ACKNOWLEDGEMENTS

The present work on, LAND UTILIZATION AND CROPPING PATTERN IN MYSORE STATE - A POST INDEPENDENCE STUDY, was carried out at the Gokhale Institute of Politics and Economics, Poona-4, under the guidance of Professor N. Rath.

When I was merely living in the world of romanticism of research, Professor Rath, my research guide, by his incisive comments and suggestions made me realise the rigour and exacting standards of research. If I have succeeded at least partly to live up to his expectations, it is due to his constant encouragement and patient bearing with me at all stages.

I am thankful to the authorities of the Gokhale Institute of Politics and Economics, Poona-4 and to Professor V. M. Dandekar, in particular, for allowing me to undertake this study and also for providing me with all facilities including the computer.

I wish to express my gratitude to Shri S. N. Gadam, my colleague at the Institute, not only for the statistical advice, but also for the help rendered by him throughout my work.

This work could not have been completed but for the timely help of my friends at the Institute. I thank them all. In particular, I express my sincere thanks to Shri Y. S. Satyapriya and Dr. Ashok K. Mitra for ungrudgingly sharing the major burden of the work at the final stages of the thesis. I am also indebted to Dr. C.S.Gajarajan and Shri M. P. Khare for bearing the monotony of going through the draft.

Lastly, I thank Shri N. G. Phadke for typing the thesis neatly and to Shri R. S. Raibagi for the neat drawing of the maps and graphs.
