ADMINISTRATION REPORT

OF

IRRIGATION WORKS IN THE BOMBAY PRESIDENCY FOR 1907-1908.

GENERAL.

The direct and indirect receipts and expenditure of the Irrigation Department during the year were as follows :—

| Class of Works. | Direct Receipts. | Indirect Receipts. | Total, Direct and Indirect Receipts. | DIRECT EXPENDITURE. | | |
|--|----------------------|--------------------|--------------------------------------|---------------------|-------------------|-----------|
| | | | | Capital. | Working Expenses. | Total. |
| | Rs. | Rs. | Rs. | Rs. | Rs. | Rs. |
| Major Irrigation Works. { Deccan and Gujarát. | 934,138 | 4,031 | 9,38,169 | 11,93,500 | 2,74,114 | 14,67,614 |
| | Sind 1,91,548 | 23,14,288 | 25,05,836 | 2,56,212 | 9,68,179 | 12,19,391 |
| Minor Irrigation Works { Deccan and Gujarát. for which Capital and Revenue Accounts are kept. } Sind | 1,59,700 | 6,883 | 1,66,583 | 60,718 | 89,932 | 1,50,650 |
| | 90,150 | 11,33,696 | 12,23,846 | 13,262 | 3,39,044 | 3,52,306 |
| Total, Deccan and Gujarát ... | 10,93,838 | 10,914 | 11,04,752 | 12,54,218 | 3,64,046 | 16,18,264 |
| Total, Sind .. | 2,81,698 | 34,47,984 | 37,29,682 | 2,69,474 | 13,02,223 | 15,71,697 |
| Grand Total, Deccan and Gujarát and Sind .. | 13,75,536 | 34,68,898 | 48,34,434 | 15,23,692 | 16,66,269 | 31,89,961 |
| Grand Total for 1906-1907 ... | 11,34,166 | 44,87,671 | 56,21,837 | 7,05,986 | 16,66,790 | 23,72,776 |

2. The following table gives the areas irrigated by the several canals in 1907-1908, compared with those for the year 1906-1907 :—

| Names of Canals. | 1906-1907. | 1907-1908. | Difference. |

| Total, Irrigation Minor Works for which Capital and Revenue Accounts are kept | 1,140,253 | 936,941 | -203,312 |
| Total, Irrigation Major and Minor Works for which Capital and Revenue Accounts are kept... .. | 2,836,719 | 2,246,781 | -589,938 |

3. The above table does not include works for which only Revenue Accounts are kept or "Agricultural Works"; including these, the total area irrigated in Sind was 3,053,285 acres. Details will be found in Statement IV E.

† Consolidated assessment levied on 337 acres only.

* Area on which consolidated assessment is levied.

Details of expenditure during the year 1907-08.

In the year 1907-1908 the expenditure on Irrigation Works throughout the Presidency amounted to Rs. 59 lakhs compared with Rs. 47½ lakhs in the previous year. This outlay was divided between Sind and Presidency proper in the proportion of 34¾ : 24¼.

2. The expenditure was distributed under different heads as under :—

| Heads. | | | | Amount. | Remarks. |
|---|-----|-----|-----|---------------|------------------------------|
| <i>Capital—</i> | | | | | |
| Major Works— | | | | | |
| Protective Works | ... | ... | ... | (a) 11,19,755 | |
| Productive Works | ... | ... | ... | (b) 2,56,212 | |
| Minor Works and Navigation— | | | | | |
| Works for which Capital and Revenue Accounts are kept | ... | ... | ... | 13,75,967 | Imperial. |
| <i>Revenue—</i> | | | | | |
| Major Works— | | | | | |
| Protective Works | ... | ... | ... | 87,375 | |
| Productive Works | ... | ... | ... | 9,91,729 | |
| Minor Works and Navigation— | | | | | |
| Works for which Capital and Revenue Accounts are kept | ... | ... | ... | 1,47,725 | ¼ Imperial and ¾ Provincial. |
| Works for which only Revenue Accounts are kept | ... | ... | ... | 10,79,104 | Do. |
| Agricultural Works— | | | | | |
| Works for which neither Capital nor Revenue Accounts are kept | ... | ... | ... | 14,22,381 | Do. |
| Contribution Works | ... | ... | ... | 14,90,148 | Do. |
| Construction of Protective Works— | | | | | |
| Works for which neither Capital nor Revenue Accounts are kept | ... | ... | ... | (c) 3,83,819 | Deposit contribution. |
| Famine Relief outlay on Irrigation Works | ... | ... | ... | 634 | Imperial. |
| Grand Total | | | | 58,99,778 | |

(a) Inclusive of expenditure in England Rs. 99,521
 (b) Do. do. " 3,450
 (c) Do. do. " 6,017

3. The total is classified as under :—

| | Deccan and Gujarát. | Sind. | Total. |
|-----------------------------|---------------------|-----------|-----------|
| | Rs. | Rs. | Rs. |
| Works | 12,03,673 | 5,57,275 | 17,60,948 |
| Repairs | 4,11,995 | 20,15,348 | 24,27,343 |
| Establishment | 6,77,759 | 8,19,205 | 14,96,964 |
| Tools and Plant | 1,84,686 | 65,998 | 2,00,684 |
| Refunds of Revenue | 3,689 | | 3,689 |
| Gratuitous Relief | | | |
| Suspense Account | 4,113 | 15,706 | 11,593 |
| Receipts on Capital Account | 1,443 | | 1,443 |
| Total | 24,26,246 | 34,73,532 | 58,99,778 |

DECCAN AND GUJARAT.
NORTHERN DIVISION.

A description of these works was attached to the Administration Report of 1906-1907.

The rainfall gauged during the year at Ahmedabad and Prantij was 33.25 and 41.40 inches respectively, the average for 30 years being 29.89 and 30.73 inches. The highest flood of the year in the Hathmati River occurred on 18th August and rose 2.30 feet above the weir at the head-works of the Hathmati Canal.

In the Khari River the flood rose to 8 feet above the weir at Raipur on 17th August. The Bokh and Chandola and all the small tanks on the system had good supplies of water during the earlier monsoon rains, and, as the rabi or late rains failed, the storage was all used.

The area irrigated was :—

| Name of the Canal, | 1907-1908. | | | Average of the past 10 years. | |
|--------------------|-----------------|-------------------------|-------------------------|-------------------------------|-------------------------|
| | Area irrigated. | Assessed water revenue. | Gross assessed revenue. | Area irrigated. | Gross assessed revenue. |
| Hathmati Canal | Acres. 8,572 | Rs. 14,847 | Rs. 15,561 | Acres 1,616 | Rs. 4,047 |
| Khari Out Canal | 6,160 | 39,247 | 41,967 | 1,568 | 7,468 |

On the Khari sluices the small tanks Gobraj and Bherai were useful owing to the failure of the rabi rains and the rice crops were good, the area was estimated at 5,000 acres of rice and some rabi crops were grown in addition.

On the tanks in Public Works Department charge, the irrigation was as follows :—

Tranza-Nagrama,
Wangroli and
Muvalia Tanks.

| Name. | 1907-1908. | | 1906-1907. | | 1907-1908. |
|----------------------------|-----------------|-------------------------|-----------------|-------------------------|--------------|
| | Area irrigated. | Gross assessed revenue. | Area irrigated. | Gross assessed revenue. | Expenditure. |
| | Acres. | Rs. | Acres. | Rs. | Rs. |
| Tranza-Nagrama Tank | 790 | 2,103 | ... | ... | 5,539 |
| Wangroli Tank | 1,859 | 6,424 | 209 | 625 | 15,763 |
| Muvalia Tank | 121 | ... | ... | ... | 1,185 |

Old Tanks.

Improvements to 9 and repairs to 40 small irrigation tanks in the Gujarát Irrigation District and repairs to 76 in the Surat and Broach District were executed during the year at a total cost of Rs. 7,000 and 64,900 on improvements and repairs respectively.

Surveys.

Rs. 2,140 were spent on surveys for Protective Irrigation works and Rs. 2,462 on detailed survey for improvement of small tanks.

