PREFACE

The present Thesis entitled **MARKETING OF ARECANUT IN MYSORE STATE** embodies an analysis of the marketing of arecanut, examining in detail, its various aspects in the major producing districts of Mysore State. Though the study is essentially on the marketing of one commodity, it also deals with the role and the working of the Regulated Markets. This is particularly important in the light of the various legislative measures introduced to improve the conditions of marketing of the agricultural produce in the primary whole-sale markets.

The present study was undertaken at the Gokhale Institute of Politics and Economics, Poona under the guidance of Prof. N. Rath. I would like to take this opportunity to express my deep sense of gratitude to Prof. N. Rath for his guidance and constant help and encouragement at all stages of this work. I am also indebted to the authorities of the Gokhale Institute of Politics and Economics, especially to Prof. V.M.Dandekar, the Director, for enabling me to carry out the study with a Research Assistantship.

I acknowledge with gratitude the help I received from many of my colleagues in the Institute and particularly from Shri M.P.Khare. My sincere thanks are due to Shri D.B.Sardesai for processing a good part of the data on

the computer and to Dr. S. Varadarajan for his help in preparing the charts and maps. I also acknowledge the help I received from the authorities and staff of the Servants of India Society Library.

The task of collecting the data involved my visiting the various Market Committees and meeting a number of persons connected with the markets. I am thankful to the staff of the various market committees and cooperative societies, authorities of the Regional Office of Arecanut and Species Development, Calicut, Kerala, and other official agencies, and to the traders and others for not only making the wealth of data available to me but also showing keen interest in the study.

I am also thankful to Shri N.G.Phadke for typing the thesis neatly.
