\frac{\text{Unmarried, married, widowed or divorced females of the respective Censuses}}{\text{Total females of the respective Censuses}} \times 1,000.$

SUBSIDIARY TABLE 6·8

Age Distribution of 1,000 married persons of each sex (and comparison with 1941 Census)

This table is prepared from Table C-III (Age and Civil Condition) given in Part II-C of the Census Report, 1951. Figures for the year 1941 are based on the 'Y' sample tables for Madhya Pradesh, prepared at the Indian statistical Institute and published in the form of "Census of India Paper No. 9, 1951".

2. The columns of the table are filled in as follows :—

Columns 2 to 9 = $\frac{\text{Married males of each age group at the respective Censuses}}{\text{Total married males at the respective Censuses}} \times 1,000.$

Cols. 10 to 17 = $\frac{\text{Married females of each age group at the respective Censuses}}{\text{Total married females at the respective Censuses}} \times 1,000.$

3. Distribution of males and females in the age groups 35 to 44 and 45 to 54 is given below for the State and the Natural Divisions :—

State and Natural Division	Males				Females			
	35—44		45—54		35—44		45—54	
	1951	1941	1951	1941	1951	1941	1951	1941
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
Madhya Pradesh	237	219	148	134	198	173	102	84
North-West Madhya Pradesh Division ..	246	232	157	132	208	179	94	76
East Madhya Pradesh Division	227	211	136	132	196	174	108	91
South-West Madhya Pradesh Division ..	249	221	166	137	190	162	99	77

4. The figures given in columns (2), (4), (6) and (8) and those given in columns (10), (12), (14) and (16) do not add up to 1,000 in some cases. The reason is that at the 1951 Census there were some returns under "age not stated", which have not been taken into account in this Table. As there were no such returns in 1941, the discrepancy of this type does not arise in the case of figures relating to the last Sensus in this Table.

SUBSIDIARY TABLE 6·9
Infants per 10,000 Persons

This table is prepared from the Main Sample Table C-II (Livelihood Classes by Age Groups) which is given in Part II-C of the Census Report, 1951. Figures for the year 1941 are based on Y Sample Tables for Madhya Pradesh,

2. The columns are filled in as follows :—

$$\text{Columns 2 to 4} = \frac{\text{Infants—Persons, Males or Females of General Population}}{\text{Total Persons of General Population}} \times 10,000.$$

$$\text{Column 5} = \frac{\text{Infants—Persons}}{\text{Total Persons}} \times 10,000.$$

$$\text{Columns 6 \& 7} = \frac{\text{Infants—Males or Females of Rural Population}}{\text{Total Persons—Rural}} \times 10,000.$$

$$\text{Cols. 8 \& 9} = \frac{\text{Infants—Males or Females of Urban Population}}{\text{Total Persons—Urban}} \times 10,000.$$

$$\text{Cols. 10 \& 11} = \frac{\text{Infants—Males or Females of Agricultural Classes in General Population}}{\text{Total Persons of Agricultural Classes in the General Population}} \times 10,000.$$

$$\text{Cols. 12 \& 13} = \frac{\text{Infants—Males or Females of Non-Agricultural Classes in the General Population}}{\text{Total Persons of Non-Agricultural Classes—General Population}} \times 10,000.$$

3. The corresponding proportional figures of persons of the general, rural, urban, agricultural and non-agricultural population of the 1951 Census given in Tables 6·9, 6·10, 6·11, 6·12, 6·13 and 6·14 do not add up to 10,000. The reason is that at the 1951 Census there were some returns under "age not stated" which have not been taken into account in these Tables.

SUBSIDIARY TABLE 7.1

Progress of Literacy

This table is prepared from the Main Table C-IV (Age and Literacy), which is a 10 per cent sample table and is given in Part II-C of the Census Report, 1951.

2. Figures for the year 1941 are based on 'Y' Sample Tables for Madhya Pradesh prepared at the Indian Statistical Institute and published in the form of "Census of India Paper No. 9, 1951." The Rural and Urban figures for 1941 are not separately available.

3. The columns of the table are filled in as follows :—

Number of literates, males/females in each age group x 1,000

Number of males/females in each age group ×

SUBSIDIARY

SUBSIDIARY TABLE 72

Literacy Standard of Livelihood Classes

[This Table is prepared from the Main Table D-VII-Livelihood Classes by Educational Standards given in Part II-C of the Census Report, 1951.]

