ACKNOWLEDGEMENTS

Professor (Mrs.) Kumudini Dandekar, Head of the Department of Demography, Gokhale Institute of Politics and Economics, Poona, was my Research Guide. In spite of her indisposition of health, she was guiding me even beyond the working hours of Institute. She had placed her entire personal library at my disposal. For all this guidance, help and encouragement, I remain ever grateful to her.

I had approached Mr. P. K. Vipradas of the Health Department, and a number of officials of the Revenue and Rural Development Departments, Government of Maharashtra for collecting the information needed by me. They all readily furnished the information available in their respective offices. Mr. G. Putta Ramaiah of the Central Water and Power Research Station, Government of India, helped me in the tracings of maps and graphs required in the present study. Further, I sought the help of Mr. V.N. Inamdar for typing the thesis. He kindly accepted the job and did it very nicely in a short time. I am indebted to all these persons for the co-operation.
