	PAGE
Prefatory Note	1
Charts illustrating—	
(1) Total uncultivable area, net area sown, culturable waste other than fallow, and current fallows	Facing page 1
(2) Total area under foodcrops, total area under non-foodcrops, and total area of crops irrigated	Facing page 1
TABLES—	
No.	
1. General summary, 1901-02 to 1920-21	2-3
2. Area cultivated and uncultivated in 1920-21 in each province	4
3. Area under irrigation in 1920-21 in each province	5
4. Area under different crops cultivated in 1920-21 in each province	6-7

1. Total uncultivable area, net area sown, culturable waste other than fallow, and current fallows.

2. Total area under food crops, total area under non-food crops, and total area of crops irrigated.

PREFATORY NOTE

The main idea in issuing these summary tables is to make available at an early date in an abstract form, the provisional figures of the Agricultural Statistics of British India for the agricultural year 1920-21, which would not otherwise, be published until Volume I of the Agricultural Statistics of India is issued later in the year.

2. The total area of British Provinces (excluding Indian States) to which these tables relate is 621 million acres according to professional survey, or 618 million acres according to village papers. Of the latter area, 230 million acres represent uncultivable area comprising forests (88 million acres) and other area not available for cultivation (142 million acres), 115 million acres represent culturable waste other than fallow, and 61 million acres the area left fallow during the year. The remainder, 212 million acres, was the net area actually sown during the year. If areas sown more than once be taken as separate areas for each crop, the total area sown in the year 1920-21 comes to 239 million acres, which is 16 million acres or 6 per cent less than that of 1919-20.

3. The total area sown may be classified under the two main heads, food crops (197 million acres) and non-food crops (42 million acres). Except in regard to jawar and ragi, there was generally a decrease in the area under food crops. The noticeable decreases were under gram ($-3\frac{1}{2}$ million acres), wheat (-3 million acres), bajra ($-2\frac{1}{4}$ million acres), and barley (-1 million acres). The total area under non-food crops declined by 2 million acres. This decrease occurred mainly in the area under cotton (-1 million acres), and linseed and rape and mustard ($-\frac{3}{4}$ million acres, each).

4. The total area irrigated amounted to 49 million acres, which is nearly the same as in the previous year. The canals irrigated 23 million acres, wells 14 million acres, tanks 7 million acres, and other sources 5 million acres. Including the area sown more than once with irrigation, the gross area of irrigated crops comes to 53 million acres, of which rice occupied 18 million, wheat 10 million, barley 3 million, jawar and bajra 3 million, and cotton 3 million acres.

Summary Tables of the Agricultural Statistics of British India

No. 1—GENERAL SUMMARY, 1901-02 TO 1920-21

Classification of area
