ACKNOWLEDGEMENTS

I consider myself extremely fortunate in having a person of the eminence of Prof. K. Sivaswamy Srikantan as my guide for this thesis. No words can fully express the benign manner in which he has guided me throughout the preparation of the thesis. With boundless patience he has gone through several versions of the thesis and given me precise suggestions. I feel immensely indebted to him.

I would like to thank the K.E.M. Hospital Research Centre, Pune, headed by the well known gynaecologist and pioneer of the Vadhu project, Dr. (Mrs.) B.J. Coyaji. To Dr. N.H. Kulkarni, the Project Director, whose encouragement and words of wisdom have been of great value to me, I would like to express my gratitude. My thanks are due to Dr. V.N. Rao for his cooperation.

The staff of the Gokhale Institute of Politics and Economics, Pune, particularly those of the Population Research Centre, have been kind and helpful in many ways. I thank them heartily.

I would like to sincerely thank Shri V.N. Inamdar and his associates for elegantly and diligently converting my manuscript into an impressively prepared thesis.

There are other well-wishers to whom I owe a lot, for their direct and indirect efforts to complete my thesis. I take this opportunity to acknowledge their assistance in this endeavour.
