## PREFACE

This thesis, "Financial experience of Small companies in India (1950-52)", is the result of independent research commenced by me in 1953 for the degree of Doctor of Philosophy in Economics of the University of Poona. The study was almost complete in 1956 itself but due to certain unavoidable circumstances, it could not be submitted to the University earlier.

I am extremely grateful to Professor D.R.Gadgil, for the very valuable guidance that he has given. But for him this thesis might not have seen the light of the day.

My thanks are also <sup>due</sup> to the University of Poona for the financial assistance provided in the form of research stipend throughout the entire period of the study and to the Reserve Bank of India for supplying the Balance Sheets of companies.
