REVIEW
OF THE
SEA-BORNE TRADE
OF THE
BOMBAY PRESIDENCY

For the Year ending 31st March 1903.

The total value of the sea-borne trade of the Bombay Presidency is shown below for a period of five years :—

	1898-99.	1899-1900.	1900-1901.	1901-1902.	1902-1903.
	Rs.	Rs.	Rs.	Rs.	Rs.
Foreign Trade ...	80,71,30,072	78,56,44,854	69,74,17,484	87,19,28,956	90,67,55,460
Coasting Trade...	26,16,58,955	31,14,81,585	81,43,40,877	29,29,20,215	26,88,73,839
Total ...	1,06,87,89,027	1,09,71,26,439	1,01,17,58,361	1,16,48,49,171	1,17,56,29,299

The trade with ports outside India is classed as "Foreign Trade" and that with Foreign Indian Ports, with British Ports in other Presidencies as well as with British Ports within the Presidency, as "Coasting Trade." In the trade between British Ports within the Presidency, the imports of one port appear again as the exports of another, and the figures under this head consequently show transactions of exactly double the actual magnitude. These figures are as follows for the five years starting from 1898-99 :—700, 766, 733, 697 and 704 lakhs.

On a comparison of the year's trade with that of 1901-1902 it will be seen that notwithstanding a further large decrease in the coasting trade, there is an increase in the aggregate total of over a crore.

The decrease in the Coasting Trade of 240 lakhs or over 8 per cent. now brings the figures under this head nearer the level of average years. A growth in this trade generally accompanies adverse seasonal conditions, by increasing the movements of grain coastwise, and in the absence of such movements the coasting trade has now shrunk to the normal figure of 2,688 lakhs.

The figures for Foreign Trade show an increase of 3.48 crores or nearly 4 per cent. and make the year the largest in the decennial period. The imports of *grain* and *pulse* show a further reduction of about 13 lakhs, while there have been increases in *metals* and *machinery, oils* and some of the *manufactured articles* which may be taken as evidence of the increased activity of the local industries as well as of the consuming power of the general population. These increases come to about 183 lakhs.

Following on the previous year's phenomenal increase of 1,057 lakhs in the exports of Indian produce, there has been a further advance of 79 lakhs under the same head. The advances in *grain and pulse* (63 lakhs) and in seeds (47 lakhs) account for the greater part of this increase. On the other hand it is to be noted that there is a drop of 53.63 lakhs in *raw cotton* and 56.64 lakhs in *cotton-twist and yarn* from the exceptionally heavy figures of last year. The exports of 1,071 and 787 lakhs under these two sub-headings stand, however, second best in the decade, and this falling off has been accompanied by a considerable increase in the consumption of cotton by local mills and by an expansion in their production.

FOREIGN TRADE.

The following table shows the value of the trade for each year during the past ten years. Government transactions are shown in this statement, but they will not be referred to in the subsequent remarks or tables:—

The principal features of the Import trade in the year under review are noted below :—

I.—ANIMALS, LIVING.

The increase under this head is inconsiderable (Rs. 12,638). The number and value of *horses* imported show a decline of 303 and Rs. 2.23 lakhs respectively. *Australian horses* show a decline of 522, valued at Rs. 3,81,000. On the other hand, *English-bred horses* increased by 93 to 116 in number and in value by Rs. 1,60,585. The bulk of these were stallions and mares brought out for breeding purposes. The increase in Persian horses was maintained, the number imported in 1902-1903 rising from 2,136 to 2,404, the largest figure of the decade. The average price per head in the case of *English horses* rose from Rs. 840 to Rs. 1,550.

II.—ARTICLES OF FOOD AND DRINK.

Following on a decrease of 74.14 lakhs in the previous year there was a drop of 33.48 lakhs, representing 8 per cent. of the total imports under this head.

The values of the principal articles in the group were as follows for the two years 1901-1902 and 1902-1903 :—

As was anticipated the levy of a special duty on the imports of bounty-fed *beet sugar* since June last has had the effect of curtailing the imports, but it is interesting to note that while there was a drop of Rs. 35,85,392 in the imports of Austro-Hungary and Germany, the decrease in the total imports was only Rs. 13,99,638. The place of *beet sugar* has been taken by imports of *cane sugar* from Belgium (4.32 lakhs), Holland (3.44 lakhs), and Java (9.68 lakhs), the bulk of the shipments coming from the Straits Settlements being Java *cane sugar*. Mauritius, which might have been expected to profit by the decrease in imports from Austria and Germany, shows a decrease of 11.42 lakhs, indicating thereby

that its capacity to meet the gradually increasing Indian demand is limited—its exports fluctuating between 1 and 1½ crores according to the season. Imports of China *cane sugar* increased by 10·31 lákhs and of the United Kingdom by 7·12 lákhs, the bulk of the latter being *raw* American *cane sugar* refined in England. The price of sugar has remained practically stationary (*beet* Rs. 10¼ per cwt., China *cane* Rs. 10½ and Mauritius *cane* Rs. 10).

Provisions.—The heavy decrease of 14·25 lákhs or over 18 per cent. brings the imports under this head nearly to the level of the average of normal years. Imports under this head had, during the last two years, been abnormally swelled by heavy receipts of *dates*, which in times of scarcity is a staple food of the poorer classes, particularly in Gujarát and Káthiáwár. These this year dropped by 7·55 lákhs—mostly shared by Asiatic Turkey, where the crop was very limited. *Dry* and *salted fish* as well as *fish-maws* and *shark-fins* have fallen by 1·1 lákhs owing to the unfavourable fishing season on the Arabian and Persian Coasts. Among *dry fruits*, *almonds* from Persia have dropped by 3½ lákhs owing to bad seasons. The large imports of *almonds* from Italy and France noticed last year have been much reduced this year. The United Kingdom still heads the list of countries from which *provisions* are received, its share being 19·41 lákhs followed by Persia, at a considerable distance, with 12·86 lákhs, by Arabia with 11·28 lákhs and by Turkey in Asia with 8·70 lákhs.

There is an increase of 2·72 lákhs which is spread over all classes of *spirits* and *wines*. The advance under this head, especially in *wines*, is probably to be attributed to the Coronation Darbár Festivities. To the increase of '62 lákhs in *ale, beer* and *porter* should be added the large increase of '86 lákhs in *hops*, which must have been accompanied by a corresponding rise in the produce of Indian breweries. Of the increase of Rs. 15,909 in *brandy*, the United Kingdom monopolized Rs. 14,146, though the imports were, naturally, largest from France. *Whisky* shows an improvement of Rs. 24,855, the imports being mostly from the United Kingdom. Imports of *whisky* "made in Germany," though small, show an increase of Rs. 18,948 this year. *Perfumed spirits* show better by Rs. 22,404 and *methylated* by Rs. 22,495, the latter mostly imported from Germany. *Wines* show the largest improvement, *viz.*, 1·18 lákhs, or nearly 14½ per cent. *Champagne* increased by Rs. 57,587, *claret* by Rs. 22,531, *port* by Rs. 7,528, *sherry* by Rs. 26,432. The total imports of *liquors* (Rs. 53,42,501) are mainly distributed over the United Kingdom (34·67 lákhs, or a little over 65 per cent.), France (11·40 lákhs or over 21 per cent.), and Germany (3·21 lákhs or over 6 per cent.).

Spices.—There is a small decrease of Rs. 33,386. *Cloves*, which are the principal item under this head, show an increase in quantity of 253,763 lbs. or 4 per cent., but a decrease of Rs. 30,334, or a little over 2 per cent. in value. This is due to the recent growth in shipments of *cloves* from Germany (721,865 lbs. valued at Rs. 36,426), of which the pith and oil are extracted previous to exportation. These are imported into India for adulteration with good *cloves* from Zanzibar. *Cloves* from Zanzibar show a decrease in quantity of 348,778 lbs., and in value of Rs. 70,630.