Drainage Channels.

The Drainage Channels in the low-lying district worked satisfactorily during the year and were maintained at a cost of Rs. 7,790. Two works of this class were in progress, namely :—

Expenditure during 1907-08.

| | |
|------------------------------|-----|
| Chekla Drainage | 988 |
| Ogan Drainage Channel | 957 |

CENTRAL DIVISION.

(a) *Nature and Scope of any large works which have been undertaken or were in progress during the year.*

Násik and Ahmednagar Irrigation District.

The masonry dam at Chankápur in the Kalvan Taluka of the Násik District, to store water for the Girna Left Bank Canal, as well as to extend irrigation on existing 'bandharas' or weirs was in progress. The seven low level and one of the upper sluices were completed and the masonry work carried to R. L. 110 or 58 feet below top of dam. The Northern waste weir and the Southern weir for half its length were built up to within 1½ feet of sill level. The Southern earthen embankment was completed and the Northern embankment was in progress. The expenditure during the year was Rs. 2,06,824. On the Girna Left Bank Canal, the masonry works up to mile 13 and the earthwork of the canal were completed, the expenditure during the year being Rs. 80,105.

The masonry waste weir of the Wághad Tank was practically completed during the year and the tank will be in a position to store water to its full supply this rainy season. The expenditure during the year was Rs. 43,039.

Godaveri Irrigation District.

The Godaveri Canal Project estimated to cost Rs. 95,61,044, including indirect charges, was sanctioned by the Secretary of State in 1906-07 and works were regularly commenced in February 1907. The project consists of—

- (1) A Storage reservoir on the River Darna, near Asvali in the Násik District.
- (2) A pick-up weir on the River Godaveri at Nandur-Madhmeshwar from which two canals are to be taken off, *viz.* :—
- (3) A canal on the Right Bank 72 miles long, and
- (4) A canal on the Left Bank 50 miles long.

These canals are intended to irrigate a total area of 63,919 acres in the Násik and Ahmednagar Collectorates, the area under command of both canals being 239,698 acres. The Inspection bungalow and service road to the dam were almost completed. The dam itself made very good progress, the whole of the masonry work up to water level, on the main nalla being completed and the foundations of the rest of the dam commenced in long lengths.

At the head-works at Nandur-Madhmeshwar, the Inspection bungalow and earthwork of the service road were nearly completed. The foundations of the weir were pushed forward and concrete and masonry commenced in February 1908; good progress was made. Excavation for the Right Bank Canal was in progress in the first 30 miles by the end of July 1907 and was extended to the 50th mile in November 1907 and is nearly completed in the first 22 miles. Masonry works in the first five miles were commenced. On the Left Bank Canal, orders to commence which were received in January 1908, arrangements to commence work were made.

The expenditure during the year on the project was as under :—

| | | |
|-------------------------|----------|----------|
| Darna Reservoir | Rs. | 8,08,313 |
| Pick-up Weir | 1,57,845 | |
| Right Bank Canal | 1,36,714 | |
| Total | 5,97,872 | |

Ahmednagar District.

This is not an Irrigation District but for convenience of work, the construction of the masonry works of the Ojhar Right Bank Canal of which the earthwork had been carried out

during the recent famines, was entrusted to the Executive Engineer, Ahmednagar District. The work is a portion of the Pravara Project lately sanctioned by the Secretary of State for India. The main features of this large project are the construction of a masonry dam 250 feet high at Bandardarra situated in the ghaut area of the Ahmednagar District, the raising of the existing low weir at Ojhar and the widening and extension of the existing Ojhar Left Bank Canal and completion of the Right Bank Canal. The estimated cost of the project is Rs. 86,44,841, including indirect charges, and the canals are estimated to irrigate 49,440 acres.

Funds were not sufficient for work along the whole project, and the limited amount available is being spent on providing masonry works to the Right Bank Canal and bringing a portion into use, as soon as possible.

Poona Irrigation District.

An estimate amounting to Rs. 1,00,002 for making a portion of the Mutha Canal water-tight was sanctioned during the year. The object of the work is to try and stop percolation from the portion of the canal above Poona City. The canal will be widened so as to have a capacity of about 1,000 cusecs with a full supply depth of 10 feet, and the bed and sides of the canal will be lined with 6 inches of mortar. As it is not feasible to close the canal, the work will be carried out in lengths of 500 feet, the water in the canal being diverted through a corrugated iron flume 500 feet in length placed in a cutting on the upper bank of the canal. The expenditure during the year was 11,944 on the flume and diversion.

Second Class Irrigation Works.

Of Second Class Irrigation Works in the Nasik and Ahmednagar District, 38 bandharas were repaired at a total cost of Rs. 37,214. Four 'kutchha' bandharas were converted into 'pukha' ones and the work of converting another was in progress. In West Khándesh the restoration of the Dhanrat Bandhara in Navapur Peta was in progress as well as repairs to the Pimpalner, Nadipar and Kusumba Upper bandharas, the total amount spent being Rs. 14,475.

The following table shows area irrigated and gross assessed revenue on the irrigation works in 1907-08 as compared with the average of the last 10 years:—

| Name of Work. | 1907-1908. | | Average of past 10 years. | | |
|--|-----------------|-------------------------|---------------------------|-------------------------|--------|
| | Area irrigated. | Gross assessed Revenue. | Area irrigated. | Gross assessed Revenue. | |

* Approximate figures, the assessment papers for the rabi season are under revision.

† Average of six years.

‡ Average of two years.

There was an increase of 3,471 acres in the area on Major Protective Works as compared with the average of the last 10 years and a very large increase of Rs. 1,54,188 in the gross assessed revenue. The small decrease in the area of the Nira Canal is due partly to the fact that the supply was insufficient to meet the full demand in the rabi season and partly to the demand for water for monsoon crops being low owing to seasonable rainfall. The gross revenue is, however, the largest on record.

Owing to breaches in the Nira Canal the Shetphal Tank could not be filled and water could therefore not be given for rabi crops outside the blocks for which there was much demand. The figures given by the Executive Engineer for the Mhaswad Tank are only approximate, but there appears to be a very substantial and satisfactory increase in both the area and revenue due principally to increased rates and to demand for water owing to want of timely rainfall.

In the case of Productive works collectively the area irrigated was about the average of the last 10 years but there was a substantial rise of over Rs. 65,000 on the gross assessed revenue. For Ekruk Tank, the area and revenue are the largest on record, On the Kadwa River system there was a rise in the revenue of about Rs. 3,391.

Under Minor Works and Navigation there is an increase in the area and a substantial rise of Rs. 24,000 in the revenue. Most of the works contribute to this but there is a falling off both in area and revenue in the case of the Matoba Tank and Ojbar Canal. This is due in both cases to the want of demand for water for monsoon crops owing to the seasonable rainfall in the early part of the rainy season. The slight falling off in the area in the case of the Bhadalwadi Tank is due to short supply in the tank during the rabi season, but Shirsuphal Tank on the contrary shows an increase due to better supply in the rabi season. The Mhaswa Tank, Jamda Canals, Parsul Tank and Bhatodi Tank, the Sholapur Tanks—Ashti, Koregaon and Pathri, all show satisfactory increases, that of Ashti being most marked and being due to monsoon rain providing replenishments which were used as the rabi rains failed. On the whole, the increase in area under the Heads Major Works—Protective, Productive, and Minor Works amounted to 8,099 acres and the increase in revenue to Rs. 2,44,963.

(b) *Important events which have occurred concerning works.*

There were no events of much importance to record during the year. The rainfall generally was not very satisfactory, the late rains failing in most places. Exceptionally heavy and intense rainfall fell at Sholapur on July 16th when 6.36 inches fell in 4¼ hours. The Executive Engineer reports that the Negretti and Zambra automatic rain-gauge in the compound of his office plainly showed that from 8-15 to 10-30 P. M. the rainfall was 5.87 inches or at the rate of 2.6 inches per hour for 2¼ hours. To show how variable the rainfall in this tract of country is, the rainfall at Hiperga 5 miles away was only 4.36 inches and it did not extend over the catchment area of the Ekruk Tank which received a replenishment of 3 feet depth only.

