DIVISION OF AGRICULTURAL ECONOMICS

UNIVERSITY FARM, ST. PAUL

CONTENTS

	Page
Introduction	3
The Minnesota Tax System.....	3
Sources of revenue	3
Method of assessment	5
Classified assessment law	6
Method of equalization	7
Plan of study and sources of data for an analysis of the Minnesota Assessment system.....	7
Method of districting	7
Source of data	9
Method of sampling	9
Relation between assessed and sale value of farms in the six districts.....	10
Significance of results	14
Causes of underassessment of high value farms.....	15
Analysis of assessments on the basis of value per acre.....	17
Significance of results	20
Comparison of pre-war and post-war conditions in Districts I and II....	22
Assessment of platted property.....	24
Source of material in sample.....	24
Analysis of assessments	24
Changes in the average assessment percentages for platted and unplatted real estate between 1914-15 and 1926-27.....	25
Tax delinquency as related to the tax burden in the counties of Minnesota....	27
Relative tax burdens in the counties.....	27
Tax delinquency in the counties of Minnesota.....	29
How can the tax delinquency situation be remedied?.....	33
Land classification	33
Concentration of settlements	34
A revised forest crop tax law.....	35
Summary and conclusions	36
Improved assessments	37
A better land policy.....	39
Need of a broad tax base.....	41

ILLUSTRATIONS

	Page
Fig. 1. Districts used in the study.....	8
2. Specimen scatter diagram showing grouping for the comparison of assessed values of farms with their sales values in District I.....	11
3. Scatter diagram showing ratios of assessed value to sale value when farms are grouped on the basis of the number of acres in the farm...	16
4. Specimen scatter diagram, District I, showing ratios of assessed to sale value per acre when farms are grouped according to value per acre	18
5. Taxes per \$1,000 taxable value in the townships of each county.....	27
6. Percentage of taxes uncollected January 1, 1929.....	29