Betelnut—from the Straits Settlements, generally inferior to the produce of other countries, dropped by Rs. 29,931.

Pepper—increased by 1·12 lakhs or 400 per cent. There was an exceptional cause for this increase, and future imports are not likely to be maintained at this level.

Cardamom and Ginger—show further decreases on last year's figures. The demand for the former is likely to decrease still further in the future—the Ceylon *cardamoms*, which undergo a peculiar white dressing, having been ousted by local produce, to which a similar process has now been applied.

Tea.—The following table shows the quantity and value of the imports from the chief sources of supply :—

Last year's heavy decrease has been partially recovered by an increase of 4·09 lakhs in the year under report. It is confined to Java. *black* and China *green*, especially the latter, which is shipped to Bombay for export to Persia and Afghanistan; Ceylon *black* shows a still further drop of Rs. 32,830. The trade with Persia has improved to the extent of 1·30 lakhs. The imports of Indian tea from Calcutta have gone up by 2 lakhs in value, though the quantity is almost stationary, showing that the Indian tea is not only able to hold its own, but also commands a much higher price.

Grain and Pulse.—Continued shrinking in imports of *grain* and *pulse* (12·92 lakhs) is further proof of the return to normal conditions. The abnormal imports of *wheat*, which had been a feature of the famine years, have disappeared altogether. Imports of *Bengal rice* and of *Burma rice* dropped by 6·39 lakhs and 56·08 lakhs, respectively.

Coffee.—There is an increase of 3,162 cwt. and Rs. 78,474, representing 75 per cent. in quantity and 60 per cent. in value. After the low figures of last year a rebound was natural, but the increase is in the cheap Brazilian stuff imported through Austria.

III.—METALS AND MANUFACTURES OF METALS.

The satisfactory increase of 89·32 lakhs or 22½ per cent., spread over all the sub-heads, may be taken as a direct sign of returning prosperity to the country.

A.—Hardware and Cutlery.—The value of this trade with the principal sources of supply during the last decade is shown below :—

Years.	United Kingdom. Rs.	Austria-Hungary. Rs.	Belgium. Rs.	Germany. Rs.	United States. Rs.
1893-94	40,51,622	3,61,769	5,36,940	6,61,111	27,699

1899-1900	39,07,754	6,34,551	3,44,584	6,80,067	1,04,070
1900-01	36,70,150	6,86,226	4,21,751	8,70,207	1,24,898
1901-02	34,05,492	4,72,449	4,78,281	11,98,797	1,44,901
1902-03	40,64,314	10,82,933	4,61,056	9,69,129	2,32,444

The increase under this head is 13·68 lakhs or over 23 per cent. The United Kingdom, with 40·64 lakhs distributed equally over almost all the sub-heads, but particularly under Hardware—"Other Sorts," con-

tributes 6.58 lakhs towards this increase. Austria seems to have recovered the ground lost from the competition of Germany, and with an increase of 6.10 lakhs or 150 per cent. has now reached her highest figure since 1893. Of this increase, 70 per cent. or 4.33 lakhs represent *enamelled ware*. Germany has lost ground by 2.29 lakhs, mostly under *Hardware—“Other Sorts.”* The United States show an increase of Rs. 87,543 or over 60 per cent., but a large portion of it (Rs. 42,881) is due to *Iron Oil Cans* which until recently had escaped duty. The Russian imports to the extent of Rs. 1,32,355, which appear for the first time this year, are due to the same cause. The decrease of Rs. 58,599 in articles of *Cutlery* is chiefly due to a fall of Rs. 93,073 in Belgian imports, British and German imports showing increases of Rs. 16,885 and Rs. 16,717, respectively.

Copper—shows the very substantial increase of 56.40 lakhs or 121 per cent., which brings the total imports of this metal nearer the figure of ten years ago, before the price was rendered prohibitive by the combination of the American Copper Trust. A large business was done in December 1902 to February 1903, after which prices stiffened at home and consequently the Indian buyers reaped fair profits. The stocks in spite of the heavy imports are not large, and upcountry demand is satisfactory and with a fair season the chances are that the shipments in the coming year will be as large, if not larger. The imports of *Copper* are a fair index to the prosperity of the masses of the country, because *copper* and *brass* pots represent the investments of the poorer classes.

Of the total imports of *Copper* of 102.94 lakhs, the share of the United Kingdom is 91.77 lakhs or 89 per cent., leaving only 11 per cent. to be contributed by all the other countries. *Japan ingots* show this year an improvement of Rs. 59,945.

Iron—shows a decrease of 4.07 lakhs or 6 per cent., but it is more than compensated for by an increase of 9.41 lakhs or 15½ per cent. in *Steel*, which, now that the prices of the two metals are approximating, is gradually supplanting the former. Putting together *Iron* and *Steel* as for all practical purposes they should be, the imports this year are larger by 5.33 lakhs or 4 per cent. than in 1901-02.

Iron, Wrought.—*Angle, Bolt and Rod* show a decrease of 1.25 lakhs, mainly shared by Sweden and Belgium, though the shipments from the United Kingdom have improved by Rs. 21,317. *Bar*, mainly Belgian imports which have fallen by 4.32 lakhs, is down by 4.55 lakhs; *Beams, Pillars, Girders, &c.*, by 1.60 lakhs, shared by all countries; *Hoop* by .82 lakhs; but these same descriptions in *Steel* are up by 6.37 lakhs (Belgium +5.84), .99 lakhs and 1.04 lakhs, respectively.

Iron, Wrought.—Nails, Screws, &c., show a decrease of 1·33 lakhs; Pipes and Tubes are better by 2·23 lakhs, of which the United Kingdom claims 1·24 lakhs.

Iron Sheets and Plates, Galvanized,—which are mostly corrugated iron sheets, advanced by ·80 lakhs. There is an increasing enquiry for this roofing article both in Bombay and upcountry and prices have been steady.

Iron Sheets and Plates, Tinned,—are better by ·76 lakhs or 14½ per cent. *Steel Plates and Sheets* show an equally satisfactory increase of 2·07 lakhs or over 17 per cent. Between *Iron and Steel* the increase this year is 5·33 lakhs, in which it is satisfactory to note that the United Kingdom shares to the extent of 4 lakhs, mostly in Iron. The percentage of the United Kingdom to the total imports is 49½ per cent. which is better than last year by ½ per cent.

German Silver—shows an increase of 191 cwt. in weight, but a decrease in value of Rs. 22,539. The competition in this metal throughout the year has had the effect of reducing prices in the Bombay market.

C.—Machinery and Millwork.—The values of the imports under this head for the last five years are shown in the margin. The increase under this head is 14·31 lakhs or 16 per cent. The steady increase in this and the previous years (Rs. 31·42 lakhs) shows that the cotton industry, adversely affected by the famine of 1900-01, is again assuming its normal proportions.

Of the total imports of 103 lakhs, the United Kingdom monopolizes 100 lakhs or over 97 per cent. Germany comes next with 1·47 lakhs or 1½ per cent., followed by the United States with ·69 lakhs, or a little over ½ per cent.

D.—Railway Plant and Rolling Stock.—The value of the trade for the last five years is shown in the margin. The increase here is 2·45 lakhs or 5½ per cent. Of the total imports of 47·23 lakhs, those from the United Kingdom are 46·61 lakhs or 98½ per cent., leaving only Rs. 61,849 or 1½ per cent. to be shared by other countries. In view of the recent controversy it is interesting to note that all locomotive engines and parts thereof, of the value of Rs. 33·73 lakhs (Government Stores 18·98 lakhs + other imports 14·74 lakhs), are imports from the United Kingdom. Under the head of Government Stores, which latterly include Railway Plant and Rolling material for the G. I. P. Railway, the imports this year are 63·14 lakhs. These are not included in the above figures.

IV.—CHEMICALS, DRUGS, MEDICINES AND NARCOTICS, AND DYEING AND TANNING MATERIALS.