(c) *Engineering questions that have arisen.*

Twelve automatic gates similar to those which have proved so satisfactory at Lake Fife have been erected at the Waghad Tank and 68 similar gates for the masonry dam at Chankapur have been received from England and are being taken to the site and it is hoped will be erected next working season. The experiments made to ascertain the line of saturation of various earthen dams were continued.

The Executive Engineer, Sholapur, has made some careful experiments regarding the losses by evaporation and absorption in the case of the Pathri Tank. This tank was selected, as at present a very small discharge is being let out for irrigation, so that the losses were less likely to be influenced by any possibility of error in the discharge from the tank. The results are given in the following table and would seem to show that the losses are really much more than have been generally allowed for in Tank projects in the Deccan :—

Table showing the observed depth of losses in feet due to evaporation and absorption in the Pathri Tank, month by month, during the year 1907.

| January. | February. | March. | April. | May. | June. | July. | August. | September. | October. | November. | December. | Total. |
|----------|-----------|--------|--------|------|-------|-------|---------|------------|----------|-----------|-----------|--------|
| 0.65 | 0.59 | 0.91 | 1.08 | 1.14 | 0.78 | 0.34 | 0.34 | 0.46 | 1.00 | 0.70 | 0.72 | 8.71 |

The failure of the October rains no doubt accounted for the high figure of evaporation in that month. The somewhat low figures for the months of July, August and September are, the Executive Engineer thinks and this is no doubt the case, due to small rainfall over the area of the tank itself which did not produce any run-off from the catchment and so caused an apparent decrease in evaporation and absorption. Experiments were also made to find the losses on the Mhaswad Canal due to evaporation and absorption by gauging the discharges in sections when all the outlets were closed. The results are shown below in equivalent discharges expressed in cubic feet per second for each million square feet of wetted surface of canal :—

| Canal. | Losses. | Length. |
|-----------------------|---------|---------|
| | Cusecs. | Miles. |
| Main Canal No. 1 ... | 6.14 | 10 |
| Main Canal No. 2 ... | 7.65 | 17.75 |
| Kasegaon Branch ... | 6.50 | 18.25 |
| Pandharpur Branch ... | 6.34 | 6.00 |

The sluices of Lake Whiting were kept closed for about 3 or 4 days at a time, thrice a month in April and May 1907 and again in January, February and March 1908, when the river above the lake was dry and accurate observations of the levels of water at the beginning and end of each period were taken to ascertain the loss due to evaporation and absorption in the lake, and the results are as under:—

| Month. | | | Average loss per day. |
|---------------|-----|-----|-----------------------|
| April 1907 | ... | ... | ·0200 |
| May 1907 | ... | ... | ·0310 |
| January 1908 | ... | ... | ·0076 |
| February 1908 | ... | ... | ·0101 |
| March 1908 | ... | ... | ·0171 |

Surveys, &c.

Plans and estimates for enlarging the water-supply main to Yeránda Central Prison and for providing a complete set of steam pumping machinery for use at the Poona Water-Supply Station were submitted to Government during the year. The estimate for the former work amounts to Rs. 59,298 and for the latter, to Rs. 73,389.

In the East Khándesh District, besides the gauging of the Rivers Aner at Ganpur, Manad at Saigaon and Tapti near Bhusával, carried out on behalf of the Superintending Engineer on Special Duty (Protective Works), the River Waghur was gauged at Raipur, in connection with the proposed storage tank at Raipur in the Jalgaon Táluka. A considerable number of projects drawn up by the Special Duty Overseers on the preparation of famine programme of village works were examined and disposed of during the year. In the West Khándesh District, the rivers Bori at Purmapada, Arunawati at Karwand and Kan at Khandbara were gauged in connection with storage tanks. The completion of the Karwand Project is in abeyance, but the Purmapada and Khandbara Projects are in hand. Surveys for improvements to a number of bandharas and channels in the Násik and Ahmednagar Irrigation District were in progress during the year.

At the village of Chandnapuri in the Sangamner Táluka of the Ahmednagar Collectorate, experiment was commenced to test the advantage and usefulness of terracing and field embankments for which estimates on a large scale have been prepared for famine purposes.

Results of new administrative measures affecting the Department which have been tried.

The block system of irrigation introduced on the Nira Canal continued to work satisfactorily. An experiment on the distribution of water by time and measurement on Distributary No. 29 of the Nira Canal, which has about 200 acres of sugarcane under it, has been ordered. Arrangements were made for the measurement and distribution of the water for the experiment.

The telegraph line on the Nira Canal continued to prove of great assistance in the efficient regulation of the discharge of the canal.

SOUTHERN DIVISION.

The area under irrigation and the gross assessed revenue on all the First Class Irrigation Works in the Southern Division are shown below in two statements: in the first they are detailed by works, and in the second, by Districts. The figures of the past year are compared with those of the average of the previous ten years:—

| Name of work. | 1907-1908. | | Average of previous 10 years. | | Area under consolidated assessment. |
|--|-----------------|-------------------|-------------------------------|-------------------|-------------------------------------|
| | Area irrigated. | Assessed revenue. | Area irrigated. | Assessed revenue. | |
| <i>Major Works.</i> | | | | | |
| Krishna Canal | 5,036 | 38,020 | 6,373 | 47,093 | |
| <i>Minor Works.</i> | | | | | |
| Rewári Canal | 1,248 | 4,323 | 718 | 4,030 | |
| Upper Mán River Works | 837 | 2,709 | 1,003 | 3,539 | |
| Yerla River Irrigation Works | 3,781 | 16,821 | 3,041 | 11,896 | |
| Chikhli Canal | 321 | 1,487 | 316 | 1,559 | |
| Maini Tank | 1,552 | 7,649 | 1,467 | 5,168 | |
| Muchkundi Tank | 4 | 12 | 49 | 414 | |
| Gadikeri Tank | (a) 377 | 1,987 | (a) 341 | 1,987 | (a) 337 acres. |
| Dambal Tank | (b) 366 | 2,204 | (b) 374 | 1,980 | (b) 144 " |
| Medleri Tank | 109 | 766 | 95 | 637 | |
| Mádag Tank | 753 | 2,641 | 861 | 2,417 | |
| Asundi Tank | (c) 283 | 1,126 | (c) 3.6 | 1,357 | (c) 185 acres. |
| Mávinkop Tank | (d) 561 | 2,338 | (d) 553 | 1,936 | (d) The whole area. |
| Gokák Canal, 1st section, and Storage Works. | 7,714 | 34,571 | 9,726 | 44,313 | |
| Total | 17,911 | 78,633 | 18,855 | 81,233 | |
| Grand Total | 22,947 | 1,11,653 | 25,228 | 1,28,326 | |
| <i>Name of District.</i> | | | | | |
| Belgaum | 8,091 | 36,558 | 10,067 | 46,300 | |
| Dhárwár Irrigation | 2,077 | 9,075 | 2,199 | 8,327 | |
| Sátára | 12,775 | 66,008 | 12,913 | 78,285 | |
| Brijápur | 4 | 12 | 49 | 414 | |
| Total | 22,947 | 1,11,653 | 25,228 | 1,28,326 | |

The total area and revenue showed decreases of 3 and 12 per cent. respectively, on the totals of the previous year, and of 9 and 13 per cent., on those of the previous ten years. There was, however, a slight increase in the total area irrigated, as compared with that of the previous year, on the 1st class tanks in the Sâtâra and Dhârwar Irrigation Districts. In the former, the large decrease in area on the Krishna Canal was more than made up by increases in area on the five 1st class tanks in that district. The decrease in area on the Gokâk Canal is more than the total increase in the Sâtâra and Dhârwar Districts. The decrease in area on the Krishna and Gokâk Canals is due to copious and timely rainfall in the kharif season.

Remarks on Individual Works.

Gokâk Canal.

There was no capital expenditure on this work during the year.