2. The columns of the table are filled in as follows:—

Columns 2, 4, 6, 8, 10, 12, 14 and 16 = $\frac{\text{Males of respective Educational Standards of a livelihood class}}{\text{Males of the respective livelihood classes}} \times 1,000$

Columns 3, 5, 7, 9, 11, 13, 15 and 17 = $\frac{\text{Females of respective Educational Standards of a livelihood class}}{\text{Females of the respective livelihood classes}} \times 1,000$

3. Proportions shown against different educational standards have been rounded off to the nearest integer. The result of this rounding off is that the proportionate number of persons holding degrees and diplomas would not add up to the total for degrees or diplomas in some cases. Similarly the number shown against different educational standards would also not add up to total all Educational Standards in all cases.

Number per 1,000 males and 1,000 females of each livelihood class, by literacy and educational standards

Educational Standards (1)	AGRICULTURAL CLASSES								NON-AGRICULTURAL CLASSES (Persons including dependants who derive their principal means of livelihood from)							
	I.—Cultivators of land wholly or mainly owned and their dependants		II.—Cultivators of land wholly or mainly unowned and their dependants		III.—Cultivating labourers and their dependants		IV.—Non-cultivating owners of land; agricultural rent receivers and their dependants		V.—Production other than cultivation		VI.—Commerce		VII.—Transport		VIII.—Other services and miscellaneous sources

SUBSIDIARY TABLE 7-3

Educational Services and Research

This Table is prepared from the consolidated District Index of Non-Agricultural occupations given later in this part of the Report.
2. Columns (2) to (9) are filled in from the District Index. The rest of the columns are filled in as follows:—

$$\text{Column 10} = \frac{\text{Column 4}}{\text{Total Persons}} \times 100,000$$

$$\text{Column 12} = \frac{\text{Column 6}}{\text{Total Persons}} \times 100,000$$

SUBSIDIARY TABLE 8·1

Maternity Data for Madhya Pradesh

This table has been prepared from Maternity Table M-II.

2. The columns of the Table are filled in as shown below :—

Columns (2), (5), (8), (11) and (14). $\frac{\text{Column (5) of Table M-II} + \text{Column (8) of Table M-II}}{\text{Column (3) of Table M-II} + \text{Column (6) of Table M-II}} \times 10,000.$

Columns (3), (6), (9), (12) and (15). $\frac{\text{Column (4) of Table M-II}}{\text{Column (3) of Table M-II} + \text{Column (6) of Table M-II}} \times 10,000.$

Columns (4), (7), (10), (13) and (16). $\frac{\text{Column (7) of Table M-II}}{\text{Column (3) of Table M-II} + \text{Column (6) of Table M-II}} \times 10,000.$

NOTE.—The actual figures for the different age-groups and the "Total" are taken from the respective rows of Maternity Table M-II.

SUBSIDIARY TABLE 8·2

Maternity data for Madhya Pradesh

This table has been prepared from Maternity Table M-I—A-Still married women showing present age and age at birth of first child of still-married mothers given in Part II-D of the Census Report.