Chemicals.—Show a small increase of Rs. 32,518 which, however, coming on the top of last year's large increase of 15 per cent., makes the total the largest during the past five years. *Alum* and *sulphuric acid* which practically form 20 per cent. of the total imports show increases of Rs. 22,549 or 17 per cent., and Rs. 45,652 or 33 per cent., respectively. The increased activity in the local mill industries has been followed by a steady increase in the imports of *exempted chemicals* which amount to 2·11 lakhs. Of the total imports of 18·80 lakhs, the United Kingdom shares 13·70 lakhs or 73 per cent. as against 75 per cent. in the previous year, Germany coming next with 2·45 lakhs or 13 per cent. followed by Belgium with ·93 lakhs or about 5 per cent.

Drugs, Medicines and Narcotics.—There is an increase of 2·18 lakhs or about 7 per cent. *Asafoetida*, of which the bulk comes from Persia, is down by Rs. 18,264. *Camphor* shows an improvement of Rs. 15,753 though *Japan cake* has failed to maintain last year's increase and has decreased by Rs. 18,887.

On the other hand Honkong imports both of *crude camphor in powder* and *semi-refined blocks* have improved by 114 per cent. and 100 per cent. respectively. Hongkong *camphor blocks* which have recently been separately tariffed seem to be ousting the more expensive and better refined Japanese article. *Cassia lignea*, mostly from China, shows an improvement of Rs. 72 lakhs, the imports (4.39 lakhs) being the largest during the last four years.

Tobacco, Manufactured.—*Cigarettes* show an increase of Rs. 29,043 or 6½ per cent. They are growing in popularity in India, and the trade shows a steady progress from year to year. The bulk of the trade in this as well as in *cigars* and *manufactured tobacco*—“*other sorts*”—is monopolized by the United Kingdom, the imports of which this year, showing an advance of Rs. 72,589 over last year, come up to 4.11 lakhs which is over 53 per cent. of the total imports of 7.67 lakhs of *manufactured tobacco*. The United States come next with 1.65 lakhs, or 21½ per cent., Egypt following with 1.25 lakhs or 16½ per cent.

There is a drop of 1.24 lakhs or about 2 per cent. under this head, of which *saffron* alone is responsible for .89 lakhs. The drop of 2.30 lakhs in *alizarine* dyes is to a certain extent counterbalanced by an increase of 1.28 lakhs in *aniline* dyes. The imports from the United Kingdom which are confined to higher qualities or numbers show an increase of Rs. 23,660 in *alizarine*. The bulk of the trade in *alizarine* and *aniline* dyes is in the hands of Belgium, Germany, Holland and Italy. Belgium has improved her position by 1.78 lakhs at the expense of Holland, which monopolizes the bulk of the shipping trade in *alizarine* owing to the facilities which its chief port Rotterdam affords for shipment. In *aniline* Belgium has again forged ahead by over 4.13 lakhs, while Italy has lost more than ½rd of her trade, thereby indicating a decrease in imports of *Swiss* dyes, particularly of the cheap *Congo Red*. *Cochineal* shows a drop of Rs. 41,285 in imports from the United Kingdom and an increase of Rs. 50,064 from France. *Saffron*, which is the produce of Spain, though mostly shipped from France, shows a decrease of Rs. 89,906 or about 16½ per cent. The heavy shipments of the previous two years left a considerable stock on importers' hands, with the result that the level of prices was lowered and shipments suffered.

V.—OILS.

Out of the total of 129.15 lakhs (an increase of 3.49 lakhs over the previous year), 124.27 lakhs represent *mineral oils*, principally petroleum or its products.

The following table shows the quantities, values and sources of supply of *mineral oils* for the last five years:—

The imports from *Russia* of *kerosine* in *bulk* show a drop of 9·81 lakhs and in *case oil* of 2·96 lakhs, but the imports from the United States in *case oil* have improved by 17·79 lakhs or over 1,400 per cent. With the addition of ·76 lakhs of "Other Sorts" (by-products of petroleum, which are used for fuel, lubricating oil and oil for the batching of jute, etc.,) the total increase in *mineral oils* from the United States amounts to 18·71 lakhs or 287 per cent. over last year's imports. The decrease in the imports of Russian bulk oil is partly due to the fact that the chief company working the business in *bulk* has taken to shipping in *cases*. The decrease in value looks large by the side of the year 1900-1901, when the value of the Russian oil imported at once jumped from 62 lakhs to 109 lakhs, but the quantity imported this year, though smaller than that imported in 1901-1902, is larger than the figures for 1900-1901 by over 7 per cent, though the value is less by 13 per cent. The extraordinary increase in American *case oil* is economically unaccountable, as the price of this oil has not gone up to justify anything like the heavy imports. As most of it has been imported by an American Corporation, which has been engaged in making attempts to get even Indian and Burma oil under its grasp, it is perhaps part of a scheme to bear the market with a large quantity of American oil ready on its hands. Though a large proportion of American oil came so far back as April 1902, the stock remaining on hand at the end of the year was 45,000 cases of "snow flake" or the higher quality, and 61,000 cases of "Chester" or the lower quality, which means an accumulation of over a million gallons. It is also worth noticing that though a large quantity of the lower quality *case oil* from America has been in stock for a long time, it is offered at a price which is 14 per cent. over the price of Russian *case oil*. Imports from Borneo and Sumatra come to about a lakh. At one time it was thought that Borneo, Sumatra and Java would be able to supply a regular quantity both of *kerosine* and "other sorts," i.e., liquid fuel, etc., but except a small quantity of the latter—the product of Java and Sumatra—nothing worth mentioning has been received. In spite of a steady rise every year in the quantity of *mineral oil*, the trade seems to be in a healthy condition, the distribution of the article all along the Presidency—coast-wise—keeping pace with the gradual increase in imports as evidenced by the further increase of $\frac{3}{4}$ million gallons in the coasting trade this year. It is noteworthy that Burma oil, which is sent in such large quantities to Calcutta, has so far not penetrated to Bombay.

In *vegetable oil*, *cocoanut oil* shows a drop of 2·75 lakhs, entirely confined to Ceylon. Increase in the imports of Cochin oil this year by 3·64 lakhs dispensed with the necessity of foreign oil. *Linseed oil* is up by Rs. 24,823, the total imports of 3·24 lakhs under this head being monopolized by the United Kingdom.

Notwithstanding the large stocks of English coal held at the end of last year, there has been a further increase of 1.71 lakhs in imports of *English coal* during 1902-1903. The decrease in price (1901-1902 Rs. 20, 1902-1903 Rs. 18 per ton) and the consequent inducement to stockholders to minimise their losses partially account for the increase. Imports of Japanese coal dropped by over 85 per cent. consequent on the hardening of prices. The coal is of a very inferior quality and its sole recommendation lies in its cheapness. The decrease of 33 per cent. in imports of Indian coal is to be variously explained by the fall in prices of English coal, the accumulation of unusually heavy stocks since 1900, combined with the absence of any large operations by the principal Railway Companies which absorb the greater part of Indian coal. The imports, however, stand at a higher figure than that of any year previous to 1900, and prices are gradually levelling themselves.

Cotton (Raw).—Compared with the heavy shipments of the last two years induced by the failure of Indian cotton crops, the imports show a further drop of 2.46 lakhs or 13 per cent. This decrease is shared generally by Egyptian (.54 lakh), Japanese (1.26 lakhs) and American cotton (1.68 lakhs). Mekran and Persia between them show an increase of 4.4½ per cent. Leaving the two exceptional years of heavy shipments out of the question, the imports this year (16.42 lakhs) are a little better than the average of the last ten years.

Hides and Skins (Raw).—The increase under this head of 70 per cent. indicates a return to normal conditions after the heavy mortality of the famine years. These imports which are mainly from Persia are intended for re-export, after dressing, principally to America.