The source of supply, the Dhupdal Weir, overflowed on the 20th June 1907. The maximum flood of the year occurred on the 4th August 1907, when the water level rose to 4.94 feet above the permanent weir crest (R. L. 2008.06). This flood is estimated at 112,240 cubic feet per second, which is equal to a run-off of 0.16 inch per hour from the whole catchment basin (1,050 square miles).

The permanent weir crest was temporarily raised, as in previous years, to a height of 1.75 feet at a cost of Rs. 891, securing an additional storage of 214 million cubic feet.

The main river undersluices were closed on the 20th November 1907, and the storage was first drawn upon on the 14th December 1907.

Special Experiments.

Experiment in evaporation and absorption.

The observations for evaporation at the Dhupdal Storage Reservoir were continued. The loss during the year, omitting the period from 1st to 31st July, amounted to 7.896 feet in vertical depth.

Silt in tanks and saturation through tank embankments.

Observations for silt deposit in tanks were continued during the year in the Belgaum and Bijâpur Districts only, the results will shortly be reported to Government: observations for ascertaining the line of saturation in dams were also continued in all the irrigation districts of the Southern Division and the results were reported to Government.

Crop experiments.

The cultivation of irrigated Broach cotton was experimented on during the year under Dambal and Asundi Tanks in the Dhârwar District.

The total cost of this experiment, including the rent of the land, manuring and sundry expenses, amounted to Rs. 42 and the outturn was 618 lbs. This result is satisfactory, as the local cotton generally amounts to about 400 lbs. only per acre.

Second Class Tanks.

The expenditure on repairs to 2nd class tanks, as compared with the average of the previous ten years, was as follows:—

| District. | 1907-1908. | | Average of previous ten years. | | Remarks. |
|---------------------------|---------------------------|------------|--------------------------------|------------|----------|
| | Number of tanks repaired. | Cost. | Number of tanks repaired. | Cost. | |
| Belgaum | 42 | Rs. 16,064 | 38 | Rs. 20,436 | |
| Dhârwar Irrigation | 110 | 77,615 | 75 | 64,137 | |
| Ratnâgiri | 2 | 132 | 2 | 511 | |
| Bijâpur | 2 | 828 | 2 | 1,378 | |
| Sâtâra | | | 1 ⁵ / ₈ | 48 | |
| Kânara | | | 1 ⁵ / ₈ | 63 | |
| Total | 156 | 94,639 | 112 | 86,573 | |

The area under irrigation and the irrigation share of the assessed consolidated revenue of the year under report, compared with the average of the previous ten years, was as follows:—

| Name of District. | 1907-1908. | | Average of previous ten years. | | Remarks. |
|---------------------------|-----------------|------------------------------|--------------------------------|------------------------------|----------|
| | Area irrigated. | Assessed irrigation revenue. | Area irrigated. | Assessed irrigation revenue. | |
| Belgaum | Acres. 9,910 | Rs. 38,049 | Acres. 9,910 | Rs. 38,049 | |
| Dhârwar Irrigation | 62,448 | 1,74,326 | 55,783 | 1,69,724 | |
| Ratnâgiri | 1,137 | 2,924 | 1,079 | 2,800 | |
| Bijâpur | 1,439 | 5,929 | 1,439 | 5,495 | |
| Sâtâra | 105 | 680 | 108 | 674 | |
| Kânara | 861 | 2,338 | 552 | 2,011 | |
| Total | 75,600 | 2,19,226 | 68,871 | 2,13,758 | |

The dam and waste weir of the tank at Murgod in the Belgaum District, which were left incomplete by famine labour, were completed for Rs. 10,600 during the year under report at a total cost of Rs. 11,101. Tank at Murgod.

A sum of Rs. 7,087 was spent during the year on the construction of the tank at Shedbal in the same district; the total outlay on it has been Rs. 37,055 against the sanctioned estimate of Rs. 65,055. Tank at Shedbal.

Three irrigation Rest-Houses at Hángal, Havasbhavi and Rattihalli in the Dhárwár District were completed for Rs. 4,995, Rs. 5,015 and Rs. 5,180, respectively, as compared with the estimated cost of Rs. 4,800 for each building, the expenditure incurred during the year being Rs. 630, Rs. 1,323 and Rs. 2,422 respectively. Houses.

The construction of this building, which was sanctioned in Government Resolution No. W. I.-1351 of 17th May 1907, was commenced during the year. The estimated cost is Rs. 15,155 and the expenditure incurred was Rs. 10,435. The residence will probably be completed in August 1908. Residence for the Executive Engineer, Dhárwár Irrigation.

These canals flowed from the 17th June to the end of December 1907. The tanks dependent on this system were filled and the season was a successful one. The total expenditure was :— Dharma and Naregal Canals in the Dhárwár District.

| | Rs. |
|-----------------------------------|-------|
| Maintenance and repairs | 2,522 |
| Supervision of water distribution | 634 |
| | <hr/> |
| Total | 3,156 |

The revenue and area irrigated under the Dharma and Naregal Canals are not given separately by the Revenue Authorities.

WORK DONE BY THE SUPERINTENDING ENGINEER ON SPECIAL DUTY.

This was the second year of the operation of the Special Duty Division established temporarily for the preparation of a programme of plans and estimates for famine works comprising "Tanks", works of the nature of "Land improvement", such as "Terracing sloping ground", "Field Embankments" and "Levelling ground cut up by numerous Ravines."

The operations during the year were carried out on a very large scale; six Sub-Divisions, each in charge of an officer, were constituted.

Programmes for practically the whole of the Deccan were finally completed and the districts vacated. Good progress was also made in the two Khándesh Districts. The three districts of Gujarát were commenced at the end of the year and in a short time the whole of the staff will be concentrated in Gujarát.

Projects for 412 lacs of rupees were submitted to Government and for a further sum of 299 lacs of rupees have been received in the Head Office and are being worked up, making a grand total of Rs. 711 lacs.

In addition to the above, a number of projects were partially completed or were under survey by the Sub-Divisional Officers.

WORK DONE BY THE SUPERINTENDING ENGINEER ON SPECIAL DUTY (PROTECTIVE WORKS).

The special surveys for Protective Irrigation works in the Bombay-Deccan were continued during the year. The investigations that were carried out were mainly in connection with projects left unfinished in the previous year.

The Gokák Canal Project submitted in the previous year was returned by the Government of India for certain alterations in the alignment.

The principal projects investigated were the Mula, the Kukadi Left Bank Canal, the Ghatprabha Right Bank Canal and the possibility of a large Godaveri Left Bank Canal.

Preliminary investigations were completed for the Krishna and the Kadwa projects.

The following is a brief account of the progress of the surveys during the year :—

Contours were run for the Palkhed Tank to ascertain the volume obtainable: this was found to be about 9,000 million cubic feet. A canal contour 88 miles in length was surveyed on the left bank of the river, and was found to command about 230,000 acres. The survey showed that all the water available could be utilised in British territory. The Godaveri Left Bank Canal. Kadwa Project.

Kukadi L. B. Canal Project.

The survey was directed to ascertain whether the Ghod River supply could be combined with the Kukadi to supply the famine area of Sholapur.

The low-level rising contour, started from Kem in the previous year, was continued and completed up to the Kukadi River. A canal line was also aligned from that river up to the Ghod River. Three more contours were run for the Nirgudsar Tank on the latter river, and an alternative dam site was examined at Sakora, for which contours have been run to ascertain the storage available.

The surveys were difficult and extensive, but indicate that the Ghod water can be made available for the famine districts.

Krishna Project.

Investigations were completed for the dam site at Dhom at the head of the Krishna River. Further survey confirmed the conclusions that the Krishna waters cannot be delivered on to Bijapur by gravity.

Gokak Canal Project.

Detailed survey and estimates have been made for the first 23 miles of the canal for improvements in the alignment as suggested by the Government of India.

Ghatprabha R. B. Canal Project.

Preliminary surveys for a right bank canal taking off direct from the Daddi Tank have been completed, and the information obtained shows that the scheme is a very promising one and likely to command nearly 800,000 acres.

Ghatprabha Storage at Daddi.

