CHARING CROSS TURKISH BATHS

(NEVILL'S).

NORTHUMBERLAND AVENUE.

SEPARATE BATH FOR LADIES.

PRONOUNCED TO BE THE FINEST IN EUROPE.

NEVILL'S TURKISH BATHS are a live and up-to-date concern, the decoration of
the bath rooms is tasteful, the attendance prompt and obliging, the shampooers capable and
efficient; each establishment is in charge of a competent and experienced manager; the
attendants are chosen from the best of their profession, and can be relied on for knowledge
of their work and readiness to assist the inexperienced bather. The supply of air is
scientifically treated and arranged; it is filtered before entering the bath, heated by a
patented apparatus of considerable repute, while the system of ventilation ensures a rapid
flow of fresh untainted air through the bath rooms.

Visitors to London are invited to make a trial of these establishments, which have been
in existence for some fifty years.

The charges are moderate and within the reach of all—but see it is NEVILL'S.

A Clear Line in Any Clime

WHEN first called upon to build telephone apparatus for India and the East we fully realised the peculiar difficulties—static, warped woodwork, extremes of heat and humidity—and insects.

And we have produced the finest all-steel Telephone Equipment bar none—impervious to climate, hard usage, white ants and inexperienced handling.

That's why the Crown Agents for the Colonies, Telephone Companies and Railways chose our apparatus.

Part of a Fleet of 30-cwt.
Albion Vehicles supplied
to the Government of India.

24 Governments endorse ALBION supremacy-

THE fact that no less than 24 Governments in different parts of the world have purchased fleets of Albions shows that experts are satisfied with their efficiency, reliability and economy under all conditions of road and climate.

After drastic tests of its soundness of construction and durability, both the Government of India and the British War Office recently placed large orders for the 30-cwt. Albion. Further, the War Office grant of a special Subsidy to users of this vehicle in Great Britain is additional evidence of its incomparable superiority.

In low maintenance cost, freedom from breakdown and length of life, Albions have proven their supremacy over other makes of vehicle for more than 25 years.

THE CIVIL ENGINEERS' POCKET BOOK.

By JOHN C. TRAUTWINE, C.E.

This standard handbook, of which 145,000 copies have been issued, is still the leading reference book for Civil Engineers. It contains information on every conceivable subject likely to prove of value to them. The work is systematically arranged, and the thumb-index enables a rapid consultation to be made to its pages.

These two works together form an encyclopædia of bridge-engineering which is so complete and thorough that it is difficult to imagine any problems in bridge design and building which could not be solved and understood by reference to their pages.

MECHANICAL ENGINEER'S HANDBOOK.

By ROBERT T. KENT and a Staff
of Specialists.

Indispensable to all engineers. The underlying thought in its preparation was to save time, and this has been done wherever possible by the use of charts, tables and diagrams.

The designing engineer can obtain in the NEW KENT all the data necessary for the design of practically every commercial manufactured article. The volume is the most complete reference book on mechanical engineering ever written: in fact, it is a library in itself.

2,247 pages. Profusely illustrated.

AMERICAN CIVIL ENGINEERS' HANDBOOK.

By MANSFIELD MERRIMAN and a Staff of
Experts.

This book is in a class by itself in the Civil Engineering field and there is no other handbook so up to date in every particular. It offers to engineers the most complete, authoritative and most reliable information on Civil Engineering practice, and is now being used by thousands both in this country and abroad. The previous editions set a standard in handbooks—engineers look upon "Merriman" as being the high-water mark of accuracy. The present edition represents the latest practice—new developments—new facts.

P R E F A C E

THIS volume has been corrected, as far as possible, up to the 1st January, 1925. It may be explained that the list of officers serving in India (pages 5 to 95B) are compiled from the Civil Lists of the Government of India and the Provincial Governments published in October last, while the records of these officers given in Record of Services Section (pages 425 to 730) are based on the corresponding Histories of Services published in July last. Later information received as to changes occurring up to the 1st January last has, however, been used in the compilation of these sections.

In the lists of Officers serving in India (pages 5 to 95B) only substantive appointments are, as a rule, shown; and, except in the case of members of the Indian Civil Service, the names of Officers drawing substantive pay of less than Rs. 700 a month are not included. The names shown in italics are those of Officers who are in foreign service, supernumerary, seconded, or employed outside their own departments.

To meet the difficulty that arises from the lack of uniformity in India in the use of surnames, Indian names are in doubtful cases twice indexed, and cross references are made in the Record of Services. Rulers of States are shown under the names of their States.

The principle of selection followed in the Record of Services (pages 425 to 730) is explained on page 423.

The "Index of Subjects and Appointments" is on pages iv to xvi, and the "Index of Names" on page 742 *et seq.* Names in the Honours Lists and Record of Services are shown in the Index of Names by "英" and "英," with a note prefixed referring to the Alphabetical Lists on pages 139 to 193 and pages 425 to 730.

It is requested that intimations of errors in the lists, or of omissions, may be addressed to the Editor of the India Office List, India Office, Whitehall, London, S.W.

February, 1925.