Ivory.—There is an increase of 2.09 lakhs or 13½ per cent. which brings the imports nearer the figures of the years before the famine. With the return of prosperity the imports of this article, the bulk of which is used

for ornaments in Káthiawár, Márwár and other districts, show a gradual improvement, though owing to direct communication between Europe and East Africa a portion of the trade to Europe is being diverted from Bombay.

Jewellery.—The increase of 3·32 lákhs or about 6 per cent. is entirely confined to unset Pearls.

Silk (Raw).—On the top of last year's heavy decrease of 21·43 lákhs, this year shows a further drop of 19·64 lákhs or 30 per cent. due entirely to the high price of the article in China.

Tallow.—The imports last year were exceptionally large and some decline was quite expected, but the heavy decrease of 2·56 lákhs or 61 per cent. is due to the high prices ruling both for English and Australian Tallow. In fact the heavy advance (from 20 to 30 per cent.) has attracted large exports of Indian tallow to Europe amounting to 1·47 lákhs or more than double the quantity of last year.

Wood (Teak and other Timber).—Teak is the largest item in this trade and the following table shows the quantity and value imported from the two chief sources of supply during the last five years:—

	1898-99.		1899-1900.		1900-1901.		1901-1902.		1902-1903.	
	C. Tons.	Rs.	C. Tons.	Rs.	C. Tons.	Rs.	C. Tons.	Rs.	C. Tons.	Rs.

Notwithstanding the import duty which places it at a disadvantage with *Burma Teak*, *Siam Teak* has expanded by 94 per cent. and has now attained the largest figure on record. It is being actively pushed on the Indian market, more particularly since the demand in the Far East has been dull and is now largely employed in Railway construction. The expansion of imports has been attended by an increase in prices of over 8 per cent. *Burma Teak* shows a decline on the previous year's figures of 25 per cent.

Wool (Raw).—Wool which had shown a slight upwards tendency in 1901-1902 has fallen heavily by 39 per cent., mainly in imports from Persia. Most of the wool imported into Bombay is intended for export after cleaning.

VII.—ARTICLES, MANUFACTURED AND PARTLY MANUFACTURED.

A.—Yarns and Textile Fabrics.

Cotton Twist and Yarn.—The imports of yarn of counts under 26s is insignificant. In the following table the imports of counts over 26s is contrasted with the production in the local mills for a period of five years. The figures are in millions of pounds:—

	YARN IMPORTED.			YARN LOCALLY PRODUCED.			Total local produce, all counts.

Imports of yarn show a decline in quantity of over 1 million lbs. or 19 per cent., but this decrease has been accompanied by an advance in the outturn of locally produced yarn of some 10 per cent., mainly in counts 26s to 30s. The causes for the decline in imports are probably to be found in the prevalence of plague and the high level of prices of cotton. The stocks at the

end of the year were moderate, being 2,607 bales against 3,671 at the end of the preceding year.

Cotton Manufactures.—There is a heavy drop of 168 lakhs or nearly 19½ per cent. No doubt the shipments of cotton piece-goods last year were very large, but the decrease is partly due to the absence of demand from the Punjab, which largely draws upon Bombay for its supplies, and partly to the stiffening of prices at home in the latter months of the year in response to the speculative rise in American cotton. The stocks, however, at the end of the year are 34 per cent. lower than the previous year, and with easier prices a large business ought to be done.

In the following table the imports of *grey*, *white* and *coloured* goods are contrasted for ten years:—

	Grey.		White.		Coloured.

There is an increase of 6·25 lakhs or 2½ per cent. in *greys*. *Shirtings* show an increase of 25 lakhs, *jeans* and *drills* 1·29 lakhs (though the United States have increased their shipments in Pepperill drills by 1·94 lakhs) and *jaconets* by 2·50 lakhs. *Whites* show a heavy decline of 121 lakhs or 40 per cent. shared by all descriptions, the heaviest drops being in lighter descriptions, as *jaconets*, *mulls*, *nainsooks* and *fancies*. In *coloured* and *printed* goods, the decline comes to 55·30 lakhs or 18½ per cent. The heaviest decline is in *prints* and *chintz* (18·21 lakhs) and *shirtings* (10·53 lakhs). *Sarics* and *scarves* show an improvement of 1·54 lakhs.

Handkerchiefs and *shawls in the piece* show an improvement of 1·58 lakhs or 33 per cent. Cotton *shawls* are replacing the woollen ones gradually, thus accounting partly for the increase.

Hosiery shows a drop of 1·25 lakhs or over 10 per cent. This is due to the accumulation of stocks, owing to the heavy shipments of the last three years. Of the total imports of cotton manufactures of 698 lakhs, the share of the United Kingdom is 644 lakhs or 92½ per cent. against 94 per cent. last year, Italy coming next at a long distance with 12·48 lakhs or a little over 1½ per cent., followed by the United States with 9·28 lakhs or 1¼ per cent., and Germany with 8·48 lakhs or 1¼ per cent.

Flax.—There is an increase of Rs. 35,787 in *canvas* and a drop of Rs. 99,758 in *piece-goods*, showing a decline under this head of ·87 lakhs. The decrease is due to the accumulation of stocks, the imports of *canvas* and particularly of *piece-goods* having been exceptionally heavy in 1901-1902.

Silk.—The imports of 110 lakhs, showing an increase of 5·38 lakhs over last year's, are the largest since 1893-94. In *pure silk* piece-goods there is an increase of 13·22 lakhs or 23½ per cent. The principal contributaries to this increase are France 4·12 lakhs, China 1·02 lakhs and Japan 7·27 lakhs. France has been latterly pushing her silk fabrics steadily and cutting into the trade of China. Japanese goods are also gradually supplanting Chinese, being lighter, better finished and cheaper. There is a drop of 6·20 lakhs or 2¼ per cent., in goods made of *silk mixed with other materials*, and as this trade is monopolized by the European rivals of China, the decrease is entirely shared by them. China shows an increase of ·51 lakhs or 83 per cent. "Other sorts," which represent mostly the *noil* and *warp* trade, show a decrease of 1·64 lakhs or 7 per cent. due to the dearness of raw silk in China on which Europe draws largely for its

supplies. The largest decrease is in imports from the United Kingdom (219 lakhs) and Italy (1.44 lakhs), the trade being practically confined to these two countries. This year there are for the first time imports of 1.70 lakhs from Egypt of silk warps, but they are no doubt European manufactures exported from Port Said.

Wool.—There is a heavy decrease of 21.85 lakhs or over 26 per cent. The drop is distributed over all the sub-heads—*carpets and rugs* Rs. 572, *piece-goods* 20.60 lakhs, *shawls* .82 lakhs and *other sorts* .40 lakhs. German imitations of Bradford cloths have been rather overdone during the last two years with the result that the heaviest drop this year is in imports from Germany, 11.42 lakhs. The United Kingdom comes next with 5.53 lakhs and France with 2.07 lakhs. Of the total decrease of imports of *piece-goods*, United Kingdom is responsible for 12½ per cent., Germany for 58½ per cent. and France for 85 per cent. *Woollen shawls* are being replaced to a certain extent by their cotton imitations. “Other sorts,” which includes *hosiery*, show a decline which is entirely confined to Germany. Of the total imports of 60.90 lakhs, the share of the United Kingdom is 44.23 lakhs or 72½ per cent., of Germany 18 per cent., Austria-Hungary 4½ per cent., Italy 2 per cent., leaving 3½ per cent. to be distributed over all the other countries.

B.—Apparel.

The increase in imports of *boots and shoes* of .89 lakh, or 14 per cent. makes the year the largest in the decade. Of the total imports of 7.25 lakhs, the share of the United Kingdom is 6.35 lakhs or 87½ per cent. *Other Apparel* shows an increase of 9.03 lakhs or 17 per cent. The imports of 62.65 lakhs which, like many articles of luxury in sub-head C, were no doubt stimulated by the Coronation festivities, are the largest since 1893-94. The total imports of 69.91 lakhs under *apparel* are distributed mainly between the United Kingdom (35.50 lakhs or 50 per cent.) and Austria-Hungary (12.44 lakhs or 17 per cent.). Japan imports at 4.04 lakhs are forging ahead gradually by reason of their cheapness.