The Daddi Tank, which is to serve both the Gokak and the Ghatprabha Right Bank Canals, has been completely surveyed for a storage of 45,000 million cubic feet. The maximum height of the masonry dam will be about 129 feet above the bottom of the foundations, which are satisfactory.

Mula Project.

For the Mula project the line of canal was surveyed, the head works and upper length of canal having been determined previously.

Rain and River Gauges.

No new gauges were fixed during the year. The existing gauges were maintained, and arrangements are being made to hand over this work to the Executive Engineers of the districts in which the gauges are situated.

Well Observations, etc.

The well observations along the proposed canal alignments have been continued. No new wells were selected for observation during the year. Orders have since been received to stop this work, except on projects sanctioned.

This was the sixth year of the Special Duty Surveys, and the expenditure of the year was :—

| | | | | | | Rs. |
|-----------------|-----|-----|-----|-----|-------|----------|
| Works | ... | ... | ... | ... | ... | 45,646 |
| Establishment | ... | ... | ... | ... | ... | 78,968 |
| Tools and Plant | ... | ... | ... | ... | ... | 6,271 |
| | | | | | Total | 1,30,885 |

SIND.

Character of the Inundation, 1907.

The inundation was a very poor one, being characterized by a late rise and an early fall.

Up to about the 20th June the supply was favourable, but the river then fell and remained at a low level throughout July when water was required for rice transplantation. It rose steadily during August, but did not attain the fair irrigating level of 17 feet on the Kotri gauge until the middle of that month, and fell below it on the 2nd of September. Compared with other years the levels are as follows :—

| Gauges— | | | | | | Average for 10 years including 1906. | 1906. | 1907. |
|-------------------------|-----|-----|-----|-----|-----|--------------------------------------|-------|-------|
| | | | | | | Days. | Days. | Days. |
| Bukkur 10 feet and over | ... | ... | ... | ... | ... | 104 | 128 | 40 |
| Do. 13 do. | ... | ... | ... | ... | ... | 44 | 84 | 11 |
| Kotri 14 do. | ... | ... | ... | ... | ... | 98 | 142 | 91 |
| Do. 17 do. | ... | ... | ... | ... | ... | 48 | 85 | 20 |

The inundation, however, was far from being so unfavourable as indicated by the Bukkur gauge, because, owing to local changes of the Indus, the readings of the Bukkur gauge were about two feet less than might have been expected from the observed discharges and the readings of the other gauges.

The rainfall during the year was good and had beneficial effects on the whole. It amounted to 7.15 inches, as compared with 5.33 inches in the previous year and an average of 4.30 inches for the last ten years.

INDUS RIGHT BANK DIVISION.

This canal worked satisfactorily throughout the inundation. The works provided for in Mahiwah the estimate have been completed, and a revised estimate for improving the distribution and giving greater facilities for communication is now under consideration of Government. The canal continues to work satisfactorily.

The improvements to this canal estimated to cost about 1½ lakhs have been completed without any excess over the estimate. It worked very satisfactorily considering the poor nature of the inundation.

This canal has once more fallen upon evil days, as the river has cut into the feeder channel, which previously gave such an excellent supply, and, owing to the erosion, much silt and brushwood was carried into the canal. An attempt was made in May to remove a silt deposit in a length of about 1,200 feet at the mouth by means of the dredger Mudlark, but the dredger could not remove the clayey deposit. The first rush of water into the canal, however, removed this silt in a few hours. The Executive Engineer reports that at two places in the 11th mile the canal has deepened its channel by scour, while the width has been decreased by heavy silt deposits at the sides. The supply throughout the season was very poor and never reached full supply level. Rotation was freely resorted to in order to distribute the water fairly amongst the different branches. The sum of about Rs. 10,700 was spent on constructing masonry Kurria heads in order to improve the distribution of the water.

This very successful canal gave an excellent supply throughout the season in spite of the poor inundation.

The construction of the Choi branch and the new head regulator for the main canal was completed with the exception of the distributaries and the new head regulator for the main canal was commenced. On the whole, the canal worked very well, but the extra supply had to be curtailed owing to the injury by scour, which had been caused in previous years, by passing down more water to the injury by adapted to carry. A more equitable distribution of the water in the lower reaches of the canal is by reducing the sizes of some of the Kurria heads, and the tail portion received a late supply for rabi.

Two small distributaries costing about Rs. 3,500 each were completed and seven others were commenced, the object of these is to regulate the supply and check waste. The canal worked well throughout the inundation. The project for improving this canal has been kept in abeyance, as it will probably be included in the proposed Right Bank Canal System.

The Ghár mouth was not opened until the 14th June, owing to the new road bridge in the 10th mile not having been completed. It worked as well as could be expected considering the very low inundation. The Fordwah mouth was opened on the 1st June and worked very satisfactorily. The area cultivated on the Ghár will probably be considerably less than usual.

The widening of the New Akil mouth, estimated to cost Rs. 1,68,060, has now been completed. This canal and its branches worked remarkably well considering the low inundation, but the area cultivated is probably considerably less than usual. This is principally due to damage done by the heavy rain in June which flooded a large area (about 20 dehs) of fertile land and did a considerable amount of injury in other ways.

In the Shikárpur Canals District, the head regulators in the new loop bund for the Chiti and Garang Canals were practically completed at a cost of Rs. 8,390 each, and in the Karáchi District, four small regulators were constructed at a total cost of Rs. 7,913. The principal canals in the Karáchi District, i. e., the Pinyari, Bággar, Kalri, Laikpur, Satta Khanto and Kokawari worked satisfactorily considering the poor inundation, nevertheless the crops suffered extensively. In the Right Bank Division, about one-tenth only of the cultivation is by lift; whereas, for the Left Bank, the proportion is about one-third, consequently the loss due to a poor inundation is greater in the Right than in the Left Bank Division.

The progress on the large Ghouspur Loop to the north of the Begari was not satisfactory owing to scarcity of labour. For the same reason, the loop from mile 5/4 to 12/4 of the Begari Bund was not completed, and erosion by the river being more rapid than was expected, the front bund was carried away and the flood water passed through the incomplete new loop. This occurred on the 19th of August, but as the river fell, the inundation being a very bad one, no serious damage was done. It is estimated that the revenue which will be derived from the flooded land will considerably exceed the loss due to the destruction of kharif crops. After the inundation arrangements were made to complete this work and to increase the height by two feet, also to construct a loop from 4/3 to 6. The progress on these works and also on the construction of a new loop (Abad Loop) from mile 19/6 to 22/3 was satisfactory.

The expenditure during the year on the above four loops was about Rs. 2,67,000.

The works consisted of raising and strengthening and ordinary repairs, and there was only one small breach.

For the proposed Right Bank Canal, three survey parties were employed before the inundation and eight parties from November to March. Surveys for the proposed Kalat Canal and for re-modelling the Begári Canal were also in progress.

Plantations. Nurseries were maintained and plantation work was carried on with satisfactory results especially in the Begári Canals District.

INDUS LEFT BANK DIVISION.

The Eastern Nára System.

The Eastern Nára System comprises the Nára River and the Mithrao, Heran, Khipra, Thar and Hiral Canals, which are all perennial, excepting the Khipra and the Heran. The annual cultivation is above 340,000 acres, of which 80 per cent. is by flow irrigation.

The Nára.

The Nára commands 275,500 acres of culturable land. The cultivation during the year was about 35,000 acres against last year's abnormal area 147,985 acres, which was mainly due to floods, as the average for the last 10 years is 57,577 acres. The Nára suffered much from insufficiency of water owing to a very low inundation, and to a large number of snags in its bed and sand banks near its mouth. The work of removing these snags and sand banks was in progress during the year under report. The Nára was maintained at a cost of Rs. 53,140 of which Rs. 29,999 were spent on raising and strengthening the Rata Bund.

Mithrao Canal.

The Mithrao Canal and its branches were maintained at a cost of Rs. 36,212 against Rs. 23,000 last year. The work of deepening the remaining $2\frac{1}{2}$ feet of the new mouth referred to in last year's report was not carried out, but groynes were constructed which, it is hoped, will have a good result. The cultivation on this canal was about 97,500 acres against last year's 143,262 and the average of the preceding 10 years which was 154,031. The shortage in cultivation is due to deficiency of water coming down the Nára. There was deficiency of water in the rabi season also which necessitated ~~work~~ between the Jamráo and Mithrao.

