ACKNOWLEDGEMENTS

Many people and many organizations in India as well as in Iran have helped me in many different ways.

First and foremost I wish to express my sincere thanks and gratitude to my thesis supervisor, Dr B.S.R.Rao, Reserve Bank of India Professor of Finance and Professor-in-Charge, Department of Economics, University of Poona.

I must also thank the Director and members of Staff of Gokhale Institute of Politics and Economics, especially those at the Institute's library and Computer Section for their kind co-operation and most sincere hospitality.

I am indebted to India and her people for bestowing upon me the great opportunity of higher education.

I am also indebted to my motherland, Iran, for deferred compulsory military training, especially during the holy defence of our country and for providing the most urgently required and hard-gained foreign exchange for our studies.

The financial support of the Indian Council for Social Sciences Research (ICSSR), New Delhi, and the University Grants Commission (UGC), New Delhi, for Computer processing of our data is gratefully acknowledged.

The financial and moral support of my elder brother, Mr Esrafil Ghanbari Maman, has always been a driving force behind all of my achievements throughout my life. May God bless him and his family.

Last but not the least, my wife Nahideh Aiazian Mavi, deserves special thanks for her tolerance and forbearance.

Hassan Ali Ghanbari Maman