C.—Other Articles.

The imports of the principal manufactured articles included under this head are shown below for the years 1901-1902 and 1902-1903:—

The increase in many of the items in this list such as *Arms and Ammunition* (1.40 lakhs), *Cabinetware and Furniture* (1.96 lakhs), *Carriages and Carts* (4.55 lakhs, of which *Motor Cars* shared 1 lakh), *Jewellery and Plate* (13.95 lakhs), *Leather manufactures* (5.70 lakhs) may partly be attributable to the activity in these branches of trade consequent on the Coronation festivities. Of the 13.95 lakhs increase in *Jewellery and Plate*, nearly 12.5 lakhs are in *Jewellery*, the balance being in *Silverware*. All the subheads of *Leather manufactures* show increases: 1.70 lakhs in *Unwrought leather*, .61 lakh in *Saddlery* and 3.37 in “*Other sorts*,” which mainly consist of leather belting

used in the local mills. *Instruments and Apparatus, &c.*, show an increase of 3.55 lakhs, the principal advance being in *Scientific Instruments* (2.42 lakhs). Of the total imports of *Type-writers* of Rs. 1,12,703 representing an increase of Rs. 49,472, the share of the United Kingdom is Rs. 87,641 or 75 per cent. The increase of .76 lakh in imports of *Matches* is made up of an advance of 2.16 lakhs in matches from Japan (which at 8.68 lakhs reach the high figure of the decade) balanced by a decrease of 1.28 lakhs in those from Norway and Sweden.

Glassware—continues to improve steadily, the increase this year being distributed over *Beads and Bottles* as against a decrease in *Sheets and Plates*.

Umbrellas.—There is an increase of 2.41 lakhs or about 36 per cent., nearly the whole increase (2.03 lakhs) being shared by the United Kingdom. The cheap Japanese article which at one time threatened serious competition to English goods has decreased by Rs. 18,000.

Articles imported by Post—show an exceptionally large increase of 22.93 lakhs or about 47 per cent. This increase may be explained by temporary causes such as the stimulus of the Coronation Carbar, but the facility and convenience which this method presents for passing goods through the customs formalities have no doubt contributed towards the expansion of this branch of the trade.

For reasons explained in previous reports this trade has gone down steadily during the decade from 3·47 crores in 1893-94 to 2·27 crores this year, a drop of 1·20 crores or 34½ per cent., the most marked decline being noticeable in re-exports to Persia which are now considerably less than half of those at the beginning of the decade. Direct communication is the principal cause of this diversion. The only redeeming feature in this decline is the expansion of the trade of Indian produce with countries which formerly derived their supplies almost exclusively from foreign sources.

II.—EXPORTS OF INDIAN MERCHANDISE.

The following table shows for the last five years the value of the Exports of Indian Merchandise under the groups into which they are classified in the trade returns:—

Total	32,40,45,795	27,73,55,418	24,72,23,915	35,29,25,836	30,04,939

From an inspection of these figures, it will appear that the bulk of the trade falls under divisions II, IV, VI and VII, and further analysis shows that the following specific articles give these groups their respective significance:—

	1898-99.	1899-1900.	1900-1901.	1901-1902.	1902-1903.
	Rs. Lakhs.	Rs. Lakhs.	Rs. Lakhs.	Rs. Lakhs.	Rs. Lakhs.
II.—Grain and Pulse	571	183	68	90	153
IV.—Opium	280	304	333	228	250
VI.—Raw Cotton	814	685	690	1,125	1,071
Seeds	556	463	409	775	822
VII.—Cotton Twist and Yarn ...	590	625	401	844	787
Cotton Manufactures	60	68	58	66	66

It is accordingly to variations in these articles that large fluctuations in the export trade must be attributed. *Raw cotton, cotton-twist* and *yarn* and *seeds* form about 75 per cent. of the total exports, and in spite of a decrease of 1·10 crores in the first two, the increase of 47·67 lakhs in shipments of *seeds* brings the total to the second largest figure of the decade. Looking to the distribution of these three articles among the importing countries, Japan maintains her position as the largest buyer of *Indian cotton* though the percentage of her receipts is reduced from 51 to 29 this year, Germany and Italy coming next each with 13 per cent. followed by Austria-Hungary and Belgium with 12 per cent. each. China drops down to about 2½ per cent. against 10 per cent. last year. Of the total exports of 7·87 crores of *cotton-twist* and *yarn*, China takes 93½ per cent. Of the total exports of *seeds* of 8·22 crores France takes 40 per cent. and Belgium 19 per cent. Thus China between *cotton-twist* and *yarn*,

practically the whole of *opium* and some other articles, is the largest consumer of the Indian merchandise, taking nearly $\frac{1}{3}$ rd (10 crores) of the total exports, France coming next at a long distance with $4\frac{1}{2}$ crores.

II.—ARTICLES OF FOOD AND DRINK.

In the following statement the exports of the principal articles comprised in this class are compared for the two years 1901-1902 and 1902-1903:—

	1901-1902.	1902-1903.

Tea	13,56,559	18,52,511

Coffee.—There is a still further drop of $52\frac{1}{2}$ per cent. in quantity. The article exported from Bombay is the cheapest and its dimensions are insignificant.

The increase of 63.39 lakhs or 70 per cent. under this head brings the figure nearer that of normal years. Excluding the phenomenal year 1898-99, the exports this year are only $9\frac{1}{2}$ per cent. under the average of the decade. The rise is distributed over every sub-head, but the increases in *jowár* and *bájra*, *pulse*, *rice* and *wheat* and *wheat-flour* are very satisfactory.

The rise of 4.91 lakhs or about 29 per cent. is chiefly confined to *fishmaws and sharkfins* (1.29 lakhs) and *ghi* (4.20 lakhs); the former being mostly shipped to the United Kingdom and the latter to Aden, the Arabian ports and Persia in larger quantities.

Spices.—Show an increase of 3·86 lakhs or about 20 per cent. This is made up of *cardamoms* (·96 lakh), *ginger* (·35 lakh) and *pepper* (2·43 lakhs), the increase in exports being spread over the Arabian and Persian ports and Asiatic Turkey.

Tea.—Shows an increase of over 30 per cent. in quantity and 36½ per cent. in value. It is satisfactory to note that Persia took 2·69 lakhs and Turkey in Asia 1·87 lakhs more than in the previous year.

III.—METALS AND MANUFACTURES OF METALS.

B.—Metals.—Show an increase of 2·43 lakhs or 15½ per cent. *Manganese ore.*—Though the trade in this metal is of recent origin, it has been steadily rising and the increase this year is 5·87 lakhs or 72 per cent. The exports to the United Kingdom have risen by 350 per cent. this year, those to the United States have doubled. Germany takes slightly less than last year, and Belgium and Holland which did not touch this metal before have begun to operate. *Brass, wrought*—the exports of which come to 2·25 lakhs—shows a small decrease of Rs. 12,257. Exports of *wrought metal, brass* and *copper* are spasmodic, and, except in times of famine, attain no considerable proportion.

Articles, unenumerated, which include hardware, machinery, &c., show a decline of Rs. 24,525.

IV.—CHEMICALS, DRUGS, MEDICINES AND NARCOTICS, AND DYEING AND TANNING MATERIALS.

The principal articles of export comprised under this heading are:—

	1898-99.	1899-1900.	1900-1901.	1901-1902.	1902-1903.
	Rs.	Rs.	Rs.	Rs.	Rs.