Hiral Canal.

The canal was opened on 16th May ~~and head works on~~ 15th August. It commands 38,300 acres ~~of culturable area.~~ The area under cultivation this year was about 13,934 acres against ~~last year's area of 22,758 acres and 14,000 acres estimated to be cultivated annually according to the forecast statement.~~ The cultivation in the first three years' working of the canal, i. e., for 1903-1904, 1904-1905 and 1905-1906 was 23,667, 31,438 and 36,156 acres, respectively. The decrease in this year's cultivation is due to deficiency of water-supply.

The canal and its branches were maintained in good order at a cost of Rs. 5,008.

An area of 220 acres was allotted during the year in extension of existing holdings.

Other branches of the Eastern Nára System.

The cultivation on the Heran, Thar and Khipra Canals was about 1,620, 47,400 and 4,290 acres as against 2,523, 58,228 and 7,926 acres of the previous year and 2,324, 59,702 and 4,878 acres, the average of the last 10 years. The Thar Canal did not work satisfactorily on account of insufficiency of water and consequently the area of cultivation was very small and the crops bad. The Khipra too did not get a sufficient supply.

Jamráo Canal.

The capital expenditure was Rs. 38,466, mainly incurred in raising the banks of the Jam. Sahib Minor, constructing a record room and Telegraph Office at Mirpurkhás, improving the 2nd class chowkies at Mirpurkhás, 84th Mile Main Canal, 32nd and 42nd miles West Branch, and in constructing clerks' quarters at all the bungalows in the southern part of the District.

The canal and its minors were maintained in good order at a cost of Rs. 1,56,145.

The conditions at the Head works are satisfactory. The groynes in the first 10 miles have been maintained in good order and continue to act satisfactorily. The canal was not specially closed for repairs this year, but during the frequent rotations with the Mithrao, due to the deficiency of water in the Nára, and during the closure of the Nára Supply Channel for clearance in the Nára, all masonry works were inspected and necessary repairs carried out. Certain minors on which there is a great deal of lift irrigation were cleared this year as the fluctuation of the water-supply due to closures for rotation caused them to silt to a considerable extent.

The area cultivated during the year under report was about 217,600 acres, as compared with last year's area of 251,004 acres and 228,564 acres the average of the past 8 years. This large decrease was entirely in the area under rabi and was due to deficiency of water.

No new colonists were imported from the Punjáb. An area of 2,261 acres was, however, given to relatives of Punjábis already settled on the canal, who had come to Sind in the hope of receiving grants. Besides this an allotment of 13,216 acres was made during the year, of which 4,503 acres were given in extension of existing holdings, 2,698 acres to zemindárs specially recommended, 1,350 acres to junior Talpurs, 1,557 acres to Military Pensioners and 1,108 acres to other colonists.

Dad Canal.

Owing to the river remaining steady at its mouth and to excellent supply from its new feeder, the Dad Canal worked well during the year under report. On account of the low inundation the water-supply in the canal was distributed by rotation towards the end of the abkalani, and this did immense good to the crops, but the necessity of a permanent head is much felt, as stated in last year's report. Owing to the canal working favourably, the cultivation is gradually increasing and the project anticipations may be realised. The Dhand,

through which the feeder takes its supply, is silting slowly, but there need be no anxiety for the next few years.

The capital expenditure of the year amounted to Rs. 15,666 and was incurred on constructing cross-over bridges on the Herbert, Bader, and Alliganj wahs, excavating distributaries to Jameswah and Pritamwah, and on drainage channel No. 1, and Karia heads.

An area of 7,173 acres was allotted; of this 5,646 acres were given to Sindhi zemindárs specially recommended, 1,171 acres in extension of present holdings, and 356 acres in satisfaction of barani claims.

This canal has been under operation for the last five years and has worked satisfactorily. Nasrat Canal.
The supply was not very good, but the crops were brought to maturity by rotation in September 1907. Nearly all the land to be cultivated on this canal has been given out, and the cultivation on it has been increasing every year, though the cultivation, during the year under report, is less than the last year's by about 50,000 acres, owing to the low inundation and to the erosion at the head of its feeder the Lundi Dhand. This fluctuation in cultivation and in the working of the canal must continue till the Rohri-Hyderabad Canal gives it a permanent head. A few breaches occurred, but were quickly closed.

The capital expenditure of the year which amounted to Rs. 36,433 was incurred on (1) converting a bridge into a regulator in mile 41 on the road from Hyderabad to Rohri, (2) a regulator in mile 10 of Amurji, (3) a combined bridge and regulator in mile 7 of Chakarwah, (4) constructing a road bridge over the Nasrat in mile 14, (5) inspection chowkies with out-houses at Kandiáro, Lakha and Halani, (6) a baulkshed for Chakarwah head regulator, (7) Chakarwah extension and (8) Karia head regulators.

An area of 11,292 acres was given out during the year, of which 5,901 acres were given to Sindhi zemindárs specially recommended, 4,703 acres in extension of holdings, 462 acres to junior Talpurs, 168 acres to Military Pensioners, and 58 acres in satisfaction of barani claims.

The capital expenditure on the Fuleli amounted to Rs. 4,039 and was incurred on constructing karia heads on the Gaja Canal Extension. The Gaja Extension with its branches worked satisfactorily, the cultivation on it during 1903-1907 being 8,330 acres and the revenue Rs. 17,031. The figures for 1907-1908 are not available but it is anticipated that they will be a little less than those of 1906-1907 as the inundation was poor. Fuleli Canal.

The Fuleli and its branches were maintained in good order at a cost of Rs. 78,817.

A sum of Rs. 12,000 was spent on the construction of five subordinates' chowkies, of which three are completed and two in progress.

The cultivation on the Fuleli was about 390,000 acres against last year's area of 417,182 and 379,808 acres, the average of the preceding 10 years. Large areas of land are lying waste in the Tando Bago and Badin Tálukas for want of water, which cannot be cultivated, unless the supply in the Fuleli is increased. The proposed Rohri-Hyderabad Canal will assist cultivation on the Fuleli by relieving it of a large portion of the area now under it, which will allow the whole of its supply to be used for the southern portion.

This canal was opened on 3rd June and flowed throughout the inundation season with a sufficient supply. It worked satisfactorily with the exception of a small area at its head where the land is high. Hasanali Canal.

A new head regulator was commenced during the year, on which Rs. 10,000 was expended against the estimate of Rs. 22,963.

All the canals in this district worked fairly well, but owing to the low-level of water in the river the crops on some of the canals withered. A few showers of rain which fell in August only benefited the cultivation to a small extent. Canals in the Central Hyderabad Canals District.

The principal canals under this head are the Naulakhi, Mehrab, Dambro, Ren, Gharo Mahmudo, Kari Shumali and Nasir, all of which worked well. Works for which only Revenue Accounts are kept.

As mentioned last year, measures were adopted to prevent flooding on the Renwah around Sakrand.

There was strong erosion opposite the 4th mile of the Renwah, and to avoid flooding of the country in case the river cuts its banks, it was proposed to construct a loop bund from mile 3 to 6 at a cost of Rs. 6,984. This work was sanctioned and commenced, an expenditure of Rs. 1,211 being incurred during the year.

Owing to the river cutting into the Naulakhi Canal at its 8th mile and to the low inundation, this canal did not work well during the year. An estimate for cutting a diversion round the eroded length so as to insure a good supply in 1908-1909 was submitted and sanctioned, and the work was commenced in March.

The detailed survey of the proposed canal from Rohri to Hyderabad, which was in progress last year, was completed during the year and the work of preparing the detailed plans and estimates is in progress. Surveys-

The preliminary survey in connection with the Eastern Nára Project which was referred to last year, was completed at a total cost of Rs. 7,341, the expenditure during the year being Rs. 6,067. The detailed survey was also taken in hand and a sum of Rs. 7,709 was expended on it during the year. The work is in progress.