2. The columns of the table are filled in as shown below :—

Column (2) ..	Total number of mothers in the age-groups 25—29 and 30—34, whose age at birth of first child was 15—19, as given in columns (11) and (14) of Table I.	Column (16) ..	Total number of children born to mothers whose present age is 45 and over, and whose age at birth of first child was 15—19, as given in column (24) of Table I.
			Divided by column (4).
Column (3) ..	Total number of mothers in the age-groups 35—39 and 40—44, whose age at birth of first child was 15—19, as given in columns (17) and (20) of Table I.	Column (17) ..	Total number of children born to mothers whose present age is 25—29 and 30—34 and whose age at birth of first child was 20—24, as given in columns (12) and (15) of Table I.
			Divided by column (5).
Column (4) ..	Mothers who are aged 45 and over and whose age at birth of first child was 15—19, as given in columns (23) of Table I.	Column (18) ..	Total number of children born to mothers whose present age is 35—39 and 40—44, and whose age at birth of first child was 20—24, as given in columns (18) and (21) of Table I.
			Divided by column (6).
Column (5) ..	Total number of mothers in the age-groups 25—29 and 30—34; whose age at birth of first child was 20—24 as given in columns (11) and (14) of Table I.	Column (19) ..	Total number of children born to mothers whose present age is 45 and over, and whose age at birth of first child was 20—24, as given in column (24) of Table I.
			Divided by column (7).
Column (6) ..	Total number of mothers in the age-groups 35—39 and 40—44, whose age at birth of first child was 20—24, as given in columns (17) and (20) of Table I.	Columns (20) to (25).	These have been filled in the same manner as columns (14) to (19), except that the number of children surviving to mothers at different age-groups has been substituted for the total number of children born to these mothers.
Column (7) ..	Mothers who are aged 45 and over, and whose age at birth of first child was 20—24, as given in column (23) of Table I.	Column (26) ..	Column (14)—Column (20).
Columns (8) to (13), respectively.	Columns (2), (3), (4), (5), (6), (7) respectively. $\frac{\text{Columns (2)+(3)+(4)+(5)+(6)+(7)}}{\text{Column (2)}} \times 100.$	Column (27) ..	Column (15)—Column (21).
Column (14) ..	Total number of children born to mothers whose present age is 25—29 and 30—34, and whose age at birth of first child was 15—19, as given in columns (12) and (15) of Table I. Divided by column (2).	Column (28) ..	Column (16)—Column (22).
Column (15) ..	Total number of children born to mothers whose present age is 35—39 and 40—44, and whose age at birth of first child was 15—19, as given in columns (18) and (21) of Table I. Divided by column (3).	Column (29) ..	Column (17)—Column (23).
		Column (30) ..	Column (18)—Column (24).
		Column (31) ..	Column (19)—Column (25).

SUBSIDIARY TABLE 8·4

Maternity Data for Madhya Pradesh

This table has been prepared from the Subsidiary Tables 8·2 and 8·3.

The columns are filled in as below :—

Column (2) = Columns (2)+(3)+(4) of Subsidiary Table 8·2 *plus* Columns (2)+(3)+(4) of Subsidiary Table 8·3.

Column (3) = Column (4) of Subsidiary Table 8·2 *plus* Column (4) of Subsidiary Table 8·3.

$$\text{Column (4)} = \frac{\text{Column (3)}}{\text{Column (2)}} \times 100.$$

Column (5) = Columns (5)+(6)+(7) of Subsidiary Table 8·2 *plus* Columns (5)+(6)+(7) of Subsidiary Table 8·3.

Column (6) = Column (7) of Subsidiary Table 8·2 *plus* Column (7) of Subsidiary Table 8·3.

$$\text{Column (7)} = \frac{\text{Column (6)}}{\text{Column (5)}} \times 100.$$

Column (8) = Column (7) — Column (4).

Column (9) = Columns (3)+(4) of Subsidiary Table 8·2 *plus* Columns (3)+(4) of Subsidiary Table 8·3.

Column (10) = Column (3) — Column (4) of Subsidiary Table 8·2 *plus* Column (4) of Subsidiary Table 8·3.

$$\text{Column (11)} = \frac{\text{Column (10)}}{\text{Column (9)}} \times 100.$$

Column (12) = Columns (6)+(7) of Subsidiary Table 8·2 *plus* Columns (6)+(7) of Subsidiary Table 8·3.

Column (13) = Column (7) of Subsidiary Table 8·2 *plus* Column (7) of Subsidiary Table 8·3.

$$\text{Column (14)} = \frac{\text{Column (13)}}{\text{Column (12)}} \times 100.$$

Column (15) = Column (14) — Column (11).

CLIMATOLOGICAL TABLES

There are 15 Climatological Tables. Table 1 to Table 12 have been prepared in the office of the Deputy Director General of Observatories (Climatology and Geophysics), Meteorological Office, Poona.

Table 13 has been prepared in the office of the Director of Land Records, Madhya Pradesh.

Table 14 has been compiled partly in the office of the Director of Land Records, Madhya Pradesh and partly in this office.

Table 15 has been prepared in this office with the help of the data furnished by the Director of Land Records and those contained in the Season and Crop Reports of the Central Provinces and Berar published by the Land Records Department.

CLIMATOLOGICAL TABLE 1

Average rainfall (in Cents) at selected raingauge stations in the North-West
Madhya Pradesh Division (based on data up to the end of 1940)

Stations	Annual	Janu- ary	Feb- ruary	March	April	May	June	July	August	Sep- tember	October	Nov- ember	Dec- ember

District Index of Non-Agricultural Occupations

This Table is prepared from the Sorter's Ticket 2.