Dyeing and Tanning materials	41,83,846	45,16,102	40,79,837	42,96,833	41,60,425

Opium.—*Opium* exports have advanced by 22·77 lakhs, representing an increase in the number of chests of 1,836½. The partial failure of the local crop have helped exports this year, but they are still far behind the figures of previous years. The fluctuating state of the China exchange seriously interferes with the exports of Malwa opium.

Tobacco—Exports of *Unmanufactured tobacco* are almost entirely confined to Aden, which is the distributing centre to the interior of Arabia and the Red Sea Coast. The exports this year, though showing a decrease of 2·74 lakhs or about 25 per cent. over last year's exceptionally high figures, are 17 per cent. better than the average of last decade.

Dyeing and Tanning Materials.—*Indigo, Myrabolams* and *turmeric* are the only important articles in this class. The values of the exports for the last 5 years have been as follows:—

	1898-99.	1899-1900.	1900-1901.	1901-1902.	1902-1903.

Turmeric	2,86,060	3,18,330	3,65,786	5,43,047	5,04,046

Indigo.—There is a drop of 720 cwts. in quantity and 1·90 lakhs in value, representing a decrease of 24 per cent. in quantity accompanied by a fall in price of 31½ per cent. Exports from Bengal and Sind show an even larger decrease than those of Bombay. Persia, which takes the largest quantity from India, is down by 1·16 lakhs.

practically the whole of *opium* and some other articles, is the largest consumer of the Indian merchandise, taking nearly $\frac{1}{3}$ rd (10 crores) of the total exports, Franco coming next at a long distance with $\frac{4}{5}$ crores.

II.—ARTICLES OF FOOD AND DRINK.

In the following statement the exports of the principal articles comprised in this class are compared for the two years 1901-1902 and 1902-1903 :—

Exports of *Raw Cotton* have receded by 53.63 lakhs or 4½ per cent. from the abnormal figures of the last year, but excepting that year, the exports (10.71 crores) are the largest in the decade. If to the exports are added the 291,000 bales or over one million cwts. consumed by the local mills over and above the previous year's quantity, it will be seen that the decrease of exports is more than satisfactorily made up. The decrease, as compared with the previous year's figures in exports to Japan, of 2.66 crores, is probably to be explained by the improvement in the China crop which last year was so poor as to necessitate the substitution of the Indian grown article. Japan however remains the largest buyer of Indian cotton. Between China and Japan (79.75 lakhs and 2.66 crores respectively) there is a drop of 3.46 crores. Exports to the European Countries, however, have increased by over 284 lakhs, United Kingdom showing an increase of 35.32 lakhs, Austria-Hungary 42.48 lakhs, Belgium, 60.96 lakhs, France 34.80 lakhs, Germany 57.03 lakhs, Italy 41.36 lakhs, and the Spanish Ports 12 lakhs.

Hemp.—With an increase of 7.90 lakhs or 38 per cent. over last year, the present year's exports (28.63 lakhs) are the largest in the decade. Crops both on the Ghats and in the Konkan were very satisfactory, and enquiry from Europe active. The largest exports were to the United Kingdom (12.27 lakhs) and to Belgium (11.33 lakhs).

Horns.—Show an improvement of 3·67 lakhs or about 54 per cent. which brings the figure to normal proportions. The largest exports (5·44 lakhs) are to France.

Manures—Animal Bones.—With the disappearance of the abnormal cattle mortality of the famine years, the exports which have been decreasing the last two years show a drop of 6·11 lakhs or 22½ per cent., the largest quantity being sent to the United Kingdom (10·79 lakhs) and Germany (6·92 lakhs).

Seeds.—The values of the various kinds of seeds exported are shown below for a period of 5 years:

Though there is a drop of 1·89 crores or 11¼ per cent. in the total exports of seeds from the whole of India, the exports from Bombay show an improvement of 47·67 lakhs or 6 per cent. This is mainly due to the increase of 52·67 lakhs or 116 per cent. in *cotton seed* and of 77·86 lakhs or about 5 per cent. in *til* or *jinjili seed* which have more than counterbalanced the decreases in the other oil-seeds. From insignificant beginnings in 1899-1900, when the exports were only 19,449 cwts. of the value of Rs. 45,567, the trade in *cotton seed* within three years has developed to 38,59,459 cwts. valued at over 98 lakhs or 12 per cent. of the total exports, and now forms an important factor in the export trade of the Presidency. The advance in quantity is accompanied by a rise in price, which this year has reached its highest at Rs. 2·8·8 per cwt. Of the total exports 90·55 lakhs or 92½ per cent. go to the United Kingdom, 5 lakhs or over 5 per cent. to France and 2·22 lakhs or 2¼ per cent. to Belgium.

As observed last year *cotton seed* is replacing *linseed* in the manufactures of the United Kingdom, as the exports of *linseed* have still further dropped this year. There was a very full *til* or *jinjili* crop both in the Presidency and outside, and besides the large exports of the *seed* there was an increase in the exports of the *jinjili oil* also.

Silk.—Exports have more than doubled, but they are almost entirely confined to the Cashmere raw silk, a regular trade in which has been started by an English firm for the last three years. The entire exports are confined to the United Kingdom.

Wool.—Shows an improvement of 25½ per cent. in quantity and 31½ per cent. in value. The increase of 14.45 lakhs is satisfactory, and brings the total nearer that of normal years, this year's figure of 60 lakhs being up to the average of the last five years. Practically the whole quantity is absorbed by the United Kingdom.

From the exceptionally large shipments of last year there is a rebound this year which shows adversely to the extent of 56.64 lakhs or 6½ per cent. Nevertheless, the exports this year are the largest in the decennial period except the year 1901-1902. The fall in shipments to China alone is 67½ lakhs, due partly to the heavy stocks of last year's shipments, partly to the disorganization of the Chinese exchange and partly to the high rates of freight. The first and the third of these causes have considerably abated and the second is also adjusting itself to a certain extent to altered circumstances, and it is expected that the progress of Indian yarn in the Chinese markets will be better in the current year.

Cotton Manufactures.—The exports are as large as the preceding year. Of these the most important item is *Grey piece-goods*, the exports of which are larger in quantity but slightly less in value. The details of *Grey* exports are given below for the last five years :—

It is satisfactory to note that all the places supplied by Bombay have continued to draw upon her. The variations in the exports of Indian cotton piece-goods are only due to the seasonal conditions of the importing country. Abyssinia partially makes up her last year's defect by an increase of '96 lakh. Portuguese East Africa has more than doubled her imports, and the figure of 11.60 lakhs is the largest in the decade. Egypt shows an increase of over a lakh—the goods being for distribution over Turkey in Europe which has also taken a large quantity of Indian yarn this year—an experiment due to the efforts of the British Consul. The heavy drops are in exports to Aden (4.28 lakhs) and Turkey in Asia (2.28 lakhs).

As the production of local yarn, particularly of the counts 21s—30s, as well as of lighter cloths, such as *grey dhuties* and *white* and *coloured cloths*, has increased, it is very probable that a large quantity of finer yarns and cloths have gone into local consumption, replacing similar descriptions of imported manufactures. Some mills are producing every year in increasing quantity finer shirtings and other lines for ports like Rangoon which were formerly taking English manufactures. Exports to Rangoon of Indian cotton manufactures this year totalled 14 lakhs, though this figure does not appear in the foreign exports. It, however, throws a side-light on the diminishing imports of English piece-goods.

Wool Manufactures—which are mostly confined to *carpets* and *rugs*—show a decrease of 2.05 lakhs, of which 1.33 lakhs is due to short shipments to the United States which takes two-thirds of the entire exports.

B.—Apparel—is up by 2.40 lakhs made up of an increase of 1.19 lakhs in *Haberdashery*, &c., and 1.21 lakhs in *Boots* and *Shoes*. The Egyptian army is supplied with cheap heavy boots from India, and the exports to Egypt this year are 2.05 lakhs, showing an increase of 1.77 lakhs.