River Bunds.

As mentioned above, a loop bund from mile 3 to 6 of the Renwah was in progress. In the Fuleli Canals District as the river continued steadily eroding its left bank near Katiar village, it was found necessary to construct a loop bund from mile 4/1 to 6/7. The work, which is estimated to cost about Rs. 1,25,000, is in progress.

Plantations.

Existing plantations on canals have been maintained and extended. The trees planted last year on the canal berms of the Jamrao have not done as well, as was expected, as many of them were flooded. These have been replaced by new ones.

INDUS RIVER COMMISSION.

The principal works carried out during the year were under "43.—Irrigation Minor Works and Navigation—Agricultural Works—Works for which neither Capital nor Revenue Accounts are kept."

Works.

All surveys carried out under the supervision of the Superintending Engineer, Indus River Commission, are classed under the head mentioned above.

During the year, the usual topographical surveys were made, aggregating about 416 miles in length.

The river surveys comprised nearly the whole length from the northern boundary of Sind to Sukkur, a portion near the Ghár Canal, where a great deal of erosion has taken place recently, then the stretch from Lundiwah down to Purañero and finally most of the length from Jherruck to the bifurcation. In addition to the above topographical work, about 10 miles of hydrographical survey was done at the bifurcation of the river.

The survey of the Ghudu and Khariri Dhunds in the extreme north was made again.

It is important to watch the changes taking place in these feeders to the Mahiwah and other Government canals. They lie beyond the boundary of the Province of Sind, and timely arrangements must be made for supply in case of silting up.

Khairpur Boundary Pillars.

The usual inspection of the Khairpur boundary pillars was carried out during the season.

The borings for the Sukkur Barrage.

A very large number of holes were bored in the river bed, and the rock level at each recorded.

It is now apparent that the deep rocky gorge between Bukkur and Sukkur becomes comparatively shallow on the line 1,200 feet above the original section. The lowest observed rock level on the former is R. L. 134 and on the latter R. L. 81.

The investigations are not yet sufficiently complete for so large a work as the Barrage and they must be continued in the next year.

Gauges at the Hyderi and the Uchito mouths.

These gauges are being read daily at high and low tides. A hydrograph showing these and the Jerruck and Kotri gauges has been prepared. Two self-recording tide gauges were fixed at the Chowgazo and Uchito mouths in the month of May 1908 but the instruments are far too delicate for work in exposed positions.

The Delta Section Lines.

The levels for these lines have been very carefully checked by making a complete circuit of levels from G. T. S. Bench Mark at Tatta to G. T. S. Bench Mark at Sujáwal. It has been decided to have three section lines; of these, A. and B. are now complete and the position for C. has been fixed.

Discharges of the Indus.

The discharges were observed regularly at Sukkur and Kotri throughout the year and also at Dera Ghazi Khan during the cold season. The maximum discharge measured at Sukkur during the year was 425,289 cusecs on the 10th August 1907, when the mean velocity was 8.58 feet per second and the Bukkur gauge read 12.1 feet. But the highest reading on Bukkur gauge was 13.7 on the 20th August 1907, and the estimated discharge on that day was about 565,000 cusecs.

The minimum discharge measured at Sukkur for the year was 26,632 cusecs on the 24th March 1908, when the mean velocity was 1.72 feet per second and the Bukkur gauge read -1.7 feet. The lowest Bukkur gauge reading for the year was -2.0 on the 30th March 1908. The comparison of the discharges of the Indus at Sukkur during the Abkalani months, June to September, for the years 1904-1905 to 1907-1908 is as under:—

| Months. | | 1904-1905. | 1905-1906. | 1906-1907. | 1907-1908. |
|--|-----|------------|------------|------------|------------|
| | | Cusecs. | Cusecs. | Cusecs. | Cusecs. |
| June | ... | 8,465,480 | 11,845,000 | 7,452,000 | 7,231,500 |
| July | ... | 10,785,958 | 13,227,000 | 12,955,000 | 6,906,353 |
| August | ... | 13,710,915 | 10,467,000 | 16,544,000 | 11,633,300 |
| September | ... | 5,044,924 | 8,143,000 | 12,625,000 | 5,107,000 |
| Total | | 37,957,227 | 43,782,000 | 49,576,000 | 30,878,153 |
| Average discharge | ... | 311,125 | 358,869 | 406,360 | 258,100 |
| Maximum do. measured | ... | 542,739 | 530,842 | 616,580 | 425,289 |
| Minimum do. do. | ... | 96,178 | 180,000 | 204,000 | 139,000 |
| Minimum discharge measured in the year | ... | 27,751 | 22,539 | 32,951 | 26,632 |

Note.—These figures represent the sum of the daily discharges in cusecs of the river and to arrive at the total quantity of water passing Sukkur, the total must be multiplied by 86,400 representing the number of seconds in a day.

Silt experiments, sand wave observations and scientific work (general) have been continued and the observations will be published in the records of the Indus River Commission for 1906 and 1907. Silt experiments, &c.

The estimated cost of the works sanctioned during 1907-1908 by the Indus River Commission in each district under these classifications is given below:— Extensions and Improvements, and Special Repairs.

| District. | Indus Right Bank Division. | | | Extensions and Improvements. | Special Repairs. |
|--|----------------------------|-----|-----|------------------------------|------------------|
| | | | | Rs. | Rs. |
| Begari Canals | ... | ... | ... | 989 | 151 |
| Shikarpur Canals | ... | ... | ... | 81,261 | 1,57,351 |
| Ghar Canals | ... | ... | ... | 3,116 | ... |
| Western Nara | ... | ... | ... | 25,140 | 6,193 |
| Karachi Canals | ... | ... | ... | 45,648 | 2,554 |
| Indus Left Bank Division. | | | | | |
| Northern Hyderabad Canals | ... | ... | ... | 967 | ... |
| Central Hyderabad Canals | ... | ... | ... | ... | 6,984 |
| Fuleli Canals | ... | ... | ... | 27,078 | 89,920 |
| Indus River Commission. | | | | | |
| Works under the direct control of the Indus River Commission | ... | ... | ... | 2,179 | ... |
| Total | | | | 1,86,378 | 2,63,153 |

The total expenditure under this head on the several works under the direct control of the Indus River Commission was Rs. 11,077, of which Rs. 1,835 was expended on the river gauge establishment at Sukkur, Kotri, Jerruck, Khairabad (Punjab) and the Delta. Maintenance and Repairs.

Snags, trees and other obstructions to navigation in the main channel of the river were removed. The Uchito has now become navigable much to the benefit of country boatmen for getting their cargoes of forest and other produce to Keti Bunder direct.

The following is the summary of the expenditure of the year:—

| | Rs. |
|-----------------|--------|
| Works | 29,777 |
| Repairs | 11,077 |
| Establishment | 84,979 |
| Tools and Plant | 20,058 |

The inundation was a low one, and the river discharge was less than in the previous three years. Though the depth for the maximum discharge measured was only 12.1 feet on the Bukkur gauge, the velocity recorded is 8.58 feet per second, while in 1906, the velocity was 8.43 feet per second with a depth on the gauge of 16.4 feet. This high velocity is probably due to a shortening of the river, between Sukkur and the Ghar Canal, by nine miles. The cut-off commenced in 1905-1906, but was very pronounced in the two subsequent years. General.

The fair irrigating level, viz., 13 feet on Bukkur gauge, occurred for 11 days only in 1907, while it was 84 days in 1906, 86 days in 1905 and 40 days in 1904.

The cold weather low discharge level of the river was also extraordinarily low, viz., minus 2.0 on Bukkur gauge against plus 1.2, plus 0.5 and minus 0.6 in the three previous years, but the volume was considerable, the minimum being 26,632 cusecs.

The most serious erosion by the river took place north of Sukkur at Sarfu, at 11 miles on Sukkur-Begari Bund, at 6½ miles on this bund, and also at 2 miles on the Kasimpur bund; at these places the bunds were eroded.

No other breaches occurred to bunds but there was considerable erosion at the Baghar Uchito bunds, miles 9 to 10.

