## ACKNOWLEDGMENTS

A Fellowship of the Social Science Research Council during the years 1933-1935 enabled me to begin an inquiry into exchange control. It was Professor Gottfried von Haberler who suggested making such an investigation, and his counsel was a source of encouragement. During my sojourn in Vienna and subsequently, Professor Oscar Morgenstern aided me so generously and in such a variety of ways that it is quite impossible to express my obligation. Regarding many aspects of the Hungarian situation, Dr. Stephan Varga has supplied valuable material and interpretations. I desire to express my sincere thanks to Professor C. F. Remer of the University of Michigan for his friendly interest in the present study and for information supplied recently from Geneva.

It is unfortunately impossible to make separate acknowledgment to some seventy persons — academic economists, private bankers and merchants, members of central banks, bankers' associations, and chambers of commerce, and civil servants in statistical and financial departments — in Vienna, Prag, Budapest, Kiel, Berlin, Warsaw, Geneva, and Basel, who accorded time and careful attention to my persistent and, I fear, sometimes distressing questions.

A really enviable standard of courtesy to foreign scholars was set by the Austrian Institute for Business Cycle Research, the Hungarian Institute for Economic Research, the Institut für Weltwirtschaft at Kiel, the Instytut Badenia Konjunktur at Warsaw, and needless to say, by the Economic Section of the League of Nations and the Bank for International Settlements. Since the term of my Fellowship, the continuance of this study has been aided by faculty research grants at the University of Michigan and the University of California.

For reading and for making suggestions regarding the chapters on Austria and Hungary, I am obligated to Dr. Viktor Kienböck, at that time President of the Austrian National Bank, and to Dr. William Fellner, formerly of the Hungarian Institute for Economic Research. Through his keen analytical powers, resourcefulness, and indefatigable industry, Dr. Alexander Gerschenkron, my assistant during the past year, has in fact become my collaborator. Professors Crum and Monroe of Harvard University have patiently devoted their attention to details of the manuscript.

HOWARD S. ELLIS.

# TABLE OF CONTENTS

## PART I

	PAGE
Chapter I. <i>The Nature of Exchange Control</i> . . . . .	1
Main Types of Exchange Control . . . . .	1
Why Was Exchange Control Introduced? . . . . .	7
Bilateral Agreements Concerning International Payments: their Character and the Causes of their Employment . . . . .	13
The Effect of Economic Forces on Exchange Control . . . . .	17
Economic Prognosis for Exchange Control . . . . .	21
Chapter II. <i>Austrian Exchange Control: an Example of Successful Termination</i> . . . . .	27
The Aftermath of the Credit Anstalt Failure . . . . .	27
The Attempt at Full Monopoly, October, 1931–February, 1932 . . . . .	37
The Efficacy of Control . . . . .	40
Clearing Agreements in the Period of Attempted Monopoly . . . . .	44
How Austria Escaped from Exchange Control, February, 1932– May, 1935 . . . . .	47
Liquidation of Debts and the Situation of Austria Preceding Incorporation into Germany . . . . .	52
Austrian Experience with Exchange Control to March, 1938 in Retrospect . . . . .	59
The Incorporation of Austria into the German Exchange Control System . . . . .	69
Statistical Appendix to Chapter II . . . . .	74
Chapter III. <i>Hungary's Struggle with Agricultural Depression and Indebtedness</i> . . . . .	86
Economic and Financial Conditions of 1931 . . . . .	86
The Introduction of Exchange Control, Moratoria, and Standstills . . . . .	88
The History of Exchange Control . . . . .	92
Economic Developments under Exchange Control . . . . .	102
A. Money, Production, Prices, and Exchange Rates . . . . .	102
B. The Comparative Situations of Industry and Agriculture . . . . .	118
Foreign Trade Under Exchange Control . . . . .	128
A. Cyclical and Secular Developments . . . . .	128
B. Trade by Countries . . . . .	131
C. Export and Import Prices: Terms of Trade . . . . .	140
Foreign Debts Under Exchange Control . . . . .	144
The Technical Efficiency of Hungarian Exchange Control . . . . .	157
Conclusion . . . . .	162
Statistical Appendix to Chapter III . . . . .	171
Index to Part I . . . . .	186

## TABLES IN THE TEXT

### Chapter II: *Austria*

	PAGE
Turnover on the Private Clearing .....	48
Austrian Imports and Authorized Import Payments .....	49
Changes in Foreigners' Schilling Accounts .....	51
Austrian Foreign Debts in Foreign Currencies .....	55
Percentual Share of Clearing Countries in Austrian Trade .....	63

# HARVARD ECONOMIC STUDIES

---

## FASCIST ECONOMIC POLICY

By WILLIAM G. WELK

"Professor Welk digs an utterly detached scalpel into the corporate state which Mussolini has founded to lead his people to a new promised land of nationalistic pre-eminence and personal well-being. It could not have been more fairly written by a Martian."—*Hartford Times*. "A well-rounded and up-to-date picture of Mussolini's state."—*American Economic Review*. HARVARD ECONOMIC STUDIES, 62. \$4.00

## MONOPOLY AND COMPETITION IN THE ENGLISH COAL TRADE, 1550-1850

By PAUL M. SWEETZ

Traces the development of the coal trade between the northern counties and London during the formative years of English capitalism. "This very readable book can be studied profitably by all those who are at all interested in the history and theory of capitalist development."—*Science and Society*. HARVARD ECONOMIC STUDIES, 63. \$2.50

## ENGLISH THEORIES OF CENTRAL BANKING CONTROL, 1819-1858

By ELMER WOOD

Of prime importance to everyone interested in money and banking, this book is based upon first-hand investigation of the actual movement of various items in the statements of the Bank of England. Professor Wood also devotes some attention to contemporary procedure. HARVARD ECONOMIC STUDIES, 64. \$5.00

## POLITICS, FINANCE, AND CONSEQUENCES

By CHARLES JESSE BULLOCK

"A great work by one of the ablest scholars America has produced. It is a study of the relations between politics and finance in the ancient world, with special reference to the consequences of sound and unsound politics. . . . The conclusions . . . are of tremendous importance with respect to modern economic and financial problems, particularly in the United States today."—*The Annalist*. HARVARD ECONOMIC STUDIES, 65. \$2.50

## GERMAN FINANCIAL POLICIES, 1932-1939

By KENYON E. POOLE

Why has proletarian Germany not suffered a financial collapse and how has it been able to meet the problems of unemployment and of rearmament during the years since 1932? A trained economist here examines the whole financial structure of the Nazi state up to the spring of the present year. HARVARD ECONOMIC STUDIES, 66. \$3.50