The Sorter's Ticket 2 was prepared in accordance with the instructions to the Sorters reproduced below :—

1. Preparation.—You have to prepare sorter's ticket 2 only if you have slips relating to any of the livelihood class V, VI, VII or VIII. You are to deal only with those slips which relate to self-supporting persons. The slips relating to non-earning dependants or earning dependants would have been separated already and should not be used at this stage.

2. First operation.—You have first to deal the slips with reference to the principal means of livelihood recorded against question 10. Your Supervisor will give you a list of "M/L (Means of livelihood) sub-groups" *in the order of importance for which you have to sort. Select not more than ten pigeon-holes and affix labels bearing the names of the "M/L sub-groups" (written out in full) as given to you. The number of M/L sub-groups given to you will generally exceed ten. You should reserve one or two pigeon-holes for throwing slips which are not covered by the M/L sub-groups shown on labels. You should then deal the slips with reference to the answer recorded against question 10. In doing so, put together slips containing entries which are written in either identical or very similar terms to each of the labelled "M/L sub-groups". If you are in doubt whether an entry, in any case is very similar or not to the labelled M/L sub-groups, consult the Supervisor. Finish the sorting for one set of M/L sub-groups and count the number and "enter" the name and number in columns (2) and (3) of sorter's ticket 2. Keep the unsorted slips separate. This completes the first stage of the first operation.

3. First operation (succeeding stages).—You should then take up the slips that remain to be sorted. You should deal them again for the remaining M/L sub-groups given to you in same manner as in the first operation. The operations should be repeated successively until all the slips are sorted for all the M/L sub-groups given to you. You may find slips where the M/L as recorded in question 10 does not fall under any of the sub-groups given to you. You should deal these slips separately in the manner explained above and enter the name and number in the sorters ticket. This completes the first operation. You should keep separate the bundle for each M/L sub-groups.

4. Special instructions regarding non-productive means of livelihood.—Livelihood class VIII will contain slips of persons who derive their income otherwise than through productive activity. They include all self-supporting persons against whom the answer to question 9, part two, is 0. They should be treated as a distinct group, not falling under any of the prescribed divisions and sub-divisions; and sorted under the following sub-groups, viz :—

(i) Persons living principally on income from non-agricultural property. (ii) Persons living principally on pensions, remittances, scholarships and funds. (iii) Inmates of jails, asylums, almshouses and recipients of doles. (iv) Beggars and vagrants. (v) All other person living principally on income derived from non-productive activities.

5. Second operation.—For this operation the slip mentioned in paragraph 4 are excluded. You have to deal the remaining slips with reference to the answer recorded in the second compartment of question 9. Affix labels to three pigeon-holes, the labels being marked "Employer" "Employee" and "Independent Worker". Take the bundle for each M/L sub-groups and deal them into the three pigeon-holes. You will find 1 for "Employer", 2 for "Employee" and 3 for "Independent Worker" recorded in the second compartment of question 9. If you find that there is no entry you should take the order of your Supervisor. When you have completed the sorting for a M/L sub-group you should count the number in each pigeon-hole and enter in columns (4) to (6) of the sorter's ticket according as the pigeon-hole relates to "Employer", "Employee" and "Independent Worker" respectively.

6. Second operation (succeeding stages).—You should take each of the other bundles for M/L sub-groups and deal them in the same manner as in the second operation. You should enter the results in the relevant columns of the sorter's ticket.

7. Conclusion.—You have now completed all operations necessary for sorter's ticket 2. Recombine all the male slips and all the female slips.

If you are sorting sample slips or slips for displaced persons you should proceed to sorter's ticket 3.

If you are sorting general slips you should proceed to sorter's ticket 6.

After the Sorter completed the Ticket and after due check by the Compiler-checker and the Supervisor, the ticket was handed over to the tabulation clerk to fill in the group code numbers in column (1) of the form of sorter's ticket 2 given below :—

Form of Sorter's Ticket 2

Group Code Number	Full name of means of livelihood (Sub-Groups)	Total	Employer	Employee	Independent Worker
(1)	(2)	(3)	(4)	(5)	(6)

The group code numbers were adopted from the Indian Census Economic Classification Scheme given in part II-B of the Report.

*List of M/L sub-groups.—Separate lists of M/L sub-groups should be prepared for use in sorting each of the four different livelihood classes V to VIII. These lists should be compiled on the basis of (a) scrutinizing of entries found to occur frequently in the National Register of Citizens and (b) results of trial-sorting by Supervisors and Checker-Compilers.