C.—Other Articles.—The large increase of 12.83 lakhs in *Jewellery and Plate* and of 5.45 lakhs in *articles exported by post* is due partly to the jewellery taken to England by the Native Chiefs and Princes for the English Coronation and partly to the purchases of the English Coronation visitors to Delhi.

The value of the imports for 1902-1903 shows a falling off of 2 per cent, as compared with those for 1901-1902 and the trade was divided between the principal countries in the following proportion :—

The value of the exports of Indian produce increased by over 2 per cent., and the trade was divided between the principal countries in the following proportion :—

The trade will now be considered in detail under some of the principal countries to which it belongs :—

European Trade.

United Kingdom.

The proportion of the trade of the United Kingdom to the total trade of Bombay shows an improvement of 1.73 per cent, as compared with the figures for the previous year. This increase is confined to exports (41 per cent.), the imports from the United Kingdom showing a decrease of .2 per cent. on those of the year 1901-1902.

The decrease under imports was due to a large contraction of the trade in cotton yarns and cotton piece-goods, partially set off by an increase under almost all the principal articles of import except wool manufactures, which have slightly declined. Under exports, the large augmentation of the trade was due to the increased shipments of raw cotton, oil-seeds, wheat, hemp and wool (raw), the total value of Indian produce (438 lakhs) sent in the year under review, being (138 lakhs) in excess of the figures for 1901-1902, and, in fact, of any of the preceding five years.

Other Countries in Europe.

The import trade with these countries has this year declined to 594 lakhs from 651 lakhs in 1901-1902, large reductions having taken place in the trade with Germany (24 lakhs), Austria-Hungary (22 lakhs) and Italy and Russia (11 lakhs) each. Imports from Belgium and France were larger than those of the preceding year by 11 lakhs and 2 lakhs, respectively. The decrease is accounted for by a diminution of the imports of sugar from Austria-Hungary, of iron from Belgium, of sugar and woollen piece-goods from Germany, of alizarine and aniline dyes from Holland, of cotton and silk goods and aniline dyes from Italy, of kerosine oil from Russia, and of matches and iron from Sweden; while, on the other hand, imports of sugar, alizarine and aniline dyes and steel from Belgium, and of silk piece-goods from France show an increase. In the decreases, sugar from Austria-Hungary and Germany is responsible for more than 35 lakhs, kerosine oil from Russia for nearly 13 lakhs, and woollen goods from Germany for more than 12 lakhs.

In the export trade, foreign merchandise has declined by 2.09 lakhs, while Indian produce shows an increase of 280 lakhs, the value having risen from 1,175 lakhs in 1901-1902 to 1,455 lakhs in the year under review. Almost all the staple articles of export, contribute to this increase, *viz.*, raw cotton (254.52 lakhs), grain and pulse (14.74 lakhs), horns (2.26 lakhs), hemp (1.29 lakhs) and myrabolams (.79 lakhs), accounting for an increase of 273 lakhs out of the total augmentation of the trade of 280 lakhs.

Africa and Adjacent Islands.

Egypt.—Both the import and export trade show increases of 2·36 and 7·17 lakhs, respectively. Among imports, the chief fluctuations were a decline in raw cotton, accompanied by a slight increase in cigarettes, and a material advance in raw silk and silk manufactures, the imports under the last item having risen to more than five times those of the preceding year.

Under exports, the shipments of cotton piece-goods, grain and pulse, and pepper (spices) as well as of boots and shoes intended for the Egyptian Army, were considerably larger than those of the previous year and account for the increase in the trade.

Mauritius.—Sugar, which practically represents the whole of the import trade, declined from Rs. 1,60,96,851 to Rs. 1,49,39,959. Exports, both of foreign merchandise and of Indian produce, declined by 7·7 lakhs, the former showing a decrease of 50 per cent.

British East Africa (including Mombasa, Zanzibar and Pemba).—Imports, principally of ivory and of cloves, show an increase of 1·2 lakhs. The export trade to these ports partly probably in consequence of direct communication between Europe and the East African sea-board, shows a further relapse of 3·75 lakhs in foreign merchandise and of 4·35 lakhs in Indian produce to which cotton piece-goods and grain and pulse are the principal contributors.

Imports from *Portuguese East Africa (Mozambique)*, which are mainly of ivory, are of slight importance, but the export trade, particularly in Indian cotton piece-goods and grain and pulse, expanded by over 12 lakhs.

Other Countries in Africa.—The import trade of these countries is of comparatively small dimensions, consisting chiefly of shells, cowries and precious stones and pearls (unset), while the exports for the most part represent shipments of cotton piece-goods and grain and pulse. The aggregate value of this trade amounted this year to about 31 lakhs, as against about 24 lakhs in 1901-1902, the exports to Abyssinia showing the largest increase, amounting to nearly 3 lakhs.

Countries in America.

United States.—Trade between America and Bombay is practically confined to the United States. There was a revival in the imports of kerosine oil from these States, the value having risen from Rs. 1,20,894 in 1901-1902 to Rs. 19,00,207 in the year under review. Under exports, the increase of 1·25 lakhs is attributable to a growth of the trade in manganese ore, the value of which amounted to double that of the previous year.

Countries in Asia.

China, Japan, Siam, the Straits and the Far East.—The aggregate value of the import trade of these countries was larger than that of the preceding year, all the countries sharing in the increase, except China, the imports from which were almost stationary. The decrease in imports of raw silk from China was counterbalanced by an increase in silk piece-goods from both China and Japan. Increases also occur in sugar and tea from China, matches from Japan, sugar from Java and the Straits, and teakwood from Siam. Tin from the Straits has declined. Exports to China of Indian produce, mainly under the heads of raw cotton and of cotton twist and yarn, show a fall of 124 lakhs, while a similar decrease of 267 lakhs appears in the shipments of Indian merchandise to Japan, more especially of raw cotton. Exports of opium to China amounted this year to 19,356½ chests, valued at Rs. 2,50,67,182, as against 17,509 chests, valued at Rs. 2,27,74,405 in 1901-1902. The Straits Settlements took an increased quantity (6 lakhs) of Indian produce, cotton twist and yarn showing an increase as against a decline in cotton goods.

Ceylon.—With Ceylon the total trade shows a slight increase, a large fall of Rs. 4·1 lakhs in imports being more than balanced by an increase in all classes of exports, more particularly of Indian produce (3·9 lakhs).

Aden, Arabia, Persia and Turkey in Asia.—The import trade with these countries was slightly smaller, owing chiefly to a restriction of imports from Turkey of horses, grain and dates. Ivory from Aden, pearls from Arabia and Persia, and raw cotton and raw skins from Persia alone show an increase, though wool (raw) from Persia and dates, from Arabia, Persia and Turkey in Asia show a decline. The number of horses imported from Arabia, Persia and Turkey in Asia was this year 2,617, of the value of Rs. 7,73,000, as against 2,482, of the value of Rs. 7,77,850 in 1901-1902. The features of the export trade with these countries were the increase of 25·59 lakhs in Indian exports, shared generally by all countries, and a decrease of 21 lakhs in exports of foreign merchandise, mainly to Persia. Decreases occurred in the shipments of cotton twist and yarn to Persia, of cotton piece-goods to Aden, Persia and Turkey in Asia, and of tobacco (unmanufactured) to Aden, with a noticeable increase in grain and pulse sent to Arabia and Aden. Exports of tea (Indian and foreign) to Persia and Turkey in Asia and of spices (chiefly pepper) sent to Aden, Persia and Turkey were also larger than those of the previous year.

Australia.

Here the principal imports are horses, the number imported this year being 1,154, valued at Rs. 5,76,000, as against 1,676, of the value of Rs. 9,57,000 in 1901-1902. The other large item of decrease is wheat, the trade in which was of a temporary nature and has now almost entirely disappeared. The exports are small and of a fluctuating nature. Shipments of myrabolams to a considerable extent helped to swell the trade in 1901-1902, but they have dwindled down to a small figure in the year under review.

