## P R E F A C E

The present study is an attempt to examine the salient features of Drought Prone Area Programme with a particular reference to Ahmednagar District. Since the literature available on the subject is very limited, we have attempted to review the developments that have taken place in this field mostly relying on sources such as circulars, records, correspondence, notes, pamphlets and reports published by the DPAP Executive Director, Ahmednagar District and Government of Maharashtra. While collecting the relevant data for this study I was greatly benefited by the discussions with the Implementing Officers and office staff of DPAP in Ahmednagar District. I express my sincere thanks for their help.

This work was undertaken under the guidance of Dr. G. R. Mulla. At the very outset I express my deep sense of gratitude to Dr. Mulla who was very sympathetic towards me in understanding my difficulties and gave me valuable suggestions in preparing this dissertation.

I am also very much grateful to Dr. A. K. Mitra for his helpful suggestions.

I record my gratitude to the authorities of the Gokhale Institute of Politics and Economics, Pune for giving

(ii)

me an opportunity to study the M.Phil. course under the University Grants Commission's Faculty Improvement Programme.

I also thank the staff of the Servants of India Society's Library for their assistance.

Last but not least I thank Shri S. K. Athale for his help in typing in a very short period.