The loops still under construction on 31st March 1908 were the Ghaunspur loop, Abad loop, 1907 loop of the Sukkur-Begari Bund and the Katiar loop of the Hajipur bund.

The new suction dredge was to be fitted with cutters to enable it to work in clayey sand. The cutters were imported from England but it was not possible to fix them in position during this year, as they arrived in March 1908.

Irrigation Revenue.

The revenue credited to this head falls under two categories, *viz.*—(1) the direct receipts of the Irrigation Department, and (2) the irrigation share of the land revenue assessed with reference to the supply of water from canals, tanks, dams and other sources created or maintained by the Public Works Department. The works are also divided into three classes: the first includes entirely new works and works restored or extensively improved for which capital and revenue accounts are kept; the second includes old works which are maintained by the Department and for which only revenue accounts are kept; and the third includes agricultural works for which neither capital nor revenue accounts are kept. The direct receipts on account of works for which capital and revenue accounts are kept were as follows:—

Half Imperial and half Provincial.

| | Rs. |
|------------------------------|-----------|
| (1) Productive Public Works— | |
| (a) Sind | 1,91,548 |
| (b) Deccan and Gujarát | 4,62,388 |
| (2) Protective Public Works— | |
| (a) Deccan and Gujarát | 4,71,750 |
| (3) Minor Irrigation Works— | |
| (a) Sind | 99,150 |
| (b) Deccan and Gujarát | 1,59,700 |
| Total | 13,75,536 |

The corresponding receipts for 1906-1907 were Rs. 11,34,166. The irrigation share of land revenue on account of works for which capital and revenue accounts are kept was as follows:—

Half Imperial and half Provincial.

| | Rs. |
|------------------------------|-----------|
| (1) Productive Public Works— | |
| (a) Sind | 23,14,288 |
| (b) Deccan and Gujarát | 4,031 |
| (2) Minor Irrigation Works— | |
| (a) Sind | 11,33,606 |
| (b) Deccan and Gujarát | 6,883 |
| Total | 34,58,898 |

The following table shows the financial position at the close of the year of irrigation works of all classes for which capital and revenue accounts are kept:—

| | Capital outlay in the year. | Capital outlay up to the end of the year. | Working expenses during the year. | Net revenue during the year, direct and indirect. |
|----------------------------|-----------------------------|---|-----------------------------------|---|
| | Rs. | Rs. | Rs. | Rs. |
| Productive Works | 3,46,048 | 3,74,93,283 | 11,65,231 | 18,06,974 |
| Protective Works | 11,40,235 | 1,18,42,749 | 1,16,492 | 3,55,258 |
| Minor Works and Navigation | 88,372 | 1,40,68,485 | 4,45,005 | 9,45,424 |
| Total | 15,74,655 | 6,34,04,517 | 17,26,778 | 31,07,656 |

The revenue and expenditure on account of works for which only revenue accounts are kept were as follows:—

| | Works in Sind. | Works in the Deccan and Gujarát. | Total. |
|----------------------------|----------------|----------------------------------|-----------|
| | Rs. | Rs. | Rs. |
| Gross Revenue ... { Direct | 88,415 | 6,595 | 95,010 |
| { Indirect | 20,88,937 | 5,01,339 | 25,90,276 |
| Total | 21,77,352 | 5,07,934 | 26,85,286 |
| Working Expenses | 8,44,601 | 4,01,568 | 12,46,169 |
| Net Revenue | 13,32,751 | 1,06,366 | 14,39,117 |

The revenue and expenditure in respect of the works for which neither capital nor revenue accounts are kept were as follows :—

| | | | | | Works in Sind. | Works in the Deccan and Gujarát. | Total. |
|----------------------|---|-----------------|-----|-----|----------------|----------------------------------|-----------|
| | | | | | Rs. | Rs. | Rs. |
| Gross Revenue ... | { | Direct | ... | ... | 18,989 | 3,250 | 20,219 |
| | | Indirect | ... | ... | 9,56,019 | | 9,56,019 |
| Total ... | | | | | 9,72,988 | 3,250 | 9,76,238 |
| Working Expenses ... | | ... | ... | ... | 14,48,242 | 1,18,483 | 15,66,725 |
| Net Revenue ... | | | | | -4,70,254 | -1,10,233 | -5,80,487 |

* Distributary lately sanctioned and completed.
 † As ascertained by actual Survey.
 ‡ An additional storage of 214 million cubic feet was obtained by raising the weir temporarily, the full supply level being at 1.74 feet above crest of the present weir.
 § Height of bank, 1.72 miles channel constructed by this Department in 1901-1902. Left bank, 1.56 miles old Irrigation Channel.
 ¶ The waste weir having been raised to 2 feet below the level sanctioned in Government Resolution No W 1, 2337, dated the 18th September 1905, the capacity of the tank and area of the surface at full supply level have been increased. As in former years the loss of capacity due to silting has not been taken into account the figures given are greater than this.
 (a) Figures given in Statement I-A.
 (b) Above lowest foundation.
 (c) Above lowest point in river bed.
 (d) Storage available after deducting 608 maximum cubic feet not used on account of the Poona water-supply.

A.
Bombay Presidency, excluding Sind, for 1907-1908.

(c) Estimated rainfall in the catchment.
 (d) Information supplied in Statement I-A, the tank being only a feeder.
 (e) The tank supplies the Pákhed, Ozar Támbat and Wádálí Canals and their distributaries as noted in Statement I-A.
 (f) Exclusive of 29 miles of Gondavali Canals.
 (g) Includes 38½ miles of branch canals.
 (h) Not yet constructed.

Note.—1—For lift irrigation half the ordinary rates are charged.
2—Double the ordinary rates are charged as penal rates for taking water without permission.
3—Leakage or percolation rates are the same as ordinary rates.

STATEMENT G.

Statement showing Areas and Water-rate Assessments during 1907-1908, according to the system of Classification adopted in fixing the Scale of Water-rates.

| No. | Name of Work. | IRRIGATION IN BLOCKS | | CLASS I.—PERENNIAL. | | CLASS II.—6 MONTHS. | | CLASS III.—4 MONTHS. | | CLASS IIIA.—SUPERIOR RABI CROPS. | | CLASS IV.—MONSOON DAY. | | CLASS V.—SPECIAL HOT WEATHER. | | MISCELLANEOUS. | | GRAND TOTAL. | |
|------------------------------------|---|----------------------|--------------|---------------------|--------------|---------------------|--------------|----------------------|--------------|----------------------------------|--------------|------------------------|--------------|-------------------------------|--------------|----------------|--------------|--------------|--------------|

Note.—The difference between the figures of total areas and assessments in this statement and those in Statements I—E to IV—E is due to difference in treatment of fractions in some cases, and in others to the fact that the figures in this statement are more or less hypothetical and are arrived at on the assumption that certain areas are assessed at certain rates.

* New Irrigation.

* Single Watering.

‡ Irrigated free of charge.—vide Government Resolution No. W. 1-1904, dated 29th July 1903.

† Exclusive of 1,804 acres of Mamul Bakiyat area on Lower Pánjhra River Works, and 2,527 on account of the area of irrigation in blocks on Nira Canal, Shetphal and Bhádálvádi Tanks under which steam cultivators are allowed to grow two crops without extra charge and are charged for the whole block whether irrigated or not.

‡ Exclusive of Rs. 6,352 on account of enhanced water-rates on old works of the Lower Pánjhra River works.

The average discharges of these canals were not observed, because the head portions of all of them were submerged under flood water. The tail portions were also partially submerged.

* 88 cusecs represent the flow into the Mancher Lake.
 † Number of days the Wahur discharged itself back into the river.

The high Δ is due to a large quantity of water running to waste into the sea.

The discharges of the Jamrao Canal are measured in its 12th mile. The high rabi Δ is partly due to 100,317 acres of cotton, a kharif crop being watered for a few months in the rabi season.

‡ The figures of area irrigated by the Mithrao and Thar include uncultivated areas.

STATEMENT II-E.

Statement showing Incidence of Working Expenses on Assessed Revenue on Canals in Sind during the year 1907-1908.