GOLD.

Imports.—There is a large increase of 263 lakhs or 61 per cent. in the imports of gold, the largest shipments being from the United Kingdom (237 lakhs), Australia (335 lakhs), Arabia (34 lakhs) and China (20 lakhs), the imports registered as from Egypt and Ceylon being practically shipments from the United Kingdom and Australia, respectively. Seven-eighths of the gold imported from the United Kingdom and one-seventh of that imported from Australia was gold bar or ingots. The rest, including that from Egypt and Ceylon, consisted of *sovereigns* and other *British coin*.

Exports—were principally confined to the United Kingdom and Ceylon, a large increase of 22·58 lakhs being noticeable in shipments to Ceylon.

SILVER.

Imports—of silver improved by 96 lakhs, bringing the total to 995 lakhs. The largest imports were from the United Kingdom 759 lakhs (including Egypt), China 118 lakhs, 13 lakhs from Arabia and 49 lakhs from San Francisco in the United States. The last is the first import of its kind for three years.

The imports from the United Kingdom, the United States, China and Australia mainly consisted of *bullion*, while those from the Asiatic countries consisted for the most part of Government of India *Rupees*.

Exports—which amounted to 439 lakhs and showed a slight decrease on last year's figures, consisted mainly of *British dollars* for the Straits, Hongkong and of Government of India *Rupees* for the Asiatic and African ports. The quantity of silver tendered at the mint to be coined in *British Dollars* amounted, in the year under review, to the value of Rs. 3,77,09,595 against Rs. 4,22,16,189 in the year 1901-1902.

It will thus be seen that the *net imports* of Gold and Silver have been 909 lakhs:—

	Imports. Rs.	Exports. Rs.	Net Imports. Rs.

British Ports in other Provinces.

Bengal Presidency.—The decrease of 29 lakhs in the trade with this Presidency is almost all accounted for by the contraction of 33 lakhs in the imports of coal probably owing to accumulations of stocks on account of the very heavy transactions of the preceding two years. There was also a decrease of more than 6 lakhs under rice, counterbalanced by an increase of 2 lakhs in imports of tea intended for re-export to Persia and Turkey in Asia. Jute manufactures too show an increase of 6 lakhs.

Madras Presidency.—There is a large interchange of merchandise between the Madras and the Bombay Presidencies and the trade is liable to vary every year according to the condition of the market and the state of the crops. The large increase of nearly 34 lakhs in the year under review is due to an expansion of the imports of coconuts and coconut kernel (6 lakhs), grain and pulse (13 lakhs), coconut oil (4 lakhs) and the spices—betelnut, cardamoms, ginger and pepper—(13 lakhs), set off by a diminution of 3 lakhs in coffee, coir-manufactures and turmeric.

Burma.—Here the decrease of more than 54 lakhs is chiefly accounted for by the reduction in the imports of rice (56 lakhs) which after the unprecedentedly high figures of 1900-1901 have now returned to the normal. Grain—other sorts—shows, however, an increase of nearly 7 lakhs. Teakwood from Burma, which is being displaced by Siam teak, shows a fall of 7 lakhs.

Sind.—The decrease of 103 lakhs in this trade this year is chiefly due to a restriction of the imports of raw cotton (14 lakhs), grain and pulse—jowari, bajri, and wheat (52 lakhs), linseed and rapeseed (26 lakhs), and dried fruit, foreign (3 lakhs), the total diminution corresponding in the aggregate to nearly the amount of the increase the trade exhibited in the preceding year.

British Ports within the Bombay Presidency.

This trade represents the interportal transactions of the several ports in the Bombay Presidency, the imports of one port being the exports of another. The trade was much the same as in the preceding year, the variation being less than one per cent.

Indian Ports, not British: Cutch, Káthiáwár, Gáikwár's Territory and Cambay.—The trade of the first three of these provinces has declined by more than 18 lakhs, while that of the fourth was better by about 1 lakh than that of the preceding year. Cotton (raw) and castor-seed came in smaller quantities from Cutch (6 lakhs), wheat and castor-seed from Káthiáwár (16 lakhs) and castor oil from the Gáikwár's Territory (5 lakh); while garlic from Cutch, raw cotton, ghi, til or jinjili-seed and wool (raw) from Káthiáwár, and tobacco (un-manufactured), wheat and pulse from Cambay show an increase in the aggregate of 7.5 lakhs.

Foreign Konkan.—The imports from this place were smaller owing to a diminution in the receipts of firewood, set off to a certain extent by an increase under rice.

Goa.—This trade represents for the most part the produce of the Southern Marátha Country brought by rail to Marmagao and thence shipped to Bombay. Cotton and seeds improved by 33 lakhs and 6 lakhs, respectively. The transfer of the working of the West of India Portuguese Railway to the Southern Marátha Railway Company may account for part of the increased transactions.

Travancore.—Coconut kernel (9 lakhs) and pepper (spices) (3 lakhs) were imported in larger quantities and account for the increase noticeable in the trade:—

EXPORTS.

British Ports in other Provinces.

Bengal Presidency.—Cotton twist and yarn and cotton piece-goods of local manufacture constitute the bulk of the trade, the other articles worth mention being a quantity of Manchester cotton piece-goods, metals, provisions—dried fruit, cloves and salt. In the year under review cotton twist and yarn and cotton piece-goods (Indian) exhibit an increase of 8 lákhs, metals of a lách and cloves of half a lách, while salt decreased to the extent of 6 lákhs, the falling off being attributed partly to the high level of prices ruling at Uran and partly to the postponement of removals of salt in anticipation of the rumoured reduction of duty.

Madras Presidency.—This trade has only slightly declined, the principal variations being an expansion of the exports of cotton twist and yarn, chiefly Indian (10 lákhs), cotton piece-goods, chiefly foreign (5 lákhs), and metals (3 lákhs), set off by a reduction in the shipments of grain and pulse (14 lákhs). Salt also fell by 8 lákhs.

Burma.—This trade was much the same as in the preceding year; cotton twist and yarn, cotton piece-goods, flour, provisions—chiefly dried fruit, and silk piece-goods being the principal articles exported.

Sind.—Eliminating the transactions in treasure from the totals of each year, there was a diminution in the trade in merchandise alone of more than 38 lákhs, which is accounted for by a decrease in the exports of cotton piece-goods (35 lákhs), and gunny-bags (4 lákhs). The export trade of Bombay with Karáchi is liable to be affected by the figure of imports of foreign merchandise, and this year the large diminution in imports of cotton piece-goods has adversely told on this trade.

British Ports within the Presidency.

This trade has been remarked upon under imports.

Indian Ports not British.

Out of the decrease of about 16 lákhs in the trade of these ports, more than 14 lákhs is due to the reduction of the exports to *Káthiáwár*, where cotton-seed shows a diminution of 12 lákhs and sugar (foreign) of 9 lákhs, set off by an increase of 6 lákhs in the aggregate in grain and pulse, cotton twist and yarn (Indian) and cotton piece-goods (foreign). With a fair cotton season, *Káthiáwár*

had no need to draw on Bombay for cotton seed, which is largely used as fodder, while the fall under sugar may be attributed to accumulations of stock, the trade in this article during the preceding two years having been unusually large.

The reduction in the exports to Goa is chiefly due to a restriction in the exports of grain and pulse.

TREASURE.

There has been a decrease of Rs. 26,515 in the imports and of Rs. 66,52,146 in the exports of treasure in the year under review as compared with 1901-1902, the diminution under exports occurring chiefly in the transactions with Karachi.

The imports of gold were valued at Rs. 9,738 as against Rs. 60,068, and those of silver at Rs. 7,55,757 as against Rs. 7,61,942 in 1901-1902.

The exports of gold were valued at Rs. 38,493 as against Rs. 13,06,485 and those of silver at Rs. 34,27,005 as against Rs. 88,11,159 in 1901-1902.
